You're talking about two different skill sets.

Hans is talking about written copy - specifically,
copying on a mill (typewriter). Those who get
good at that skill set reach a point where they
really don't think about the incoming copy - it
just flows.

In some cases the op literally doesn't know the
content of the copy.

What you're experiencing is the beginnings of
conversational Morse Code. This is where you
understand the incoming Morse "directly", like
listening to someone talk.

Similar skill sets occur with sending.

--

Morse Code is much more than "an encoding scheme".

Now there is only one VoIP ham program left which is worth using:
Echolink.

Reason: You now have to register to use eQSO, but eQSO has vastly
inferior audio to Echolink. The friendly and trusting atmosphere has
vanished among eQSO operators, and that was in fact its one, redeeming
virtue. Now it has morphed into an inferior Echolink, and it is
simply not worth the effort required to register for it when one can
devote that effort to Echolink instead.

Goodbye, eQSO. You were fun while you lasted.

Walt, eQSO PC Client 3.00 Build 1 does indeed send the hard disk serial
number back to the server. Here is an Ethereal dump I have just made of
one of my packets to the server (best viewed with fixed pitch font):

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
0000 00 c0 49 e0 4b f2 00 11 11 be 8e ba 08 00 45 00 ..I.K...

When you activate Win doze XPee it sends details of several pieces of
your hardware to MS to build the activation code. Each time you re-start
XPee this code is checked to see if 'significant hardware changes' have
been made.
MS say this is their way of ensuring any XPee disk is only installed on
one PC, but if you don't go along with it you'll find that the XPee
set-up that _YOU_PAID_FOR_ becomes unusable after 90 days.

Frank:

A good reason to investigate linux, learn about it, become proficient in its use and gain freedom from microsofts control.

Linux is free... you can download .iso files, burn the OS disks and free yourself from microsofts control... or, simply pick up a copy at a software store near you, it is very cheap for the already prepared disks and manual.

John

Thanks John, I run my web server, email server, DNS and loads of other
stuff on a Red Hat Linux 8.0 platform, and I'm very impressed with its
stability and multi-tasking capabilities. The PC concerned is an ancient
P200 that comes nowhere near the minimum requirements for XPee, but
despite its workload, I've not even had to reboot it so far this year.

How did they "tie up" the repeater? Did they refuse to let others use
it?

Or would it have simply been silent without them?

A couple of observations:

First off, with a few exceptions, the subject matter of amateur radio
conversations isn't regulated or restricted by FCC. Unless you can
make a case that the conversations involved violated some provision
of Part 97 or the Communications Act, they're allowed.

Second, I hope no one, including you, ever gets seriously ill or has a loved one in perilous health. May we all live to very old ages with all our faculties intact, and go quietly and peacefully in our sleep when
the time comes.

But in reality, many if not most people have to deal with such health situations. While those conversations may be boring and depressing to *you*, those involved may find them a source of strength, support and comfort. Also information. Would you rather those hams go through such times without the support of fellow amateurs, whom they may have known for decades?

Third, a repeater's owners have the right to shut down a repeater if they don't like the way it is being used, or who is using it. But that didn't happen. Are you one of the repeater's owners, or an authorized control operator for it?

Fourth, almost all of the ham rigs I've seen have both a frequency control and an on-off switch. Use them!

Morse had become merely a licensing hurdle, Farnsworth a testing
scheme. Now if anyone bothers to learn Morse, it will be to use it.

> for decades?

One of the biggest reasons that some hams have a problem with those types of conversations is their *own personal* fear of their *own personal* mortality. And the oldsters with their discussions remind those fearful ones of that very mortality. And they do not like that.

One of the most gripping conversations I ever heard on the bands was one fellow talking to another. He was in the last stages of something or other. But he was wheezing and gurgling on the air. I was fearful that he was going to pass on right there in the middle of the QSO. Real funny stuff, that. Let's go make some hilarious jokes, eh? 8^(

Anyone who would turn off their repeater for *that* is a heartless bastard. The Karma buildup would be very bad - and deserved.

> Fourth, almost all of the ham rigs I've seen have both a frequency
> control and an on-off switch. Use them!

Finally! And good advice.

I do know that one thing that is much more annoying than old dudes talking about their ailments is people that try to control what other people can or can't say on the air.

A simply excellent response, Jim.

Hi

We are doing it here in Melbourne Australia as I speak.Tthe consensus amongst amateur TV operators here is that it is educational tv so it is ok to transmit.

I have sent a letter to the authorities here seeking clarification about the issues. Heopfully they will agree that it constitutes educational tv and so is ok to transmit. In the US specific permission has been given for ATV stations to transmit NASA TV. It certainly is interesting from a scientific and technological point of view.

There are some spots on 'phone where such conversations go on. 75
meters is
a common place for them. I've never encountered one on Morse Code even
though
I spend far more time using that mode than all the others put together.

Agreed - but they'd be within their rights as repeater owners. Then
again,
maybe the folks talking *were* the repeater owners.

> The Karma buildup would be very bad - and deserved.

Yup.

What you can't say is pretty well laid out in Part 97 and the
Communications
Act. The rest is pretty much open.

Of course there are folks everywhere who have a hard time gauging their
audience. For example, there are folks on the Internet who can't seem
to
learn to spell, use grammar or punctuation, or even post in the same
style as others in the particular forum. Some haven't even learned that
using all caps is the equivalent of SHOUTING.

And of course there are the folks who will tell you the same story of
their life over and over and over....and over again, even though
there's no point to it and it has nothing to do with the discussion
at hand...

> A simply excellent response, Jim.

Thanks!

People may not always agree with my opinions, but that's OK with me.

There were plenty of Code Tape Extra's out there who never worked a dit
in their lives.

b.b.:

Uhhh, we "code tape wizards" and "computer taught b*st*rds" are "out there" (more ways than one, I suppose), and if a code reader can't display it on the screen--we can probably live without those "words of wisdom."

Art Bell said, "CW is dead!" If Art Bell (even more trustworthy than Santa and the New York Times!) says it, Victoria, it is true!

People may not always agree with my opinions, but that's OK with me.

There were plenty of Code Tape Extra's out there who never worked a dit
in their lives.

Of course there were/are. Lots of folks never cared a lick if they actually
operated CW or not. And to them it was a hurdle to do 13 or 20.

But to those select few that actually enjoyed the mode it became a real pain
hearing about how hard it was to learn, how useless, how unnecessary, etc.

Now perhaps the debate will finally END. And those that like CW can
continue to enjoy it. And help those that want to learn it, learn it, and
also enjoy it. And use it and not have to put up with all the whinning any
longer.

No argument there. My point was that I take exception with the idea that
the HF bands are populated by the type.

Even 5wpm was an unnecessary hurdle to folks not interested in the
mode.

> But to those select few that actually enjoyed the mode it became a real pain

Why?

> Now perhaps the debate will finally END.

I hope so.

> And those that like CW can continue to enjoy it.

I certainly hope so.

Just one question; why must I have learned Morse Code for you to enjoy
CW use?

I have no problem with folks wanting to use CW. It just pisses me off
when they make claims of intentionally sending code so poorly that a
pimply-faced No-Code Tech with a code reader can't listen in.

Give it up Willy Weeper. "They" (a single guy) who said that is long since dead, but you keep writing jeremiads on a topic that no living soul remains to support.

And why is it that you continue to hijack my satirical character, Billy Beeper?

beep beep
de Hans, K0HB

(Apologies to Kurt Vonnegut)

To all external appearances, Farnsworth Corners, U.S.A., is bright, cheerful, and happy. However, in dark corners of the city lurk Godless Nocoders who seek to undermine the moral fabric of our mighty Nation.

In a dirty basement apartment, an underfed, seedy-looking old man wearing small, round spectacles and threadbare clothes, types furiously at a musty desk illumined only by a single, naked bulb. As the pages fly through his typewriter, an evil plan gradually emerges: a treacherous treatise which threatens the well-being of the upright citizens of Farnsworth Corners. The work is completed, and the old man leans back thoughtfully and smiles as he rubs the three-day stubble on his chin. The time has come for the Hammer of Leonard to strike!

Some weeks later, in another part of town, little Billy Beeper walks home from school. Suddenly he hears a voice right next to his ear.

"Psst! Hey, kid! Would you like to try my 2M HT? It's free!"

Billy's eyes open wide as he faces the stranger. An embroidered patch on the mans soiled jumpsuit reads "Codefree Charlie". "Gosh, no! N2EY told me never to touch a radio which didn't beep!"

"Aw, c'mon!" says the old man. "I only wanna be friends with you!"

"Well, I don't know," replies Billy. "I was told that FM was bad for you!"

"That's just what the grown-ups say to scare you!" says the drooling man.

"The truth is that they don't want you to try it 'cause it'll make you grow up faster and be able to smoke cigarettes and drink liquor just like them!"

Billy is hesitant, but suddenly a tall form looms before them and grabs the ruffian by the collar.

"Golly!" exclaims Billy. "It's Captain Code!"

Yes, Readers, it's Captain Code: faster than a Vibroplex Blue Racer, more powerful than an Alpha three-holer, able to leap tall pileups in a single bound.

"You should be ashamed of yourself, old man," says Captain Code to the hoodlum. "There are far better ways to earn money than to hoodwink innocent children into a life of codelessness. It's to the FCC for you!

"And as for you, young friend, take my advice and stay away from strangers, and believe nothing that they say. It's tragic, but until Godless Nocodism is abolished from the world, there will always be those who would like nothing better than to hurt you ."

"Gee, thanks, Captain Code!" says Billy. "I promise that I'll always listen to Mom and Dad, and I'll keep away from strangers with shacks on their belt!"

b.b.:

They are not "sending code so poorly that a pimply-faced No-Code Tech with a code reader..." can't read it, they are attempting to send so badly that a computer running software coded by one both CW and computer savvy has set up--I suspect they think themselves smarter than the computer... maybe... <grin>

Indeed, a very good programmer would inject "nuances" into the way the app translated his keyboard code to morse, making it virtually impossible for them to tell they were copying automaton generated code, at a very respectable speed! <grin>

I would think it would be a game, an enjoyable one...

I find Echolink is more interesting because all hams are there. Unlike eQSO has limited hams there.

For new eQSO, they did not mention they want to my ham license for them to process my registration. Echolink has mentioned on their website.

Sorry folks, but I simply had to cross-post this gem of
a posting from rec.radio.cb to the ham radio groups.
I can easily imagine some of the goofballs and kooks
I saw at a certain hamfest last week trying this on 75M
after reading this. *If you do guys, remember that a
good ole traditional METAL garbage can, like a trusty
galvanized Wheeling Mfgr Corp model, available at any
home depot for modest cost, would work FAR BETTER
than any of the Rubbermaid plastic model(s)* Also remember
that when you fart inside of a said can with the same propped
over your head down to your lower torso, the sounds produced
will be AMPLIFIED by a factor of twenty or so and you can
get a breath of 'fresh air' while you're at it.

GO FER IT BOYS !!!!!!!!!

57. N9OGL to comment on K1MAN RENEWAL

Newsgroup: rec.radio.amateur.misc

---
N9OGL IS WORKING ON A FILING TO COMMENT ON K1MAN RENEWAL

N9OGL is filing a comment to the Federal Communication Commission on
the renewal of K1MAN's license. N9OGL is filing the comment not for nor
against K1MAN but attends to raise some questions about the recent
petition for deny for NO2K1MAN and the recent NAL from the FCC to
K1MAN. The comments N9OGL is filing deals with Interference, pecuniary
Interest, and Broadcasting. Some of the questions N9OGL is asking the
FCC is "If K1MAN is interference is illegal (he begins in show on top
of on going Communications, then why hasn't W1AW ever been complained
about? It seems that amateur's are "picking on" his station, when in
fact there is documents that W1AW has done the same thing. N9OGL also
raises concerns over K1MAN pecuniary interest. Amateur Radio is a
non-commercial service, yet unlike other NON-COMMERCIAL services aren't
allowed to make any money, N9OGL want's to know the rational behind
that. noncommercial broadcast stations are allowed to make money to
sustain the station with contributions from listener, Public-Safety is
given funds from the State and the federal government through taxes,
which is used to by new radio's and other communications.
non-commercial often means in radio as a service that doesn't make a
profit but get aid to sustain the station. K1MAN may have been using
pecuniary interest "direct" but, at the same time W1AW which is owned
by the ARRL is doing it "indirectly" the FCC rules state a station
can't have any pecuniary interest direct or indirect. But when a
short-wave listener hears W1AW they will go to internet and look it up
and it will lead them to the ARRL website which sales all sort of good.
Finally N9OGL touches on K1MAN's information bulletin which amateur
believe is a broadcast because it is opinionated. N9OGL want's the FCC
to point out the rule that states an information bulletin cannot be
opinionated, and secondly how does that rule conform to Section 326 of
The Communication Act of 1934, and the MANY court cases that the
federal courts, and even the Supreme Court has stated that the FCC can
not have content-based rules. Because the vague rules and definitions
on information bulletins and broadcasting in the amateur bands can be,
and have been used by both amateurs, and The FCC to control the content
of amateur radio stations, in clear violation of section 326 and the
First Amendment.

The 'friendly and trusting atmosphere' has probably gone following abuse.
The particulars asked for during registration are name, address, call
sign and email. These are then verified in some way, probably by QRZ.COM
or similar before a password is issued.
This information is readily available so all an abuser needs is
verifiable particulars. The only problem I can see is that people who
are 'particulars withheld' may have difficulty with registration.

Lloyd:

My gawd man, K1MAN is a GOD! He cannot be judged as a mere mortal!

If he wasn't posing such a danger to the "arrl enterprises, inc." he would probably have a write up in Forbes Magazine.

His best trait is throwing some light on the arrl and perhaps awakening the brain dead to the fact arrl needs a severe "hand slapping" and restructuring.

However, I think the sorry state of things is that those who already have the gray matter are already pi$$ed at the con job, the others will never know.

Anyone out there that has a service manual for the TS-430 I would appreciate
it if you could
scan the schematic of the Final Unit [the one with the voltages in red] and
email it to me at
n5lbz@arrl.net Thanks

Stuart

Headline: Brain Dead Woman Gives Birth To Baby Girl

What is the big deal about this? Wogie Wiseman's brain dead mother gave birth to a brain dead son 49 years ago in kind of a "two for one" deal and nobody thought it newsworthy then.

Continue??? You were asked if you wanted him back, and I would gladly
return him to his rightful owner. You didn't reply.

Are you asking now? If so, do it plainly so that I do not mistake if
for just more Extra-class "stuff."

With the mostest kindest regards, Billy Beeper

Nice try, Lardass..as usual you fucked it up. It isn't even
remotely *your* website.
The only thing you've been up to is trying to find another job
after getting fired from your pizza delivery "career."

Thanks Brad

By the way have TV Gladesville been showing any of the Space Shuttel coverage live? Last we night we had vision of Steve Robinson fixing the Space Shuttle - it was quite amazing to watch. Previously we have shown the launch of the Space Shuttle and also interviews with the crew as well as some other space walks.

Mind you enjoy it while you can because I suspect that there is probably not going to be a space shuttle mission for a while after this one, possibly not ever if they decide to scrap the program. I'm still amazed at how NASA can send a craft like this up which, from a tile point of view, appears to be quite fragile.

cheers Peter VK3PB

John, that discussion took place in here a few years ago, my
remarking on what I'd seen, lent my Icom HF receiver for an
air test, on an ADAPTIVE decoder for morse. It was written
by a professional programmer as an intellectual exercise for
his own benefit, just wondering if it could be done. The
ADAPTIVE part was in automatically adjusting to the differences
in weighting of dits and dahs, their combination resulting in
a word rate equivalent. The ADAPTIVE part took most of the
source code...the translation of morse characters to ASCII for
immediate display was a small, small part of the source, just
a small look-up table in effect. It was done on a medium-old
clock rate PC but would be a snap to work at a 2 GHz clock.

To reverse the process, to add weighting to dits and dahs, even
to having different weighting for different characters, is a
snap with a random number routine. That wasn't done, but is
viable without much alteration of the source.

The PCTA extras in here will have NONE of such things! They
will attempt to THRASH anyone in a monumental display of deus
ex machina worthy of the most devout Luddite. <shrug>

Len:

Yep, that is one way alright, and produces good results, there are others, some better.

Adaptive learning by the program is the key, and the program must learn what the senders' length of a di to a dah is, and the breath of the width he is spanning of each the di and the dah.

The amateur abbreviations are in a table, and the dictionary from a spell checker can be borrowed to check decoded morse words against which are not abbreviations.

You are right, a high speed machine affords you time to do abundant error checking--and here is where you gain close to 100% accuracy from, final fall back is the ear and the mind, to correct any mistakes the program cannot, yet, handle...

All words which do not match the table of abbreviations or the dictionary have a copy of that word thrown into an error file, along with di's represented by periods and dah's represented by underscores or hyphens, of the word thought to be an error. This error file can be studied later and the program "tweaked" to handle such errors in the future.

However, what interests me most is your knowledge on the subject, you most certainly have a good grasp of the logic necessary to begin to put one together.

Perhaps you have programmed and played with such yourself? Perhaps you have a relative or friend in the field?

John

Can't answer that Question Pete, I'm over 100km away and cannot receive a thing from them. They used to gether quite a large audience when they were on 576MHz. Lots of people tuned into them when their new TV's autoscanned and found their test card.

I was watching the webcast and connecting to them via packet everytime the flew over. Yep, it was pretty good video!

I would love to have been able to receive the EVA signals direct but they are on 410.2MHz, wideband FM, 1.4MHz wide. Nothing I have would copy that.

One other quick question.

You mentioned that ACA approves of the retransmission of NASA TV. Have you seen that in writing anywhere?
By the way do check out my web page below. As you can see I have moved on up from SSTV to Fast Scan TV.

cheers Peter VK3PB

87. Irish amateur radio callsigns as of February 1960

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-04 08:50:55 UTC
From: geacorkireland@hotmail.com
Message-ID: <1123145455.724194.322440@f14g2000cwb.googlegroups.com>
Source record: 50491

Historical Irish callsign list - from 1960, a useful reference of old amateur callsigns in the Republic of Ireland:

Irish Amateur Radio operators as of February 1960

EI2A S.C. MacNamee, 4 The Square, An Uaimh, Co. Meath
EI2AB D. O'Neill, St. Joseph's Chalet, Kells
EI2AC H. Spencer, Main Street, Roscrea, County Tipperary.
EI2AD R. Savage, Tory Island, Letterkenny, Co. Donegal.
EI2AF D.K. Donnelly, 68 Morehampton Road, Donnybrook, Dublin.
EI2AG J.R. Murphy, 235 Marian Park, Drogheda, Co. Louth.
EI2B H.L. Wilson, The Limes, Plunkett Avenue, Foxrock. Co. Dublin.
EI2C Comdt. M. Higgins, 15 Wyckham Park, Dundrum, Co. Dublin.
EI2F G. Reynolds, 135 Tyreconnell Park, Inchicore, Dublin.
EI2G J. Riley, "Whinbush", Hillcrest Road, Sandyford, Co. Dublin.
EI2I W.J. Scully, St. Theresa, Avenue Road, Dundalk, Co. Louth.
EI2K T.M. Lawless, Halstead, Malahide, Co. Dublin.
EI2L T. Murphy, Rathview, Rathangan, Co. Kildare.
EI2N T. Cottam, Elmuin, Grange Park, Waterford.
EI2P R.D. Mooney, Hollywood, Carrickmines, Co. Dublin
EI2Q M. Brosnan, Naval Depot, Haulbowline, Cobh, Co. Cork.
EI2R T.K. McDonald, 28 Ballybricken, Waterford.
EI2S D. O'Hare, Airfield, Bishopstown, Cork.
EI2T W. Greenway, 13 Lavista Avenue, Strand Road, Sutton, Co. Dublin.
EI2V Capt. P. Harrington, Signal Corns, Baldonnell, Co. Dublin.
EI2W H.L. Wilson, QSL via EI2B, Experimental station at Sandyford.
EI2X M. Beazley, Ballerina Ballroom, Ballybunion, Co. Kerry
EI2Z J. Dunne, 111 Capel Street, Dublin.
EI3AC K. O'Beirne, 23 Clare Street, Dublin.
EI3AE R. Williams, c/o Miss Canning, 1 Park Rd, Longford.
EI3AF J. O'Connell, 44 Collins Park, Donnycarney, Co. Dublin.
EI3AG W.A. Thompson, 76 St. Finian's Park, Moville, Co. Donegal.
EI3B S. Merry, Clonroad House, Ennis, Co. Clare.
EI3BC R.S. Haslam, "Hazeldene", 3 Wasdale Grove, Terenure, Dublin.
EI3BD J.J. Drudy, 3 Alma Terrace, Finisklin, Co. Sligo.
EI3D G. Whale, Colwyn, Lucan Road, Chapelizod, Co. Dublin
EI3H C.J. Ardiff, Baily Cottage, Baily, Dublin.
EI3I J.F. Brezina, 33 Clonmore Road, Mt. Merrion, Dublin.
EI3J Rev. Fr. M. Kelly, Saint Patrick's Presbytery, Lower Road, Cork.
EI3K E.J. Larkin, 3 Line Tce., Hill Street, Dundalk.
EI3L Comdt. A. C. Woods, 17 Butterfield Crescent, Rathfarnham, Dublin.
EI3P W.D. Watts, 1 Mount Mapas Villas, Kill Avenue, Dunlaoghaire
EI3Q A.T. Hobson, 31 Marino Green, Dublin.
EI3R Comdt. T.A. Hurley, 82 Manor Street, Waterford.

EI3S J. Scully, 30 O'Daly Road, Drumcondra, Dublin
EI3U The Principal, Institute of Science & Technology, Kevin St., Dublin.
EI3W J. Lawlor, Glenflesk, Knather Road, Ballyshannon, Co. Donegal.
EI3X Rev. Bro. O. O'Gorman, De La Salle House, Macroom, Co. Cork.
EI3Y I. Clarke, Ballina House, Ballina, Co. Mayo.
EI3Z P. Conway, St. Andrews, Moate Road, Athlone.
EI4A D.K. McCrossan, c/o Curragh Camp Post Office, Co. Kildare
EI4AB C. Connolly, Rialto, Marian Park, Waterford.
EI4AC Rev. F.G. O'Connor, Main St., Foynes, Co. Limerick.
EI4AD Cyril B.T. Kelly, "Milfordhaven", Nth. Circular Rd., Limerick city.
EI4AE T.J. Martin, "Banba", Killybegs, Co. Donegal.
EI4AF H.R. Steele, 78 Booterstown Ave., Booterstown, Co. Dublin.
EI4AG J. Maher, 65 Meadowbank, Lower Dodder Rd., Rathfarnham, Dublin.
EI4B J.P. Campbell, Sutton, Dublin
EI4BC A.D. Patterson, "Trudder", Newtownmountkennedy, Co. Wicklow.
EI4BD F.F. Walshe, 14 Mount Merrion Avenue, Blackrock, Co. Dublin.
EI4C H.W. Moss, "Kilternan", Bonniconlon, Ballina, Co. Mayo.
EI4D R.V.N. Sadlier, St. Ronans, Kitestown Road, Howth, Dublin.
EI4E T.A. Gallivan, Avenue House, Countess Rd., Killarney, Co. Kerry
EI4G G.H. O'Donnell, 61 Stiles Road, Clontarf, Dublin.
EI4H D.P. Fitzmaurice, 37 Grove Park, Ballymun Avenue, Dublin.
EI4I F. Beal, 11 West View, Waterville, Co. Kerry.
EI4J F. Halpin, Turret House, Davitt Road, Crumlin, Dublin.
EI4L J. Scanlon, 2 Johnsgate Street, Wexford.
EI4M G.M. Fitzgerald, 26 Terenure Road West, Dublin.
EI4N J.J. Malone, 136 Mount Prospect Avenue, Clontarf, Dublin.
EI4Q Rev. Fr. J. A. Stone, 39 Booterstown Ave., Blackrock, Co. Dublin.
EI4R M. Crowley, 78 Church Street, Listowel, Co. Kerry.
EI4S H. Dumpleton, 73 Cloiginn Park, Cherry Orchard, Dublin.
EI4T R.E. McCrea, Station Street, Pettigo, Co. Donegal.
EI4W P. Joyce, Glenina, Galway.
EI4Y E.F. Matthews, "Lyndale", 9 Pine Copse Road, Dundrum, Dublin.
EI4Z T. O'Donnell, 26 Ballymun Ave., Ballymun, Dublin.
EI5A Rev. T. Brennan, O.Carm., 44 Seafield Road. Blackrock, Co. Dublin.
EI5AB B. Cantwell, 104 Sycamore Avenue, Rathbane, Limerick.
EI5AC Wm. T. McGowan, Glenties, Co. Donegal.
EI5BC C.F. Morgan, 20 Stockwell Street, Drogheda, Co. Louth.
EI5AD James P. Ryan, Main Street, Ballygar, Co. Galway.
EI5AE Rev. E. W. Stanley, Seir Kieran Rectory, Clareen, Birr, Co. Offaly.

Pete,

Probably best for you to contact the Gladesville mob yourself for the answer, but even their website mentions it:-

Television Gladesville test transmissions show technical and scientific material from groups such as NASA, CSIRO, universities and industry, as well as material produced by the Club itself. It is this kind of material that makes Television Gladesville unique.

Brad.

Lardass your brain dead because of drug abuse mommy Shelly
should've had you aborted since you were born brain dead just
like she was. Shelly, your mommy, was (and still is) a big time
heroin addict. In fact, according to your medical records from
the St. Joe, Misery free clinic she shit you out in, you were
born dead.

91. 14.313 - the good old days - looking for recordings

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-04 12:56:47 UTC
From: bogpeat <bogpeat@bigfoot.com>
Message-ID: <1123160199.c9a6405beda1cc4cbfdfacd44b6d5b1b@teranews>
Source record: 50495

I was an swl in the early 90s and stumbled on 14.313 one evening and was hooked on it. Much more entertaining than television.

I got to the point of looking forward to a few hours of radio fun every evening.

Unfortunately, I never made an effort to record the goings-on, and now wish I had.

Does anyone here have recordings on cassette or other media? If you have already turned them into mp3 and have them on CDs, I would be happy to buy copies for any reasonable amount.

If you just have a box of cassettes, and care to loan them to me, I would be glad to convert them to mp3 format and put them on CDs, and provide you with copies of the CDs.

It may sound odd, unless you were there, but I think those nightly festivals are worth preserving, and the boxes of cassettes won't last forever.

If I could get the 'shows' converted to mp3 (and have permission from the owner of the tapes), I'd put them on my web site for free download, or mail CDs at cost to whoever wants them.

If you are interested, and have recordings from a good listening post, email me at bogpeat@bigfoot.com

First off stebie, he isn't on death row, and I not for nor against the
renewal of his license. However, there is a lot questions that need to
be answered as stated in my orginal post. If the FCC doesn't answer
them I sure the US Court of Appeal will inform the FCC to do so.

What you folks are describing is just a form of RTTY using Morse Code as the
encoding method, rather than ASCII or Baudot or some other scheme.

Of course it can be done, and has been done. Why it would be done is another
issue. It is certainly not a "better way".

Consider a bicycle. If another wheel is added, the rider doesn't need
to worry about falling over, so the skill required to ride it is
greatly reduced.
Add a small gasoline engine and a suitable transmission, and
pedaling becomes much easier. A simple cover will protect the rider
from rain
and other inclement weather.

Eventually you wind up with a small, three-wheeled automobile that
could win
the Tour de France. Except it's not a bicycle anymore, and its rider
isn't
a cyclist by any stretch of the imagination.

Or consider the piano. Pianos and similar keyboard instruments have
been around
for hundreds of years. It takes considerable skill and practice to play
them, and
reading sheet music is a skill of its own.

With modern computers and software, however, one can simply have a
machine that
scans in the sheet music and turns it into a "performance" - without
all those
lessons, practice, etc.

There are many such analogies. But they are lost on some people - those
who
Shaw described as "knowing the price of everything and the value of
nothing."

> issue. It is certainly not a "better way".

that does depend on the goal, and the operator. Personaly I find the idea of the manual morse and compter morse interacting the only redeeming virtue of the mode (please I know you disagree but go along for a minute) That someone could use the simple assembly of the QRP rig to reach out to a station like mine reading fby machine and sending it back the same way. It is one the few occasion I can realy see much use in the mode during an emergency gives the user the low signal abilities of RTTY or PSK 31 but allowing the station in the affected area to despense with a PC

Thus it is 'better" in some ways, indeed I am a much better operator of computer morse than manual and it would make my staion a bteer station by your standards (more modes more abilities)

so where your beef?

it is not your cup of tea sure fine

Hello, I am currently a comp sci student who has become interested in ham radio, mainly from taking physics classes and learning about electromagentic theory. I find the subject fascinating and would like to learn more theory and hands on applications. Currently my schedule doesn't let me take any of the classes which sound interseting like EM wave theory and antenna theory. I go to a small school and there isn't a ham radio club here.

>From my initial research into ham radio, the subjects which I have the most interest is mainly satellite communications, but I am also interested in DX communications, antenna theory and packet radio.

I have found three clubs on the ARRL website within 30 miles of me. Only one of those lists DX communication and none of them list satellite or packet radio as one of the groups interests. I feel a little uneasy simply showing up to one of the meetings with my limited (read non-existant) knowledge of the subject. I know enough about the physics and theory behind everything, but pratically 0 about the actual application. I envision going to one of these meetings (the one closest to me is held at a diner) and sitting around a table with a bunch of guys who are talking ham radio jargon and not being able to follow anything being said. I realize they are probably helpful to newcomers, but I think they would expect a newcomer to be able to hold their own, which at the moment I would be unable to do

Is there any (cheap) equipiment or kits that I might be able to find on ebay or some retail outlet that you could recommend to a beginner which I could play around with to help me get started before being licensed?

Any books or websites geared towards beginners (possibly with my interests in mind) that I might find useful? I've found a bunch, but it would be better if I could get some recommendations from experienced operators.

Charles,
Attend a meeting, introduce yourself and tell them your interests.
Get a feel for the members and what they are doing. Typically, there
are hams who are involved in various aspects of the hobby. You may be
presently surprised. Start at the top with the Club's President or if
he/she turns out to be non responsive find someone who is.

Just my opinion for a "first step". Of course read up as much as you
can. The jargon, by the way, will come as you get more involved.
Good luck.

A bit expensive unless you buy a used one, but you might purchase the ARRL Handbook, which contains hundreds of pages of useful information about most aspects of ham radio. Both new and old copies of this book can be purchased through Amazon.com.

There's no need to use a table of abbreviation...those can vary
from time to time and operator to operator. The MAJOR problem
is determining the "dit rate"...once that is done, the "dah" can
be separated, also the inter-character spacing.

>You are right, a high speed machine affords you time to do
>abundant error checking--and here is where you gain close to 100% accuracy
>from, final fall back is the ear and the mind, to correct any mistakes the
>program cannot, yet, handle...

Those who've never gotten far INTO computer programming will NOT
fully understand how blazing fast a 2 GHz clock PC really is!
My platform isn't top-of-the-line at 2 GHz clock and 100 MHz
RAM access...but it can almost blow the mind on how fast it can
handle anything in the Win32 family...I am getting slowly into
that through PowerBasic Compiler, calling the canned Win32
routines directly.

Back in '92 I shifted over to a moderate PC with a 20 MHz clock
and 1 MHz RAM access rate...and was checking various forms of
complex number calculation combinations to handle LARGE two-
dimensional arrays. Had those runing at tens of thousands of
random-quantity repetitions in order to get the fastest. That was
for a ported-over circuit analysis program from RCA in the 70s
(which I had helped improve - along with others in Central
Engineering - then). In the 1970s, any mainframe with a 10 MHz
clock and 1 MHz RAM access was considered "top of the line." :-)
I dug out the same PC time test routines and ran them on THIS
platform and the runs were just an eyeblink long. :-) In order
to actually time them, I had to increase the number of iterations

a hundred times (from about 10K) in order to see some semblance
of actually working hard!

>All words which do not match the table of abbreviations or the dictionary
>have a copy of that word thrown into an error file, along with di's
>represented by periods and dah's represented by underscores or hyphens, of
>the word thought to be an error. This error file can be studied later and
>the program "tweaked" to handle such errors in the future.

I disagree. The first task is to ADAPT to the going rate. That
requires only a temporary memory (but a large one at that since
one dimension MUST be time) to set the approximate received rate.
When rate is approximated, there can be a built-in weighting on
time duration to determine dit from dah. Simple conditional yes-
no on duration but the trick seems to be arriving at a good
decision point in time.

"Abbreviations" tables aren't needed. In fact, from seeing such
a program working (and being able to look at the flow diagrams
of the routines...source was in C++ but flow diagrams were in
standard box-diamond form...the common abbreviations and Q codes
could be left as they were in ASCII on the screen. Since morse
operators tended to have a great variation in inter-character and
inter-word spacing, those spaces were just left in the screen
display and the human reader could do the final "adaptation" on
what the spaces meant (or didn't mean).

>However, what interests me most is your knowledge on the subject, you most
>certainly have a good grasp of the logic necessary to begin to put one
>together.

In 1970 (at an RCA division in Van Nuys, CA) I got a chance to
do programmed calculations on an HP 9100 desk calculator...did
some statistics runs on aircraft collision avoidance estimates,
part of a long-range R&D project at RCA devised by the late
Jack Breckman (a genius type who could extemporaneously speak
in ordered paragraphs). Found that programming and I got along
very well and a "romance" of sorts happened, went full-flower
with successful negotiations with bean counters to get corporate
computer time (then horribly expensive). Got Dan McCracken's
softcover on FORTRAN IV Programming to explain the program
ordering (damn good book, Dan became President of the ACM for
a time later), won a steak dinner bet with another on being able
to make a running program and off it went to bigger, better
things. The epiphany happened due to a supplier delay on some
small inductors for a vital hardware delay line...could I use
a "close, but not quite right" inductor which was plentiful?
Did a simulation run for pulse shape on the corporate computer
using the possible replacement, decided it was okay. When the
replacement parts arrived, I quickly tack-soldered the delay
line together, viewed the pulse shape though it and found the
computer simulation waveform matched the real waveform EXACTLY!

I was sold and a definite believer in accurate simulation ever since.

>Perhaps you have programmed and played with such yourself? Perhaps you >have a relative or friend in the field?

I never bothered with a "morse code reader" program. Wayyyyy TOO MANY OTHER kinds of calculations that would be of immense value. When my group at the RCA division was disbanded in '75, I had six programs in the Central Engineering software library and have had four other programs as Shareware back in times before the Internet went public. Those are all Freeware now, not that it matters much with Windows and other GUI-ey graphic screens being "what all want." :-)

As a former voting member of the ACM, courtesy of cross-membership privilege of the IEEE, I've worked with/known a bunch of computer programmers. The kind that can DO THE WORK and DEMONSTRATE it without pointing to a bunch of framed/plaqued certificates on the wall. One of those was the guy I described...one who had the HOBBY of programming as well as doing it every day for a living. We were friends enough for him to let me look at all pages of his project notebook...and myself letting him use my Icom receiver as a morse signal source. He thought it was a fun program to do, while I thought morsemanship wasn't worth bothering about...but, it was a fascinating challenge to mechanize and to make work. His development platform was rather faster than my 20 MHz clock thing and - as it was written then without final optimization - wouldn't work with high rates of the speed-freak hams (I knew of two, one in Frisco, the other near San Diego, both retired and busy beeping each other most every day then). Right now I can order a Microchip PIC from DigiKey running at a 50 MHz clock, get a couple large EPROMs to hold the source code (if ported) and it would work fine, I'm sure. PIC's RISC instruction set is NOT compatible with 80x86 instruction set and takes a lot of translation. Thank you, I'll take canned PIC programs, use those and be done with it.

I do NOT have ANY sort of decoder for morse, TTY, commercial SSB TTY tones, any of the TORs in-house. Not my cuppa either. The 'TOR peripheral boxes are cheap enough that I could buy one and use it if the interest struck. No problem. Someone else did the design, debug, engineering and I respect that; no sense in re-inventing wheels unless it's to make them more rounded, smoother, etc. :-)

Note: Watch for Jimmie Noserve, the Nun of the Above, to pick up on that last sentence and use it later in chiding postings agin' me...it might be weeks before he do dat, but he gots a memory like an effluent and will issue it later. Predictable.

N2EY:

Oh, we are talking about MUCH MORE than RTTY...

Not even close... RTTY is dead... but some dead languages are still
spoken, no surprise. Look at how long Latin was a dead language, but
still pressed to service the the catholic church...

Len:

It is not even close...

The end of all that design in computer hardware and software, when
efficient and up-to-date, would be impossible for a human operator to send
let alone receive without hardware and software... RTTY is as dead as CW...

Len:

Right now I am running a 3.8Ghz processor clock with a 466Mhz memory clock
on a bus capable of 266Mhz.

The fastest keyer would leave the
hardware/software killing time to await his next di or dah...

The purpose of the "error file" is to catch new abreviations so they can
be added to the table, let them come up with as many variations as they
possibly can, in the end the reader is only made stronger...

Well, I don't have a definite answer - but I'd seriously doubt that - although that may be what the poster wanted people to think...

Along those lines, as easy as it is for government officials to know who someone is that posts on the internet (IP address', other trace software they have, etc), the poster could be in line for a little 'Cuba or Egypt questioning' session at the least -

Extremely stupid game to play...

Thanks for the advice, I will attend a meeting. After further
searching the ARRL website, I found that my school is actually
conducting a test on Sept. 24th to get a technician's license! I will
have time to attend one or two meetings before then and I also found
the ARRL book Now You're Talking and the hadnbook at my schools
library. Hopefully this should prepare me enough for the test.

On another note, I am working part-time while at college so money is a
little tight. So I can get an idea of what I need to save, how much
should I expect to spend on a beginner's rig? Any advice on a model or
make that would be a good starter set? What if I want to do some
sattelite communications?

Thanks again for the advice,
Charles

Charles,

Clubs vary - from my experience, the majority are very open, friendly, and helpful to newcomers and would-be hams.
Unfortunately, to be totally honest, some are cliquish and not like the majority.

I would suggest you vist all three and see which one "feels best" in terms of openness, interests of the membership, etc. and decide from there.

Ham radio is supposed to be about "Elmering" (experienced hams welcoming and helping newcomers), so don't feel like you need to go it on your own until you've "earned your stripes" ... if you visit a club and don't get an appropriately warm welcome, move on and try another one.

73 and good luck,
Carl - wk3c

Glad you found the book - read it and you should be able to make inroads into a licence. I'll say, just to reinforce it - go to the club! There's bound to be one or more who'll point you in the right direction when you need some help.

Take a look at Ebay for prices of rigs - search on 'amateur radio' (duh! wasn't my first pick but it's pretty durn obvious :-) or the makes, like Yaesu, Icom, etc. Take you pick, depending on band(s) you want to work. Or just drool for a while before you splurge - if you wait a while you'll find you'll have a better idea of what you want to do. You guys are spoilt for choice in North America. :-)

For satellite, and I'm talking from a position of not having done it for a few years (I have to do it at work so I tend not to at home now) so someone correct me if I'm wrong; look at a 70cm and a 2m rig or a 70cm/2m dual-bander. But if the cost is beyond you at the moment, get one rig and play with it and figure out procedures, antennas and the like. Plenty to play at before moving on!

Have fun!

Cheers.

Ken

No, you're not.

The systems you're talking about consist of a keyboard and visual
readout,
same as RTTY and other "keyboard modes". The error-correction and other
features are simply enhancements - they do not change the basic method
of communication, nor the experience of the end users.
>
> Not even close... RTTY is dead... but some dead languages are still
> spoken, no surprise. Look at how long Latin was a dead language, but

Morse Code, OTOH, is alive and well on the amateur bands. You will find
many
more radio amateurs on the HF/MF amateur bands using Morse Code than
any
other mode except single sideband amplitude modulated voice.

Another analogy:

Inexpensive pocket calculators can do basic arithmetic far faster and
with more
accuracy than most humans, even with pencil and paper. Does that mean
there is
no reason to learn how to add, subtract, multiply and divide?

Make sure that the Now You're Talking book is the latest issue so that
you're studying the right stuff. Although I'm not sure how much it's
changed. An older issue may be close enough. Anyone know?

N2EY:

My gawd man, must you apply antique analogies to everything which is attempting to break archaic methods to attempt to obfuscate anything you don't like and/or agree with? Technology has passed you by man, the reins have passed, what you are holding in your hands are the ashes of yesteryear... don't embarrass yourself and others about you... speak on things you understand, or not at all...

True enough.

It's just *one* good thing about Morse Code (the ease and flexibility
of
human-machine interface. There are many more good things (redeeming
virtues?) of Morse Code.

> That someone could use the simple assembly of the QRP rig
> to reach out to a station like mine reading fby machine and sending it

One more tool in the toolbox.

If the operators know Morse Code, there's no reason for a PC at either
station.
>
> Thus it is 'better" in some ways, indeed I am a much better operator of
> computer morse than manual and it would make my staion a bteer station

In that regard, it is "better". But it is not universally "better",
just as an automobile is not universally "better" than a bicycle.
>

> so where your beef?

The idea that machine operation is somehow universally better.

> it is not your cup of tea sure fine

IYO

not in mine

it is a fact manual morse is quite useless to me and others

>
> > That someone could use the simple assembly of the QRP rig

and yet you opose allowing me in the playing feild at all

My station is at least one if not several such tool but you don't wish
to allow it without ahvng that ONE tool

>
> > It is one the few occasion I can realy see much use

agreed but so what

this doesn't justify keeping me from being there and using my sation to
help the pcles staion

> >

I have never said it was

it is your side that varies from stating or impling that Manaul is
always better which just isn't so

> >
> > so where your beef?
>

which by analogy is up to me. Id rather listen than play that tune

and what about Manual Morse justifies making ME play that tune?

>

>don't like and/or agree with?

John, he MUST. It's an obsessive compulsion. :-)

That's Jimmie for sure, the Nun of the Above. Predictable.

> Technology has passed you by man, the reins
>have passed, what you are holding in your hands are the ashes of
>yesteryear... don't embarrass yourself and others about you... speak on
>things you understand, or not at all...

Oh, oh, Jimmie will now remark on his TWO degrees in EE and his
years-as-a-ham (like he spent 8 hours a day, 7 days a week in
pounding his brass on the ham bands). :-)

The Order of Luddism is upon Jimmie and EVERYTHING must be done
manually in communications! Just like in the 20s and 30s during
the pioneering days of radio. Jimmie bravely carries his cross
for them (provided Kellie doesn't shoot the bear).

He segues to music (morse is "music" to his ears...and years).
He probably hasn't heard a good musician at work on a synthesizer
keyboard producing the enjoyable sound of an entire band...in any
style of music you like. Down here there's dozens and dozens of
them...busy working.

You say that RTTY is "dead" but it hasn't "died" yet since it
carries on with the TORs (Teleprinter Over Radio) such as AMTOR.
The FCC, nor any of its three predecessors, NEVER had a manual
teleprinter test for radio amateur license applicants. They've
"always" had one for manual telegraphy. That's the REAL
subject of WT Docket 05-235.

Just leave Jimmie alone with his abacus/soroban and he can do
all his Eigenvalues by hand plus a table of elliptic integrals.
Very basic calculator. However, beyond the four functions it
gets cranky...forget simple square-roots, for example. A Taylor
Series for a correct Sine or Cosine is going to take a lonnnnng
while to finish on his buttons-on-wires soroban/abacus. :-)

Charles,

OMG, please don't count on any of these groups if you want to get an idea of what amateur radio is like. Go to the club like these guys suggested. Do some research online (arrl.org, etc.) and go to the library if you can, and go to HRO on a Saturday morning if it is close by. Hams are, by nature, good people, and they will be glad to help you!

But r.r.a.m and other such groups are not good indicators of what ham radio is like. These newsgroups are the "short bus" full of ham radio wannabees. There are many, many good resources here as well, but the dozens of idiots screaming from the short bus drown out the few intelligent ones.

You will get insulted here (as will my posting... watch). That is not what ham radio is about. Don't let it bother you (and in fact, don't even read the rest of the sentence when they spray paint you with their grafitti.)

Just go ahead and get on the air and you will have more fun than you can imagine. Trust me - I have been on the air since 8th grade. I turned 50 years old in Feb 2005.

And go ahead and post here, but remember that amidst the 90% jerk factor here, you may find people who actually are licensed, and among them, you may find some who get on the air sometimes, and among them, you might find someone who can do you good.

All the best, and 73,
Dave

Did anyone mention the www.arrl.org page and AMSAT for the sats ?

Look around and see if there is a hamfest near you. That is a flea market
for ham gear. You may find a used rig there. As always you may find a few
that will sell a rig that is not working like it should and so on.

While studying for the license test don't try to learn anything from the
qustion and answers, Just study the correct answers. Get a ARRL Handbook ,
even a used one a few years old will go a long way in getting you started on
teh correct path. Packet is just about dead except maybe a few that are
looking at the DX clusters.

Dee:

Some would argue Latin is not dead, churches and doctors still use it...

It is dead, both cw and morse, some may live to see the proof, some may not have long enough. This is the digital age.

Here in this newsgroup you can find many who try to form religious doctrine over out dated specs, faqs and past limitations of the net. This type of behavior is seen in many groups of individuals, the "control freaks" are here on the web too.

There is a real cult which has formed around CW, they have their church, high priests, hierarchy and devoted following, you might refer to them as "CW Groupies" if CW was the name of a rock band.

The data transmission protocols which could be used on amateur radio as we speak here are mind numbing. However, phone and cw do server hobby uses here. But, data transmission of binaries, graphics, movies, etc. are not suited to either. Two bursts of encrypted/compressed packets happening a a blink of an eye can fill your screen with enough text to keep you reading for two minutes. Or, an IM protocol could be employed in "text chat" with one freq serving as a party line and only grabbing packets they are interested in... possibilities are endless...

No, no one would pause at a simple cw reader, you would allow two machines to chat together, no human needs to tap a key, it is far below what the human mind was meant to do, it is akin to pounding on a skin covered drum, however, if MadMax ever happens, I will grant you it may have a use, "God" forbid that ever occurs... but then, if it does, there will be tons of CB radios out there which will be pressed into use... they will be able to be found in almost any diesel truck on the highway, and base stations in the smallest of towns, alternators removed from cars and driven by small gas engines off lawn mowers, etc.

I don't think there is going to be that many hams with a key in their hand saving the human race... and you will not likely know the heroes until the event happens... the greatest plans of mice and men...and all that...

But, hey, the dreams of men are what keeps them going, and there is always only a problem when they attempt to force their dreams on others--especially when the dreams become decades old... become brittle and turn to dust in the face of harsh reality...

<snippety-two>

Simply because a club doesn't list a given interest does not mean
that none exists among the membership.

As others have pointed out, you're overthinking and overplanning.
Pick a club you like the sound of, and go to a meeting. You could very
well be pleasantly surprised. None of us learned all that we now know
overnight.

Thank you all for the advice. It has been very helpful and given me quite a few pointers. The book that I have is the 5th edition and I believe it is the latest. Thanks for the warning about the newsgroup. I noticed some flames and other pointless rants, it's good to know that there are people intelligent enough out there to see what it is and simply ignore it.

I'll check out ebay and keep an eye out for the brands you named. I'm not sure if there are any hamfests around here, but there is a huge flea market every Saturday, so I might stop by there and see if I can get any information there.

I'm also glad to hear what everyone had to say about the clubs. I will still check them out, but it's good to have the info you provided. I had a few experiences with some computer user groups that claim to be open and welcome to new users but can be almost snobbish to a beginner.

This seems like a great way to get my hands on some fun gear to play around with and meet some interesting people. I'm excited to try it out! Thanks again for all the advice and anything else you might think of is greatly appreciated.

Charles

You don't EM or antenna theory classes to join this hobby. They may
certainly enhance your fun later, but I've taught classes at the local
community college and graduated (licensed) dozens of folks that didn't
have any electronics education.

>
>>From my initial research into ham radio, the subjects which I have the

My satellite experiences ended with Oscar 6, a long time ago, so I
can't comment on the current bird activity and/or operating modes.
AMSAT is the organization that you need to look to for this stuff.

Casual, as opposed to rabid DXing is an interest of mine, but frankly
with the current state of the sunspot cycle this isn't as much fun as
it will be in a few years. You're a young guy so you will have
several cycles to look forward to.

I've never had an interest in digital modes, but I think packet is
pretty much over with. The new modes are PSK-31, etc. Some vhfer's
are using digital modes for meteor scatter and moonbounce. See:
http://pulsar.princeton.edu/~joe/K1JT/index.htm for a start.

To be honest, at least in my area, clubs are populated by a bunch of old geezers like me who are more interested in socializing than programs. That said, by all means visit them and make your interests known. These guys won't bite (many of them don't have their teeth anymore) and they put their pants on the same way as you do, one leg at a time.

In all likelyhood, if they have any sense, they will welcome you with open arms; young people interested in ham radio being a rarity these days.

>
>Is there any (cheap) equipiment or kits that I might be able to find on

Check out the clubs first. You might find someone willing to loan, or give you an older rig, just because you're interested and he has one he doesn't know what to do with anyway. I have done this.

Besides, being cheap and a scrounger is a ham tradition; you might as well master this aspect at an early age. Begging is perfectly acceptable.

Of course the ARRL site www.arr.org is a place to start. The aforementioned www.amsat.org has a "New to satellites" area.

Welcome to the fold,

Consider buying a low cost used scanning receiver that will let you listen in on the segments of the VHF and UHF amateur bands where you'll find most of the FM repeater traffic (roughly 145 - 148 and 440 - 450 Mhz). Personally I'm a fan of Uniden's BC895XLT or the newer BC898T. These $200 receivers (new, $125 used) make great general coverage receivers for the VHF and above ham bands. Google on the model numbers.

Also consider a used dual band 2 meter / UHF trasceiver for about the same price.

If you live anywhere near a city with a good sized ham population you should hear daily traffic on the repeater systems. For information on specific Philadelphia and Pennsylvania area repeaters see this link:

http://www.artscipub.com/repeaters/states/Pennsylvania.asp

Good luck and welcome to the world of amateur radio.

158. Re: N9OGL to comment on K1MAN RENEWAL

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-06 11:52:09 UTC
From: N9OGL <toddaug555@yahoo.com>
Message-ID: <1123329129.688765.17800@f14g2000cwb.googlegroups.com>
Source record: 50462
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Some of the points to my petition:

1. This petition is neither for nor against K1MAN renewal, instead it is being sent to the commission for the purpose of the FCC to answer a few questions. These question mostly circle around the recent NAL given to K1MAN.

2. INTERFERENCE: The question of why the FCC seems to be going only after K1MAN when W1AW has also been reported to have cause interference. It seems funny that since 1987 the FCC has repeatedly sent warning letters and NAL's to K1MAN and not W1AW, who has been reported to begin transmitting over ongoing communications. It is also rather funny that amateur's, even the ones that W1AW has transmitted over, seem to target only K1MAN.

3. PECUNIARY INTEREST: Amateur radio is a non-commercial service and according to the rules and regulations amateur radio stations cannot have pecuniary interest either direct or indirect. The first of the questions is why does the FCC have a double standard or definition to the term non-commercial? Non-commercial under the general rule is a station that can't make a profit; instead a station can make money, to sustain the station. Non-commercial FM and AM radio station due it through viewer support and non-commercial point to point services do it through state and federal funds ALL other service are able to get funds to run their stations either commercial and non-commercial. The second is direct or indirect rule. K1MAN on his Information bulletin advertised his website which had commercial goods on it (DIRECT) while when some one listens to W1AW, like a short-wave listener, or a future ham operator they would get on the Internet and do a search for W1AW, which in term would lead them to the ARRL site, site, which also has goods for sale (INDIRECT). So the question is why is the FCC going after the ARRL for their indirect sale of goods? It seems that the FCC has a double standard when it comes to who can bend the rules and who can't. Which leads to the finally question, Does announcing your website on the radio (even if it to some guys your talking too) and it has commercial advertisement on it really constitute pecuniary interest? And again if so then why is the ARRL allowed to sale products on their website.

4. Broadcasting: Under the FCC rules governing amateur radio, ham operators are not allowed to broadcast, however under 97.3(a)(25) and 97.111(b)(6) amateur can run Information bulletins. The questions are where does the line between Information bulletin end and broadcasting begin? Many amateurs believe that an Information bulletin is to be a

newscast and is not allowed to opinionated. Which raises the second and third question, where in the amateur rules does it state an information bulletin cannot be opinionated? Third does these "non-opinionated rules" allowed under the "non-content based rules" (the Courts has ruled repeatedly that the FCC rules must be content-neutral) or Under Section 326 of the Communication Act of 1934 as amended, (prohibits the FCC from control the content of station except for obscene and indecent material) or the First Amendment

It was a sort of real life soap opera, that ran every evening for years on 14.313.

I think it started because of the complaints of one operator about the way a maritime net was being run on that frequency.

It degenerated, as these things usually do, into personal attacks, and settled into a sort of trench warfare, with a group of regulars on each side, and a chorus of hecklers, drunks, and people having psychotic episodes.

As sometimes happens with soap operas, once you got to know the cast and the general plot, you were hooked; it was by far the best long-running entertainment I have come across.

The participants probably didn't find it so entertaining: there was a lot of nastiness, not confined to verbal stuff; but if you were just an observer, it was great fun.

I think it also resulted in a crackdown by the American regulatory authorities on amateur radio.

If enough tape-recordings exist, there's probably a goldmine of material for an aspiring PhD in psychology or sociology.

I'd be happy to convert tapes to mp3 format and put them on my website. If you have any and care to loan them to me, let me know.

Those are derived from artists depictions from the middle ages.
During that epoch, long hair like yours was common, and it was natural
for the artists to paint Jesus to look like themselves.

In actuality, it is highly probable that Jesus had short hair. Even
the History Channel has put on programming which points that out.
Your own lack of scholarship is clearly evident in the comments quoted
above.

Paul (or Saul) lived during Jesus' time and was intimately familiar
with the customs of the day. Long hair like yours was regarded as
effeminate by most male Roman citizens (Saul was a Roman citizen), and
hence the quote from one of Saul's letters to the Corinthians.

If Saul were alive today, he would probably say "If Woger posts his
photo on Yahoo, it is a shame unto him."

And he would be right.

For rules, click on:

<http://www.w3cwc.org/>

Then, click on "MDC QSO Party" in the left column.

- - - TEXT - - - - - -

T h e F u n C o n t e s t
Maryland-DC QSO Party Rules for 2005
Now in our 16th year of FUN

Sponsored by:
Antietam Radio Association W3CWC

Contest Date:
August 13 1600-0400 UTC August 14 and 1600-2359 UTC August 14

Many certificates are awarded including:
10 Best MDC Single Ops,
Best Score per State and DX Country,
Best MD YL,
Best QRP entry from any state,
Top 3 MDC Clubs, and others!

New for 2005
A Certificate will be awarded in place of a Plaque in categories with less the
five entries.

Plus:
Certificates are awarded to all stations with 50 or more QSO POINTS in their entry!

Plaques Awarded:
only if five or more entries in category

High Score from a:
Maryland Club or Multi-OP
Station Outside MDC
MDC Mobile
MDC Single Operator (HF + VHF)
MDC VHF-UHF Only Entry
MDC QRP & Non MDC QRP
and
Highest Scoring Antietam Radio Club Member
(regardless of total entries)

The Contest:
Non MDC must work MDC for score
MDC works the world (we hope!)
No formal net or packet qsos.
Club entries must be from a single QTH
Club entries outside MDC are included in the regular Non MDC category.
Phone and CW are one contest
CW in CW sub-bands only
Stations may be worked once per band using each mode
Stations that change MD counties or state lines may be worked again for qso points as different stations
Non MDC stations must be single operator even if from a club station.

Exchange:
QTH and Major Category
QTH is county for MDC; State, Country, or Canadian Province for others.

Major Categories
Club, Mobile
QRP
Standard
Multi-op stations are considered
CLUBS!
(using one call-sign as entry) Stations will send the category that reflects their Highest Point Value to the station worked.

Suggested Frequencies:
1.895 3.643 3.920 7.06 7.230 14.06 14.270 21.06 21.370 28.035 28.370 50.150 52.525 144.15 146.55 146.580 432.15 446.000 MHz.
Please note some of these suggested frequencies have changed this year based on your suggestions.

Scoring:
Use of our summary sheet (available at www.w3cwc.org) is highly recommended!
Add up your qso points and multiply by the sum of the multipliers.
Multipliers may be claimed once each and they do not repeat from band to band.

Note: No licensed amateur who participates in the MDC Party as part of a mobile team consisting of two or more licensed amateurs in the same vehicle may work that station with whom they participated for scoring credit.

MDC County Abbreviations

ALY Allegany
ANA Anne Arundel
BAL Baltimore City
BCO Baltimore
CLV Calvert
CLN Caroline
CRL Carroll
CEC Cecil
CHS Charles
DRC Dorchester

FRD Frederick
GAR Garrett
HFD Harford
HWD Howard
KEN Kent
MON Montgomery
PGE Prince George
QAN Queen Anne's
STM St. Mary's
SMR Somerset
TAL Talbot
WAS Washington
WIC Wicomico
WRC Worcester
WDC Washington DC

QSO Points:
10 points per club station
5 points per mobile station
4 points per QRP station
3 points for each CW/digital station
1 point all other QSO's

Remember- Only the highest single point value may be applied per QSO.

Multipliers:
For stations outside MDC- 1 per MD county + DC + Baltimore City (25 possible)
For MDC Stations ONLY- the basic 25 + each of the other 49 states + each new DX country

Deadline:
Send logs + scoring summary + SASE by September 15, 2005 to the primary contest sponsor-
Antietam Radio Association P.O. Box 52 Hagerstown, MD 21741-0052 or logs may be emailed in plain text or
Microsoft Word or Excel format using this email link . A contest summary must be included.
Note: By entering you agree to the decisions of the contest committee as final.

Special Award:
The Worked All Maryland Multipliers Award The only stipulations are 1) All contacts
must be made from a single QTH and 2) All contacts must be made during a single year's qso party.

N3WD offers a Worked All MD Award to all who work the 23 counties + Baltimore City in our contest.
Contacts for this do not have to be from a Single QTH. Contest Log must show needed data for this
including Mode and Band.

Finally, the Antietam Radio Association, primary sponsor of the modern day Maryland DC QSO Party wishes
to thank those who financially support the contest with your donations. Donations toward the continued
operation of this activity are always welcome and may be sent to the primary sponsor. 2004 Marks the
15th year of the modern day party. Please visit our website at www.w3cwc.org and see you in the pileups.

Logging Software available from N3FJP, Writelog, and W3KM that is party friendly.

Good luck!

Try the newsgroup, rec.radio.amateur.antenna

Several crusty elec. engineers, book authors and other knowledgeable
types discuss all manner of wave theory and antenna theory there. It's
free, and you can learn a lot, whether you simply observe or get
involved. They can also point you toward many of the classic books
from long ago on antenna theory.

What Would Jesus Do?

Advocate child abuse and murder amongst many other cruelties.

Christians are always claiming, "heï¿½s the lamb", "our savior",
"the king of peace", "the embodiment of love", amongst the many other
names they associate with a loving, merciful nature. Jesus a nice
guy? Not in my book. Nor in any other personï¿½s who is capable of
compassion and rationality. Letï¿½s examine who the hell the Jesus
character really is. These verses will show not only is Jesusï¿½
"loving" nature a joke but so are the Christians who worship him.
Jesusï¿½ real mission to come to earth:

Jesus says that he has come to destroy families by making family
members hate each other. He has "come not to send peace, but a
sword." Matthew 10:34

Jesus says, "Donï¿½t imagine that I came to bring peace on earth! No,
rather a sword lf you love your father, mother, sister, brother, more
than me, you are not worthy of being mine." The real beauty of this
verse is that Jesus demands people truly love him more then they love
their own family. I ask you how can we love someone that we can not
see or interact with? Love is an emotion pertaining to physical
existence not to faithful ideologies, yet God threatens you with Death
just because your love for your mother maybe stronger than your love
for him. Matthew 10:34

Families will be torn apart because of Jesus. "Brother shall deliver
up the brother to death, and the father the child: and the children
shall rise up against their parents, and cause them to be put to
death." Matthew 10:21

Jesus strongly approves of the law and the prophets. He hasnï¿½t the slightest objection to the cruelties of the Old Testament. Matthew 5:17

Jesus advocates murder and death:

Jesus condemns entire cities to dreadful deaths and to the eternal torment of hell because they didnï¿½t care for his preaching. Matthew 11:20

Jesus, whose clothes are dipped in blood, has a sharp sword sticking out of his mouth. Thus attired, he treads the winepress of the wrath of God. (The winepress is the actual press that humans shall be put into so that we may be ground up.) Revelations 19:13-15

The beast and the false prophet are cast alive into a lake of fire. The rest of us the unchosen will be killed with the sword of Jesus. "An all the fowls were filled with their flesh." Revelations 19:20-21

Jesus says he is the only way to salvation yet he purposely disillusions us so that we will go to hell:

Jesus explains that the reason he speaks in parables is so that no one will understand him, "lest . . . they . . . should understand . . . and should be converted, and I should heal them." Matthew 13:10-15

Jesus explains why he speaks in parables to confuse people so they will go to hell. Mark 4:11-12

Jesus advocates child abuse:

Jesus is criticized by the Pharisees for not washing his hands before eating. He defends himself by attacking them for not killing disobedient children according to the commandment: "He that curseth father or mother, let him die the death." Matthew 15:4-7

Abandon your wife and children for Jesus and heï¿½ll give your a big reward. Jesus asks that his followers abandon their children to follow him. To leave your child is abuse, itï¿½s called neglect, pure and simple. Matthew 19:29

Jesus criticizes the Jews for not killing their disobedient children according to Old Testament law. Mark 7:9

A few other things about Jesus:

Jesus says that those who have been less fortunate in this life will have it even worse in the life to come. Mark 4:25

Jesus sends the devils into 2000 pigs, causing them to jump off a cliff and be drowned in the sea. Clearly Jesus could have simply sent the devils out, yet he chose instead to place them into pigs and kill them. This is called animal abuse. Mark 5:12-13

Jesus kills a fig tree for not bearing figs, even though it was out of season. Jesus must not be as smart as Christians would have us

believe, for he was retarded enough to do something this silly. Youï¿½d think the son of god (god incarnate) would know that trees donï¿½t bear fruit in dry season. Mark 11:13

Luke 12:47 Jesus okays beating slaves.

Garsh darn it, John. Now you went and did it. I don't know whether to strike my chest three times and recite, "Mea Culpa, Mea Culpa, Mea Maxima Culpa", or to bow five times toward the east and hope that Allah blesses (???) me with several wives and a buggy whip. I suppose I could do both and top it off by throwing a few bananas in front of the Buddha statue just in case.

No need to piss Jesus, Lennie, Allah and Buddha off in one fell swoop, eh? That would surely send me to ARRL Hell in no time flat.

It is probably not necessary to have a Catholic Priest wave his hands over my radios, though perhaps it 'may' give added life to the transistors. I will instead defer and humbly bow to the Lennie God without whose blessings we cannot proceed.

Mea Culpa, Mea Culpa, Mea Maxima Culpa

Lucifer:

You old hot devil you, the women have been asking around for you!

Really don't know huh?

He changed "an eye for an eye" to "turn the other cheek"...

He changed not being able to eat pork to now being able to eat it...
(someone needs to sneak some ham in the muslims food! They don't know
and haven't tried it yet... <grin>)

... jews are still pi$$ed off about a lot of it, don't recognize Jesus as
the messiah, some will grant he bears prophet status...

... but then, much of this doesn't have to do with amateur policy,
although it can't hurt to have a catholic priest bless your rig and
antenna!

Now you went and done it...you done tole ole Wogie that he is, in a few words, stupid...

"Your own lack of scholarship is clearly evident in the comments quoted"

Wogie gonna have to sit back and figger this one out. He got no 'scholarship' but from his Devry mail order Master Degree. Cost Wogie all of $249.30 plus tax.

"If Saul were alive today, he would probably say "If Woger posts his photo on Yahoo, it is a shame unto him."

Nice quote. Woger, however, would counter that Lloyd was behind this post. Wascallly Wogie sees Lloyd behind every door, in every shadow. Wascally Wogie has never been known for his intellect...

Uncle teddie:

Many things are highly improbable, I agree, such as evolution.

However, if you venture a religious belief in evolution, and then there
are millions of millions of planets out there near similar to earth, with
billions of billions of mud puddles on them--aliens become a given
probability.

180. TS930 problems

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-07 19:29:53 UTC
From: Benny <bbubble62@hotmail.com>
Message-ID: <18zh10nh3a825$.1vupgb135poa6.dlg@40tude.net>
Source record: 50484

Is there any one in this newsgroup who has experience with repairing a TS930 ?
My unit seems to be 'deaf' although I can hear another rig which is in my shack.
It started intermittent nad after a few power down/up cycles the unit worked as expected but now I can switch the rig off and on forever but it won't work anymore.
Unit has sn 41xxxxx (I know there are problems with the older sn's) and the TX part works very well.

Any ideas ?

Ben.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
more likely a "BUSTED CALLSIGN". As always, you never know - "Work
First Worry Later" (WFWL).

5R, MADAGASCAR (IOTA Op). Dino, IZ4AKV, plans to be active as 5R8HS from
Nosy Be Island (IOTA AF-057) between August 25th and September 8th. Look
for activity on all HF bands. QSL via IZ4AKV (QRZ.com).

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Branch Manager, announced that
the following operation has been approved for DXCC credit:
```

T6EE - Afghanistan; Operation from September 19, 2004, to October 16, 2004

FY, FRENCH GUIANA. Members of the Cayenne ARC will be active as FY5KAC from the City of Sinnamary (on the road from Cayenne to Kourou, West French Guiana), August 13-15th. They will have two HF stations on the air; one on CW and the other on SSB. This is a three days exhibit to show "How to become a ham". QSL via the French REF Bureau or direct via QRZ.com.

GD, ISLE OF MAN. Hein, DL2OBF, was invited by Alex, GD3UMW, and the Manx Radio Club to operate GD6IA during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. High/Low-Power will be decided shortly before the contest depending on the conditions. Do not expect much activity before or after the contest. QSL for GD6IA is via PO Box 1, Peel City, Isle of Man, British Isles. More information about the station can be found on the Web page at: http://www.gd6ia.com

GREEK IOTA TOUR. Tony, IK8VRH, will begin his IOTA summer tour in Greece this week as SV/IK8VRH. Activity will be on 20/17/15 meters CW/SSB/RTTY. QSL via his home callsign, by the ARI Bureau or direct (QRZ.com). His schedule is as follows:
August 10-11th - Skiza Island (EU-158)
August 13-14th - Alefonnisos Island (EU-113)
August 16-18th - Dokos Island (EU-075); lighthouse will be activated
August 20-22nd - Kavalliani Island (EU-060)
August 23-28th - Spetses Island (EU-075); lighthouse will be activated

HB0, LIECHTENSTEIN. Members of the Eindhoven Student Radioamateur Club (ESRAC) will be active from Sareiser Joch now through August 16th. They will be signing as HB0/PA6TUE (QSL via PI4TUE) and possibly HB0/homecall. Activity will be on 160-6 meters and UHF, with an emphasis on the lower bands, 6 meters and the digital modes (RTTY, PSK31, SSTV, JT6M).

HB0, LIECHTENSTEIN. Roger/ON7TQ and Marcel/ON6UQ will be active as HB0/ON7TQ and HB0/ON6UQ, September 17-24th. Activity will be on all HF bands on CW/SSB/RTTY/SSTV and maybe PSK32. QSL via their home callsigns. They will put up a 3 element 3-band yagi, a R7, an inverted L (AKI) 40m and dipoles for 80/160m. Rigs are: FT1000MP and TS850S with about 400W.

IOTA NEWS.....
AS-062. Operators Vladimir/RV1CC, Serge/UA1ANA, Yuri/RA0FU and Elen/RV3ACA will be be active from Shikotan Island (RR-15-06), August 10-18th. All operators will sign homecall/0, except Yuri; he will sign RA0FU/p. QSL via their home callsigns.

AS-079. (Cancelled) Tack, JE1RXJ, had to cancel his activity to Miyako Island because of Typhoon No.9 approaching the island.

EU-010. Dennis, M0LSB, will be active as MM0LSB/p from South Uist (SCOTIA HI-06 and IOSA OH-003), Outer Hebrides, August 8-11th. Activity will be on or near the usual IOTA frequencies.
QSL via M0LSB.

EU-011. The special event station callsign, GB0SM, will be activated from St. Mary's, Isles of Scilly, September 24th to October 1st. Activity will be CW, SSB and possibly some Digital. Bands will be 160-6 meters. QSL via the Bureau, direct to G0PSE or by E-mail. G0PSE's address is: Tom Taylor, 19 Derwent Grove, Taunton, Somerset TA1 2NJ, England. E-mail requests for Bureau QSL go to: g0pse@qsl.net
The on-line log will be updated to include the new QSOs AFTER the DXpedition members return home - so don't check to see if you are in the log until a further announcement is made that the log has been brought up-to-date. Web page is at: http://www.qsl.net/gb0sm

EU-170. Lada, OK1LO, will be active as 9A5LO/p from Pasman Island (CIA-34, CI-085 and MIA MC-291), now through August 15th. Activity will be on 80-10 meters. QSL via his home callsign, direct or by the bureau.

NA-046. Adam, K2ARB, will be active as K2ARB/1 from Martha's Vineyard (USI MA-005S), now through August 30th. Activity will be on CW on 80/40/30/20/17 meters. QSL via his home callsign, direct or by the bureau.

NA-052. Karl/N1DL and Joe/KK9TT (signing K5MI) will be active from Marco Island (USI FL-025S, Collier County, Florida) through December 31st. Activity will be on 40-10 meters, CW, SSB, PSK and possibly RTTY. QSL for both callsigns via N1DL direct.

NA-092. Phil, AD5X, will be active as AD5X/p from Mustang Island (USI TX-011S, Nueces County, Texas), August 13-16th. His activity will mostly be on 40/30/20 meters CW, with some SSB on 17 meters. QSL via his home callsign, direct or by the bureau.

NA-111. Ross, K3HR, will be active as K3HR/2 from Long Beach Island until Sep 6. QSL via the bureau.

NA-112. Steve, W3HF, will be active as W3HF/4 from Bogue Banks now through August 13th. Activity will be QRP on 40-10 meters, mostly on PSK or SSB. QSL via the bureau.

OC-NEW. Members of "Team YE1P" will be going to Karimata Island and be active as YE7P between September 1-5th. The team consists of: YB5QZ, YB5NOF, YB2MTA, YB0A, YB0DPO, YB0ECT, YB0JS, YB0KLI and YB1TC (Team Leader and QSL Manager). It is requested that all EU chasers please send donations and QSL requests to IZ8CCW. For Japan please send to JN6RZM, and for NA & SA please send donations and QSL requests to Al-K6SIX. For more information and the online log, please visit the Web page at: http://www.orari.web.set

SA-069. (Cancelled) Members of the "Atacama Desert DX Group" have postponed their 3G1M operation from Santa Maria Island until October.

J7, DOMINICA. Mike, WA2VQW, informed OPDX that "While it is really too early to be making a full, detailed announcement of our future return-trip to Dominica, we are so excited about going BACK to J7 that we thought that we would give everyone a 'heads-up'. The RZS Amateur Radio Club had such a wonderful time last March (2005) in Dominica, that we have made plans to return and reserved several cottages at Sea Cliffs for the March 2006 WPX. Last March we made 75 people very happy on 160 meters and several hundred on 80 meters. Our total QSO number exceeded 6500 for all HF bands, all with wire antennas that 'came out' of a suitcase! We will give full details on our upcoming trip next February."

JW, SVALBARD. Operators Mathias/JW5NM, Ragnar/JW7FD and Peter/JW7QIA will be active as JW5E during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via JW5NM: Box 498, 9171 Longyearbyen, Norway. PLEASE NOTE: Postage to Norway-USA = 1.70 USD and Norway-Europe = 1.5 Euro

JW, SVALBARD. Howard, G6LVB, will be travelling to Svalbard in the next few weeks (current plans, August 26-28th) to do some minor upgrades to a satellite station at: http://www.svalsat.com
He is intending to take some LEO satellite gear with him, so if you'd like to add JW to your DXCC list let him know at: howard@howardlong.com
Howard states,"Despite its northerly location, it has coverage to Canada and the North Eastern U.S. as well as Japan. I will definitely be active on AO-51, SO-50, AO-27, PO-28 (let's hope) and if I have room for SSB equipment I will operate FO-29, VO-52 and possibly AO-7. The ISS never travels far enough North for me to take a shot at it. There are no plans to take any HF gear, whatever that is ;-)."

LIGHTHOUSE ACTIVITIES.....
Jerome, F5ASD, will be active several hours a day from now through August 15th, from the Cap Frehel Lighthouse (DPLF PB-087 and ARLHS FRA-085). QSL via the bureau or direct (QRZ.com).

Look for special event station, IY6GM, to be active from Monte Cappuccini - Ancona (WAIL MA-003 and ARLHS ITA-104), August 12-14th. Activity will be on 40-10 meters CW/SSB. The activity will celebrate the 101st anniversary of the experiments carried out by Guglielmo Marconi from this place. QSL via IZ6CRK, direct (c/o Sezione ARI di Ancona, P.O. Box 122, 60100 Ancona - AN, Italy) or bureau.

Look for IR7LH/p to be activated from Isola Traversa (EU-091, BR-001, MI-137, WAIL PU-028, ARLHS ITA-175 and WLOTA L-0005) during the International Lighthouse-Lightship Weekend.

Mike, IF9ZWA, will be active as IF9ZWA/p from Punta Libeccio Lighthouse on Marettimo Island (ARLHS: ITA133, EU-054, MI-056, TP010, SI025 and WLOTA 1215) during the International Lighthouse-Lightship Weekend (August 20-21st). Activity will be on 40/20/15 meters SSB only.

LX, LUXEMBOURG. Marcus, DL1EKC, will be active as LX/DL1EKC/P from August 10-26th. Operation is planned on the classic bands from 80-10 meters. Marcus will enter the WAEDC as a Single-Op/Low-Power station. There might be some 6 meters activity after the contest.

MICROLITE BALTIC TOUR (2005). Vincenzo, IZ0FKE, informs OPDX that it is getting too hot in Italy during the summertime, and it is time take a break (holiday) and maybe cool off in Scandinavia. He plans to activate a couple of islands and rent cottages very close to the Baltic Sea (just meters of coaxial from the radio to the antennas). This will be a microlite setup (Yaesu FT-857 and wires antennas). His current schedule is as follows:
August 8-13th - Active as OH1/IZ0FKE from Parainen-Pargas Island (Turku Group), IOTA EU-096 (Number 4 on the Top 10 Most Wanted European Islands).
August 13-20th - Active as OH0/IZ0FKE from Aland Islands (Aland Main Island), IOTA EU-002.
Acivity will be on HF SSB and 6 meters with "Live Media Coverage by MMS Pictures 1,2 Megapix." Visit his interesting Web page for more details and maps and photos at: http://www.iz0fke.com
His operations are supported by some DX Clubs in Italy:
Strange Radio Team, http://www.strangeradioteam.com
ARI Frascati Crazy Demon DX Group, http://www.arifrascati.it
Also, Scandinavia support: Alandia Contest Team, OH0AZ; Mr. Peter OH0JFB; TURKU Contest Club, OH1AA; and Mr. Markus. OH1MN.
Chief Operations Supporter and QSL Manager is Alberto, IZ0FMA. QSL via the Italian Bureau or direct. His Web page is: http://www.iz0fma.info

NCDXF ELECTION (Press Release by: Al Burnham, K6RIM, NCDXF VP). At its Board of Directors meeting on August 5, 2005, in Corte Madera, CA, the Northern California DX Foundation re-elected the following officers and directors:
President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Rusty Epps W6OAT
Director Dave Pugatch KI6WF
Director Chuck Ternes N6OJ
Director Glenn Vinson W6OTC
Director Steve Merchant K6AW
Director Ken Anderson K6TA
Director Tim Totten N4GN

Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

P4, ARUBA. By the time you read this, operators Gerard/KE9I (P40QX), Eric/K9GY (P40GY), Mike/AJ9C (P40C), Nancy/KB9NSC, and Phil/N9LAH (P4/N4LAH) should be active until August 20th. They will be active in the WAE CW Contest (possibly as P40QX in remembrance of Leo/N9QX who passed away this year [father of KE9I]).

P5, NORTH KOREA. The following was sent out early in the week by Mike, NA5U, on August 2nd.

The Lone Star DX Association in conjunction with Dr. David Borenstein announces the following:

Dr. David Borenstein, KA2HTV, will be traveling to Pyongyang, Democratic People's Republic of Korea, "North Korea" during the month of August. He has received written permission from the "North Korean" government to operate as P5/KA2HTV during his stay. While radio operating is not the primary reason for his visit, Dr. Borenstein hopes to be able to operate 1-2 hours a day and will stay an additional three days devoted entirely to radio operation. For security reasons, he will only operate SSB and primarily 20 meters. Dr. Borenstein will arrive on August 9th and depart on the 23rd. QSL requests should be sent to KK5DO. Operation from P5 is at the pleasure of the host country, so the DX community should keep their collective fingers crossed that all goes well.

The ARRL has reviewed the Dr. Borenstein's plan, and if and when P5/KA2HTV occurs, it will likely count.

Dr. Borenstein notes that while his operating time will be limited, the success of this operation will lead to further P5 operations in the near future. Much of the equipment being taken will remain there, pre-positioned for subsequent operations.

The Lone Star DX Association (LSDXA) is the sponsoring DX organization for this operation. For information about the LSDXA, visit the Web page at: http://www.dxer.org/lsdxa/index.html.

ADDED NOTES: Bruce, KK5DO, reports (via his Web page) that Dave, KA2HTV, will operate as P5/KA2HTV from North Korea on August 9-23rd. Online logs will not be avialable during the operation, as Dave uses paper logs and the data will have to be entered into a computer when he gets back. QSL via KK5DO: Bruce Paige, P.O. Box 310, Alief, TX 77411-0310, USA. "Please limit your contacts to one", Bruce says. "Many hams were not able to work Ed, P5/4L4FN. Please allow those that did not get P5 before a chance to work P5 now. If you are in the P5/4L4FN log, do not send for a QSL card from this operation". The KK5DO Web page is:
http://www.amsatnet.com/p5a.html
As this bulletin was being written/prepared, word was released on Friday, August 5th, that Dave was now enroute to North Korea. Reports from Dave's neighbor is that he left for China Friday morning at 5:00 AM where he will spend 5 days before taking the next leg to North Korea. Once Dave enters North Korea, he will no longer have internet or cellphone usage. He will be able to operate from 1 hour before sunset until 1 hour after sunrise. Remember that the last 3 days of the trip are extra days that Dave will use for as much operating as possible.

PJ2, NETHERLANDS ANTILLES. Here is an early announcement! Look for Jeff, K8ND, to be active as PJ2T from from Signal Point, Curacao, during the CQ WW 160 CW Contest (January 28-29th) as a Single-Op/High-Power entry. QSL via N9AG or LoTW. Visit the Caribbean Contesting Consortium at: http://www.pj2t.org

PJ2,NETHERLANDS ANTILLES. Operators Jonathan/K9JS, Ian/K5ZM, Lewis/WW4LL and Darrell/K9MUG will be active as PJ2B during the CQ/RJ WW DX RTTY Contest (September 24-25th) as a Multi-Multi entry. Look for the operators to be active before the contest on 160-10 meters CW/SSB/RTTY, September

20-23rd.

QRP MOUNTAIN DXPEDITION. Alain, F6ENO, will be active portable and QRP from the Condamine Summit in the French Alps, August 15th or 16th, weather permitting. Activity is scheduled to start around 1200z until his power cells run out of power. He will be QRP on 40 meters using a HM 2 watts CW transceiver powered by a pack of two 2Ah cells, and a 2X10 meters dipole at 1.5 meters above ground (but at more than 3000 meters ASL). He is limited to 15Kg of gear that he can carry in his rucksack which is prepared for a two day journey (included food, tent and pegs, ice axe, cords, snap hooks etc....). The second rucksack, which is his wife Odile's, is devoted to photography gear. The callsign to be used is the French CW Society (the Union Francaise des Telegraphistes'): F8UFT/p. All QSOs will be confirmed with a special QSL. QSL via F6ICG.

QSL INFO AND NEWS.....
Oscar, EA4TD, reports that the first batch of QSOs logged by the 3V8SM Spanish team is now available online at: http://www.ea4td.com/logs.php The QSOs are valid for the Mediterranean Islands Award, MT-013. Also, the 3V8SM Spanish Team (active between July 26th and August 1st) want to remind everyone that the QSL Manager for this period is EC4DX. QSL by the URE Spanish Bureau or direct to: Javier Prados, C/. Las Flores,9-1�A, Cp. 28.340 Valdemoro - Madrid, Spain. They have recently noticed that some radio forums and cluters are listing others managers. Save your money and use the right QSL Manager.

The TM380 QSL cards for the first A380 aircraft take off celebration have been received over the past weekend from the printer. The first batch for direct QSL will be answered very quickly. Bureau cards will be answered just after. QSL TM380 via F5GNY: Michel Valette, 1 rue des Mimosas, F-31850 Beaupuy, France.

Reports indicate that the CY0AA Sable Island logs (good through August 4th) are now online at: http://www.wb8xx.com/sable/log.htm

Spencer, W6SZG, informed OPDX that he received a nice reply to an E-mail inquiry about the QSL status for the brief Clipperton Island, FO0/F8UFT, operation in March 2005. Maurice, F5NQL, told him the cards are being printed, and all QSLs will be answered shortly.

Effective August 1, 2005, Laurent, W0MM, is the QSL Manager for OH0Z. QSL is "OK" direct or via the bureau. Logs will be uploaded to LoTW later in the year. QSL cards are being designed and should be ready within a month.

SPECIAL EVENT. The Parry Sound Amateur Radio Club will operate special event station, VE3CGPS, on August 20th, from 1400z to 2100z from the Canadian Coast Guard Base located in Parry Sound, Ontario, Canada. Activity is to commemorate the 100th Anniversary of the Base. The station will also operate at unscheduled times between August 21-25th.

SPECIAL EVENT. The special callsign TM2QP will be aired to commemorate 20 years of ATV DXpeditions led yearly by F2QP at the pass of Pailheres, in the Pyrenean mountains, (2000m ASL, WWL: JN02XR), between the Ariege and Aude Departments. There will be two activities conducted for this commemoration.
August 11-15th - The ATV team of Toulouse (F2QP, F5AXPs and possibly others), will be active on both 438 MHz and 1.2 GHZ.
August 10th (1600z) through 14th (1100z) - HF activity will be conducted by the F5KSE ARS (ops F6EPH, F4DTY, F6IHY and F4DQG) on 80-10 meters SSB.
QSL both activities via F5GNY, by the bureau or direct (w/SASE + postage or IRC) to: Michel Valette, 1 Rue des mimosas, F31850 BEAUPUY, France.
PLEASE NOTE: Qne U.S. dollar is not enough to cover the return of a card from France to outside of Europe and Africa.

SV5, DODECANESE. Hubert, DK9NCX, will be active as either SV5/DK9NCX or J45R from the Island of Rhodes (IOTA EU-001, MIA MGD-028), now through August 20th. Look for activity on 160-10 meters, with an emphasis on the lower bands. QSL via his home callsign, direct or by the bureau.

SV5, DODECANESE. Giannis, SV5FRI, will be active from Symi Island (MIA MGD-030), August 15-24th. Activity will be on 40/20/17/15 meters. QSL via address on QRZ.com.

V73, MARSHALL ISLANDS. Jeff, KA1GJ (aka V73GJ), informs OPDX that he will be leaving the Marshall Islands after "four great years of DX." Jeff also mentions that all QSL requests should now go to his new mailing address: Jeffrey Parker, 19 Old Forge Lane, Sudbury, MA 01776, USA.

VP9, BERMUDA. Frank, K3TRM, will be active as K3TRM/VP9 while on vacation from August 20-28th. Activity will be on 80-6 meters, including the WARC bands using SSB, RTTY, and PSK31. QSL via his home callsign, direct or by the bureau. Additional information is available on his Web site at: http://www.k3trm.com/

VP9, BERMUDA. Kyle, WA4PGM, will be active as VP9/WA4PGM from September 9-13th. His activity will include entries in the WAE SSB, ARRL VHF and NA SPRINT CW contests. Outside of the contests, look for him on 160-6 meters CW/SSB. QSL direct with return postage to his PO Box address only: Kyle Chavis, POB 127, Farmville, VA 23901. His Web page is: http://www.wa4pgm.us

VP9, BERMUDA. Operators Al/K7AR, Robert/W7YAQ, Scot/K9JY and Will/N7OU will be active as VP9/K7AR, from VP9GE's QTH, during the CQ/RJ WW DX RTTY Contest (September 24-25th) as a Multi-2 entry. By ops: K7AR, W7YAQ, K9JY, N7OU.

VU4, ANDAMAN ISLANDS (Hamfest in Portblair!). The editor of the "Daily DX" received a letter from Mr. S. Suri, VY2MY, Chairman of the National Institute of Amateur Radio (NIAR), informing him of a possible hamfest in Portblair, Andaman Islands, during the Christmas and New Year holiday between December 25, 2005, and January 10th, 2006 (any 3 days in between). This will also include possible foreign amateurs radio activity from

VU4-land. The reason: It seems that the Indian Government was quite
impressed with the VU4 Dpedition and Tsunami relief operations, as well
as the operators, government and NAIR officials favorable welcome at the
USA's 2005 Dayton HamVention and the 2005 German Hamradio (Friedrichshafen).
NIAR is now conducting a dialogue with the government of India on a regular
basis. The officials are interested in knowing how many foreign Hams would
be serious in attending a Hamfest, as well as granting them special
permission to operate their amateur radio stations during Hamfest and
possibly thereafter. If interested in attending and operating, NIAR
suggests to E-mail Prof. Ram Kapse, Lieutenant Governor of Andaman &
Nicobar Islands, at Port Blair, India, via : lg@and.nic.in
ramkapse@and.nic.in
Please send a copy to NIAR for follow-up and further action at:
vu2nro@gmail.com
Bharathi, VU2RBI, also suggests to send an E-mail to the following address
for more information at: niarindia@hotmail.com

XQ, CHILE (COTA Op). Sergio, IZ6BRN, C.O.T.A. member, will be active as
XQ3/IQ6CC now through December 2005. Activity will be mainly on SSB
17/15/12/10 meters. QSOs are good towards the C.O.T.A. (Carabinieri
On The Air) award. QSL via IZ8DDG, by the bureau or direct to: Orlando
Balisciano, Villa Bisignano 5ªTraversa, 21 80147 Napoli - Italy.

I don't know about the 930, but the 830 (its predecessor) had a small
coil in the antenna circuit which acted as a fuse to protect the 1st
RF amplifier stage. I blew out two of them in a multi single 'test in
about 1983--KW amps feeding separate antennas which were nevertheless
still too close together.

A near lightning strike could also smoke them.

Moron, W1AW does the same thing, it is funny that ALL THE MORONS in
amateur radio complain about K1MAN, and not W1AW.

><SNIP> What a blowhard you are Toad. Ham radio is NOT COMMERCIAL.
>Broadcast radio is. Need I continue, really? You are not actually that
>ignorant are you?

And what dumbass you are, Amateur radio is NON-COMMERCIAL, but
NON-COMMERCIAL IN ALL THE OTHER SERVICE CAN MAKE MONEY, BUT ONLY ENOUGH
TO SUBSTAIN THE STATION. Commercial radio can make a profit, read the
rules you freaking moron.

>The FCC has answered that question. It is UP TO THE CONTROL OPERATOR.

yeah but the NAL seems to me is an attempt by the FCC to control the
content. Simply because the definitions of an information bulletin and
broadcasting is very vague.

Uncle ted:

I am afraid you would have to have the ability to carry on a conversation without me having to align all of my comments up to your comments which prompted them. If you need to, go back, read your posts, read mine--in sequential order, you should be able to figure it out... if not, we probably should not be having this conversation in the first place...

I see that is the style you choose (alignment of each of my comments to your counter-comments), and now, perhaps, I know why you need such a style.

I am afraid you may have to choose others who you can "understand."

Uncle Ted:

Let me try a simple approach for you. Since, by your own text, you dismissed the possibility of Jesus, the ONLY other explanation currently "on the board" is evolution. I accepted debate on what that all involves, such as the existence of aliens, and moved to that platform... why would you wish to go back and debate Jesus, an idea/possibility you have dismissed. I simply don't know, could be here because of "God" and awaiting an angel--or, could be here because of mud puddles and are awaiting an alien... But, it is damn sure one or the other (well, there are other possible reasons, but even fewer supporters of those...)

195. morse code from baby monitor

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-08 08:12:01 UTC
From: Robert <robertmlaws@yahoo.com>
Message-ID: <1123488721.759969.68760@g47g2000cwa.googlegroups.com>
Source record: 50300

I wonder if anyone can throw light on this. I have a Tomy radio-linked baby alarm. I find that when the receiver is plugged into the mains unit I get faint morse code coming from the receiver. Interstingly it seems to be RF pickup from the charger leads - it 'works' even if the charger is not plugged into the mains.

The morse is being sent at about 40 characters per minute. There are long strings of letters followed by pauses. But it doesn't seem to make any sense. here's a typical sample:

ieideaeigeeetiesetneelneetsertedeteeit

I also get the odd isolated digit from time to time in the middle of the letters.

Any thoughts?

Robert

Wrong. I dismissed the bible and the version of Jesus that it depicts.
Whether or not such a person actually existed is another matter, and
it certainly doesn't have anything to do with evolution.

200. Strange object : what is it???

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-08 15:46:05 UTC
From: Rightrik <gaggiorNOSPAM@tin.it>
Message-ID: <3lpd1sF13hskcU1@individual.net>
Source record: 50304

Hello, i have a strange surplus (???) object to understand...

It is a metallic container, sealed, with a "BNC" female on the left and a
"N" female on the right.

Size is 11,5 x 5 x 7,5 centimeters.

On the top i can read this :

FCC-550-230-75-NB1
FSCM: 53779
DATE CODE: 8912
S/N 337

A photo here :

http://www.arifidenza.it/Public/data/ik5wqo/200587224338_piccola.jpg

It should be a sourge arrestor, but i need the exact specifications.
Can this be useful for an amateur radio station or it is completely useless?

Thank you,,
73 de Riccardo IK5WQO

BWHAHAHAHAHAHAHAHAHAHA..Yeah, barbers were so prevalent in his
day! BWHAHAHAHAHAHAHAHAHAHAHAHA
What a dumbfuck you are, Saggytits. Get that much needed Rogaine
yet? Or are you going to get hair plugs?

Oh, and you'd better upgrade your research skills yourself.
According to http://www.barberpole.com/artof.htm, In Egypt, many
centuries before Christ, barbers were prosperous and highly
respected. The ancient monuments and papyrus show that the
Egyptians shaved their beards and their heads. The Egyptian
priests even went so far as to shave the entire body every third
day. At this time the barbers carried their tools in open-
mouthed baskets and their razors were shaped like small hatchets
and had curved handles. The Bible tells us that when Joseph was
summoned to appear before Pharaoh, a barber was sent for to
shave Joseph, so that Pharaoh's sight would not be offended by a
dirty face. Apparently Joseph looked like the picture you claim
is Roger's.
In Greece, barbers came into prominence as early as the fifth
century, BC. These wise men of Athens rivaled each other in the

excellence of their beards. Beard trimming became an art and barbers became leading citizens. Statesmen, poets and philosophers, who came to have their hair cut or their beards trimmed or curled and scented with costly essences, frequented their shops. And, incidentally, they came to discuss the news of the day, because the barber shops of ancient Greece were the headquarters for social, political, and sporting news. The importance of the tonsorial art in Greece may be gathered from the fact that a certain prominent Greek was defeated for office because his opponent had a more neatly trimmed beard.

In the third century, BC, the Macedonians under Alexander the Great began their conquest of Asia and lost several battles to the Persians who grabbed the Macedonians by their beards, pulled them to the ground and speared them. This resulted in a general order by Alexander that all soldiers be clean-shaven. The civilians followed the example of the soldiers and beards lost their vogue. Barbers were unknown in Rome until 296 BC, when Ticinius Mena came to Rome from Sicily and introduced shaving. Shaving soon became the fashion and the barber shop became the gathering place for the Roman dandies. No people were better patrons of the barbers than the Romans. They often devoted several hours each day to tonsorial operations, which included shaving, hair cutting, hairdressing, massaging, manicuring and the application of rare ointments and cosmetics of unknown formulas. The great ladies of Rome always had a hairdresser among their slaves and the rich nobles had private tonsors, as they were then called. Barbers were so highly prized that a statue was erected to the memory of the first barber of Rome.

When Hadrian became emperor, beards became the fashion again -- and for a very good reason. Hadrian had a face covered with warts and scars. He allowed his beard to grow to cover these blemishes. The people of Rome imitated the emperor and grew beards whether they needed them or not.

The fashion changed again to clean-shaven faces. We know that Caesar was clean-shaven. As we will see repeated in history many times, the leaders of the state were the leaders of fashion and the people were always ready to follow the prevailing styles. There are many passages in the Bible referring to the barber profession. Moses commanded that all who recovered from leprosy should be shaved. This was done as a health precaution, because throughout history the Jews have honored the beard as a badge of manhood. To this day, the orthodox Jews have little respect for clean-shaven men. During periods of mourning, the ancient Jews allowed their beards to go untrimmed, but ordinarily their beards were trimmed regularly. The prophet Ezekiel refers to an ancient custom in these words: "Take thou a barber's razor and cause it to pass upon thy head and upon thy beard." The razors of those days were made of flint and oyster

shells.

Looks like your claim that Jesus, who was Jewish, did indeed
have long hair and a beard.

><backpedals, unsubstantiated bullshit and excuses flushed>

That still doesn't change the fact Roger has short hair, dumbass!

BTW, Paul was a faggot just like Jesus.....who got what he
deserved on the cross.

Find that Marshall County WV ARES website yet, shit for brains?

I have a Kenwood TM 701 that has good rf decks, audio etc. The
previous owner botched the button cell battery replacement job.
Radio does not program properly. Can only change freqs with the mic
up/down buttons.

I would like to find one that has toasted rf decks (most of them) but
has good logic Or just the front encoder board.
Willing to sell for parts as a last result if I get no answers for
k-ball unit.
Please e-mail to ron@onwisconsin.com

Thank you.

Anon:

To tell you the truth, I have had both long and short hair. I have much seen it as I do the difference between a conversation on 10 meters and one on 11 meters, they are both alright...

Some people lacking real self-esteem always find some element to which they can attach themselves to and feel superior or better than another or a group. This only appears very strange to one who views them on their interests, thoughts, ideas, motivations and ability to be interesting...

Like that old TV ad, "We don't want tuna with good taste, we want tuna that tastes good!" I'll be the judge of someone who "thinks his/her self interesting", what they think just isn't a concern of mine, in that area... strange they can consider it to be any other way...

John

First, Woger tries to pretend that the mere idea of the existence of barbers during Jesus' time is laughable, by saying:

: BWHAHAHAHAHAHAHAHAHAHA..Yeah, barbers were so prevalent in his
: day! BWHAHAHAHAHAHAHAHAHAHAHAHA
: What a dumbfuck you are, Saggytits. Get that much needed Rogaine
: yet? Or are you going to get hair plugs?

And then, in a puzzling non-sequitur, Woger continues with:

: Oh, and you'd better upgrade your research skills yourself.
: According to http://www.barberpole.com/artof.htm, In Egypt, many
: centuries before Christ, barbers were prosperous and highly
: respected. The ancient monuments and papyrus show that the
: Egyptians shaved their beards and their heads. The [SNIP]

This latter statement underlines that fact that short hair (and barbers) had been around for centuries prior to the time of Jesus and St. Paul, making the reader wonder just what Woger's point could be?

It would seem that Woger was arguing with himself.

On second inspection, one can see that the last part of Woger's post is a cut and paste job which was tacked onto an earlier post. Apparently, Woger was too lazy to read the new, combined text, and he was completely oblivious to the actual meaning of what he had just created.

The post is therefore nothing more than a redemonstration of Woger's intellectual laziness.

Now we know why Woger never made the DeVry Correspondence School's Philosophical Debate Team, in spite of the fact that he resembles Ezekiel.

The future of Amateur Radio depends on us, the old timers, to attract, elmer, encourage, and train new folks in the amazing privileges we have. CW testing has nothing to do with that.

I think if one knows he code is a true amateur radio operator. One never knows when the code will come in handy. Although, I must admit I am very lax on using it. I haven't used it for years, but I am trying to brush to on it. I find it fascinating.

Perhaps because the ARRL/W1AW actually provide a usable service to
Amateur Radio...Not to mention that at least W1AW keeps it's operations
close to the band edges where few folks venture...K1MAN plops down in
the middle of the band and other operations be danged.

No matter what any of us think in a "purist" sense, even with code, amateur radio has certainly changed over the decades. I'm a purist in other areas. Like reading books instead of computer screens. And using film along with digital imaging.

There was a time when one almost was certainly so knowledgable about electronics as to be at the EE level of learning. And a *lot* of discrtionary income. Today any bright person can learn the antenna theory and go purchase a set with relative pocket change.

We may have to rethink what's at the basis of Amateur Radio. Is it the fraternity?
Is it the public service? Is it the skill set? Or is it just the frequencies? And how can be best support the art & craft we know, maintain it, and continue as a unique and special medium of communication.

Yes, I'm only a Tech. But observing changing times and making the best and providing direction are important considerations. That makes it more important than ever to let your voice be known to the FCC on these matters. It's just like voting. Be heard and you will be influential.

My personal suggestion:
a) keep code, but 5wpm @ General & 20wpm @ Extra
b) Reallocate 220, 440, & 144
c) give Tech 6M, and leave the rest the same.

This would provide a lot of practical versatility and keep the CBers out.

Just my 2c,

Collin
KC8TKA

I'll add to that.

True amateur radio operators can build spark gap receivers and
transmitters from scratch using materials they have in their junk boxes.

Doesn't matter, Interference, is interference. it doesn't matter if
they are providing a service or not.

>Read the rules yourself...And try to not drool on them as you do.

I have read the rules and there is a double standard on the definition
of what non-commercial is

>It's not vague to anyone except for those Junior D-J types, such as yourself, as to what
they are.

No, the one's don't understand are those who try to put more into the
rules then what is here. For example the idea that information
bulletins can be opinionated, yet there is no rule that states that,
nor is there any order from the FCC that states that.

Riccardo,

It is an electrical surge arrestor, but I can find no exact specifications.

Part Name: ARRESTER,ELECTRICAL SURGE
53779 is the cage part # .

Federal Supply Class (FSC): 5920 - Fuses, Arrestors, Absorbers, and
Protectors

Associated Part Numbers

FCC-550-230-75-NB1

29-2733589-5

29-2733589-5

29-2733589-5

Can you take a picture with the cover plate removed?

Hello Ace, thank you for information.
I am waiting an answer from the manifacturer to have the exact
characteristics of this object.
I cannot open the cover plate because it is soldered AND have screws...

Thank you,
Riccardo IK5WQO

It's the receiving station's inerpretation of what "interference"
is.

Obviously a significantly higher number of people consider K1MAN to
be "interference" than they do W1AW. And for good reason.

> >Read the rules yourself...And try to not drool on them as you do.

Nope.

The ARRL does not refer listeners to it's website for it's paid
services.

K1MAN does.

It really is THAT simple.

not at all obvious many possible explainations exist for complaining
about K1MAN and not about W1AW

The rules state and an amateur station cannot make money direct or indirect. when a shortwave listener hears W1AW their going to go to the internet and go to yahoo or google and look it up which leads them directly to the ARRL site. that's called INDIRECT as to K1MAN's DIRECT.

>You're the one trying to "...put more into the rules then (sic)
>what is here."

no I'm not, I have been stating there is no rule and regulation nor final order from the FCC that states an Information bulletin can not be opinionated. If the FCC didn't want Information bulletins to opinionated then they would of stated in the rules, they have that power.

W1AW does NOT "make money", direct or indirect.

The American Radio Relay League does, which in turn funds W1AW.

But then you could also say that my employer "funds" K4YZ in the
same way.

> >You're the one trying to "...put more into the rules then (sic)

So far, no one has abused the rules in such a way as to argue what
"information" means. The FCC has pretty much assumed (erroneously,
obviously...) that the average person knew the difference.

"Opinion" is not "information"...it's opinion. And offering your
opinion in a one-way transmission is broadcasting.

K4YZ:

Well there ya go, ya figured it out!

K1MAN (the licensee) does NOT make any money! Glen Baxter (the man) does!

Same thing, good argument you posed, the FCC shouldn't hassle baxter
anymore then they do arrl/W1AW.

Can you do it for me and tell them,
it is high time to abandon Morse code, for amateur license tests.

If you apply as a singer in an opera,
would you like it when they test your ability to stutter?

Here's a fuller quote: "Doth not even nature itself teach you, that, if a man have long hair, it is a shame unto him? But if a woman have long hair, it is a glory to her: for her hair is given her for a covering."

That's not hard to understand at all, Woger, and yet you seem to be having difficulties with the ideas that St. Paul tried to convey in his letter. The quote is not out of context at all, unless failing to quote the whole New Testament is the context which you seek.

Also, the original Greek text used the word "ATIMA" when describing long hair. That word can be translated as "shameful" or "vile," where vile refers to the offensiveness of a dead body. In fact, "atima" is used in the latter way in several other biblical passages.

So it is likely that Paul would have thought that your hair reminded him of the unseemliness and offensiveness of a dead body

We, on the other hand, know that it only smells that way.

If that photo is 'not' Roger as so claimed, why then is he going to the effort of having it removed?
A previous poster was right about Roger in that the more vehement the denial, the more veracity there is to the accusation.

"John Smith",

Have you ever listened to a K1MAN 2 hour "bulletin"???? His bad mouthing of his fellow hams, the FCC, the ARRL and "opinions" about his so called service to ham radio is nothing but a self aggrandizing pat on his own back.

He would plop down right on top of on going communications, then send out "felony affidavits" to those that told him to get bent. Fully indicating he had indeed been listening before the broadcast began. He should have sent himself one of those cheaply copied useless pieces of paper.

Mr. Baxter basically has made a total laughing stock of himself to any ham that has the ability to reason and think. Obviously Toad can't do either.

That's my opinion and I'm sticking to it.

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for

the head at worship. They have several verses discussing what should not be worn during worship services, probably referencing those rags they wear on their head in the desert (like they do today). His taking the verse out of context shows how stupid he really is and like all fake xtains, wants to use it for something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

>
> (Image restored after Woger had it removed. Not Woger, eh?)

Wrong again, Saggytits. But you do stay consistent in being wrong.

Original link (now dead, thanks to Woger's fear) restored to this
followup:

> http://img357.imageshack.us/img357/7599/ab8mq08033of.jpg

But, of course, we want to see not-Woger and his Yaesu wall chart, so
the image of not-Woger has once again been restored to the net and can
be found (until Woger has it removed again) at

http://img358.imageshack.us/img358/3138/ab8mq08033am.jpg

The fact that the image disappears only after it is mentioned here is
highly significant.

The image is also hosted elsewhere where it can't be removed, but the
Image Shack location is more fun to quote. Check with
images.google.com for the other locations.

And remember that the qoute of the week is: "If a man have long hair
it is a shame unto him." -- Paul, I Cor. 11:14

262. IZ4GQA - Italian Red Cross first ham radio station activation

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-10 13:45:41 UTC
From: Mattia IW4EKY <iw4eky@REMOVEthisWORDSlibero.it>
Message-ID: <42fa0547_2@news.isis.de>
Source record: 50366

Dear friends,
I'm glad and proud to announce that on October 2005 will be activated the first ham radio station of the Italian Red Cross in all its history: IZ4GQA.

This station has been planned by the Radiocommunications Technical Office for Emilia Romagna region of the Italian Red Cross: on the english pages of our website (http://radio.cribo.it) you can find all the informations related to our work and activities, timetables and frequencies. You can also subscribe a free newsletter to be promptly informed on IZ4GQA's radio activity.

For further informations you can reach us through our website's "Contact us" section (e-mail, phone, fax, skype):

Please share this message as much as you can to your ham friends, stressing the uniquness of this event as we hope to meet you all on the air.
Webmasters wishing to add this news inside their websites can download special banners from our website.

Thanks for you reading, best DXes and 73!

Many things involving amplifiers of different sorts are prone to RF pickup
and are good demodulators. In my 60 years of interest in electronics I have
heard wierd things at times, such as the the projection equipment in my
local cinema picking up a local coast station for shipping, the DJs gear at
a night club with sound from a taxi radio, and strangest of all was in a pub
which was in the shadow of the masts of said radio station, when a customers
metal tankard was placed on a wet beer mat on a metal surface and we clearly
heard the coast station calling ships !
Interesting life is'nt it !!
Mike.

>
> Here's a fuller quo (more like "here's more Saggytits Lee
bullshit")

That's the same verse I was referencing, DUMBASS. Learn to read,
kook.
All one has to do is push your buttons and you are so easy.

> That's not hard to understand at all

It must be, since you took the verse that follows out of
context. And no matter haow many times you say it, I'm still not
Roger, Saggytits the NostraDUMBASS! Now go take text out of
context like a good little Nazi, fake Xtian. The chapter is
still discussing what is worn (or not worn) during worship, not
at any other time.

> Also, the original (More lies flushed)

{original text restored, not some made up bullshit Saggytits
likes to do, as he did with his UN "International Radio
license".)

but fails to mention (as usual his sloppy, biased "research" is
like him, flawed) that Chapter 11 deals with the Covering for

the head at worship. They have several verses discussing what should not be worn during worship services, probably referencing those rags they wear on their head in the desert (like they do today). His taking the verse out of context shows how stupid he really is and like all fake xtains, wants to use it for something it was not originally intended. The Hebrews, like other Semitic people, regarded LONG HAIR on HEAD and chin as a distinctive MARK OF MANLINESS. Absalom's beauty was attributed to the luxurious growth of his hair (2 Samuel 14:25, 26). This symbol of pride and beauty was shaven as a token of mourning. Non cutting of the hair was part of the vow of the Nazarites (Judges 16:17)Black hair was especially prized (Cant. 5:11). The long hair of men, especially in New Testament times was gererally exceeded in length only by that of women. So looks like they did indeed have long hair, but not in the case of the Egyptians or the Romans.
(Source: Holy Bible, King James version)
{end restore}

> So it is likely

Prove it, kook boy. It's even more likely that Jesus, his leader had long hair, since he was born in Bethlehem. And following the Hebrew tradition of long hair and beard as a mark of manliness. (Unlike you, which you really should go get the rest of your sex change operation so you can be a true woman)

But you never back up what you say, do you, Saggy?

> projection snipped)
> We, on the other hand, know that it only smells that way.

Projecting again, Saggytits, since you never bathe? How would *you* know how another man's hair smells like? Some sort of freudian slip, or are you like Marky, Brian, bisexual? Sounds like you are jealous since your hairline (guffaw! what hairline?) is almost at the back of your scrawny neck.

>
> (Image restored after Woger had it removed. Not Woger, eh?)

Wrong again, Saggytits. But you do stay consistent in being wrong.

Source record: 50384

Anyone install a 2/440 rig in a 2005 Silverado? I will be soon and was just wondering if anyone had been through it and had any advice that may help. Where you can route power cables or coax throught the firewall. Perhaps a good place you can pick up power form under the dash instead of going to the battery. If I decide to roof mount an antenna, what is the best way to make the hole for an NMO mount in the roof? Any experience with HF in the 2005 Silverado? Noise problems? Any RFI getting into any components of the trucks electronics?
I have an IC-706 and a screwdriver antenna I may want to use in it. I had no problems in my old 1990 truck but not much electronics in it compared to the 2005 (the employee discount GOT me)!! Thanks, Mike K7MH.

So what? It hasn't been legal to operate a spark transmitter for a couple generations. You don't even have to be a ham to build, just pick up some of the early books and follow the instructions. The receivers of that era would be useless in today's congested RF spectrum, as well.

On the other hand if you can design and build a state of the art communications system without outside help, that is something to brag about.

I do wish people would not refer to me as a 'ham'.

Amongst the very few things I am proud of is that I am a true Class-A Radio Amateur.

Incidentally, as a British pensioner, my annual licence is free. When requested I just have to confirm I am still in circulation. Same applies to riding on buses when mobile or not mobile, sober or not sober.

Arn't you American Amateurs envious?

Reg, G4FGQ.

I can't imagine why we should be. I've been a ham for nearly 50 years (Extra class for more than 40) and have never paid a cent for my license (or my commercial FCC licenses, for that matter). Can't recall the last time I rode on a bus. But the 17.5% tax I'll pay on everything I buy in your fine country during an upcoming trip will be my small contribution to your continued enjoyment of your lifestyle. Then I'll return to Oregon, where we have no sales tax and I can ride on the light rail for a couple of hours for a bit under a pound. Even for those of us who aren't pensioners.

Roy Lewallen, W7EL
Ham.

What frequency? The last system I worked on was a 70 MHz IF with a
90 MHz upper limit for a dual channel telemetry receiver with a
diversity combiner all done in the digital domain.. It was the
L3-Com/Microdyne RCB-2000. It also had a 70 MHz IF output that was
regenerated after the FIR filters to feed wideband logging recorders for
later analysis. Multiple IF bandwidths and Video bandwidths. It was
controlled by a custom GUI under embedded NT, and had IEEE-488, RS-232
and Ethernet ports for remote programming and control. All for just
$80,000 per radio.

The DR-2000 was the same basic radio chassis, but it was just single
channel receiver.

BTW, that was a joke. Being retired, I don't know what the upper
frequency limit is for DSP sampling nowadays. I was using one
million samples per second systems at Intel ten years ago.
They worked well at 455 kHz not only for filtering but for
decoding/detection.

Strangely enough, I never used anything except a superhet.

> What's an IF ??

455 Khz on everything I used back then. With no RF amp,
my S38 would receive the same signal on two different
frequencies on 15m, sometimes eliminating an interferring
signal in the process.

We have enjoyed the redneck jokes for years. It's time to take a reflective look at the core beliefs of a culture that values home, family, country and God. If I had to stand before a dozen terrorists who threaten my life, I'd choose a half dozen or so rednecks to back me up. Tire irons, squirrel guns and grit -- that's what rednecks are made of. I hope I am one of those. If you feel the same, pass this on to your redneck friends. Ya'll know who ya' are...

You might be a redneck if: It never occurred to you to be offended by the phrase, "One nation, under God."

You might be a redneck if: You've never protested about seeing the 10 Commandments posted in public places.

You might be a redneck if: You still say "Christmas" in! stead of "Winter Festival."

You might be a redneck if: You bow your head when someone prays.

You might be a redneck if: You stand and place your hand over your heart when they play the National Anthem.

You might be a redneck if: You treat Viet Nam vets with great respect, and always have.

You might be a redneck if: You've never burned an American flag.

You might be a redneck if: You know what you believe and you aren't afraid to say so, no matter who is listening.

You might be a redneck if: You respect your elders and expect your kids to do the same.

You might be a redneck if: You'd give your last dollar to a friend.

God Bless the USA!

I would have loved to stick with my assigned call when I moved
from TX to CA in 1971 but the FCC forced me to give it up. Now
they have charged me the social security money they gave me to
get it back.

The reality is that Wogie is lying again, as usual. Wogie *has* no photos of
Stagger Lee. On the other hand, the photo that Stagger posted IS Roger.
How many times have you had the photo taken down, Wogie? Two? Three? Four?

There are lots more where that came from.
..
Roger talks tough. He doesn't know the meaning of fear, but then again he
doesn't know the meaning of most words.

Dee:

Redneck? Hey girl, that is a hickie on your neck! Isn't it? <grin>

Yes, not ashamed to have a deep allegiance to my country, my fellow citizens, my forefathers who shed their blood for my freedom, or the principles this great nation was founded upon. I may disagree and argue vehemently with another, but I would just as soon turn and risk life, limb and property and stand shoulder-to-shoulder to oppose our common enemy...

I am proud to be an American, I am proud of my fellow Americans--I would like to effect changes which could make me proud of my public servants, but they seem to have lost value for having those they serve respect them...

I think most here, most likely down to the last man/woman hold this country and its' citizens in such high reverence as I, and if tested, they would demonstrate it... the Star Spangled Banner still brings a swelling of pride in my chest and a tear to my eye. Watching a classroom stand and pledge allegiance to a flag which represents America, the giants of men which were our forefathers, and all Americans almost drops me to my knees with a physical weakness caused by intense emotion...

You know what I mean girl, I am a redneck...

Warmest regards,
John

Well for myself I wouldn't have picked the spaghetti soup group of letters I had to
start with. But after retiring I thought I might as well get a little vain... That's all
that left after a while. he he.... So for a whopping $20 I got a vanity call after
moving to a new call area. I thought in my second life after heart surgery, back surgery,.ect. I might as well have a little fun. After all isn't that what a
hobby is for? I'll get 10 years out of my new call but I can't get that far on $20 worth of gas these days. eh. Now all I need is about $20K for that new $13,000 ham radio and a tower and antenna ha ha.

What ever is fun is ok. Even if it means dumping a 25 year old call sign.
Let me see Ham radio so varied what next.
Been there done that.... DXCC... RTTY... OSCAR.,.. PACKET...
oh and of coarse RAG CHEW codey slow no problem getting in the time for that award. Contest... Special events... Homebrew...
and a cold brew...

Oh BTW it isn't the one with the most toys... It's the one who gets to play the most with their toys. Have fun everyone and don't take it too seriously or you get an ulcer and high blood pressure.

Cheers 73 ol' WB9SMX new K4TWO when the papers arrive. ;-)

It seems odd to me that you call them "Vanity Calls" over there and that they were rare. A very large percentage of VK's have them here, they cost no extra, and if they have any title, it would be personalised call. Look the through the callbook, many have their initials. I had my initials (mixed slightly) with VK2JBG, and now a two letter call of my choosing VK2QQ and even my Outpost Radio (Royal FLying Doctor Service) call was 2NUT, at my request. I don't know why Americans seem to be so polarised about vanity calls, they've always existed here.

Markie's an insufferable creep, just like his buddies Lennie,
Brain and Toiddie. What a bunch, eh?

Markie's been flattering himself as Self Appointed Cutter Of The
Irrelevent lately, no doubt from the latent "Super Moderator" psyche of
his.

Markie is all about "defending free speech", but just like his
other semi-literate buddy, Toiddie McDocherty, overtly works to try and
censor others comments. IE: every post where he put "cuting"...

Each "cut" is censorship, and more evidence that Mark Morgan is a
hypocrite of unlimited bounds.

Steve, K4YZ

I don't think we are particularly polarized by vanity calls. Although some
are annoyed by the fact that one can ask for and receive "out of area"
calls. However those same people who are annoyed by that are also annoyed
by the fact that we don't have to change calls when we move to an area
different than our current call sign would normally indicate. Most people
just ignore those who are annoyed by such little things.

Assholes like you are the reason why I abandoned ham radio years after earning a general class ticket at age 13. If I wanter to associate with foul mouthed jerks like you, which I don't, I'd hang around in cheap bars.

What is it about ham radio today that appears to attract the very lowest end of the food chain? Perhaps it's time that the license requirements were elevated to include a comprehensive knowledge of civilized behavior.

Hi Everybody

I hope this isn't the wrong place to ask. if it is, please let me know where I should post.

I have a Kenwood TS50 installed on a boat with a SGC autotuner. The tuner is grounded to a dynaplate.

I also have a 2000watt inverter/charger built into the boat for ac power creation from 12v batteries.

Something strange is going on and I jusr don't know where to start trouble shooting.

When I transmit on frequencies like 14300MHZ usb, no problem.

If I transmit on 7628 LSB 100watts the FET's in my inverter blow up! As soon as I key the mike I hear a loud pop and there goes another fet.

I've changed them twice now and since the inverter is bolted into an awkward spot and weighs 70 pounds (it's all transformer), removing the inverter and changing them ain't fun.

Tonight I went so far as to disconnect (as in unplug) the AC supply to the inverter and switch it completely off. As in no LEDS lit, everything off.

Yet as soon as I keyed the mic, POOF. The fets just blew apart.

Any thoughts as to what might be happening?

FWIW, the coax from radio to tuner runs within about 2 feet of the inverter, the radio and tuner are powered from the batteries which power the inverter. So the inverter and radio share Pos. and Neg.

I can only think of a few ways this might be happening:

1) Radiated signal from the coax leaking into the inverter.
2) Radiated signal passing into the inverter via the shared positive or negative feeds.
3) Some weird ground loop issue.

I have no ideas as to how to diagnose this and trouble shoot it without having to replace fets everytime. And that's a big job.

Any thoughts would be greatly appreciated.

345. Re: Removal of Morse Code from Amateur License Requirements...Vanity call wheeee

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-14 02:50:57 UTC
From: Rick Frazier <rickf@rickfrazier.com>
Message-ID: <42FEB19E.7AAABA57@rickfrazier.com>
Source record: 50249
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

Though this appeared in the Rec.radio.equipment newsgroup and is being broadcast to several others that may or may not really be appropriate for this diversion from the original subject, I can't help but responding....

When it comes to a vanity call, the relative pittance we are charged for a call that makes sense to us (whether because of an old call in another location, or because it's easier to transmit in morse, or even fits some other plan we may have) is worth the money in my opinion, and I imagine to anyone else that took a vanity call.

For myself, I chose my current call because the people at FCC didn't give me a call in my area on an upgrade from Tech to Extra, despite an address update way prior to the examinations. Somehow, they managed to show correct postal box address and city, but my state as California (where I used to live), yet the zip code was correct, so our "wonderful" postal service forwarded the license upgrade to my PObox, yet they gave me a California call....
Moving to a vanity call that indicated Hawaii was a no-brainer for me, and I'd be willing to pay 20 bucks a year to keep it, so the increase in costs still make sense to me.... I know I may get a lot of flak from some people because of this, but it's all what it's worth in my mind.... It is a hobby, and thing that are outside "standard assignment" can be expected to cost a bit more. In my mind, it would certainly be worth less than 2 bucks a month to have a call that makes sense to me in place of one that is from an area where I no longer live.

Thanks

I can't offer much help, but I would think that you ought to try this with a dummy load instead of the antenna; Dummy load hooked directly to the radio.

If nothing else, it would tell you whether you have a DC voltage/grounding problem, or an RF problem.

Here's what I think is happening.

On 40 meters, the path from the tuner back along the outside of the coax to the rig is about as attractive to RF as the dynaplate, so a good fraction of the RF current being fed to the antenna goes that way. On 20 meters, the dynaplate is relatively more attractive due to a combination of the dynaplate impedance, antenna input impedance, and coax length, so more goes to the dynaplate and less along the coax.

The RF current goes along the outside of the feedline to the rig, over the outside of the rig, and into your inverter via the power leads. There are a couple of ways you can reduce the problem:

1. Put one or more good current baluns (common mode chokes) in the coax feedline. If you just put one in, I'd put it at the rig, to force the current there to be minimal.
2. Put a common mode choke in the power cable to the rig. Because the wires are pretty large, it's probably not practical to wrap multiple turns around a single ferrite core. So get some large clamp-on cores you can clamp over both conductors at the same time. It's likely to take a dozen or so, or more depending on the type of ferrite. I recommend type 43, or 70-series if you can find it in clamp-on cores.
3. Apply the same kind of choke to the inverter power leads from the battery.

What you're doing here is to create a high impedance to common mode current along the path from the tuner to the inverter.

If you'd like a quantitative measure of how bad a problem you've got and how effective any solution is (or if this is really the problem), get a clamp-on ferrite core you can clamp over the coax line or the power leads to the rig. Wind about 10 turns to make a transformer secondary winding -- the primary will be the wire passing through the clamped core. Connect the winding through a series capacitor of around 0.001 to 0.01 uF to a shunt diode (any small signal type will do), and then to a voltmeter:

```
----| |----.----
cap |
from winding _|_ to meter
diode /\
|
-----------.----
```

Sorry, I'm not very good with ASCII art. . .

Clamp this onto the coax or over both power leads. The meter reading
will be approximately proportional to the amount of RF current. The
object is to minimize it.

Could be any of the three paths, or more than one at once... conducted
vs. radiated is an interesting question, but perhaps a bit academic.
All of your equipment is going to be in the near field of the
antenna/ground system, I think, and so you're going to be ending up
with RF pretty much everywhere.

If I had to guess, I'd guess that your inverter may have some sort of
half-bridge / push-pull switching circuitry. The RF getting into the
system is switching both sides of the push-pull drive into conduction
at the same time (a few volts of RF on the gates of the FETs could do
it) and shorting the supply through the FETs.

The fact that the RF was able to blow the FETs with the inverter
switched off suggests to me that it may be a fairly direct, local
pickup of RF onto the gates which did the damage. With the inverter
switched off, its controller wouldn't have been driving the FET(s) at
all.

As to how to prevent it from happening again... my guess is that your
best bet is going to be to add heavy-duty RF filtering to both the DC
inputs, and the AC load, and make the invert case as RF-tight as
possible.

I'm not sure whether it'd be possible to add snubbers, ferrites, etc.
on the FET gate leads themselves to keep the RF from triggering
them... the inverter design may require driving the FETs quite fast to
achieve proper control of the voltage. Figuring this out would
require a schematic and some study of the design.

It might be worth sniffing around inside the inverter with a grid dip
meter, with the power completely disconnected and everything
unplugged. You might get lucky and find a portion of the circuitry

that's actually resonant at around the frequency at which you're
having trouble. If so, spoiling the Q of this resonance might reduce
or eliminate the problem.

Since my boat, like many is made of fiberglass, obtaining a
ground/counterpoise is a tad tricky. Steel boats don't have a problem
but glass boats do.

So what is commonly done is a dynaplate is added to the boat. It's
basically a highly conductive copper plate that is through bolted to the
hull and is in contact with the sea water under the boat. There's a stud
on the dynaplate to which you attach a copper foil coming from the tuner
ground stud.

Plenty left...Just none of it pertained to YOU.

Instead of "...or even people in the NG", you SHOULD have wrote
"...or nothing that even resembles me".

Restoring what Markie was "cuting" for comment.

W4NTI said:

We have enjoyed the redneck jokes for years. It's time to take a
reflective look at the core beliefs of a culture that values home,
family, country and God. If I had to stand before a dozen terrorists
who threaten my life, I'd choose a half dozen or so rednecks to back me
up. Tire irons, squirrel guns and grit -- that's what rednecks are made
of. I hope I am one of those. If you feel the same, pass this on to
your redneck friends. Ya'll know who ya' are...

A-yup.

You might be a redneck if: It never occurred to you to be offended by
the phrase, "One nation, under God."

I make it a point of saying it just a little bit louder hoping I
induce a stroke in some ACLU twit.

You might be a redneck if: You've never protested about seeing the
10 Commandments posted in public places.

People who protest them are the same one's who usually aren't
anywhere near a church unless it involves a wedding or funeral...All
that "don't lie, don't cheat, don't steal" stuff make's em nervous.

(Probably why pagans don't have any "commandments"...)

You might be a redneck if: You still say "Christmas" in! stead of
"Winter Festival."

Or "KAWANZAA!

You might be a redneck if: You bow your head when someone prays.

Markie said he "cut" everything that didn't pertain to anyone, yet just 3 days ago he was talking about respect for others religion...Guess that was only while it was productive to his rants to do so.

You might be a redneck if: You stand and place your hand over your heart
when they play the National Anthem.

I lock up.

I still can't sing it all the way through as it makes me teary-eyed.

Again, another "problem" I am sure Markie doesn't suffer.

You might be a redneck if: You treat Viet Nam vets with great respect, and always have.

If I see a guy with any kind of "Been There" patch, I'll ask them if they were...I give them my thanks and a hand shake.

You might be a redneck if: You've never burned an American flag.

Hmmmmmmmmmm....Whelp, have to own up to this one...Of course it was a Ceremonial Retirement, and the tattered flags were being "retired" from service. A very solemn event.

You might be a redneck if: You know what you believe and you aren't afraid to say so, no matter who is listening.

Hence no anonymous remailer for me.

You might be a redneck if: You respect your elders and expect your kids to do the same.

Markie can't wait to share body fluids with a REAL "female" so he can raise kids to lie and cheat. Said so himswlf.

You might be a redneck if: You'd give your last dollar to a friend.

What's a dollar...?!?!

God Bless the USA!

OOOOOOOOOOOOOOOORAAAAAAAAAAAAAAAAAAH!

Steve, K4YZ

364. How long to fill up a log-book and why?

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-14 16:16:39 UTC
From: Polymath <aiyr.r.bean@lycos.co.uk>
Message-ID: <1124036199.096260.32510@g49g2000cwa.googlegroups.com>

It took me 18 years to fill up my first log-book,
and in the subsequent 17-year period I have only
half-filled my 2nd, despite following all the rules
and regs to the letter as regards noting down all
CQ-calls and harmonic tests.

I think this is because the _REAL_ Radio Ham, the person
woth having a chat to, is few and far between, with the
net result that I spend more time listening than I
do TXing. Oddly, with the 2M rig left tuned to S20, it
is surprising the number of recent licensees who
act as a closed user-group, seemingly calling their
previously-10-4-buddies and no-one else.

Perhaps with the advent of the CB-style of licence (the
M3 here in Britland, probably the no-code techy in Yankland)
it is fated that I will never complete
the 2nd half of my 2nd log-book?

What are the experiences of the rest of you. Has the influx
of INCURABLE CBER's dampened your ardour?

Come on Gareth, we all have opinions on CBers, M3's, no coders and the
dumbing down of the tests. Its not going to make a jot of difference what
any of us think, the fact is its here, we've got it.
Now posting up this same sort of rant every other day is just going to make
you unpopular. Learn to live with it or find another hobby. Im sure you
have skills that you could help your local M3's with, so instead of putting
them down, try and bring them up to your standard.

May I remind you of your own words:

"The technical excitement motivates Radio Hams to compete
with each other to determine who has designed and manufactured
the best-quality station. This competitiveness is found in DXing,
competitions and fox-hunts."

Given that your station will no doubt be such a "best-quality station" why don't you go in for a contest - the Worked All Europe CW is currently on - this gives you DXing and competitions both at the same time and uses those CW skills which you advocate. In any major contest you should be able to easily fill your log in a weekend and get DXCC to boot.

But I'm surprised that you haven't written your own software for a computer logging program.

Or perhaps your station isn't yet in the "best-quality" class - but I guess the truth is that the operator isn't.

==========
Thank you for the above info. Now understanding the situation better , it would perhaps be beneficial to have a 'tunable counterpoise' between the transceiver ground connection and the dynaplate.
It is in fact an adjustable series tuned circuit comprising a air-spaced capacitor and a roller coaster or switch-tapped type of variable inductor which is tuned for minimum impedance with the aid of an integral RF current meter (as described by Roy ,W7EL) Tuning is done for each band by maximising the current in the counterpoise at low power.
For the latter it is best to use a sensitive microamp meter ,its sensitivity adjustable with a potmeter
Such a tunable counterpoise can also be used very well in a high rise apartment where there is no good RF earth .
The end of the counterpoise is then not connected ,but since the RF voltage can be considerable ,the free end should be well insulated.
Such a device can be home brewed ,but a version with a switch allowing for several inductor taps is (or at least was) available from MFJ it's their model MFJ-931 ; Artificial RF Ground.
It was (in the early 1990s ?) described in QST , by Doug DeMaw , W1FB (sadly now SK)

I have home brewed the above type of artificial ground made with a roller coaster inductor.
For the HF bands the inductor is to be adjustable between approx 0.9 to 43 microHenry ,with the variable capacitor being 200 -250 pF max.

Got what right? Dropping CW? The reason they are dropping CW in Italy is
they can't splatter in CW.

Dan/W4NTI

```
Sending morse code with a signal light is faster than signal flags,
especially at night.

DX Bulletin No. 722
BID: $OPDX.722
August 15, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL DX Bulletin, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K5LBU, W6SJ, K7ZUM, K8YSE, N8MR, W8UVZ, 9A7K, DJ7IK, DL1EK & The DX News Letter, EA1CNF, F5CWU & La Gazette du DX, F5NQL & UFT, HP1AC, I1JQJ/IK1ADH & 425 DX News, IW4EKY, IZ7ATN, JI6KVR & JA-IOTA Islands News, JT1CD, LU9ESD, PS7AB, SP5XSD, SV1DPI, SV1IW and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th/August, through Sunday, 14th/August there were 200 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, JA, JD/o, JT, JW, JY, K, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZC4, ZD7, ZD8, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. The Association of Tunisian Scouts are organizing the "37th World Conference of Scouting" as well as the "9th Forum of the Young People of Scouting World" for the first time in an Arab country between September 5-9th. For more information, please visit the following Web page:
http://www.scouts2005.org.tn
During this important event, the Tunisian Scouts Radio hams have organized

a special ham radio activity for the first time for the World Conference of the Scouting which will be activated by scouts and chiefs scouts, Tunisian and other radio hams. Your participation will be enormously appreciated during the following three principal phases (events).

*Since August 7th, the following seven club stations of the Tunisian Scouts Radio hams have changed their callsign and are currently active until 2200z, August 31st, with these special callsigns:
Call - 3V1WSC 3V2WSC 3V3WSC 3V4WSC 3V5WSC 3V6WSC 3V7WSC
QTH - Tunis Borj Cedria Monastir Safx Jerba Jendouba Sousse
ex-Call - 3V8ST 3V8CB 3V8SQ 3V8SF 3V8SM 3V8SJ 3V8SS
The 7 stations will be active on be SSB, PSK31 and SSTV, and on the following bands 10/12/15/17/20/40/80 meters; generally on the special frequencies for scouts:
http://home.versatel.nl/worldscout/Jota/frequencies.htm

*During the weekend of September 2-4th, the special callsign TS9SF will be used in the International Center of the Camp-site Borj-Cedria (9th Forum of the Young people of Scouting World) including 3 active stations on 10/12/15/17/20/30/40/80/160 meters on SSB, PSK31, SSTV and CW (according to availabilities of the operators in Morse).

*From 0700z, September 5th until September 9th, a special callsign will be activated at the conference site in "M�dina" Yasmine Hammamet: TS37WSC (World Scout Conference). Four stations will be active.

8P, BARBADOS. A team of operators will be active as 8P9R in the CQ WW DX SSB Contest (October 29-30th) as Multi-Multi/High-Power entry. QSL via W3ADX. The team will arrive on the island on October 25th and depart November 1st. Activity before and after the contest will be on all HF bands including WARC bands plus RTTY/PSK and 6 meters. The following are the operators and their callsigns that will be used:
K3LP - 8P9LP & 8P9R (contest callsign) N3VOP - 8P9OP
K1LZ - 8P9LZ W3ADC - 8P9DC
W3ARS - 8P9AS W3ADX - 8P9DX
N3KS - 8P9KS WB6CBU - 8P9HC
Send QSLs for all QSOs to their QSL Manager W3ADX, Nathan King, using the QRZ.com address.

8Q, MALDIVES. A Spanish DXpedition team will travel here next October to participate in 2005 CQ WW DX SBB Contest (October 29-30th) with activity prior to the contest. Callsign for this operation will be 8Q7EA. Operators mentioned for this activity are: Carlos/EA1DGZ, Oscar/EC1KW, Roberto/EA1DBC, Joaquin/EA1AAW and Fernando/EA1CNF. Activity will be on 80/40/20/17/15/12/10 meters using an Icom IC-706MK2-G, beam, dipole and a G5RV. QSL via EC1KW, by the bureau or direct (QRZ.com).

9A, CROATIA (All Croatian Islands Award - DXpedition). Branko, 9A7YY, Vice-President of the "All Croatian Islands Award Group" (ACIAG), is organizing a DXpedition to activate about 31 Croatian Islands between August 14-21st. QSL via his home callsign by the bureau or direct. The list of all of the Croatian Islands that Branko is going to activate

is available at: http://www.9a7k.com

A61, UNITED ARAB EMIRATES. Members of the German Bavarian Contest Club will continue to be active as A61AJ until August 17th. They were active mostly on WARC bands, CW, SSB and RTTY before this past weekend's WAE CW Contest. Operators mentioned are: Mario/DJ2MX, Chris/DL1MGB, Tom/DL4MCF, Ben/DL6RAI, DO2MLU and Anja/DO2WW. Remember, North American stations should QSL via K2UO and all others via DJ2MX.

C6, THE BAHAMAS. Randy, W6SJ, will once again head to Grand Bahama Island in November. He expects to be on the air on November 22nd but will leave on November 28th. Activity will include the CQ WW DX CW Contest (November 26-27th) as C6AWS and as Single-Op/All-Band/Low-Power entry. Randy informs OPDX that since this is a solo effort again, he may just try 20m in the contest instead of spending hours and hours fooling around with antennas. Outside of the contest, he will try to operate on the WARC bands and will try PSK. He states that hopefully there will be some PSKers who need C6. QSL via W6SJ, direct or by the Bureau.

C6, THE BAHAMAS. Foster, W1CGT, will be active as W1CGT/C6A from Kemp's Bay, South Andros Island (IOTA NA-001), now through August 19th. Activity will be on 40-2 meters SSB and PSK-31. QSL via his home callsign, direct or by the bureau.

C9, MOZAMBIQUE (Looking to next year.). Operators Frosty/K5LBU (3DA0CF) and Wayne/W5KDJ (3DA0KDJ), who just recently returned from their Swaziland operation, have already begun making plans for next year. They are looking to operate from Mocambique Island (AF-088) in the Nampula District Group (Mozambique) sometime in the June (possibly the 6-20th). Frosty states that they would like to have six operators this time (3 for CW and 3 for SSB). They would also like to try RTTY and more PSK on this trip. Also mentioned was 160/80/40/30 meters and a possibility of 2 and 6 meters EME. If interested in joining their team, please contact Frosty via E-mail at: frosty1@pdq.net

CARIBBEAN TOUR. Kan, JJ2RCJ, is currently active from Martinique (FM) as FM/JJ2RCJ until August 18th. He will then move to Guadeloupe (FG) and be active as FG/JJ2RCJ from August 18-21st. Activity from both QTHs will be mainly on the digital modes and low bands. QSL via AB2RF.

CU2, AZORES (Super Contest Station in the Making!). Activity by CU2A this past weekend's European DX Contest (WAEDC) was in preparation for the upcoming CQWW Contests (CW and SSB). Operators from the San Miguel Island DX Team and OH Contesters are in the process of setting up a superb contesting site. An early summer meeting to discuss this project took place between Pertti/OH2PM, Jose/CU2CE, Jacinto/CU2AA, Fernando/CU2BV, Jose/CU2AP, Martti/OH2BH and Eduardo/CU2AF. Fernando/CU2BV is the Honorary Consul of Finland to the Azores while Jose/CU2CE is acting as a Coordinator for this season's activities. Adding to the group will be Toni/OH2UA, President of Contest Club Finland. The CU2A station was activated this past weekend by Pertti/OH2PM. Reports on the CU2A signal on various bands will be welcome and sent to Toni, OH2UA, at: oh2ua@oh2u.com

They also reported that a lot of bulky equipment was moved this past week from the previous Madeira Island site (CT3BH) thanks to the kind support of SATA Air Azores along with their captain CT3AV plus CT3AR, CT3EE, and CT3FJ. SteppIR is credited with antenna support for this project while HamRadio Solutions is providing a new SO2R controller adding to OH3QK station automation. Vertex Standard (Yaesu) will release folded full-color QSL cards for CU2A, and each QSO will be confirmed through the bureau or direct via OH2BH.

FO, FRENCH POLYNESIA (Op Cancelled). Fred, F5INL, who was expected to be on a 2 year French Military assignment in Papeete starting August 8th, has cancelled his tour of duty due to a serious family issue.

FP, ST. PIERRE AND MIQUELON. Five operators will be here between November 21-29th trying to a run Multi-Multi station for the CQWW DX CW Contest. The callsign is yet to be determined (possibly some FP/homecall). Operators will be AC8W, K8DD, K8GL, K8MM and K8AQM. There will be activity before and after the contest on 160-10 meters and the WARC bands. QSL all callsigns via K8NA.

HP, PANAMA. Paul/WN6K and Juan/W6NOW will be leaving for Panama from San Diego on August 31st. They expect to operate as HP1/WN6K (while on vacation) from September 1-13th. Activity will be on 160-10 meters with an emphasis on the WARC CW bands. Also, they plan to be active in the All Asian SSB Contest (September 3-4th). Paul states they will be staying at a place on the Pacific Ocean side on the beach. W6NOW is from Panama but is also a new U.S. Ham, so his experience is limited.

IOTA NEWS.....
AF-018. Giacomo, IH9GPI, and a team operators will be active as IH9GPI from Pantelleria Island (Africa Italy) during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via IH9GPI.

AS-053. Cha, HS8KAY, will return to his home and work on Phuket Island until December 31st. He will be using a Kenwood TS-850S w/100 watts into a ground plane antenna.

AS-099. Operators Simon/IZ7ATN and Alessio/IZ0CKJ will activate Bozcaada Island sometime between August 16-20th. Callsigns will be TA0/IZ7ATN/p and TA0/IZ0CKJ/p. Activity will be on 40/20/17/15/12/10 meters SSB; usual IOTA frequencies. QSL via IZ0CKJ, by the Bureau or direct.

AS-117. Look for 8J7STAR/7 to be active August 17th from Izushima Island (JIIA AS-117-New), Honsyu Coastal Island, Miyagi Prefecture. QSL via the JARL Bureau.

EU-045. Amedeo, IZ0FXW, will be active August 14-25th from Ponza Island (IIA LT-001, MIA MI-076) using the special Mediterraneo DX Club callsign, IB0MDC. QSL via his home callsign, direct or by the bureau. More information is available at: http://www.mdxc.org/ib0mdc

EU-049. Nicos/SV2AYT, and George/SV2JJE will be active as SX8AYT from Limnos Island (MIA MG-065), August 16-26th. Activity will be on 80-6 meters SSB. Suggested frequencies are: 3790, 7080, 14220, 18140, 21200, 28480 and 50120 kHz. QSL via SV2AYT (QRZ.com).

EU-120. Alan, G4NXG, will be active moblie on August 17th from The Holy Island of Lindisfarne (WAB Area NU04BER). Activity will be on 14260 and 7060 kHz between 1700-1900z. Alan mentions that if you require other bands, please let him know beforehand so he can take the extra whips with him. E-mail address is: g4nxg@arrl.net

EU-170. Marco, IK1ACX, plans to be active as 9A/IK1ACX from Pag Island (CIA CIA-32, MIA MC-282, IOCA CI-082, County LS) now through August 20th. Activity will be on HF, CW and SSB. QSL via his home callsign.

EU-186. Operators Simon/IZ7ATN and Alessio/IZ0CKJ will activate Gockeada Island sometime between August 16-20th. Callsigns will be TA0/IZ7ATN/p and TA0/IZ0CKJ/p. Activity will be on 40/20/17/15/12/10 meters SSB; usual IOTA frequencies. QSL via IZ0CKJ, by the Bureau or direct.

IS0, SARDINIA. Gaetano, IZ8GCB, plans to be active as IS0/IZ8GCB, August 18-29th. Activity will be on 80/40/20/15/10 meters. QSL via the bureau to his home callsign.

IZ4, ITALY (Red Cross Station). Beginning in October, look for the first Italian Red Cross ham radio station to be activated using the callsign IZ4GQA. This station is managed by the Radiocommunications Technical Office for the Emilia Romagna region of the Italian Red Cross. Visit their Web for more information related to their work and activities, timetables and frequencies. You can also subscribe to a free newsletter to be promptly informed on IZ4GQA's radio activity. Web page is at: http://radio.cribo.it

KG4, GUATANAMO BAY. Bruce, W4OV, will be active as KG4OV, August 19-22nd. Activity will be on all bands 160-6 meters, CW and SSB. QSL via his home callsign.

LIGHTHOUSE/LIGHTSHIP ACTIVITY..... (ILLW this weekend August 20-21st)
Look for 3Z1LH to be active from the Darlowo East Mole Lighthouse (ARLHS POL-003), August 18-22nd, during the World Wide Young Contester meeting. They will also participate in the International Lighthouse/ Lightship Weekend (August 20-21st). QSL via SP1KNM, direct or by the bureau.

Tommy, IZ7ECL, will be active as 9A/IZ7ECL/p from the following Croatian lighthouses (in the EU-016 ITOA group) between now and August 26th:
Daksa (IOCA CI-165, MIA MC-065, WLH 9A-010, ARLHS CRO-037 and CLH-017)
Grebeni (CI-173, WLH 9A-018, ARLHS CRO-054, CLH-036)
Kolocep (CIA-18, CI-038, CRO-031, CLH-010)
Sipan (CIA-50, CI-122; CRO-173, CLH-167)
His activity will be mainly on 20 and 40 meters. QSL to his home

callsign via the bureau.

Members of the Panama Canal Amateur Radio Association (PCARA) will activate Gatun Lighthouse (PAN-029), near the Gatun Locks, Panama Canal (Atlantic entrance), August 20-21st. They will use the special event callsign HP2GLT. Activity will be on all bands CW/SSB/PSK31. QSL via HP1IBF.

Look for the Eagle Harbor Lighthouse (USA-253) in Michigan to be activated in the ILLW (August 20-21sT), using the special 1x1 callsign K8E. Activity will be on HF/VHF, CW/SSB, FM Satellite and possibly HF digital. Collectors of ARLHS numbers can get credit for three upon request: Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear Range Light USA-255. QSL via the bureau or direct to N8MR with #10 SASE. Web page is: http://www.kc8nah.com/Interests/illw05.htm

Look for Mariners's Memorial Lighthouse (USA-1223), located in River Rouge, Michigan, to be activated by members of the Motor City Radio Club during the ILLW (August 20-21st). The callsign will be W8MRM. Collectors of ARLHS numbers should take note as this may be the first known activation of this lighthouse. QSL via the bureau or direct to N8MR with #10 SASE. Web page is: http://www.w8mrm.org

Members of the Bah&#65533;a Blanca DX Group will activate 4 different light-
houses simultaneously during the &#65533;2005 International Lighthouse/
Lightship Weekend&#65533; (ILLW). Lighthouses are:
- SAN JORGE Lighthouse (ARG-006), near Comodoro Rivadavia in Chubut
Province.
- RECALADA (ARG-009) in Monte Hermoso which will celebrate its 100th
anniversary soon.
- BALIZA CHICA Lighthouse (ARG-083), at 30 Km. From Punta Alta and...
- EL RINCON Lighthouse (ARG-036) in the &#65533;Verde Peninsula&#65533; in Villarino
County.
There will be no special callsigns to be used, just each operator&#65533;s
personal callsign plus the identification of each province. In this
case Recalada, Rincon and Baliza Chica will be identified as &#65533;LUxXXX/D&#65533;
and San Jorge as &#65533;LUxXXX/W&#65533; as it is located in the province of Chubut.
The contacts will be valid for the new &#65533;Litoral Atlantico Argentino&#65533;
Lighthouses Certificate organized by BBDXG together with DX MISTONGO
Group Tandil sponsored by Tandil Radio Club (LU2EE). ALL contacts will
be confirmed via LU7DSY: Carlos Almiron, P.O. Box 709,
8000 Bah&#65533;a Blanca, Argentina.

Claude, F5MCC, will activate at least five of the following Lighthouses of the Finistere Department, French Brittany, between August 20-23rd. Look for him to sign F5MCC/p. Activity will possibly be on 40-10 meters CW only. Bands will be determined by propagation. QSL direct to his home callsign with SAE (address on QRZ.com) or via the Bureau to his QSL Manager F3GJ. All of the following lighthouses count for the French Onshore Lighthouses Award (DPLF) as well as some other awards:
Point of Morgat Lighthouse, PB 104

Point of the Millier Lighthouse, PB 105
Point of Tourlinguet Lighthouse, PB 109
Point of Lervilly Lighthouse, PB 112
Keradec Lighthouse, PB 165
Audierne, Raoulic Jetty, Lighthouse, PB 276
Pors Poulhan Lighthouse, PB 277
Audierne Trescadec Lighthouse, PB 281

Look for Lars/SM6WPF, Tomas/SM6XMY, Rolf/SM6IQD and Rick/SM6YOU to be active from L&#65533;ngholmen Island, August 19-21st. They will also activate the L&#65533;ngholmen Range Front lighthouse (ARLHS SWE-444) during the International Lighthouse/Lightship Weekend (August 20-21st). Watch for updates at: http://sector7.nu/7s6lan

Operators Hakan/SM6EQO, Bjorn/SM6JOC, Magnus/SM6VFJ, Lasse/SM6ZBD, Loesaus/SM6ZBC and Gundhard/SA6AIF will be active as 7S6TL/LH from the lighthouse (ARLHS SWE-392, WW Loc. JO57UM) on Tristlarna (IOTA EU-043), between August 19-21st. They will be active during the International Lighthouse/Lightship weekend. They are also celebrating the 100th anniversary of the Tristlarna Lighthouse. QSL via SK6GO (QRZ.com).

Operators Cliff/SV1JG, Markos/SV1MF, George/SV1AGK, Theodoros/SV1GRM, Sotirios/SV1HER, Ulukali/TA1FL and Soyhan/TA2IJ will activate Lighthouse Apolytares (WLH SV-011, ARLHS GRE-040, WLOTA 0298) for the first time ever on Antikythira Island (EU-113 and MIA MG-014), August 20-22nd. Their callsign will be SX8L. This is a joint effort between Radio Amateur Association of Greece (RAAG) and Telsiz ve Radyo Amatorleri Cemiyeti (TRAC) members.

NP2, U.S. VIRGIN ISLANDS. Operators NP2B, WD4R, W4OV, W4DTA, W1RG, K9VV and possibly others will be active as NP2B during the CQ WW DX SSB Contest (October 29-30th) as Multi/? entry. QSL via NP2B.

OD, LEBANON. Pierre Louis, F5NED, will be active as OD5/F5NED between August 16-25th. No other details were provided.

P5, DEMOCRATIC PEOPLES REPUBLIC OF KOREA. No QSNs reported yet for Dave, KA2HTV, as P5/KA2HTV. There has been some PIRATED QSNs but nothing legit. He is expected to be there until August 23rd. QSL via KK5DO.

PJ7, SINT MAARTEN. Ken, K7ZUM, will be active as PJ7/K7ZUM in the CQ Worldwide DX RTTY Contest (September 24-25th) as a Single-Op/All-Band entry. QSL via K7ZUM. Ken informs OPDX that this real "quick" trip, just long enough for the RTTY contest: setup late Thursday and Friday, work contest, tear down after contest, leave Monday morning. Ken would have liked to have made it longer, but it did not work out that way. However, he will be back on the beach in November for the CQWW CW Contest with a Butternut vertical and a K2 at 100 watts.

QSL INFO AND NEWS.....
George, W8UVZ, informs OPDX that he has limited number of current style IRCs available for sale after doing some QSL work for XQ6ET. He states, "I usually like to sell in groups of ten for 1.10 USD each

plus SASE to ship. Sale helps keep Bob, XQ6ET, going in Zone 12 with his modest station." George's E-mail address is: w8uvz@voyager.net

Andy, SP5XSD, reports that online logs and pictures of Wojtek, SP5MXZ's, June 20th to August 2nd activity from Tenerife Island (AF-004) are now available at: http://sp5xsd.za.pl/sp5mxz/ea8/

SILENT KEY. JT1CD from Mongolia reports that Ebi, JT1BJ, has become a Silent Key (SK). His age was 44.

SPECIAL EVENT. Look for special event station TM7VM to be active again between August 14-28th. Operations will be on HF and CW/SSB. Activity is to celebrate the opening of the Millau Viaduct (South France, which is said to be the highest one in the world). This viaduct is 343 meters above the ground at its highest part. A technical Web page about this viaduct (in English, Spanish and French), is available at:
http://www.viaducdemillaueiffage.com/
The activity is organized by the Millau ARC (F6KSM) under the leadership of Patrick, F5UJZ, who is also the QSL Manager. QSL either direct (SASE + postage) or via the French REF Bureau. During the year 2005, the special event station will be activated a few more times. The following is an update on their scheduled days:
September : No activity
October : October 22nd to November 5th. TM7VM will be in the CQWWDX SSB Contest.
November : November 20th to December 4th. TM7VM will be in the CQWWDX CW Contest.
December : The last activity of TM7VM will be scheduled from December 17-31st.
ADDED NOTE: The QSL cards are printed. All the direct cards for previous operations have been answered, and the first batch is ready to be mailed. The first batch of Bureau cards will be sent to the Ref-Union QSL Bureau when reopened in September.

SPECIAL EVENT. Look for special event station PS113QB to be on the air on SSB, CW and the DIGITAL modes during the month of September. Activity is to commemorate the 113th anniversary of the Liga de Amadores Brasileiros de R�dio Emiss�o (LABRE RN) in the State of Rio Grande do Norte Brazil and its first President (1939), Sr. Jose Bezerra Marinho, ex-PY7QB. QSL via the bureau or direct to: Labre RN, Caixa Postal 251, 59010-970 Natal, RN, Brasil. For more information, contact: ps7dx@globo.com

SY9, CRETE. Kostas, SV1DPI, will be going here (EU-015) for his holidays from August 24th to September 3rd. He has requested the callsign SY9DPI. He will operate during his free time, mainly late in the evening (2000z) and early in the morning (0400-0600z). His plans are to operate mainly digital (RTTY and PSK31) but also CW and SSB. He will use a Kenwood 480SAT w/100w and a homemade vertical antenna. QSL via his home callsign SV1DPI.

TY, BENIN. Luc, F6FVX, will be active as TY/F6FVX from Azov� (in northwest Cotonou, Benin) now through September 6th. His bands and modes of activity

were not provided, but he will be on HF with his TS-50 and dipole. He only speaks French.

V47, ST. KITTS. Just a reminder to look for Larry, KJ4UY, to be active this week as V47UY between August 19-26th. Activity will be on 160-6 meters. QSL direct to KJ4UY.

My National NC-54, i think, had the same design feature! :-)

Sensitivity on 10 meters was, well different. I could hear W1VUO and W1GID with excellent Q5 copy. I could never hear who they were working!

I figured out that it must be my receiver. After all, W1GID lived 200 yards North and W1VOU lived 1/2 mile west. Never heard anything else on 10 meters until I bought a REAL radio, HQ-140X.

BTW, in Boy Scouts I did build a Regenerative for 6 meters. It earned a Worked All TV sets award :-) Channel 2 is/was a major supplier in the Boston TV market.

Let's face it, Morse had an important need at one time in the history of radio. As a result, many amateur spent countless hours perfecting this craft. I'm glad they did.

However, technology has advanced (thank God) to a point where Morse is all but obsolete. My hope is that when the FCC removes the Morse requirement, more amateurs will spend that time improving their technical abilities.

The nice thing about amateur radio is that it flexible and offers many (very necessary) opportunities to its ranks.
I believe the Morse requirement just distracts people from other more exciting (and more necessary) aspect of the hobby.

Your own words prove your commitment to the hobby (or craft as you
freemasons say), eighteen years for one log-book, your are not very
experienced are you, you appear to talk the talk (very poorly) but cant walk
the walk. No right minded person will talk to you on radio, it makes one
wonder why you appear to have no offspring. Your relationship with PLOD
appears more intimate than that with Liz (must cost a fortune in batteries).

Most libraries carry at least one copy of the ARRL Handbook, or at least
that's been my experience. It may not be the most current, but it's
within the past few years. In Orange County, Calif. they usually buy
one per year per branch, with the most current one in the reference
section and the older ones available for check-out.

[This followup was posted to rec.radio.amateur.equipment and a copy was sent to the cited author.]

Sounds like you've already picked up some good advice. If you want some good software to go with the Now You're Talking book, you might visit the W5YI website at http://www.w5yi.org/catalog.php?sort=18 and check out the packages they have. They're basic programs that drill you on the questions that will be on the test, so you can get yourself proficient before going in for the exam. I used their older DOS-based stuff for my tests some time back, worked very well.

I believe it also includes Morse training and practice software, which will be helpful if you want to go for your HF privileges (at present, the FCC still requires a demonstration of Morse proficiency before you can gain access to the HF bands). In training for my Morse exam I found that the tapes are only good up to a point, after which I found myself memorizing the tapes, so they weren't much good after that. Computer-generated Morse practice can keep the material fresh so you're never copying the same stuff over and over again, as you would with tapes.

On the matter of clubs, I've had mixed experience with various clubs when I was first getting started. One that I visited was pretty clique-ish, so much so that the only person that took any time to chat with me was the guest speaker! I've been good friends with the guest speaker ever since, but I've never darkened the door of that club since. I found that this was the exception rather than the rule -- nearly all the other clubs I've visited since then have been more than welcoming to all new visitors, so if you don't find a good club the first time out, shop around. The ARRL web site at www.arrl.org lists many different ARRL-affiliated clubs, so you should be able to find a lot of potential groups in your area.

You'll also find that your computer skills will dovetail nicely with the newer modes that are available for your use on the ham bands. Packet (especially APRS these days) and PSK31 are good examples. There are also video modes -- slow-scan TV (SSTV) and amateur television (ATV) -- that you could experiment with if you're interested.

Welcome aboard!

Hi!

Just got an Yaesu FL-7000, and found out that the SWR meter is behaving in a strange way. The antenna tuner also seems to have some troubles to tune to an optimum SWR, espcially below 20 metres.

I did like shown in the manual page 13 (added 3 * 50 Ohms dommyload in parallel and TX freq = 14 MHz), and found out that the SWR meter is only showing around 1:3 when the TX power is about 100W. Increasing the power to 200W makes the SWR meter go to max, and decreasing to 50W it shows about half of what it did at 100W.

I have an external SWR meter attached, and it says 1:3 all the time :-)

I also discovered that the SWR indication is frequency depended. On 80 metres it's impossible to make it show more than about 1:1,5 with 200W TX power.

I did some measurements on the FWD and REF points, and the difference between them seems to be okay, and my conslusion is that the SWR bridge is okay. Just to make sure i measures the diodes, and they seems to be intact.

Studying the schematic tells me that the transistor Q05, and the op-amp Q01 is involved in calculating the SWR, but I have no service manual to tell me about values that can be measures, and used to identify the problem.

Anybody with similar expirence, or just good advices?

Best 73 de OZ1BV, Brian

You didn't say how far away from the dynaplate the tuner was? I would bet that you have a fairly long run with your ground lead to it as seen in most boats where the antenna system has problems.
You need to have a very short distance between the tuner and the ground plate, not more than a few feet. Lots of people install the tuner close to the antenna and run a long ground lead. That is the wrong way to go as it then allows the coax and power leads that go to the tuner to become part of the antenna system as well as the radio itself and its power leads, which you don't want.

Also if you operate in fresh water rather than salt water you may need more surface area for a ground.

Sail boat or power boat?

THE SHITCAN MAN
With apologies to "Willy Wonka and the Chocolate Factory"
- as recorded by Sammy Davis Jr. with the Mike Curb Congregation

Who can take a Wiseman, sprinkle him with Joo
Cover him with shame and a Yiddish name or two
The ShitCan Man, oh the ShitCan Man can do
The ShitCan Man can 'cause he mixes it with truth and makes the world take note

Who can take a gay lame, wrap it in a sigh
Soak it in the sun and make a groovy Wiseman pie
The ShitCan Man, the ShitCan Man can
The ShitCan Man can 'cause he mixes it with truth and makes the world take note

The ShitCan Man makes every post he moves go away to shit can limbo
Now you talk about your childhood wishes, Woger's living with the bitches

Oh, who can take NIM Busters, dip it in a dream
Separate the trash and collect up all the cream
The ShitCan Man, oh the ShitCan Man can
The ShitCan Man can 'cause he tends to it with care and makes the board look good

The ShitCan Man makes every post he moves go away to shit can limbo
Talk about your childhood wishes, Woger's living with the bitches

Yeah, yeah, yeah
Who can take NIM Busters, dip it in a dream
Separate the trash and collect up all the cream
The ShitCan Man, the ShitCan Man can
The ShitCan Man can 'cause he tends to it with care and makes the board look good
Yes, the ShitCan Man can 'cause he tends to it with care and makes the board look good
a-ShitCan Man, a-ShitCan Man, a-ShitCan Man
ShitCan Man, a-ShitCan Man, a-ShitCan Man
ShitCan Man, a-ShitCan Man, a-ShitCan Man

Lardass, poor Lardass aka "Digital". He cringes every time the "40 Year Old Virgin" movie is mentioned, especially when he knows they used him as an example of one of these kinds of people. The kind that play with Daleks and never get lucky.

> He doesn't recall the day, but his Bar Fly mom said that when she brought

Why would he, his mom weasn't a bar fly, nor did his daddy really want a puppy. Sounds like you are jealous because Roger was wanted unlike you. However, "Digital"'s Mommy wasn't sure which "John" (and that isn't his first name) fertilized her egg for that $2........

> <sound of a door slamming>

"Digital" has familiarity with hearing doors slamming, especially right after he was kicked out of his rented duplex (he stayed in the basement) and when he tried to beg to come back home.

Most of what currently fills this newsgroup up is the work of a small group of psychopaths who for some strange reason enjoy insulting one another in a public forum (I suppose that way they have an audience as opposed to taking it to email). They do not accurately represent the 'average ham' in any way, shape, or form. While you will find a few nuts on the bands (e.g., jammers who do not identify themselves) the vast majority are friendly folks who love radio, comply with Part 97, and love a good ragchew.

I highly recommend you ignore the childish ad-hominem attacks in these groups. Most newsreaders have filtering capabilities. Use them.

>
> Gee, Woger.

Gee, Lardass Lllllllllllllllllllloyd, aka Widdle Lardass, you should have your lisp from cocksucking looked at by a plastic surgeon. Among other things, like your pig like face and 290 pound body on a 5 foot six inch frame.

> Stop and think, if you can. The movie you refer to is a work of
> fiction. Fiction.

Based on interviews of the lead actor of the movie, (trhe star) in which he said the writers based the virgin on real ones, like you Lardass! You know guys like you who are 31 or so and have never gotten laid. Looks like you don't know what the fuck you are babbling about, again.

And we all know the only reason you are a 31 year old virgin is because you are a fucking queer.

> And the posts in green? (Lardass' whines flushed)

Nope, wrong again, Davies. But you make your life out of being wrong, don't you?

Sendplease:

I would be interested of where you hang out on your computer.

In IRC, IM, chat/discussion groups on the computer, etc. I see little
difference, sure you are still in the land of the living, what you speak
of is more likely to exist in heaven...

Sounds like you got this problem nailed Gary.... I would suspect that
the RF Ground between the tuner and the radio is somewhere close to 1/4
Wave and is the Power wires to the inverter are also near 1/4 Wave for
the 40 Meter band, or maybe 1/8 Wave. A couple of good RF Type .1 uf
Caps across Inverter Power Leads, at both ends, should tame the problem,
after the RF Ground is shortened up to make it a good Low Impedance,
Wideband RF Ground.

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday August 21st 2005
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

SEASON PASS + Advance Seller Discount

A sellers discount season pass is available which
offers a 30% discount. By prepaying you get a
discount and earlier admission. See the registration form.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,

will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

They don't accurately represent the CBers either. I use both Ham and CB. One thing is for sure, No one is being attracted to either hobby by those actions. Pretty soon, people may also start turning away from the news groups as well - due to it. I know one ISP who refused to carry them - partially for just that reason. It is a shame.

Just me

LLOYD'S A VIRGIN

(Madonna/Billy Steinberg and Tom Kelly/Les Paul)

LLoyd made it through 12th grade
Somehow he made it through
Never had a forum for his views
Until he found radio newsgroups

Lloyd is the the freak of the week
Everybody avoids that fatassed geek
But everyday's a brand new day
Yeah, it makes him feel
Shiny and new

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

"I'm gonna post about you, boy
My Bible's on my side"
Lloyd's been bashed around
Because his stupidity is hard to hide

He's bald, obese and round
A weeble-wobble that won't fall down
Oh, when he went to the retreat
Yeah, he stepped on his own feet
What a fucking fool

Lloyd's a virgin <GAY!>
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Oooh, oooh, oooh

He's bald, obese and round
He'll just follow you around
Because you make him feel
Yeah, you make him feel
He's got something to do

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Lloyd's a virgin, ooh, ooh
He'd rather slurp nutsack goo
Lloyd's a virgin
What's a loser like him to do

Oh, oh, oh, oh, oh, oh, oh, oh, oh
Ooh, Lllllloyd
Can't you hire a whore
For the very first time?

//

It has been said that there are none so blind as those who will not see....

Wogie falls into this category.

Besides, Wogie is, and always has been, in a state of denial. The sick puppy
is a congenital liar.
His claims that the Admin is blaming the posts of others on Wogie is pure
bunk. Wogie, it seems, posts better than half of the foul comments and when
he is taken to task he does what he is so skilled at. He lies.
Bottom line seems to be that the Admin can see the origins of the posts and
he "flags" Roger's crap.

So far as I am concerned, Wogie is guilty of flooding the Nim board with
crap messages.
Wogie is an immature liar.

Some of the tubes were two or more sections: Dual triodes, dual
diodes & amp so you actually have 17 "Tubes" in 11 envelopes.

Don't forget Compactrons, that would have three "tubes" in an envelope.
That would really lower the package to tube ratio.

From: antoine <antonio@yoservice.cum>
Message-ID: <4306eed0$1_3@newspeer2.tds.net>
Source record: 50101

Friday August 20, 2005
Chesterfield County, VA

Subject on Channel 19 advertising Cbs for sale and wanted to goto 21 to make the sale.

He said radios were modified and had 25 watts.
Only a ham rig modified for CB would have 25 watts.
(CBs are 4 Watts AM and 12 Watts PEP for SSB.)

He didn't have a "Handle" or name.

He told people he lived in the area of Route 10 and Hwy 288.

Greetings

Late last year, I started out helping out local qsl bureau... My uncle is the bureau manager so trust was not an issue...

Anyways, my first task was to sort out the cards that were being send back to the orininating station because some hams were not collecting cards, or the amateur has since then passed away...

Anyways, I am looking for looking for a website that would show what qualifications various countries have toward hams, or would be hams, trying to move up the ranks of amateur radio....

I know, for example, that some countries require you to be a short wave listenner first and collect some qsl cards, to show interest, before allowing you to try an amateur radio exam...

Again, is there a website or webpages that can show what you need to qualify to get you ham licence is various countries?...

Hi Bob, many tubes can have "dual" purposes in one glass envelope.
Some of the manufactures utilized these fuctions. The wording is
directly from the catalog.

Antoine:

A lot of 10 meter equipment can be opened up for 11 meters. However, I find it preferable to just expand the frequency coverage of 11 meter equip. Most 11 meter linears are constructed to accept 5 watts input, more than once I have seen someone burn one up attempting to pump too much drive into them.

John

HI, I'm posting this for a friend.

For you hams that might have started out with one of these
way back when. And you can convert it to 10 meters

Is there a Kenwood repair center in outer space?
Shoulda' bought an Icom!

HAM RADIO IN SPACE: ARISS PACKET STATION OFF THE AIR

Still with ham radio space related matters, word that the ARISS packet relay system is down. According to Ken Ransom, N5VHO that the TNC on the Kenwood radio on-board the Internationl Space Station appear to have stopped working.

Ransom says that attempts have been made to restore the the radio but so far without success. With the crew very busy preparing for an E-V-A, additional troubleshooting will not be possible until after the space walk has been completed.

When I first got my technician ticket, my assigned call sign was KI4FAT. After about 6 months, I retired from the Army and applied for and received a vanity call sign of WO2RET. I'm proud of my status both as a military retiree and an amatuer radio operator. When someone asks me what the call sign stands for, I just tell them it means exactly what it says. I also have an amatuer radio operator vanity plate on my car.

As for G4FGQ, the highest compliment I ever had paid to me was after I had been DXing on the 2meter band using a home made Jbeam, I heard an old timer telling the indivual I had been talking to that he didn't catch the call sign but 'that ham with the home made antenna had really done his homework and put it together right because the signal was outstanding.' To have an old-timer call a relative newcomer a "HAM" is probably one of the greatest compliments a person can receive.

Just my 2 cents worth.

Hi
I just picked up a (stoner) Dymek DA9 active antenna. The tuning cap has somehow been bypassed and it does nothing to affect the station. I was told that this was bypassed intentionally so as to be a broadband antenna. I'd like to resore ti to original and use the tuning cap as a preselector.

Does anyone have a print / schematic on this unit ?

Thanks!

Actually, the sentence makes no sense.

You have reference crystals in recent synthesized rigs, but if you changed
it you'd end up with an odd channel spacing. Depending on if the rig uses
it for injection into a pre-mixer before the programmable divider chain,
it may alter the output frequency of the synthesizer too, but that's
just the design making double use of a crystal oscillator. At that
point it's not a "reference crystal".

But, given the age of the rig in question, if it is synthesized
it's going to be a bunch of crystals, mixed together to get different
combinations. There likely won't be one crystal to change to put
it on a new band, you'll need to change a bunch of crystals. And
in those rigs, none of the crystals would be refered to as a "reference
crystal".

Michael:

Correct, just pull the xtal for one of the chans and stick in a VFO
capable of covering the 10-11 meter bands, there is a plate tune and load
on the back of that rig! A handful of parts and you can homebrew a VFO...

469. Eliminating Jeep TJ RF Noise?

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-21 00:50:33 UTC

Message-ID: <1124585433.598884.22010@o13g2000cwo.googlegroups.com>
Source record: 50123

Hi Folks,

Has anyone had sucess eliminating Jeep TJ RF noise? Specifically, year 2000 or later? I grounded the tail pipe to the frame, installed .1uF bypass caps on the fuel pump lead (to ground) and am still experiencing noise on 2m/70cm. The bypass cap helped eliminate some noise, but I'm still experiencing noise poportional to engine RPM.

Any insight appreciated.

Thanks,
Nick

Is it ignition noise or alternator noise?

Have you already put bypass capacitors on both potential sources?
Supression at the source is generally far more effective than random
fixes elsewhere.

If your vehicle has one, check you HV coil terminal. It can fail due to corrosion and arcing to produce the same symptoms.

In article <de908c$b0l$0@pita.alt.net>
"Digital" <WankingLloydie@anon.uz> whines excuses again:

>> And as usual, you are too stupid and lazy to compose one.
>
> Who<whiny excuses,per usual>

An excuse for your laziness and stupidity, Lloydie? Oh, and last time I checked I'm still not Roger. DUMBASS! You seem to see him everywhere. But then, you don't have much else going on in your life. Did you find a new pizza BOY job yet?

> "Isn't the "s" key adjacent to the "e" key" or is your cum-stained keyboard
> too opaque?

> Yes.

Thanks for admitting you have a cum-stained keyboard, queer Lloydie. I hear you jack off to pics of shemales, sheep, and Roger Wiseman. Of course, with your pic like the one picking your nose that you posted to the internet really makes you popular, doesn't it? <guffaw!>

>S is for Stupid.

You're speaking from the experience of constantly being called stupid, I would imagine. It shows.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th/August, through Sunday, 21st/August there were 201 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

CCF & OHDXF CRUISE. Once again, the Contest Club Finland (CCF) and the OH DX Foundation (OHDXF) are proud to announce the 11th CCF & OHDXF Contest and DX Meeting on January 20-22nd, 2006. The meeting concept will be the same as last January - a cruise on the Baltic Sea from Helsinki(OH) via Aland Islands (OH0) to Stockholm (SM) and back to Helsinki. More details of special cruise packages, agenda, registration etc... are coming soon.

Information from the previous CCF & OHDXF meetings can be found on the CCF Web pages: http://www.qsl.net/ccf

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (40m) entry. Look for him to be active before the contest on the WARC bands and 160 meters. QSL via W7EJ.

EA8, CANARY ISLANDS. Uli/DK2OC and Rich/W4GKR will be active (possibly as EA8/homecall) from Gran Canaria Island (AF-004) now through September 4th. Uli will handle CW and Rich will do SSB/PSK. If anyone needs a (specially) PSK contact, please send info on Band/GMT, band opening to your QTH to: w4gkr@hotmail.com
They try very hard to be on that band/opening time slot. They should have a good signal on all bands 40-10 meters. They will also try to get on 80 meters with a dipole. Listen between 18120-18130 kHz SSB, if band is open. PSK frequencies are: 18105, 14070, 10139, 7035 and 3579 kHz. QSL via their home callsign.

ET3, ETHIOPIA. YL chasers may want to look for the E.A.R.S. club station, ET3AA, on 20 meters. Operator Mima was heard this past week on 14174 kHz between 1530-1600z. QSL via Box 60258, Addis Ababa, Ethiopia.

GD6, ISLE OF MAN. Operators Joe/K1JB and Mike/K1EU will be active as GD6IA during the CQ WW DX SSB Contest (October 29-30th) as Multi-Single entry. QSL only direct to K1EU.

HI3, DOMINICAN REPUBLIC. Ted, HI3TEJ, announced that he will be active in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via ON4IJ.

HS0, THAILAND. Charles, K4VUD, is now on the air as HS0ZCW. He informed the DX community that there will be no 80 meters operations planned for now. However, he may try to activate the HS0AC club station on that band during the big contests. More details are forthcoming.

IOTA NEWS.....
AF-NEW. Mustapha/DL1BDF and Salaam/SU1ER announce that an Egyptian team consisting of SU1KA, SU1KM and SU1ER will be teaming up with guest operators from Italy to activate the new IOTA, Gifton Island (AF-New). The SU/I team has received permission to activate the island using the callsign/license, SU8GFTN. Activity is expected during September 2005. More details are forthcoming. QSL is via SU1ER: Ezzat Sayed Ramadan, PO Box 11, El-Thanaweyya Al-Gaweyya, Almaza 11391, Egypt.

AF-018. Operator IT9BLB and an international team will be active as IH9P from Pantelleria Island (IIA: TP01, WAIP: TP and ITU Zone: 37) during both CQ WW DX SSB and CW Contests as a Multi-???? entry. QSL via KR7X.

AS-060. Members of the Pyongtaek DX Club (D90HE) will be active from Saok Island (KDN H32 - Shinan-Gun), August 26-28th. Operators

mentioned are: Han/DS2GOO, Lee/6K2CEW, Kim/DS4PAI and Kim/
6K2CSD. The operators will sign as homecall/4. Acttivity will
be on 80-10 meters SSB, RTTY and BPSK31. QSL via operator's
home callsign, by the bureau or direct. For more details, visit
the Web page at: http://myhome.naver.com/dxer2han/as060

AS-100. Mark/4Z4KX, Ros/4Z5LA, Yuli/4X6HP, Isaac/4Z5LI, Ilya/4Z1UF
and Jan/4X1VF will be active as 4X7AZ from Akhziv Island
between September 30th and October 1st. Activity will be on
40-10 meters CW and SSB. They plan to have three stations on
the air. QSL via 4Z5LA (QRZ.com).

EU-017. Fabio, IZ7FLQ, will be active as ID9/IZ7FLQ/p from a few
islands in the Eolie Group (IOTA EU-017) between now and
August 27th. QSL via his home callsign, direct or by the
bureau.

EU-047. Matt, DJ8OG, will be active as DJ8OG/p from Baltrum Island
(GIA N-06), now through August 27th. Activity will be on
80-10 meters (no WARC bands) SSB. QSL via his home callsign,
direct or through the bureau.

EU-061. Jorgen/LA5UF, Paul/LA6YEA and Trond/LA9VDA will be active
as LA6Q from Svenner Island, September 15-18th. They will
also activate the Svenner Fyr/Larvik lighthouse (WLH LA-025,
ARLHS NOR-044 and WLOTA 1029). Activity will be mostly on
80-17 meter CW, SSB with some RTTY. They also plan to
participate in the SAC CW Contest with one station. QSL via
LA9VDA (QRZ.com).

EU-124. Look for the Barry Amateur Radio Society to activate GB5FI
from Flatholm Island, Friday, August 26th to Tuesday, August
30th. This is their annual trip. Activity will be on SSB,
PSK, RTTY, SSTV, CW, Top Band to 70 Cms plus 6 meters. QSL
via GW0ANA, callbook address or by the bureau.

EU-138. Operators Mario/DL5ME and Guenter/DG3HWO will be active as
SM7/DL5ME and SM7/DG3HWO from Hassloe Island, August 27-31st.
Activity will be on the 40/30/20/17/15 meters CW/SSB. Antennas
are a Butternut and Spiderbeam. QSL via their home callsigns,
direct (prefer) or by the bureau (longer wait).

OC-148. Hot, YC0IEM, will be active as YC0IEM/9 from Timor Island
from August 29th through September 15th. QSL via IZ8CCW,
direct or by the Bureau.

IARC'S AWARD WEB PAGE CHANGE. Isaac Lindenbaum, 4Z4TL, IARC V. Chairman
and Secretary, announced that the "Maccabiah 17 Games Award" Web page was
updated as follows: Award sample picture and a small applet to search
eligibility for the award were added. The Web page address is:
http://www.iarc.org/~4z4tl/Maccabiah17_award.htm
In case a callsign is not found on the search applet, please contact
Isaac, 4Z4TL, at: 4z4tl@iarc.org

KH7K, KURE ISLAND (Update). A press release was sent out by Ward, N0AX, late last week (dated 8/19/2005) indicating that the K7C team will be leaving for Kure Island in less than a month. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin. Excerpts from the release state that the K7C team will leave the Hawaiian Island by boat aboard the Machias on September 15th. It will take about 9 days to sail to Kure Atoll, aided by the trade winds. The return trip will take another day or two. During the voyage, they hope to be active as K7C/mm on the HF bands. The success of this phase of the operation depends on how they can best rig an antenna aboard the Machias. Activity from Kure is expected to be between September 24th and October 6th. For more details, please visit the K7C Web page at: http://www.cordell.org/htdocs/KURE/

MONTAIN DXPEDITION CANCELLED! Alan, VK4AAR, reports: "It is with regret that the DXpedition to a remote Dayak mountain village (of Sarawak - 9M8) has had to be cancelled. Various factors contributed to this unfortunate circumstance which caused Sengchai Chan (9M8SC) and Festus (9M8FH) and their team to 'pull the plug' on their late August plans."

OH0, ALAND ISLAND. Ari, OH5DX, will be active as OH0Z during the CQ WW DX SSB Contest (October 29-30th). Operation class is to be determined, probably Single-Op and Single-Band (15m) or All-Band entry. QSL via W0MM.

P5, DEMOCRATIC PEOPLES REPUBLIC OF KOREA. No QSNs reported yet for Dave, KA2HTV, as P5/KA2HTV as this was being written Sunday morning. There has been some PIRATED QSNs but nothing legit. During the next few days there "should" be activity. He announced that his last three days would be devoted to ham radio. He is expected to be there until August 23rd. QSL via KK5DO.

QSL INFO AND NEWS.....
C91CW-C93DY NEWS. Dimitry, UT5UGR, reports that the on-line logs are available at: http://www.dxer.com.ua/c9/log.html
If your contact is not in the on-line log or if there is any mistake, please request Dimitry to check the log manually via E-mail at: ut5ugr@uu7j.com
QSL cards will be arriving from the printer in 2-3 weeks. Please, QSL via UT5UGR: Dimitry Stashuk, P.O. Box 115, Kiev-147, 02147, Ukraine.
Take a look at the QSLs via: http://www.dxer.com.ua/c9/qsl_info.html
Photo gallery of C91CW is available at:
http://users.iptelecom.net.ua/~ut5ugr/cw.htm
Photo gallery of C93DY is available at:
http://users.iptelecom.net.ua/~ut5ugr/dy.htm

Laurent/F8BBL (CW) and Jean Marc/F4ECL (SSB) was active this past weekend from Banc d'Arguin Island (EU-159 and DIFM AT-033). QSL via F8BBL, 100% by the bureau or direct.

Online logs and photo story of the unexpected expedition of Barbara/ SQ5BB and Andy/SP5XSD (from August 5-12th, 2005) to the islands and lighthouses of the Polish Baltic coastline (6 islands & 5 lighthouses) are now available at: http://sp5xsd.za.pl/aug2005/

QSL VK4YN/p via VK4FW. Activity was from Fraser Island (OC-142) this past weekend. Address via QRZ.com: Bill Horner, PO Box 612, Childers, 4660, Australia.

QSL VK6DHI via VK4AAR (direct only) to: Alan Roocroft, 376 Old Toowoomba Road, Placid Hills 4343, Australia. Operators were Wally/VK6YS, Dan/VK8AN and Nigel/VK6KHD from Dirk Hartog Island (OC-206) this past weekend.

RTTY DX SURVEY. Don, AA5AU, Co-editor of the "VK2SG RTTY DX Notes", is pleased to announce the "2005 RTTY Most Needed DXCC Entities Survey." All digital operators are invited to take part in this exciting new survey. The survey can be found on the following Web page at:
http://aa5au.com/rttysurvey2005.html
Survey ends 2400Z September 18, 2005.

S6, SINGAPORE. Members of the "Singapore Amateur Radio Transmitting Society" (SARTS) will organize another local field day to be held August 26-29th, from St. John's Island (AS-019). They expect a fairly large group of local operators to operate and be active as S61FD. Look for 2-3 stations to be on the air on 40-15 meters all modes. If time permits, and there is the availability of hardware; he may also try 80 meters and possibly 160 meters. QSL via PA0KHS, by the Bureau or direct to:
Henk van Hensbergen, Smaragdstraat 53, 6534WN Nijmegen, The Netherlands.

SPECIAL EVENT. A special event station, SN25SOL, is operating from the Gdansk Shipyard to commemorate the 25th anniversary of Solidarity (Solidarnosc), the social movement which changed the country (Poland) and Europe. The festivities will end on August 31st, 2005. The station is operating on all bands from 80-10 meters (CW, SSB and digital modes). Piotr, SP2AYC, is the QSL Manager (via PZK Bureau).

YO CONTEST. The Romanian Amateur Radio Federation (FRR) invites radio amateurs world-wide to participate in the annual YO DX HF Contest. The 24 hour contest is scheduled on Saturday, August 27th, 1200z - Sunday, August 28th, 1200z. Rules can be found on the following Web page at:
http://www.hamradio.ro/contests/yodx_eng.pdf
Writelog and N1MM Logger have recently included YO DX HF on their supported contest list.

From: Gene Rodgers <oldcodger@verizon.net>
Message-ID: <fRoOe.4176$Hi.1427@trnddc04>
Source record: 50136

I have a Transmitter which is rack mounted in a cabinet and capable of over 150 watts but will dead key transmit at 120 watts (continuous). The transmit is variable from 5 watts to 120 watts. I also have a dual Receiver rack mounted in a cabinet. Both have power supplies and are very heavy duty pieces of equipment. Wouldn't take much to convert to a 440 repeater or use as is for volunteer fire department or small city.
Units must be picked up in Dallas.Comes complete with manuals for both.
Will sell (make offer) or trade for good Ham HF rig, or ????.

Pictures of manual & rig:
http://www.grodgers.com/dfwforsale/transmitter440.jpg
http://www.grodgers.com/dfwforsale/receiver440.jpg

Units are skid mounted and virtually unused. Appereantly this was a backup unit.

Contact me at ke5bfa@comcast.net or reply to this email.

Gene

Woger has been committed to the funny ranch as recently as 1999 when he
beat
up his poor elderly mother. Since he has no insurance a poor State like
West Vagina released him to the public.

"FAGGOT WOGER ALERT: SHIT CAN SHIT CAN SHIT CAN SHIT CAN SHIT CAN. A
SHIT
CAN MAN ALWAYS WINS IN THE END." -SHIT CAN MAN from Nimbusters

Well, he beat up his elderly mother and married a crackhoe' so Woger's
family really isn't much. His kids
were taken away by child welfare and have nothing to do with him. Woger
is very lonely and has a homosexual fixation on Lloyd Davies, who may
or may not be a TimeLORD. Woger will be 50 next month and
has lead a wasted existance. You really must pity him.

"Uhhhhhh, yeah, I'm calling you about giving you a dick sucking

[nothing intelligent]

Face it: You never even thought about the fact that at least eight (8) different host names resolve to the same IP address as the NIM Busters board. In fact, you have no idea how to find out that kind of thing, do you?

Here's the forward DNS lookup on four of them:

Host ------------------ IP address

the-forum.us ----------- 64.21.87.27
Brettcampbellcpa.com --- 64.21.87.27
Bsumbdytraining.com ---- 64.21.87.27
Claudediehl.com -------- 64.21.87.27

There are a total of eight or nine hosts at IP address 64.21.87.27, depending upon how you choose to count them. That fact makes it clear that the person who owns the domain "the-forum.us" probably doesn't own the machine which hosts it, and that leaves you no one to run to with a terms of service complaint. Can you say "virtual hosting?"

NIM Busters keeps its board up and running, and you remain left out in the cold. Oh, Boo hoo hoo.

In the future, the next NIM Buster's owner ought to register a different domain through GoDaddy while using the Domains by Proxy service to keep his name and phone number private. That would give you even more grief when you attempt your next TOSing.

Oh, my little Lloydie is still hiding behind sockpuppets. He wouldn't show at Dalton hamfest or at anybody's door. And let's not forget how he hid behind his fron door when Oris Grim paid him a visit in December, 2004. And widdle Lloydie has to hide posts on nim busters that hurt his widdle feelings.

Too bad DNSMADEEASY.COM is the host server for nimbusters.

Poor Lardass tell us why you whine and hide away your daily asskickings. Those words hurt your widdle feelings do they? The only way you can even come close to "winning" is you have to cheat by tagging posts, editing posts and hiding them away, too bad the posts you think Roger posts he never posted at all. And, you keep guessing about Roger's "5 isp's" DUMBASS...you are so fucking wrong, but then you have made a lifetime out of being wrong.

BWHAHAHAHAHAHAHAHA!

Didn't Blevins say he TOSed Roger off of MSN to begin with? Looks like you and him fucked up again!

Yep, run and hide, pussy CONVICT!
[restored]

He whined to the admin of the board to have his daily asskickings
hidden away because he is a pussy who couldn't answer them directly.
But what a double standard, like when Davies posts under two dozen
different names and spams as the shit can man on the board those posts
stay because the admin thinks he is helping his gay lover Davies. The
fact is, Roger wins because you have to cheat by hiding posts and
editing posts to "win."
Oh, and Roger wouldn't have to post "200"? posts (or so you say, mainly
that's another LIE from the known liar Davies, some "christian" he is,
eh?) if you weren't such a pussy and had to hide his posts that hurt
your widdle feelings, Porky.
Poor deluded Lardass Davies and his retard buddies, cowards and
pussies, all of them.

[end restore]

That is EXACTLY what is happening.
>
> You think you can whineand

"whineand"

You think you can post in English, you queer Okie CONVICT?
Okies arent' the smartest people in the world, even people fromWest
Virginia are smarter than people from Oklahoma.
To be charitable about it.

Hey Prison BITCH, you are very familiar with how shit on dicks taste,
since a nigger assfucked you and you sucked him off on a nightly basis
while you were in the Federal Pen.

I am looking for the Black (Nylon,Polythene ???) tubing around 6mm OD
and wall thickness of 1mm for construction of 900 MHz whip antenna.
It needs to be fairly rigid as it is glued to an SMA plug.

If anyone can advise what material is typically used and where I could
purchase
a reel of it (maybe it is even pressure tubing for pnuematics ?), it would
be much
appreciated. Australian source would be preferrable.

Thank in advance

Regards

David

Mal,

I cannot see on the web page where they mention the material used for the
Whip Radome ?
They also don't seem to sell any tubing.

Can you advise me which page they advertise the tubing ?

Thanks

Try a gardening shop. Drip/micro spray irrigation uses pvc tubing that might
fit your requirement.
Don't forget to do a microwave oven test on the material because some black
plastics are carbon filled.

I just got one without a manual and need some help. I've figured out how to store and recall, and kind of scan but don't know how the other functions work. The 2.8 filter doesn't work, but red the LED when 2.8 KHz is selected. Other than locking up once in a while, and that might be me, the radio seems to work. Anyone got a manual/copy they want to sell? How about the page on working the keypad functions?
tnx

It's too late. You already made yourself look foolish by using the word "dficks" in your subject line. You can't take back your mistake with a second post, because everyone already knows that you have never (and never will) master an ordinary keyboard.

Buy a weed whacker. Cut your hair with it. Chill out. Make love to a dalek.

You'll be glad that you did. Or maybe you won't. Frankly, we don't give a damn, Scarlett.

Wrong, the post is not archived on Google, idiot. You still don't know
how things work, and you proved that when you tried to pass off an
Marshall County Alabama ares website for one concerning Marshall County
West Virginia ARES. But you prove your idiocy in every post.

> Buy a

I already own you, BITCH!!!!!!!

"...Drunkenness...and the like...those who practice such things will
not inherit the kingdom of God... And those who are Christ's have
crucified the flesh with its passions and desires." (Galatians 5:21-24)

Now get to blowing those goats.............

--
Saggytits' theme song by Bob Dylan:

"Idiot wind, blowing every time you move your mouth,
Blowing down the backroads headin' south.
Idiot wind, blowing every time you move your teeth,
You're an idiot, babe.
It's a wonder that you still know how to breathe."

INTERNATIONAL AMATEUR RADIO NETWORK (IARN) AND AMERICAN AMATEUR RADIO ASSOCIATION (AARA)BROADCAST OWNERSHIP AND POLICY STATEMENT

IARN is a non commercial sister organization of AARA. IARN's Amateur Radio short wave, two meter, satellite and internet bulletin service is available to AARA directly and all other Amateur Radio organizations indirectly through its AARA owned and operated affiliates Amateur Radio Newsline, RAIN and ANS. The amateur radio public has instant and direct 800 number access through the daily talk show. All radio amateurs worldwide are required to listen daily.

IARN is governed by the IARN Amateur Radio Peace Corps Foundation, Inc. which has a Board of Directors who appoint IARN's Manager (currently Glenn Baxter, K1MAN). IARN also has 501(c)(3) tax exempt status with the IRS.

IARN has free lifetime memberships, Directors, International Amateur Radio Clubs around the world, and a free newsletter The International Amateur Radio Digest. IARN's primary purpose is emergency communications and its secondary purpose is to maintain the IARN Bulletin Service and support AARA via access to this service.

broadcaster in a while now.

540. GMRS vs Marine VHF

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-25 20:09:33 UTC
From: John <jfrey2a@yahoo.com>
Message-ID: <1125000573.895005.203620@g49g2000cwa.googlegroups.com>
Source record: 50045

Can anyone tell me what the difference in performance would be between (handhelds): a 5w GMRS vs. a 5w Marine VHF in mountain terrain (ignoring legalities.)

Your comments are appreciated.

541. N9OGL comments on K1MAN taken from QRZ

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-25 20:31:48 UTC
From: N9OGL <toddaug555@yahoo.com>
Message-ID: <1125001908.273148.309830@g44g2000cwa.googlegroups.com>
Source record: 50046

Hello everyone, I see there is another discussion on K1MAN. I am currently working on a petition to send to the FCC regarding K1MAN. This petition is real not for K1MAN nor is it against him. I mainly wish to bring some of my concerns and questions to the commission. I am currently as I stated working on it but here is what I've got so far.

I. Broadcasting and Information Bulletins

1. N9OGL believes that the FCC should clarify the rules regarding Information Bulletins and Broadcasting.
2. N9OGL questions the FCC decision regarding K1MAN "broadcast" was this decision "content-neutral" and how does the decision conform to Section 326 of the Communication Act of 1934 and the First Amendment?

II. Pecuniary Interest

1. 97.113(a)(2) prohibits ANY amateur station from making money direct or indirect from the amateur service. N9OGL questions while K1MAN made money directly the ARRL and its W1AW is making money indirectly how is one allowed to do it and another isn't?
2. What is the FCC definition of non-commercial radio? Because it seems that the definition has an arbitrary assortment of definitions from one service to the next.

Todd N9OGL

Very Little I should think

except that Marine VHF would likely have a little better range away
from the Oceans or Great Lakes, due to the lack of other stations

a the firnges of ones range another signal can finish off the further
more distant one.

here of course the word range means usable range it will still travel
out as far but you will not be able to hear it under the other stations

> Your comments are appreciated.
>

Hi John,

You will get many comments about legalities, and some about antennas, and some about radios.

If they don't mention the fact that Marine VHF (150-170 MHz) and GMRS (460 MHz) have very different abilities, then you should not pay a lot of attention to what else they say.

Many times, VHF and UHF act very similarly, and over water, that may be more so, but if people who answer your post don't mention any of those at first, then it means (at best) they didn't read your post. That means that you should give their post as much credence as they gave yours.

They probably didn't even notice that you were asking about mountain terrain. That is a big part of the question. OK, maybe it's 99% of the question to consider. All the other stuff is interesting, but it doesn't answer the question. My 2c only.

All the best,

Dave

p.s. If you would like to exchange email about this, my posting address here will be good for 6 days or so. I'd be happy to give you my regular email address if you want to talk about VHF vs. UHF in mountainous territory. I live in NH where the state cops still use 46 MHz (low VHF, covers the hilly "Granite State").

553. Free guide on how to make your website rank high in Yahoo, Google, MSN...

I am providing a free guide on how to make your website rank high in the top search engines. Using this guide and the seoelite software mentioned inside, I was able to make my website - www.studiotrafficguide.com rank in the top 3 positions. (You can type "studiotraffic guide" in Yahoo, Google or MSN search to check.)

I don't know how long I am going to offer this guide for free, so download it ASAP by visiting the link below:

http://www.studiotrafficguide.com/seo_madeeasy.pdf

Be sure to read every word of it, and use the methods diligently. You'd be amazed at how well it works (especially seoelite)!

Is it moderated?
If so, that's also got a "down side,"
in that discussions are limited to the parameters
set by the prejudices and bigotries of the moderator.
Sometimes, kill files are the best answer.

Try 2W VHF no-license MURS Service (which has no ERP limit).

Two 2W VHF rigs will perform as good as 5W GMRS UHF rigs in your situation, when comparing like-gain antennas, and the batteries will last twice as long!

(Oh, and don't even bother with those cheap-ass FRS/GMRS integral-antenna hybrids, those are junk... I'm assuming you were talking about a REAL GMRS radio with decent receiver specs and replaceable/upgradeable antenna).

For more information on MURS:
http://groups.yahoo.com/group/MURS-OPEN

*** SAY GOODBE TO K1MAN FOLKS !!!!! ***

(snip of much bs)

ENFORCEMENT: FCC SETS ASIDE K1MAN LICENSE RENEWAL
(from the ARRL Letter)

The FCC has confirmed that the agency has set aside the license
renewal application of Glenn Baxter, K1MAN, of Belgrade
Lakes, Maine. This after routinely granting it on July 22nd.

As previously reported, Baxter received a $21,000 Notice
of Apparent Liability from the agency which has not yet
been paid. His current license expires on October 18th.
In years past, if a person contested fine and his or her
license expired during the period when the matter was
being adjudicted, that person could continue to operate
until a final determination was made.

That all changed in November of 2004 when the
agency enacted the so-called "Red Light Rule"
With the "Red Light Rule" in place, the FCC can
decline to renew a license during the appeals
process and order the person off the air once his
or her current license expires.

The agency's July 25th notice to K1MAN was signed
by Tracy Simmons who is Associate Chief for Licensing
Operations of the Public Safety and Critical Infrastructure.
Division of the FCC. In it, the FCC says that the set
aside is for enforcement review purposes. Whether or not
the regulartory agency will invoke the Red Light rule in
Baxter's case won't be known until after October 18th
unless he pays the NAL or settles the matter in another
way before that date.

Back on November 1, 2004, the FCC's put its "Red Light"
rule into effect. Under it, the agency must withhold action
on applications and other requests for benefits when the
applicant is shown in the FCC's database as being delinquent
in non-tax debts owed to the Commission. This means that

the regulatory agency will no longer accept applications
from debtors, process their pending requests, or provide
other benefits until the delinquency is resolved.

To make this work the Commission checks its records against
each application under that applicant's federal registration number.
This, to determine if the applicant or any other entity using
the same taxpayer identification number is delinquent in
any debt owed to the Commission. If the Commission finds
that the person to be a delinquent debtor, the request is "red lighted."
The Commission then stops the processing and notifies the
applicant that he or she has 30 days to either pay the debt
or make arrangements for payment of the debt. If payment
arrangements or correction of the records is not made,
the Commission will dismiss the application or request.

There are three extremely limited exceptions to this rule.
First, if the applicant through an attorney files a timely
administrative appeal or has contested the existence
or amount of the debt, the debt will not be considered
delinquent under the red light rule until the order in
question is final. Also, the FCC will not consider it to
be an immediate debt if the automatic stay provisions
of the United States Bankruptcy Code have been
invoked and are deemed to be applicable in a given case.
Lastly, the Commission will process applications for
emergency or special temporary authority involving safety
of life or property including national security emergencies.
Other than these, the delinquent applicant either must
pay up or take the chance of loosing his or her ability
to continue on the air.

They're Coming To Take Me Away

Remember when you ran away
And I got on my knees and begged you
Not to leave because I'd go beserk?
WELL,

You left me anyhow and
Then the days got worse and worse
And now you see I've gone completely
out of my mind

AND

They're coming to take me away,
Haha, they're coming to take me away,
Ho ho, hee hee, ha ha,
To the funny farm
Where life is beautiful all the time
And I'll be happy to see
Those nice young men
In their clean white coats
And they're coming to take me AWAY,
HA HAAAA

You thought it was a joke,
and so you LAUGHED, YOU LAUGHED!
When I had said that losing you
Would make me flip my lid,

RIGHT?

You know you laughed.
I HEARD you laugh, you laughed
And laughed and laughed
And then you left,
But now you know I'm utterly mad

AND

They're coming to take me away,
Haha, they're coming to take me away,
Ho ho, hee hee, ha ha,
To the happy home with trees and flowers
And chirping birds and basket weavers
Who sit and smile and

Twiddle their thumbs and toes
And they're coming to take me away,
HAHAAAAAAAAA

I cooked your food,
I cleaned your house,
And this is how you pay me back
For all my kind unselfish loving deeds

HUH?

Well, you just wait,
I'll find you yet,
And when I do I'll TOS your
ISP, you rotten CUNT,

AND

(Roger foams at the mouth while crying.)

well there's a lot of people on here that use google which doesn't have
that feature. The reason I created it was to discuss amateur radio, not
have a weekly flame war by calling people names.
Todd

//

You tell em', Todd.
Lord knows YOU have never called anybody names....

Classic. And very true.

>Problem is that the cross-eyed intellectual midget cannot get it through
his inches thick Neanderthal skull that he is simply not wanted. Nobody has
a good word to offer on his behalf and all condemn his infantile
disposition.
It is little wonder that there are those who would take no small amount of
glee in seeing some sort of physical harm befall the little antisocial
urchin. It wouldn't be as if he was undeserving of reaping that which he has
sewn.

N9OGL:

Yes, it would be best if you left here and went there. You don't seem to do well in an open forum where matters are freely discussed.

There you will be able to pick and choose those which agree with you or who can only mount weak disagreements. You can also control and influence the course of conversation, or else "pull the plug on them."

I will attempt to help you out and refer complete nincompoops your way, try to be gentle with them...

If you ever get tired of running a "fixed game", come back, we will be waiting... bring your bunch with you, after you have them all brain washed and figure ten of you will be able to go "toe-to-toe" with one of us...

Source record: 49987

From KH6GRT

Greetings Museum Ships and Military History enthusiasts,

September 2, 2005 marks the 60th anniversary of the signing of the Japanese surrender papers on board the battleship USS Missouri in Tokyo Bay, formally ending World War II. The USS Missouri, currently located at Pearl Harbor, Hawaii, will be holding extensive ceremonies on board September 2, and the ship's club station KH6BB will be on the air as well. On CW we will be using the original Vibroplex key that was used on board in 1945 to send the first news of the surrender signing; the key has been loaned to KH6BB for the event by the Maritime Museum of Monterey CA, with permission to use the key on the air.

First operations from KH6BB will take place on September 2 at 0000Z (note that this is the afternoon/evening of September 1 in the US), because this time corresponds to 0900 September 2 in Tokyo Bay, the time and date that! the papers were originally signed. At this time we will re-transmit the exact message that was sent from Missouri in 1945 reporting the signing. Since Missouri's hull number is BB-63, the primary operating frequency will be 14.063 MHz CW. Depending on propagation, alternate frequencies will be 18.073 and 21.063 MHz. There may be combined SSB/CW operations on 14.263, 18.163, or 21.363 MHz. Operations will continue until approximately 0600Z depending on propagation.

KH6BB will also be operating on September 3 and 4 from about 0000-0600Z (Friday September 2 and Saturday September 3 local time in the US), possibly earlier depending on propagation. There may be operations on September 2 and 3 around 1600-1800Z, again depending on propagation. Check the KH6BB web page event calendar at <www.kh6bb.org> for last minute details on times and frequencies.

This special event developed so quickly that we were unable to submit it to ARRL for publication in QST which is why we're putting the word out on these mail lists. So, warm up your boatanchors and look for KH6BB during these special event days.

The CIA is believed to be holding fewer than three dozen al Qaeda leaders in prison. The agency holds most, if not all, of the top captured al Qaeda lea ders, including Khalid Sheik Mohammed, Ramzi Binalshibh, Abu Zubaida and the lead Southeast Asia terrorist, Nurjaman Riduan Isamuddin, known as Hambali.

"Thanks, but no thanks," Joshua said. "The conversation where you try to exp lain to a highway patrolman why you have 40 pounds of gelatin in your passen ger seat is one I think we'd both rather avoid."
"And here you thought you were going to have to do a lot of hand holding," I said.
That stung. Joshua must have picked up on it. "I don't mean to imply that yo u had done anything wrong, Tom," he said, gently. "Just that there wasn't ti me. Even if there was, this was a better way. Ralph deserved better than to die on a vet table with strangers over him."

Dear Asshole,

I've started this group to allow people to discuss amateur radio issues, and get away from assholes like YOU and your little buddy STEBIE, Command BitchWhore and all the other harassing people one here. Perhaps one day you too will get tired of the name calling, libel, and homobashing on this group and come to a group that talks about AMATEUR RADIO POLICY AND RULES AND REGULATIONS.
I hope you and your little name calling buddies have fun on this so-called amateur radio discussion group.

And one more thing Johnny, you can talk about anything you want the only thing I don't want on it is all the crap (name calling, libel and harassment) that's on this so-called discussion group

again you and your little harassing buddies have fun on this so-called and worthless newsgroup

N9OGL:

Well, I must admit that it will be nice have some homosexual/queer worshiping weirdo like you move off straight avenues.

And, I have noticed that all you have to offer is "historic protocols", "historic justifications", "historic data", religious devotion to ancient ideals, etc--and that you want to plonk your worthless behind-the-times right in the middle of everything and bring everything to a halt, so by all means I do welcome your leaving to form your own "good ole boys club"...

And, I am afraid you will only get my ridicule, disdain and polite tolerance for your very limited methods of participation and your concept of non-advancement for the technology, policies and course which will lead amateur radio away from the destruction you hold in store for it and have most obviously participated in... what ever vision blind you, there is probably a cure or treatment when you are ready...

Progress can move mountains, a few old-timers stuck in yesterday should be no problem...

590. For Sale or Trade 440 Repeater/Base Unit 150+watts

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-27 20:39:13 UTC
From: Gene Rodgers <oldcodger@verizon.net>
Message-ID: <Rb4Qe.2040$Uz2.1689@trnddc02>
Source record: 49994

I have a Transmitter which is rack mounted in a cabinet and capable of over 150 watts but will dead key transmit at 120 watts (continuous). The transmit is variable from 5 watts to 120 watts. I also have a dual Receiver rack mounted in a cabinet. Both have power supplies and are very heavy duty pieces of equipment. Wouldn't take much to convert to a 440 repeater or use as is for volunteer fire department or small city.
Units must be picked up in Dallas.Comes complete with manuals for both.
Will sell for $300, (make offer) or trade for good Ham HF rig, or ????.

Pictures of manual & rig:
http://www.grodgers.com/dfwforsale/transmitter440.jpg
http://www.grodgers.com/dfwforsale/receiver440.jpg

Units are skid mounted and virtually unused. Appereantly this was a backup unit.

Contact me at ke5bfa@comcast.net or reply to this email.

Gene

Incorect troll. The FCC has not taken the K1MAN off the air and it
never will. K1MAN has 11 lawyers in Washington and 4 in Maine who will
tie the FCC up in court for years. K1MAN, IARN and AARA will win.

> in fact, a district manager now, with a company vehicle.

Bullshit. A quick call to Papa John's confirms he (you) was FIRED!
You are not the district manager, Lardass, you couldn't even do your
pizza delivery job correctly and frequently fucked up the orders.

> Eat your heart out Welfare Boy,

Sorry, dumbass, Roger nor myself is on "welfare", "SSI" or any of your
other wrong guesses and certainly not jealous of an unemployed pizza
delivery BOY who 1) Has no desirable job skills, since pizza delivery
is the only job he is qualified to do. 2) Your poor work record will
make it even harder for you to even get another pizza BOY job or
anything else and you'll have to mooch off your Mommy and Daddy again.
3) You have to make up lies like you are the "district manager" when
that is easily verified NOT to be the case. You are a liar. You are not
anything but FIRED, Davies! BWHAHAHAHAHAHAHAHAHA (And, are you still
crying over Laura dumping you after talking to her a few times and
asking her to marry your stupid sorry fat ass?)

Now who's dreaming, Lardass?
The answer is you.

> all hairy,

Nope, wrong again, Porky. Keep trying to pass off that faked pic as
Roger's. You can't even do that right.

> with a secwet masters degwee,

My, you have a not so secret cocksucking lisp, 31 year old virgin
because you are queer Davies.... Wrong again, dumbass, Roger has
credits towards a Master's degree (you get it wrong every time)and has
never claimed otherwise, but at least unlike you he graduated from

college and has a degree or two and didn't do like you did, flunk out
your first semester.

> retested twice by Riley due to malicious qrm,

Wrong again, dumbass! You can't even count to two. Roger was only
retested once, and passed. The retest letter which has been posted here
ad nauseum does not mention qrm or anything else as to the reason
behind the retest. Passing a retest or even a higher test is something
you can't even do, training wheel no code loser. That speaks volumes
about your knowledge. The retest Roger passed and even upgraded to
Extra, (another thing you can't do) so if that was a "punishment" it
sure backfired on the FCC.

> and sent three FCC warning letters.

Nope, wrong again, Lardass, you should lay off that chepassed womanly
Bud lite beer, it's rotting that single brain cell you have.
1) warning letter
2) advisory/cautionary letter to Roger and Steve Tunder
3) retest letter

You couldn't count to 5 so it figures you can't count to ONE.
Like when you posted as "Digital":

"Digital" <WussyRayChason@anon.uz> shows not only is he too fucking
stupid to correctly read a message header, he can't count to 5 in
<degedb$l0u$0@pita.alt.net>:

Digital Lardass Lloydie whined to himself, as he answered himself like
he does on nim busters:

><nothing of importance>

Tell us how an Alpha Delta DX-CC antenna which is 82 feet long and
installed in an inverted vee configuration with the apex at 45 feet can
cross a sidewalk 20 feet away fromthe end of the antenna, dumbass?
Bwhahahahahahahahahahahahahaha You fucked up again, Davies!

> Wogie is still <Poor Lardass, he can't even pass the General theory test>

Too bad he made you look like a fool, Davies. Tell us how the Marshall
County Alabama ARES website is the one for Marshall County, WV ARES
again.

> And by the way. Wogie was only made to wetest because he tested through a
> VEC.

Fromthe ARRL website:
Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R.
Section 97.519(d)(2), the Commission has the authority to re-administer
any
examination element previously administered by Volunteer Examiners
(VE's).
The Commission may either administer the examination itself, or under
the
supervision of a Volunteer Examiner Coordinator (VEC) or VE designated
by
the Commission.

You finally got something right, dumbass Davies. And Roger passed it
and even upgraded to Extra, while all you have is the no code training
wheel license. Tell us how you can't do morse code again, mentally ill
retard Davies.

> Wiley does this all the time, wight? You wead about it evewy day on
> Newsline.

Message-ID: <3f95f43d.279559451@newsgroups.bellsouth.net>:
"The retest letter made no reference to interference; in fact gave no
reason for requiring the retest. Such a request is part of the
Volunteer Examining program. It could have been made for any number of
reasons that may have had nothing to do with any of the addressee's
actions. An investigation into the VE group that gave the test, would

be a good example."

Obviously you can't read, but with that cocksucking lisp, you sure show you can suck cocks, Davies.

"he who owns the presses owns the press"...if someone starts up a moderated newsgroup or list on Yahoo, they "own the press" and can setup whatever rules they like. I don't bitch about it. If I don't like the rules I don't join the group. If I want a group with different rules, I setup one of my own. Pretty simple, actually.

better check their database then. I do believe that the report (as cited)
can be found on the fcc newsletter section. as such, it pretty much means
that in 2 months, he's gone. no if's, and's or but's.

I begin to wonder though? where does he have all the money for the lawyers
when he can't even deal with an fcc fine?

609. Geek Shopping

Newsgroup: rec.radio.amateur.misc
Date: 2005-08-28 16:18:51 UTC
From: slowave@mail.com
Message-ID: <1125245931.018723.91450@g49g2000cwa.googlegroups.com>
Source record: 50013

I need a little help.
Several times I have tried to find recent information on the web on good places to find good geek items like electronics parts in specific locations like Dallas, Hong Kong, and Southern California. Sometimes after various amounts of searching I would find a few places for each location but nowhere was there a good current comprehensive list.

A lot of my searches would lead to the Wikipedia so in my ignorance I created a 'Geek shopping' article in the hopes that other people would both find use for it, and add to it so that fellow geek shoppers would have a much easier time.

I half expected the page to not meet Wikipedias criterea for survival. However I didn't expect it to be immediately attacked and marked for deletion for such reasons as the anagram for Geek Shopping is 'Pigpen kegs, ho'! I suspect that the page is being attacked by a core group of Wikipedia 'nabobs of negativity' who have nothing to do with whether the page is valid material or not (it probably isn't as it stands).

Therefore I am asking that you take a look at 'http://en.wikipedia.org/wiki/Geek_shopping' and update it and make it more useful. Also please go to the link on the line reading 'See this article's entry on the Pages for Deletion page' and add your comments on if the article should be deleted or not.

N9OGL:

Let me explain something to you, from your posts here:

1) I consider you "One SICK BASTARD!"
2) If you lived in my neighborhood I would warn my neighbors of you.
3) I would not be comfortable having you around children.
4) I would refer you to mental health.
5) etc.
6) etc.

You get the picture?

John

==========
January 29, 2002

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918
Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.
In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect.

We will outline the apparent misunderstandings below.

Amateur Station Control
With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable

modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference
It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users
Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting
We also note that on your web site and in your radio transmissions, you

refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations
We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 724
BID: $OPDX.724
August 29, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K2HJB, NG3K, W3UR & The Daily DX, K4UEE and K0IR, N4AA & QRZ DX, N4GN, WW5L, K8YSE, 4X1VF, DL1EK & The DX News Letter, EA5KY, F5CWU & La Gazette du DX, F5NQL & UFT, G3NKC, HL5FUA, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, MM0DFV, ON3UR, SK0BU, SM0BYD, SQ9MZ, TA3J and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st/August, through Sunday, 28th/August there were 208 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3Y, PETER I ISLAND (Update). A new press release was sent out this past week by Ralph/K0IR and Bob/K4UEE (Peter I Dxpedition co-leaders). OPDX InterNet Subscribers will receive the complete press release as an additional bulletin. Excerpts from the press relase state that three new team members have been added to the 3Y0X DXpedition: Mel/W8MV, Don/N6JRL and Mike/FM5CD. They indicate that there are still a couple of team slots

available, and they are especially keen to find a team physician to accompany them. If you have an interest, contact Bob, K4UEE at: mallphin@aol.com
An inspection team have just returned from Punta Arenas and Santiago, Chile. They report that everything is on track for an early February 2006, activation of Peter I. The team should depart Punta Arenas around January 27th and return around February 25th. This will allow them to be on the island for about sixteen days depending on the weather and other factors. Fifteen members of the team will meet in Atlanta for a training session scheduled for September 15-19th. Please visit their Web page, and if possible make a contribution toward the significant expenses of this DXpedition at: http://www.peterone.com

9/11 ACTIVITIES.....
The Pearl River DX Association will again operate W2WTC to commemorate the 4th anniverary of 9/11. The club will operate throughout the month of September on all bands SSB only. Check out W2WTC on QRZ.com. Operators will be Hank/K2HJB, Kevin/KA2NUE, and Ira/KB2DJJ. QSL via W2WTC or K2HJB, direct (w/SASE) or by the Bureau.

The Metropolitan 222 Amateur Radio Society (K2MET) will sponsor a September 11th Memorial Station on Governors Island, NY (IOTA NA-026, USI NY-012 - new one for USI), September 10, 2005. Operations will take place between 11:00 AM and 4:00 PM EDT (1500-2000z) on 21340 kHz, 14250 kHz and 7250 kHz (+/- QRM). QSL via W2SN.

0T705 & 0T805, COSTA RICA (Attention Prefix Hunters!). Carlos, TI8CBT, will activate new prefixes starting September 1st through September 30th. Look for special callsigns 0T805P and 0T705G to be on the air to celebrate the 184th annversary of Costa Rica's independence. Activity will be on all bands 160-10 meters including the WARC bands and 2 meters. Carlos states that the suffix "P" is for Puntarenas, Costa Rica, Zone 8, and the suffix "G" is for Guanacaste, Costa Rica, Zone 7. More details and a picture of the QSL card is avaliable on QRZ.com.

FRENCH SPECIAL ACTIVITIES.....
From September 12-26th, hams from the French Correze area will put on the air the special callsign TM5MEM. During these 14 days they will celebrate the "French Heritage Days." On September 17-18th, a station will be active, CW only, from the Partisans and Deportation Museum, Edmond Michelet, in Brive la Gaillarde. QSL via F6KLO, direct or via the French REF Bureau.

Now through September 10th, look for TM8CDX to be active during and before the French DX Club and The Clipperton DX Club's (CDXC) 27th convention. This callsign will be used also by the members of the Provins ARC (F6KOP) during their entry in the IARU VHF Contest on September 3-4th. QSL via the French Bureau to Rafik, F5CQ, or direct to: Rafik Djandji, Les Revergis, F-35360 LA CHAPELLE DU LOU, FRANCE.

FY, FRENCH GUYANA. David/F0CRS and Freddy/F5IRO will be here for the next four months. Activity will be on the HF bands, CW and PSK. Both operators

have asked for FY callsigns. They will be active from the Cayenne ARC (FY5KAC). Freddy is currently active as FY/F5IRO and David is awaiting his new "F8" callsign and is expected to sign FY/F8*** when he receives it. Both operators plan to be acive in the next French CW Championship the last weekend of January 2006 (28-29th); callsign TBA. QSL both operators via F5KIN.

GD0, ISLE OF MAN. The Manx Kippers will be active again during "SSB Field Day" (September 3-4th); in the Open Section (400w and beams category). The callsign will be GD0EMG/P. The team this time will be G3NKC, G4MJS, G4XUM and M0RHI. They will be active on 80-10 meters, as per UK rules, and welcome all QSOs. They will try to be active on 30m if time permits (they get many requests for activity on this band; before the IOTA Contest they made a number of QSOs, and they attempted to be active afterwards but had RF feedback problems). QSL to M0BEW.

H40 & H44, TEMOTU PROVINCE AND SOLOMON ISLANDS. Members of the Korea Amateur Radio League (KARL) will be celebrating their 50th anniversary by going on a DXpedition to the Temotu Province in the Solomon Islands, between November 5-11th. Six operators will have two stations active on all HF bands 160-6 meters (including the WARC band) on CW, SSB, RTTY and PSK31. The callsign H40HL has been requested (not confirmed yet) for their activity on Nendo Island (OC-100) in the Temotu Province. The operators mentioned are: Choi Jong-Sool/HL5FUA (member of Korea DX Club - KDXC), Gang Ho-Jun/DS2AGH (Team Leader), Yi Ju-Dong/DS2BGV, Yun Yong-Ju/6K2AVL, Yu Byeong-Jo/6K2DJM and Bak Yeong-Su/N1PW (ex-HL1PW). They will use five beam antennas, two kinds of vertical antennas and one dipole antenna. They will use the callsign H44HL (not confirmed yet) in the Solomon Islands (OC-047) before and after the operation in the Temotu Province. A Web site is now active with more details at: http://kdxc.net/h40hl_2005/
QSL Manager is HL1XP. QSL via the bureau or direct to: Jeon Seong-Tae, 58-1 Nonhyeon-Dong Gangnam-Gu, Seoul, Korea, 135-815, REPUBLIC OF KOREA.

IOTA NEWS.....
AF-100. NEW IOTA ACTIVATED! Joe, I2YDX, activated this new IOTA during the past weekend. Activity was from an island located on the Delta of Congo River, belonging to the Democratic Republic of the Congo, and qualifying for IOTA NEW ONE. Joe got a special prefix/callsign for this operation: 9R2DX. He was joined by a local ham from 9Q.

AS-100. If you missed this past weekend's 4X0AI Akhziv Island activity by Dov/4Z4DX and Alex/4Z5KJ (QSL via 4Z4DX), you will have another chance in September. Jan, 4X1VF, informs OPDX that he will lead a team to operate as 4X7AZ from Akhziv Island between September 30th and October 1st. They will have three complete stations on 80-10 meters CW/SSB. Operators mentioned are: 4X1VF, 4X6HP, 4Z1UF, 4Z4KX, 4Z5LA and 4Z5FI. QSL via 4Z4LA:
Ruslan Bunyat-Zade, P.O. Box 345 D.N.Efraim, Barqan 44820, Israel

EU-038. Vince, IZ0FKE, plans to be active as PA/IZ0FKE from Texel Island between August 30th and September 2nd. Activity will be on all

HF bands, including 6 meters, SSB only. QSL via his home
callsign, direct or by the bureau.

NA-092. Bob, N2OML, will be active from Mustang Island (USI TX-011S,
Nueces County, Texas), between now and September 4th. Activity
will be mainly on 20 and 17 meters. QSL via his home callsign.

NA-NEW/
NA-175. Bruce/KD6WW and Mike/K9AJ arrive in Kugluktuk (formerly Copper-
mine) on August 31st and will activate the Kitikmeot Region-West
Centre Group (NA-175) first, then hopefully go on to the
Kitikmeot Region-West Group (NA-NEW) next. There is considerable
ice remaining in the Coronation Gulf from last winter, and their
activation of the new one is contingent on improving ice and
weather conditions. They will depart Kugluktuk on September 7th.
Anticipated activity will be mostly on 20/30/40 meters on or
near the usual IOTA frequencies. The callsigns will be KD6WW/VY0
and K9AJ/VY0 from both locations, so operators will need to pay
attention to which island they announce they are on. QSL to
each operator's CBA.

KH6, HAWAII (Special Event). Look for the USS Missouri's club station,
KH6BB, to be active on September 2-4th to commemorate the 60th anniversary
of the signing of the Japanese surrender papers on board the battleship USS
Missouri (on Sept. 2, 1945) in Tokyo Bay, formally ending World War II. The
station's activity will take place between 0000-0600z and 1600-1800z. Their
primary operating frequency will be on 14063 kHz CW. Depending on the
propagation, alternate frequencies will be 18073 and 21063 kHz. There may
be combined CW/SSB operations on 14263, 18163 or 21363 kHz. QSL direct to:
Battleship Missouri Amateur Radio Club, 98-1547 Akaaka, St. Aiea, HI
96701-3051, USA. Check the KH6BB Web page event calendar for last minute
details on times and frequencies at: http://www.kh6bb.org

MD4, ISLE OF MAN. MD4K will be active again during the "SSB Field Day"
(September 3-4th); in the Open Section (400w and beams category). The team
this time will be G3NKC, G4MJS, G4XUM and M0RHI. They will be active on
80-10 meters, as per UK rules, and welcome all QSOs. They will try again
to be active on 30m if time permits (they get many requests for activity
on this band; before the IOTA Contest they made a number of QSOs; they
attempted to be active afterwards, but had RF problems). QSL to G3NKC.

OH0, ALAND ISLAND. Ari, OH5DX, will be active as OH0Z during the CQ WW
DX CW Contest (November 26-27th) as a Single-Op possibly as an All-Band
or Single Band (TBD) entry. QSL via W0MM.

QSL INFO AND NEWS.................
The log search with pictures of the recent 5X1B and 5X1W operations
(August 3-12th) by JJ1CBY/Yuki and JA1DOT/Hisa are now available
online at: http://www.NDXA.jp/pedi/5x1w-2005/

Hans, SM0BYD, informs OPDX that for direct QSL replies for HZ1EX, please
QSL ONLY via SM0BYD (please - NO QSLs via SM0CXU!): Send 2 USDs OR 1 IRC,

OR a prestamped SAE with a 10 kronor Swedish stamp which makes up for sufficient return postage. He also states, "Unfortunately, I still receive only 1 USD now and then and I don't think that I should pay for the postage or part of it, hi..." QSL via the Bureau is also OK as well. ADDED NOTE: Hans states that he will now accept IRCs. He was misinformed about IRCs being accepted in Sweden by an employee at his Post Office HQ in Stockholm!

The correct QSL Manager for Berkin, TA3J, is TA3YJ. Some Polish radio amateurs have been using YL2GP as his QSL Manager which is incorrect.

NOT THE QSL MANAGER. Jerzy, SP9FUU, has been receiving QSL cards for V8NOW. Jerzy has never been a QSL Manager of any station . QSL V8NOW to: Alias Hj Mohd Ali, No.6, Simpang 208-5,Kampong Manggis Dua, Jalan Madang BC3515, Brunei Darussalam, BRUNEI.

RSARS CIS DX CONTEST 2005. Jurij, MM0DFV, informs OPDX that there are new rules and date (October 22nd, 1000-2200z) for this contest. Visit the following Web page for details and the 2004 results at: http://www.srars.org/cisdxc.htm

SA50, SWEDEN. The Amateur Radio Club at the Royal Institute of Technology in Stockholm, Sweden, is celebrating their 50th anniversary this year. They will participate in the Scandinavian Activity Contest (SSB) from September 24th 1200z to September 25th 1200z using the callsign SA5'L. QSL via SK'BU.

SOUTHEAST ASIAN TRIP. Pete, SM5GMZ, will be back in Bangkok in the beginning of December this year for another six months working as a photo journalist mainly for the European news agencies but also for World Picture News (WpN) in New York. Even though work always comes first, during his free time he will be active on the air. Between December 5-31st, Pete will try to activate his Thai callsign, HS0ZFI, as much as possible. His operations will be on CW/SSB/PSK31 and RTTY. Starting January 6th, Pete will be back in Cambodia (XU) and will also try to make a few thousand QSOs (12K last time) with his Cambodian callsign XU7ADI. He will stay in XU for at least two months. Activity will be on all bands including 50 MHz and the same modes as above; CW/SSB/PSK31/RTTY. He also mentions that there may be a slight chance that he will activate Myanmar (XZ) and Laos (XW) as well. More details will be forthcoming.

ST, SUDAN. Jovica, T98A (ex. T94FC), will be on a one year United Nations High Commissioner for Refugees (UNHCR) assignment to the Sudan. He has received the callsign ST0RM. Activity will be mostly CW on all bands, but also expect some SSB and the Digital modes. QSL via T93Y by the Bureau or direct to: Boris Knezovic, P.O. Box 59, 71000 Sarajevo, Bosnia and Herzegovina.

ST, SUDAN. Ado, W4ADO, has a two years contract with "Doctors Without Borders - Medecins Sans Frontieres" (MSF-USA) for work (technical support) in The Republic of the Sudan. He will arrive in Sudan on September 26th and will try to get an amateur radio licence. His activity will be on

both CW and SSB. Ado states, "My first goal is to help people in Sudan and after that work on the radio". QSL will be via 9A6AA.

T8, PALAU.The following was a press release sent out by Tim Totten, N4GN, on Tuesday, August 23rd:
THE REPUBLIC OF PALAU - AN IDEAL DX HOLIDAY SPOT
Martti, OH2BH (T88BH) and Tim, N4GN (T88GG) AT IT AGAIN
Those in the game for some years will recognize the Western Carolines, KC6, as one of the regulars on the DX scene. It was in 1994 when the islands gained independence as T88, and this particular entity has been more difficult to reach from Europe and the United States ever since. Only a handful of locals and sporadic DXpeditions have kept Palau on the map. But no more.

Tim, N4GN, and Martti, OH2BH, have decided to challenge the matter and put two T88 signals on the air at the same time; T88GG mostly on CW and digital modes and T88BH on SSB. The activity begins on August 25 and continues until September 5, including the All Asian DX Contest during the first weekend of September. QSL cards featuring this newly independent Republic can be obtained via Jarmo Jaakola, OH2BN: Kiiletie 5 C 30, Helsinki FIN-00710, FINLAND.

This DXpedition is supported by Vertex Standard (Yaesu) both in radio and manpower terms. Yuichi, JN1WTK/T88YK, will be on the team to make sure that you can hear the cleanest audio on the bands from the latest lineup of state-of-the-art Yaesu gear, but not around the clock as ladies are involved, too--Joana and Leena OH2BE/T88BE expect to establish a reasonable routine between radio and beach time while still guaranteeing that peak hours in both activities will not overlap as the path can be critical during these days of low sunspots.
http://www.api-japan.com/palau/radio/english/radio1-e.htm

You are invited to visit Palau and use the Yaesu supported luxury radio room. Maybe you can start your own dream tour today by studying the Republic of Palau for your next travel destination.
http://www.visit-palau.com/
http://palau.panpacific.com/

TI0, COSTA RICA (Special Event). Look for special event station, TI0SP, to be active in September to commemorate the 184th anniversary of Costa Rica's independence. Activity will be on all bands 160-10 meters, including the WARC bands and 2 meters. Modes will be CW, SSB, RTTY and PSK31. QSL will be via EA7FTR, only direct. More info is available on QRZ.com (type TI0SP).

VP2, MONTSERRAT. Look for Rick/G3VZT, his XYL Lynda/G0VDR and his 13 year old daugther Catherine/M3VZT to be active as VP2MRJ, VP2MLJ and VP2MCJ, between October 26th and November 4th. Rick states that he will be active as much as possible, but this is a holiday/business/family trip. Rick and his family are also expected to be active during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. He hopes to use the callsign VP2M as he did in the 1977 CQWW CW Contest. However, the VP2M callsign

currently belongs to the Montserrat Radio Society. If they can't use VP2M, they will use Rick's old callsign VP2MRJ. QSL via G4WTD.

ZB2, GIBRALTAR. The United Radio DX Team is planning a new trip at the end October here. Their callsign will be: ZB2/ON5UR (Max), ZB2/ON5MRT (Thierry) and ZB2/ON6NP (Wim). Activity will take place between October 27th and November 3rd on all bands, SSB and Digital mode. They will be active also during the CQ WW DX Contest. QSL direct via: United Radio DX Team, P.O. BOX 33, Zichem B-3271, Belgium. All direct QSL cards will receive a special full color double QSL. Visit their Web page at: http://www.on5ur.be/UR.htm

From: Tom Anderson <WW5L@gte.net>
Subject: P5 final news release

FOR IMMEDIATE RELEASE
Contact: Tom Anderson, WW5L WW5L@gte.net
Lone Star DX Association Vice President and Information Director
http:www.dxer.org/lsdxa

Apparent internal miscommunications within the North Korean government's Committee for Cultural Relations with Foreign Countries and the Ministry of Telecommunications and Posts over the approval of an operating permit

to Dr. David Borenstein, KA2HTV, led the government to halt his recent P5 DXpedition before it could even begin, the New York physician said today.

However, the main purpose of his trip to North Korea was not amateur radio, but the donation of several thousand dollars worth of medical supplies from various Western countries to the Korean Medical Association. I went to make sure these medical supplies got where they were supposed to, he said. Dr. Borenstein specializes in physical medicine and rehabilitation.

Another situation that may have also played a part in the halting of Dr. Borensteins DXpedition operations was the death of his government assigned guide, one of the leading such guides in the country. The guide drowned at Wonsan, while he and other government assigned guides were escorting KA2HTV and others to the North Korean coast.

Dr. Borensteins DXpedition costs were underwritten by the Lone Star DX Association (http://www.dxer.org/lsdxa) and equipment donated by many companies and individuals. Before he left the United States, Dr. Borenstein and the LSDXA were told his DXpedition operation should be fully accredited by the ARRL once he returned and submitted passport, visa, and photographic documentation showing he was in North Korea. This is standard procedure for DXCC DXpedition accreditation.
The Lone Star DX Association is committed to the support of DX. We knew this would be a gamble, but thought the risk was worth it to try getting P5 back on the air. Hopefully our efforts and those of Dr. Borenstein has moved the ball forward in restoring amateur radio in North Korea, said LSDXA President Mike Thomas, NA5U..

The miscommunications developed when a Democratic Peoples Republic of Korea Cultural Relations official issued the operating permit, while the governments Telecommunications and Posts officials, had not formally processed KA2HTVs request for a permit to operate. Both agencies are part of the North Korean government.

Dr. Borenstein was planning on beginning his full time P5 operations on August 20, when DPRK officials suddenly called him into a meeting. They told me the person who gave the authority in the committee should not have given it because of a mix up with the Ministry of Telecommunications and Posts, he said. Up until then I had no idea that I would not be allowed to operate as government officials had given no hint that the operating authority issued previously was not valid. I was able to demonstrate amateur radio to these same government officials and showed them how it would benefit the country.

But the inability to operate was devastating, he said. After meeting with the government officials I just went back to my room for a while and watched the BBC, the only English language television program we could receive. I knew there were hundreds of stations around the world waiting to make a P5 contact and I could not get on the air.

The Lone Star DX Association and I had planned this DXpedition for many months and many donors had given equipment and their time and effort to make this operation occur, he said.

Both KA2HTV and the LSDXA would like to thank the following sponsors for their donation of equipment: Tennadyne log periodic antennas, Yaesu and Vertex Standard radios, ACOM International amplifiers, Texas Towers, W4MPYThe QSL Man, GigaParts, Buddipole, Hex Beam, High Sierra, Press JonesThe Wireman, Heil Sound, North Alabama DX Club, Southeastern DX Club, LDG Electronics, DX Engineering, Ham Radio Outlet, and W4HT Electronics. In addition, the following individual hams provided logistical and other support: WW5L, WY5H, K4UEE, K9LA, KC2MWA, K7JA, W4WB, W4RT, W5QM, W9GJ, W2RC, QSL manager KK5DO, and the many members of the Lone Star DX Association.

Dr. Borenstein said these government officials confided to him they were hopeful a license for him to operate could be obtained in the near future, however no definite date was given. They told me they would welcome me back, despite the fact it is very difficult for Americans to get a visa there. Also, he added, there is no prohibition by the U.S. government against Americans visiting North Korea.

After the death of his guide, he said, many government leaders went into official mourning. I couldnt ask them about radio matters as these people were in mourning, so that delayed everything another two or three days.

When he arrived Aug. 9 all of the radio equipment was processed through North Korean customs without problem and it all went smoothly. Later the Telecommunications and Posts ministry officials asked to inspect some of his equipment, which included an Icom 735 and 706 MK2G, and a Yaesu 857, plus an Acom amplifier. They kept part of it for a week, he said, before ministry officials told him he would not be allowed to operate.

When first planning the DXpedition, Dr. Borenstein said, negotiations had centered on the donation of amateur radio equipment to the DPRK as a measure of friendship. When the DPRK government took the equipment for inspection, they apparently thought this was the same equipment that was to be donated. The donated equipment taken for inspection includes KA2HTVs own personal Icom 735 transciever, a Hexbeam antenna, a High Sierra tripod, coax, a Yaesu rotator, and a dual voltage power supply. The equipment was not seized, they knew I had other equipment, they could have taken everything, but they didnt, he said, adding, seventy percent of the equipment I took over there came back home.

A receipt thanking Dr. Borenstein for the donated equipment was issued by the DPRKs Committee for Cultural Relations with Foreign Countries.

KA2HTV does not consider this a failure, but rather a chance to open doors to North Korea for possible future amateur radio operations. Although I didnt get a chance to operate from P5, I believe the equipment donations and my visit planted the seeds for amateur radio operations in the future, he said. Some people may see this as a

failure, but if you dont try, youll never fail.

KA2HTV received his first amateur license in 1980 and earned his extra class license in 1984.

Dr. Borenstein has guest operated from the following club stations or as an individual from: SP5PBE in Poland, 4X/KA2HTV in Israel, JY6ZZ in Jordan, CO2KK in Cuba, and 9G5DR from Ghana.

This trip to North Korea was not his first. He was in the DPRK in July 2004 for similar medical related reasons.

PRESS RELEASE 2006-2
Peter I DXpedition- 3Y0X

For Immediate Release

August 24, 2005

From: Ralph, K0IR and Bob, K4UEE
Peter I Dxpedition co-leaders

We are pleased to announce the addition of three new team members to the 2006 Peter I DXpedition. They are Mel W8MV, Don N6JRL and Mike FM5CD. These gentlemen all bring radio operating expertise to the team as well as individual talents for the overall project. We are pleased to have them aboard! There are still a couple of team slots available and we are especially keen to find a team physician to accompany us. If you have an interest contact Bob, K4UEE at: mallphin@aol.com.

An inspection team consisting of Erling LA6VM, Bob K4UEE, and Carlos NP4IW/6 have just returned from Punta Arenas and Santiago, Chile. They report that everything is on track for an early February, 2006 activation of Peter I. The plan has the team departing Punta Arenas, Chile around Jan. 27th and returning around Feb. 25th. This will allow about sixteen days at the island. Of course, the actual time on the island and on the air depends on weather and other factors.

Fifteen members of the team will meet in Atlanta for a training session scheduled for Sept. 15th through Sept 19th. This will give us all a chance to renew friendships forged earlier this year and get acquainted with our new team members. Among the activities on the agenda are: practicing rapid deployment of shelters, low band antenna erection, sequenced container packing and rappelling practice. There will also be a safety meeting and discussions of operating techniques and tactics to be utilized by the team. Other subjects will be discussed by the team leaders, safety committee, and the antenna committee.

Please visit our website at: www.peterone.com and if possible make a contribution toward the significant expenses of this DXpedition. It may be the most expensive DXpedition ever and every contribution helps. PayPal is available too! The team members themselves are funding 70% of the total

cost.

Thanks to all of our great contributors, but the team would especially like to thank the International DX Association (INDEXA) for their enthusiasm, confidence and support of the 2006 Peter I Dxpedition. Not only have they offered significant support, but have increased their contribution from the previous year. Thanks!

Subject: WRTC2006 Tokyo Press Release - August 22, 2005
Date: Mon, 22 Aug 2005 12:31:44 +0300

FOR IMMEDIATE RELEASE

WORLD RADIO TEAM CHAMPIONSHIP 2006 (WRTC2006) SIGNED SPONSORING AGREEMENT WITH VERTEX STANDARD IN TOKYO TODAY

Tokyo
August 22, 2005

The 5th Olympic Games of Amateur Radio will be organized in Brazil, for the first time on South American soil, during the summer of 2006 with participants from more than thirty countries, representing all continents. The WRTC concept provides all participants with a level playing field, allowing pure operating skill to determine the very best in handling Amateur Radio traffic, using both voice and Morse communication.

"It is essential for an event of this magnitude that we can secure a solid financial base through leading companies in the Amateur Radio field to be able to carry out the event professionally," commented Mr. Atilano de Oms (PY5EG), President of the WRTC2006 Steering Committee. "We are honored to have leading companies support the Games as title sponsors; thus this agreement we have signed with Vertex Standard today illustrates an extremely important landmark for the Brazilians who make a huge voluntary manpower investment in this event", he concluded.

Mr. Jun Hasegawa, President of Vertex Standard Co. Ltd, emphasized that supporting one of the world's premier on-the-air events for determining the best in fair competition is fully in line with their established strategy for the Yaesu brand. "The brand profile will continue to be focused both on leading DXpedition events as the Choice of the World's Top DXers and on world championships in radio contesting", he added. "We have been pleased with the impact of the previous WRTC event which enhanced our image, realizing that more than 80 percent of the world-class competitors in a similar 2002 event had selected the Yaesu FT1000 series as their radio in pursuit of the world championship", Mr. Hasegawa stated at the press briefing.

Mr. Martti Laine (OH2BH), representing the World Radio Team Championship Sanctioning Committee in Tokyo today, welcomed the continuation of this long-term relationship and emphasized that signing up exclusivity for leading manufacturers, such as Vertex Standard, will help the WRTC concept

flourish while also sending a clear message that this kind of supporting opportunities exist whatever country decides to apply for the next Games due in 2010.

WRTC2006

WRTC2006 is jointly organized by the Araucaria DX Group of Brazil and LABRE, the IARU society of Brazil, utilizing a large voluntary base, opening their homes and hearts to the visitors as well as contributing hundreds of working hours to make the event a success. For the first time in WRTC history, the event will be geared to receive a large number of Amateur Radio operators also with their families as friends to attend the event in Brazil. The event will be held in the beautiful city of Florianopolis with good transportation connections from several major cities in Brazil.

Vertex Standard (Yaesu) Co. Ltd

Vertex Standard is a leading manufacturer of competition-grade HF radios along with an extensive range of radio communications equipment from UHF and VHF to HF frequencies. The units are a result of pioneering work with sophisticated technology such as SSB emission, originating from its early invention. The recent launch of the very latest breakthroughs in high-end radio design, such as the FTDX9000 series, with several "firsts" in the industry is proof that the industry can be proud of. The invention of full-duplex, simultaneous listening and transmitting for transceivers is just one of those advances that place Vertex Standard in the forefront of radio design.

Further information can be obtained from:

WRTC2006 - Mr. Atilano de Oms, py5eg@inepar.com.br

I did it the free way. But only after problems with FCC's computer system
and a couple of telephone calls. They had, and likely still have, bugs in
their system. If I considered my time worth anything, I would have paid the
$6. OM

Well, at least you got the name you use - correct... .KOOKOO.

Just where in that article - does it imply ANYTHING to do with a "ham operator"? It does NOT. I'm not sure what your problem is, maybe not bright enough to pass the exam, dumb enough to have been busted and lost a license or just so fucking queer, you lust for Hams who have apparently turned you down. For all we know, it may have been YOU in that picture - dick wad.

Of course it hasn't been "paid."
You don't PAY an "apparent" liability.
You pay it IF and WHEN when it becomes a fine.

A friend got a $6 renewal notice so I offered to renew his License on the internet for $0.00.

I also had my friend get the Renewal Form 605 from the FCC because he preferred doing it via the mail rather than providing the information online.

The Form required an FCC registration (FRN) so I told my friend to go to the FCC site and follow a few simple steps to get his FRN.It turned out to be a major project - requiring many emails and even phone calls - to get my friend to do this simple job.

The actual process of renewing my friend's license online was simpler than simple but the hassle and aggravation of trying to work with my friend was a tremendous waste of time. It would have been easier and cheaper for me to just give my friend $6 and let W5YI do the job.

It may seem stupid to pay someone $6 to renew a license but when people aren't computer literature it can be very smart to pay someone $6.

It was my opinion that whoever set up the FCC website should be more
computer literate. The FCC people really were helpful once I got through on
the telephone - although that wasn't a quick process either. OM

Hello collegues!

Just for your information. We just open a new web site about new
Russian Celebration diploma programm.
It`s realy new generation programm fr everyone Ham`s. Special station
will work on 14 130-14 400 Mg. not every day of course. Full list of
special Russian day you can see at our web site www.rv3ats.com
Also for everyone hams we just compleated new full coloured QSL card
about the each special day in Russia life.
Our target - present a new information about all celebration in
Russia.

Also We are looking for a sponsors for DX expedition in different
region or country in the world. We have very proffesional Radio
Amateurs Team for it and full compleatly equipment for work for DX.
Please help us to promoute our new web site. If ou have a friends
please tell a litle infromation about usto him(his)
Dear Radio Amateurs if you have some quastion or comment please send me
your email.

Our web site is not compleate yet, but we hope to finish work as soon
as posible.

Thank you foryour help.

P.S.
sorry for my Englsh our traslator have a holliday now :)

NEW UNIFIED AMATEUR RADIO LICENSE EXAM

The new unified amateur radio test has been announced and is here. A few important changes have been made. The new test has been designed in order that the same test can be given for all license classes. To qualify for the higher classes of license, all you have to do is score better on the test. This makes things so much simpler for VE's.

I have included a copy of the new exam.
==========

Please PRINT (that means no squiggly lines)

YOUR NAME (what they call you) _____

ADDRESS (where you live) _____

BIRTH DATE (when you were born) _____

EXAM INSTRUCTIONS:

Make a circle (one of these round things O) around the letter of the best answer! This is so we know what your answer to the question is!

1. You TALK into a microphone with your
A. Hands
B. Feet
C. Toes
D. Mouth
E. Armpits

2. When you talk into a microphone, you talk into
A. the front
B. the back
C. the top
D. the bottom
E. the wire

3. "HEADPHONES" are worn over the
A. Knees
B. Eyes
C. Toes
D. Ears E. Lips

4. What do you do with the AC line cord coming out of a power supply?
A. Hold it in the air to pick up signals
B. Pull on it to start the motor
C. Talk into the plug to get real "skip DX"

D. Hook it to your antenna
E. Insert the plug into a source of power

5. A "two meter" radio is:
A. twice as strong as a one-meter radio
B. two one-meter radios in series
C. a CB with two meters on the front panel
D. a good doorstop
E. a monoband radio

6. A "ten-foot mast" is how long?
A. Three meters
B. Ten pounds
C. Two meters
D. Tree-top tall
E. Same length as basketball hoop is high

7. A "Triband antenna" is made to work on how many bands?
A. 1
B. 2
C. 3
D. 4
E. 10

8. The "Marconi" antenna is named after:
A. Marconi
B. Mantovani
C. macaroni
D. Dean Martin
E. martini

9. What colors of DIODES can you buy at a Radio Shack store?
A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am color blind so this is a discriminatory question and I
should automatically get a waiver on this question.
E. I have no intention of ever using DIODES, so don't care what color
they are.

10. What color of SLURPEE can you buy at 7-11?
A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am color blind so this is a discriminatory question and I
should get another waiver on this question. I now have
two questions right.
E. All the above

11. You have just installed your new mobile rig in your vehicle and you are
still parked at the curb, you need to pull out into traffic and you are
talking to another station?

A. You put down the mic long enough to signal that you intend
to pull away from the curb
B. You keep on talking and just pull out in traffic
C. You open your left rear door to signal that you want to pull
out in traffic, while calling CQ DX on the repeater
D. You install a light bulb at the top of your antenna so that it
will flash when you are talking on the radio and people will
then know to let you out

END OF EXAM.

YOUR SIGNATURE (slap yo tag here)

==========
SCORING:

Get FOUR correct and you get an EXTRA!!!! Get TWO right and you get a
GENERAL!!! Get ONE right and you get a TECHNICIAN! Get None right. Go back
out in parking lot and study another five minutes. When you are done, come
back in and try again.

You do know that if you are a member of the ARRL they will do it for you
for free - and send you a reminder before the renewal is due. They will
send you instructions on how to do it online, a form if you want to use
mail or a simple form to return to them and they will do it. Simple and
quick.
John

Why would you put yourself through this hassle?

You can go to the following URL:

http://www.qrz.com/callsign

Enter the relevant callsign.

Then click on "Detailed Info."

One of the details is the FRN.

In addition, you can get the Form 605 at:

http://www.fcc.gov/Forms/Form605/605main.pdf

And, if you need the additional data schedule (for vanity calls) it's at:
http://www.fcc.gov/Forms/Form605/605d.pdf

Then your buddy would have everything he needed to do it by snail mail.
No pain, no strain.

Source record: 49962

I have a number of these manuals kicking around in good or like-new condition from the 40s and 50s. Let me know if you're interested in any of them before I put them up on eBay....

At first glance:

RCA Image Orthicon Camera and View Finder (Part of TK-11A and TK31A Television Camera Equipment.

RCA Type TM-6B Master Monitor

RCA Television Field Pick-Up Equipment (The compleat field system)

RCA TM-21A Color Monitor

TG-2A/TG-12A Studio Sync Generator and Field Sync Generator

All of these are in excellent, like-new condition, and are stamped from RCA Laboratories circa 1958.

Pre-offering on eBay, I'll sell the entire lot for $150 or best offer.

My future offerings will include a complete circa 1959 catalog of RCA's full offering of radio and TV broadcasting products. Also, a function prototype of RCA's first vidicon hand crafted at RCA labs, plus the technical paper that accompanied it.

Let me know if you are interested becasue I plan to place all of the above up for auction on eBay during the next month or so.

Kindest regards, Harry Conover (email:hhc3141@yahoo.com)

Well, I guess my biggest complaint is the SS number thing. I understand (maybe) why the FCC may want/need this but NOT W5YI. I'll give him my DL number too and a few credit cards and really make his day. I do believe that if a ham is smart enough to pass even the dumbed down newer tests then he/she could probably figure out how to renew.

John,
My friend is not a member of the ARRL but your comment should be very
helpful for many people who read this newsgroup.

EJH

Because I expected this to be a simple 5 minute job. I was also trying
to be a good guy and save my friend $6. The job was so simple I never
expected it to be a hassle but it was.

My friend didn't have an FRN so looking at the "Detailed Info" wouldn't
have been useful.

I gave my friend, who I thought was computer literature, simple
instructions to get an FRN but it turned out to be a major project for
him. Plus there was the issue of, my friend, deciding whether to do
this renewal online or via regular mail. My friend was also concerned

about entering personal information, such as, his Social Security
Number online so that added to the confusion.

This is good info for those who don't know they can get FCC Forms
online.
I printed the 11 page Form 605 on my printer but given my friend had to
wait 3 weeks to renew his license it was less complicated to just have
my friend get the form from the FCC.
>

Let me try to share some information with others who may be renewing
their license in the future.
1. You need an FCC Registration Number(FRN) to renew you license. If
you don't have an FRN then you can go to the www.fcc.gov website and
get an FRN but you will have to enter your Social Security online to
get your FRN.You can also call the FCC and have them send you Form 160
(CORES Registration Form). You fill out that form that includes your SS
number and they will send you an FRN via regular mail. Then you can
fill out Form 605 and mail that back to the FCC. (Of course you can go
to www.fcc.gov and print out the Form 160 if you don't want to call the
FCC).

2. If you have a computer, it's a lot easier to get your FRN at the FCC
website. Renewing via Form 605 online is also simpler and less error
prone than filling out Form 605 by hand.

3. If you are a member of ARRL then you can have them do the renewal
process for you for $0.00. If that seems easier than doing it yourself.

4. Seven years ago I renewed my license online and it was so simple.
The new FCC online renewal process is different so there is a certain
learning curve - just to understand the new process. It's relatively
easy to do but it's not a 30 second exercise.

Keep in mind that renewing your Ham License is something that is done
once every 10 years. For some, who consider their time very valuable,

paying W5YI $6 - which is 60 cents a year - may be a bargain. Time is money and $6 isn't a large sum of money to compensate W5YI for their time.

Hopefully, my post will be helpful but the decision on the best way to renew your license is your call.

EJH

Here is the latest info that I have:

Fred W4JLE DEC SEOC SC

The on-the-ground situation in SE Louisiana and SW Mississippi is as bad as television is reporting. Neither state is permitting disaster relief agencies into the affected areas except on a very limited basis and only then where conditions are stable. Nearly everyone is still staging as close by as possible and waiting.

The Louisiana SM (Mickey Cox K5MC) and SEC (Gary Stratton K5GLS) are in communications with state officials, who have directed them to NOT advertise for volunteers. Some volunteers have been requested, and these are being staged at the state EOC.

The situation for the Mississippi SM and SEC, Malcolm Keown W5XX, in Vicksburg MS is very uncertain. His station is completely on the ground and EchoLink repeaters in the area are off-the-air. Attempts to contact Assistant SMs have been unsuccessful.

An AB2M.net Amateur Radio operator registration web site has been setup and is ready to go public when approval is received. Some Amateur Radio operators are known to be traveling towards the affected areas with emergency services and disaster relief agencies as dedicated communications resources.

Despite everyone's nearly overwhelming desire to help, about all we can do right now is to make preparations for a prompt response when the officials finally give their approval. None of us know when that will occur.

The West Gulf ARES Emergency Net remains active (7.285 MHz days/3.873 MHz nights), and radio amateurs not involved in emergency communication have been asked to keep these frequencies clear when the net is in session. (this is an emergency H&W freq)

A high volume of health-and-welfare requests reportedly is slowing the passage of critical tactical and emergency traffic. The Salvation Army Team Emergency Radio Network (SATERN) on 14.265 MHz has been accepting and handling general health-and-welfare inquiries on the air and via its Web site.

http://members.tripod.com/~Bozak/HOMEPAGE.HTM

COMPLAINT INFORMATION:

Complaint #: 414840
Complaint Type: Company (other than automobile)
Date Received: 9/12/2001
Primary Complaint Classification: Credit or
Billing Disputes
Secondary Complaint Classification: Delivery
Issues
Complaint:

To whom it may concern:

Mr. Steve G. Bozak was contacted in mid July 2001
regarding products (eg.
antennas and coax cables) which were available
for sale from his firm. Mr.
Bozak quoted prices and then later changed the
quote to reflect higher prices
(25% higher) without my authorization. Mr. Bozak
concludes that since I gave
my credit card info that I agreed in principle
with the altered price quote
(which I did not agree too).

In addition to the order being 2-3 weeks late
(because his firm did not have
enough coax cable on hand), I then had to follow-
up and specifically request
a copy of the original billing invoice. When the
invoice was finally received
in late August, and after noting the higher
prices charged, I immediately
called and complain to Greg (Bozak's sales rep).
Greg was informed that I

received a lower price quote in mid July. Greg requested that I forward that
quote which I did. After reviewing, Mr. Bozak wrote back on September 12,
2001 that "I am sorry for the confusion about the prices.... every effort
has been made so this does not happen."

Thus, Mr. Bozak concedes that he (and his organization) screwed up but they
want me to eat the higher costs. This is why this matter is being forwarded
to your offices for recording and resolution purposes. Prospective customers
need to know about Bozak's deplorable customer service/business practices.

(from Drudge Report)

Officials Helpless Against Looters
Aug 31 11:41 AM US/Eastern
By KEVIN McGILL - Associated Press Writer

NEW ORLEANS

Officials watched helplessly as looters around the city
ransacked stores for food, clothing, appliances and guns.
"We don't like looters one bit, but first and foremost
is search and rescue," Gov. Kathleen Blanco said Wednesday.
In the city's Carrollton section, which is on relatively high
ground, looters commandeered a forklift and used it to push
up the storm shutters and break the glass of a Rite-Aid pharmacy.
The crowd stormed the store, carrying out so much ice, water
and food that it dropped from their arms as they ran.
The street was littered with packages of ramen noodles and other items.

New Orleans' homeland security chief, Terry Ebbert, said
looters were breaking into stores all over town and stealing
guns. He said there are gangs of armed men moving around the city.
The Times-Picayune newspaper reported that the gun section
at a new Wal-Mart in the Lower Garden District had been cleaned out by
looters.
Multiple gunshots were heard throughout the night in Carrollton.

Police spokesman Marlon Defilo said an officer and a
looter were wounded in a shootout. Defilo had no word
on their condition. Three or four others were also arrested, he said.
One looter shot and wounded a fellow looter, who was taken
to a hospital and survived.

Staff members at Children's Hospital huddled with sick youngsters and waited in vain for help to arrive as looters tried to break through the locked door, Blanco spokeswoman Denise Bottcher told the newspaper. Neither the police nor the National Guard arrived. Authorities planned to send more than 70 additional officers and an armed personnel carrier into the city.

On New Orleans' Canal Street, dozens of looters ripped open the steel gates on clothing and jewelry stores and grabbed merchandise. In Biloxi, Miss., people picked through casino slot machines for coins and ransacked other businesses. In some cases, the looting was in full view of police and National Guardsmen. The historic French Quarter appeared to have been spared the worst flooding, but its stores were getting the worst of human nature. "The looting is out of control. The French Quarter has been attacked," Councilwoman Jackie Clarkson said. "We're using exhausted, scarce police to control looting when they should be used for search and rescue while we still have people on rooftops."

Sen. Mary Landrieu's helicopter was taking off Tuesday for a flyover of the devastation and she watched as a group of people smashed a window at a gas-station convenience store and jumped in. At a drug store in the French Quarter, people were running out with grocery baskets and coolers full of soft drinks, chips and diapers.

This folks is what you call "TNG" (Typical Negroid Behaviour)

Where the heck is the armed KKK when you need them the most ???

Geez...LIDS causing deliberate interference on the SATERN frequency by whistling, saying 'HELLLLLOOOO', and transmitting other signals over the air because their VOX is on. And to think they had to pass a code test for that!

My XYL said she saw/heard Larry King telling people last night that ham radio could be the best way of getting information to and from the affected areas.

I have been listening to SATERN on 14.265 handling emergency/H&W traffic.

I was able to pass a Emergency message via the SATERN net on 14.265 . A
station in the area was able to relay it via the Coast Guard. Ham radio is
alive and well.

I've been hearing calls for help from people stuck in attics
being routed through HF. Also , the usual H&W... So far,
the local people that have tried to go over there, and been
told, *Stay Away*!!!. They have plenty of local people from other
parts of the state, and New Orleans can't support any help
that does arrive. They have no way to keep them, feed them,
etc...So until they are ready, they are telling most to hang back.
I've been getting a good signal on WWL 870 in the daytime
using my big indoor loop.
Lotsa caller in, and things fairly normal on the air, cept, they
say they are running out of power, and no A/C, etc in the studios.
They are using all available power just for the transmitters.
Only station in town that is still going so far.
MK

I've been getting a good signal on WWL 870 in the daytime
using my big indoor loop. ....

Dang, I just checked it now, and it *seems* to be off the air...
Hope it's just propagation.... Hope they didn't finally lose
power... It is 6.30 PM, so it's possible I just lost them due
to the propagation...I get them much better in the day, than
night. I hear a station on freq, but don't know if it's them or not.

They are still on here in San Antonio. I no longer recall exactly where their transmitter is located, and haven't
taken time to look it up on one of the look up sites. The one I used to use and have stored in my favorites is gone,
and I haven't replaced it. Do you have the transmitter location? I *think* it is somewhere in Jefferson Parish.

Oh the irony. Usenet's biggest joke talking about stupidity.

LOL.

Roger Wiseman's Greyhound Men's Room Band
(R. Xemblinosky/P. McCartney)

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Roger Wiseman's Greyhound Men's Room Band.

We're Roger Wiseman's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Roger Wiseman's Greyhound, Roger Wiseman's Greyhound,
Roger Wiseman's Greyhound Men's Room Band.
It's wonderful to be here,
But Wiseman's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman's Greyhound Men's Room Band.

I am a DEC with ARES and have been told by a number of newer hams that ARES is obsolete in the 21st Century.

It was pointed out to me that echo link, cell phones, wireless internet etc etc. obviated the need for a "bunch of old farts" that couldn't read the handwritting on the wall...

We all watched in amazement as New Orleans was relagated to the Stone Age. All the wizz bang technology fell on it's hind parts. No cell phones, no internet, no echo link, no communications.

No emergency system that relies on intact infrastructure can be relied upon period! Those who fail to heed this lesson, are doomed to repeat it.

Now take it one step further and change the disaster to a nuclear explosion. The EMP wipes out all the rest of the neat toys necessary to communicate in the digital modes.

The SOS and requests for help being transmitted on CW from an old tube type rig go unanswered, as no one can understand code. Mores the pity.

Oh, the irony, Lardass Davies plagiarizes a fag lame.

ALMOST HUMAN
(KISS/Who ?)

Ahh, ha
I'm almost human, can't help feelin' strange
The moon is out, my stupidity I'll never gonna change

I'm LLoyd, so stupid and retarded, a living, breathing moron who
daydreams
I've got to have you, Roger, I'm wishing for your hot cum stream

I'm almost human, I'm almost a man
I'm almost human, ooh

I'm almost human, women always run away
'Cause wherever you see me, my shit smell is a inch away

I'm very hungry and Roger's what I'm thinkin' of
Ooh Roger, Roger, Roger, so hungry for your love

I'm almost human, oh, almost a man
I'm almost human, whoo

I'm very hungry and Roger's what I'm thinkin' of
Ooh Roger, Roger, Roger, so hungry for your love

I'm almost human, I'm almost a man
I'm almost human, I'm almost human
I'm almost human, I'm almost human
I'm almost human, almost, almost, almost a man
I'm almost human
Almost, almost, almost, almost, almost, almost human
I'm almost human, I'm almost human
I'm almost human, almost a man
I'm almost human, almost, almost, almost
I'm almost human

There's a bunch of teen-agers in our local radio club who think that
Morse is "Reel Kewl" because their non-ham friends can't read it.....

Old geezers (like us) never die - we just pass the key to the young
whipper-snappers.

From the Chicago Sun-Times:

http://www.suntimes.com/output/feder/cst-fin-feder01.html

On [Dahl's] (105.9) afternoon show Tuesday, he mused about creating a drink inspired by
reports of "floating corpses" in New Orleans. And on his Web log Wednesday, he elaborated.

"Okay, so maybe now I feel a little guilty that I wanted to see New Orleans completely
covered in water," Dahl wrote. "You have to admit, though, that the helicopter rescues
and the looting make for some interesting TV. I guess I understand the looting for food
and water. If I were flooded out of my home, I think I would crave a 32-ounce bottle of
Dasani water and a can of SpaghettiOs myself. But trying on clothes while standing knee
deep in floodwater? That seems a bit much. I'm still waiting on the floating corpses.

"To that end, I have sent away for five pounds of Chocolate Babies to act as 'floaters' in
the new drink I'll be inventing this week: The Floating Corpse. ... I'm thinking Creme de
Cacao, Kahlua, some rum, maybe a little cream and a floating Chocolate Baby.

"Of course, I'll fine tune that and come up with a 'secret ingredient' or two, but that's the
general cocktail framework that I'm thinking of presently. Sort of a Mudslide, without the
mud. More of a Muddy Waters.

"Also, just for the record, the Chocolate Baby thing is not meant to be racist in any way.
Yes, there have been a lot of African Americans on TV being rescued and the like, but they
don't make anything other than Chocolate Babies or Licorice Babies, and it seemed to me
that chocolate was less offensive. It's a judgment call. If they made Strawberry Babies, I
would have ordered five pounds of them too."

I nearly peed myself folks.... ;)

What a lot of fuss about _NOTHING_ from you Yanks!

What has happened down south is exactly what you have
been meting out to the citizenry of Yugoslavia, of
Afghanistan and latterly of Iraq - the destruction
of the civilain infrastructure.

It's normal Yankland experience!

Serves you right for your illegal invasion of Iraq!

Yup - it is/was an Axis Of Evil combining together the hypocrisy
of the religious loonies, Bush, Blair and Windsor.

Insofar as they contrived to send many young men to their
deaths, they're not a lot different to the Muslim loonies
directing all these suicidal youngsters.

With all do respect, may I entice you to have an auto-erotic experience.

If we had not helped you during WW2, I would not be reading your trash as I do not understand German.

Regardless of your politics, to show such utter disregard for the suffering of the people is indicative of your anti US stance as opposed to your concern for humanity of any stripe.

But were you not a rabid mouth breather, you would know that.

Your challenge is rather silly and infantile.

Perhaps it is indicative of the malaise that
prepossesses Yankland when Yankland visits the
same style of destruction on the innocent
citizenry of the World?

You did not help me during WWII.

I am not showing "utter disregard for the suffering
of the people". Far from it, but your self-obsession
and the self-obsession of Yankland might lead you
to think so.

Eastern Europeans might disagree. US intervention in WWII
enabled the creation of the Soviet Empire along with its
Iron Curtain.

Your challenge is rather silly and infantile.

You did not help me during WWII.

A good point.

WWII was started by Britland with the express purpose
of dispersing the invaders from Poland, and yet the
war ended with invaders in Poland.

Therefore, Britland (and Yankland for all its pompous
posturing) _LOST_ WWII.

Who were NOT British, French, Belgian, Finnish, Irish, Canadian,
Scottish, Aussie, NZlanders, American or German.

If I recall ancient history, ca 1991, Poland is FREE!
>
> Therefore, Britland (and Yankland for all its pompous

German's surrended, NOT Brits or Yanks or the members of the above list.

Get your head out of the 'pint' and do REAL history!!

We love you anyway.

Just ignore Plymath!

He is actually Gareth A. Evans, G4SDW of Chippenham, England. He is
obviously retarded in many ways as you can see..

I'm very sorry you folk in the USA have to read his garbage,
particularly in a situation like the hurriucane disaster.

Peter, G3PHO

We or at least "I" don't judge a whole country on the potty mouth of one.
We're still your friends and probably will be for life! It is sometimes hard
to ignore a$$ holes without defending oneself, but that truly is the best
course of conduct. Maybe one day he'll find himself in the midst of some
terrible plight and as he lays there suffering, he'll think back of all his
assinine words.

IN KATRINA'S WAKE
Civil-rights leader claims cannibalism
Says black storm victims eating corpses to survive

Posted: September 2, 2005
5:00 p.m. Eastern

© 2005 WorldNetDaily.com

Without providing evidence, a civil-rights leader and author claimed black victims of Hurricane Katrina in New Orleans have resorted to cannibalism to survive because no one has come to help them.

Randall Robertson, writing in his Huffington Post weblog, said:

It is reported that black hurricane victims in New Orleans have begun eating corpses to survive. Four days after the storm, thousands of blacks in New Orleans are dying like dogs. No-one has come to help them.

However, no reports of cannibalism have turned up as thousands of armed National Guardsmen pour into the city to restore order, help distribute relief supplies and evacuate stranded refugees.

Robinson, author of " The Debt - What America Owes to Blacks," said, "New Orleans marks the end of the America I strove for. I am hopeless. I am sad. I am angry against my country for doing nothing when it mattered."

He called the response to Katrina's aftermath the "watershed moment in America's racial history."

"My hand shakes with anger as I write," he said. "I, the formerly un-jaundiced human rights advocate, have finally come to see my country for what it really is. A monstrous fraud."

Many readers responded positively to Robinson's remarks, but some sharply criticized him, pointing out his lack of sourcing and the unlikelyhood of cannibalism after only four days, since people can survive for weeks without food.

722. New Liberal Definition

The politically correct Liberals take offense that the media is calling the goons in New Orleans "Looters".

The Liberals prefer that they be referred to as "Undocumented Shoppers."

Here's the latest Bush administration right wing political lie..."we are doing all that is humanly possible for the people of New Orleans" What they really are saying is "Let all those poor bastards die, they vote for Democrats anyway" Oh by the way, the reason there so few National Guard troops available is because they are in Iraq, liberating all those billions for Halliburton and Bush's oil buddies...

Or, they could call all of them looters rather than calling the black
ones looters and the white ones "people looking for food".

But, of course, to you goosesteppers the skin color makes a huge
difference, so we need two different phrases describing the same
situation.

Could you tell us which republican said that?
It was one of your own MSM liberal dumbasses who said that so GFY.

Yeah--one phase is race bait--ever hear of that?
Even a high school class president has better political strategies to use
than race baiting and death exploitation.
Is that all you stupid ass libs got anymore--jeez totally lame.

Tell us, please. Was the date of the hurricane marked on your calendar,
years in advance, like an election day?

Where do you buy such a calendar? My local Voodoo Shop is all out of those
calendars.

And in your post you state "...democraps provide fleets of buses...". I
didn't know that democraps had a stranglehold on the bus industry. Maybe in
Looneyville, Minnetucky where you live. Not in New Orleans where the
freeways in and out are covered in water. And where two of my nephews are
holed up in a sugar mill in Araby, just out of New Orleans, still boating
around in 14 feet of water, pulling people off roof tops.

Oh! I get it! Just drive a bus into 14 feet of floodwater and drive those
poor people to safety. It must be a blessing to be able to simplify an
appalling disaster into such a simple solution. Good conservative
thinking!!

Hmmmmmm........You are a Twit.

The "procreate".

742. r.r.a.m out of control (was: Re: New Liberal Definition)

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-03 16:08:32 UTC
From: Dave Bushong <5b3ycdrvlqsv984@jetable.com>
Message-ID: <fMmdna7twocfV4TeRVn-gA@adelphia.com>
Source record: 49896

I'm sure glad that this is on r.r.a.m. Just another reason why the group is irrelevant.

Why don't we rename it to

rec.ham.wannabees

Seriously, this group has turned into something that I would not want to recommend for new hams, or people who want to be hams. I used to say "Tune in and listen to us!" Now, people who don't have radios tune in *here* and after a few minutes of reading stuff from people who pretend to be hams (how pathetic is that?), these potential newcomers and good friends decide to go elsewhere. Wouldn't you do the same?

I'm also a little embarrassed to be a human being, in light of this group, but that is a tale for a different time.

OK, I'm going back to 20 meters to deliver H&W traffic. My dad's sister is down there and hopefully I will hear some good news about her in the process.

743. NOLA Disaster

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-03 17:49:41 UTC
From: Chuckie Brash <b@alltel.net>
Message-ID: <9ea24$4319d3ff$d8602720$30187@ALLTEL.NET>
Source record: 49897

The Democrats have had control of the Peoples Republic of Louisiana since the beginning of time. And what good did it do? This is a state where nobody worries about anything but crawfish and Mardi Gras. Their antiquated infrastructure was destroyed in the first ten minutes. The black mayor didn't care about his own people. He had to send written note via police car to Baton Rouge to get the attention of the Governess.

President Bush wasn't issued a "Magic Wand" when was inaugurated. So all the blow-hard, wind bags in New York and D.C. don't really know what they are talking about. As usual the Libs have nothing positive to say and aren't doing anything constructive to help. One of them even had the audacity to disrupt a benefit concert for his own selfish rant against the President. As Libs are fond of saying. "If you aren't a part of the solution, you are a part of the problem."

With love,
Chuckie

Well spoken.

These people live at 30 feet below sea level. My heart goes out to
them, and whenever humans die, it is a tragedy.

These people live at 30 feet below sea level. Why are they still living
there? Many are not, but for the rest of them, they will move back into
their previous address in a few weeks.

Next time they get hit by a storm, we will bail them out, using the tax
dollars that they take from my paycheck at gunpoint.

Why????

Are we even more stupid than they are?

Dave

Hi all, I have a Yaesu FT-7400, which is a 440 mobile radio.
Any one have a clue how to adjust the LCD back lighting, or turn it off
or on??

The FT-2400 is the 2 meter version.

THANKS FOR YOUR HELP!!!

I would love to meet you face to face. The result of that encounter
would be that one of us would end up in jail on murder charges.

Have you ever thought about the consequences of your outrageous
behavior? My gawd, you are such an obvious asshole, and I wonder how
many times you have had someone smack you in the face.

You probably sleep in your mother's basement and never meet humans, so
this may not be relevant.

I'm sure that you will follow up to this message with another one of
your forged postings, but this is the last you will hear directly from me.

Loser.

(go ahead and play with my posting - that would be so original. Wow!
You are so smart!)

I can't believe how many scumbags there
are profiteering off of Katrina on e-Bay
right now !!

Alot of them say that some of the proceeds will
go to Disaster relief when everyone knows these
fat smelly opportunistic bastards won't send one single
dime in to any charity anytime or anywhere and will
just pocket the proceeds and walk away laughing.

I knew these gypsy dealers we all used to see at the hamfests
each and every year were lowlifes and scumbags, but this really
takes the cake and the silverware! What a bunch of cheap ass
lying bastadts !!!!

(Wonder how may of em are pulling the same crap on the
many other swap-and-shop boards?? Not all hams do this
of course but the ones who are really stink like shi+ - disgusted.)

Are you "sure" about that? Somewhere in the news I heard that E-Bay was
setting up a program where the proceeds from sales could be sent directly to
them to be put toward the relief effort! Maybe the sales of these items ARE
for this purpose. "I" could be wrong but that is a possibility.

Hi all, I have a Yaesu FT-7400, which is a 440 mobile radio.
Any one have a clue how to adjust the LCD back lighting, or turn it off
or on??

The FT-2400 is the 2 meter version.

THANKS FOR YOUR HELP!!!

My FT 2400 has no adjustments for the LCD. It is supposed to be automatic.
For instance. When the ambient light is bright, the LCD is supposed to get
brighter. Conversely, when it is dark, the readout becomes dimmer. This is a
stupid design flaw that, fortunately, Yaesu corrected with the FT 2500.
Another common problem with the 2400 is that the freq. selector knob often
malfunctions and either skips step up and step down, or fails to work
altogether. You will then have to use the Up Down keys on the mic.

Roger is ever the laughingstock. Even on Nimbusters where living low, being part and parcel of a group of infantile one-liners with IQ's bordering on single digits is the norm, poor Woger has been relegated to the lowest of the low.
Yes, even the Nim low-life's have their pecking order, and Roger has been shunted to the bottom of the heap. So much so that Roger's posts are now being transferred to another board by the administrator.
Has Woger gotten the hint? Has he learned that he is unwanted?
No.

He continues as before. Undaunted, unswayed, and as stupid as ever, this rectal cavity from West Virginia persists. And yet this social misfit continues to boast that he is pursuing higher education, a claim that is difficult to believe in light of his hundreds of spelling errors and outright lies.

If there is any consistency to Mr. Wiseman it is that, one, he is a congenital liar and two, that he is in dire need of a concentrated dose of mental health assistance.

For a 49 year old man to act as he does...well, it is sad. You have to pity the guy.

You sure didn't, Lardass, you shouldn't jack off over your
cum-encrusted keyboard so your space bar sticks like that.

You never did tell us how somebody "operates" a dictionary instead of
reading one, or weren't you "thinking" as is your standard operating
practice.

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language. But that's not surprising from someone
who things that..."

NEWINGTON, CT, Sep 2, 2005--The Corporation for National and Community Service (CNCS) will provide a $100,000 grant supplement to ARRL to support Amateur Radio's emergency communication operators in states affected by Hurricane Katrina. The grant will help to fund "Ham Aid," a new League program to support Amateur Radio volunteers deployed in the field in disaster-stricken areas. ARRL Chief Development Officer Mary Hobart, K1MMH, expressed gratitude to CNCS for its generous response. Ham Aid, she said, offers a unique opportunity to support individual radio amateurs helping to bridge the communication gap Hurricane Katrina has caused.

"For the first time in ARRL history, we will be able to reimburse some of the expenses that hams incur in response to a disaster," she said. "We only wish that we could justify an expense reimbursement program like this every time Amateur Radio Emergency Service volunteers are called upon to help in a disaster or emergency, sometimes placing themselves in harm's way."

In addition to providing emergency communication within and outside the affected areas, Amateur Radio Emergency Service (ARES) members and individual radio amateurs are supplementing the communication needs of emergency management and relief agencies, including the American Red Cross and The Salvation Army. Hobart said it's only due to the scope of the unprecedented and tragic Katrina disaster that CNCS agreed to help support dedicated Amateur Radio volunteers.

"But," she added, "we'd like to think of this grant as a token of appreciation and a recognition of Amateur Radio's value in past emergencies and disasters, such as 9/11."

Hobart says ARRL's Ham Aid program already has received some substantial private donations. Those and the CNCS grant, she said, provide a way for the League to "support our Field Organization as never before."

The CNCS Ham Aid grant is effective for operations established and documented as of September 1, 2005, and the aid is earmarked for Hurricane Katrina deployments only at this point. Guidelines are being established that will permit volunteers who have been involved in bona fide field support operations on or after September 1 to provide communication support to apply for a reimbursement voucher on a per diem basis.

Trained Amateur Radio operators will be on site for the duration of this disaster response, which could run into several weeks or months.

"Many will leave their jobs and families and travel on their own expense, using their own equipment," Hobart points out.

Corporation funds may also sustain the Ham Aid program and help to rebuild the emergency communications capabilities in Louisiana, Mississippi and Alabama to ensure that the Gulf Coast is prepared, should disaster strike again.

The CNCS grant is an extension of ARRL's three year Homeland Security training grant, which has provided certification in emergency communication protocols to nearly 5500 Amateur Radio volunteer over the past three years.

"CNCS grants helped make it possible for the ARRL to train America's hams and make them the best all-volunteer emergency radio service ever seen," Hobart said. "Now they are making it possible for the hams to use that training."

I think the $100,000 grant should be redirected to victim needs. I'm sure it's strictly legal, but I'd personally not be comfortable accepting reimbursement for volunteer activities of this nature, even if the funds came from private donations or ARRL reserves and not from tax dollars.

K0CKB and I have assembled a capable portable station, and we can provide our own living facilities and power (RV & generator) in case our help is needed. We might add additional diesel fuel capacity to increase our range, but certainly would not expect the government/ARRL to cover that expense.

73, de Hans, K0HB

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KF2TI, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, NE8Z, AK0A, DL1EK & The DX News Letter, EA5KY, F5CWU & La Gazette du DX, F5NQL & UFT, F6ABN, I1JQJ/IK1ADH & 425 DX News, I1HYW, IZ8CCW, JI6KVR & JA-IOTA Islands News, LA9VDA, PA7FM, PS7AB, SM5SIC, VA3RJ & ICPO and YV5TX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th/August, through Sunday, 4th/September there were 206 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

7P, LESOTHO. Jun, JH4RHF/OE1ZKC, has plans to be active from here starting September 24th for one week (until October 2nd). He has requested the callsign 7P8RH. Jun states to OPDX, "Actually it is an 'excursion' after my duty trip to South Africa. Everything will be arranged by famous DX Safari by ZS6WPX." His equipment will be: 15m Mobile trailer with Cushcraft A4S (+40m); 12/17m beam stacked on top; Vertical for 40m and 80m (+trap for 160m) and a Yaesu FT1000MP w/TL922. This will be a one man effort,

and he hopes to be active as much as possible. Activity will be on 160-10 meters, SSB, CW and RTTY (probably more CW/RTTY than SSB); SSTV on request(?). He hopes to do some RTTY for the WW RTTY Contest during the weekend. Jun may stay on the low bands longer due to the propagation. QSL via OE1ZKC.

9H, MALTA. Several members of the Dutch VRZA will be active from Qawra (JM75fv), starting September 10th through October 3rd. The callsign for the group will once again be 9H0VRZ. However, group members will also use their individual 9H3 callsign. Activity will be on all bands from 80-6 meters, CW, SSB and Digital modes. Also, 160 meters activity is planned from Baghria together with some Maltese amateurs using a 150 ft. high antenna. They will try to activate their special callsign 9H0VRZ for the whole period and hope for good conditions. Operator Nico, PA0MIR, will try and operate in both legs of the SAC Contest and may try some casual operations in the WAE SSB Contest. Also, he may look for Oceania stations the first weekend of October if the antennas will stay up in good form. Here are the individual callsigns with the QSL route:
9H3X via PE1NGF 9H3XQ via PA0CKV
9H3IE via PA0BEA 9H3ZR via PB9ZR
9H3XYL via PA0XYL 9H3MIR via PA0MIR
9H3YT via PA3GUU 9H3ON via PG9W
9H3HS via PE2HSB 9H3YM via PE1OFJ
9H0VRZ via PB9ZR: Ruben v.d. Zwet, Barentszstraat 1, 2161 TJ LISSE, The Netherlands.

ANTARCTIC QSL GALLERY. Gianni, I1HYW, informs OPDX that the Dynamic DX Charterhouse (www.ddxc.net) and the Worldwide Antarctic Program's (WAP - www.ddxc.net/wap) "NEW" QSL Antarctic and Sub Antarctic's Gallery is now available to visit via their Web pages. Just to summarize: The Gallery contains 677 pictures, split into 53 Albums and 11 Categories. They are continuing to insert more Antarctic pictures such as Bases and operators (there are more than 1000 waiting to be on added to the gallery).

DXCC STATUS OF TT8M AND TT8AMO. Dennis, PA7FM, reports to OPDX that there were a few validation problems at first for DXCC credit for the TT8M and TT8AMO cards. Several people could not get credit as there was an "out of date" problem with the QSL cards. These problems have been solved, and the final operational dates for TT8M and TT8AMO are July 31st through June 19th. Those who got a TT8M or TT8AMO QSOs rejected for DXCC should go back to the ARRL to get the QSO(s) validated. Dennis thanks Bill Moore, NC1L, for his help in fixing the problem. Meanwhile, Dennis states that direct QSL cards for both TT8M and TT8AMO are still being answered as soon as possible. Direct cards with insuffucient return postage or no return envelope will be returned as bureau cards.

HC, ECUADOR. Dr. Rick will be active again as HC1MD between September 20-25th. His activity will be mainly on the WARC bands CW. QSL via K8LJG.

IOTA NEWS.....
AS-076. JA5BEX/5 and JN4MBO/5 were active this past weekend from Kisaka Island in the Kagawa Pref. QSL via their home callsign

either direct or via the bureau.

AS-129. David, BA4DW, will be active as BA4DW/7 from Nan'ao Island,
September 8-13th. No bands/modes of activity were provided.
QSL direct via his home callsign: David Y.J. Zhou,
P.O. Box 040-088, Shanghai, 200040, China.

EU-017. Andrea, IZ0EHO, will be active as ID9/IZ0EHO from Isola Lipari
(IIA ME-001 and MIA MI-053), September 7-18th. Activity will
be on the HF bands and 6 meters, SSB and the Digital modes.
QSL via his home callsign, direct or by the bureau.

EU-030. Klaus, DJ4JI, will be active as OZ/DJ4JI from Bornholm Island
(DIA BO-001 for the Danish Islands Award) now through September
10th. Activity will be on 80/40/20 meters SSB only using a
Swan 350 at 400 watts. QSL via his home callsign, direct or
by the bureau.

EU-043. Fred, SM7DAY, will be active from Orust Island now through
September 11th. Activity will be on all HF bands, CW and
SSB. QSL via his home callsign, direct or by the bureau.

EU-061 (Cancelled)/
EU-062. Trond, LA9VDA, informs OPDX that the LA6Q's trip to IOTA EU-061
Svenner Lighthouse in September is off due to many problems.
Instead they will be active from IOTA EU-062 Helligvaer
(Helligv&#65533;r). Operators will be LA6YEA/Paul, LA8AJA/Andy and
LA9VDA/Trond. Activity will take place between October 19-26th.
Operations will be on CW/SSB/RTTY on 80-17 meters. QSL cards
can be requested via E-mail to: la9vda2003@yahoo.no
Their homepage will be updated with a log search, photos, etc...
at: http://home.online.no/~andreask/expeditions/eu62/index.html

EU-125. Michael, DK5NA, will be active as OZ/DK5NA/p from Roemoe Island
(DIA NS-001 for the Danish Islands Award), now through September
23rd. Activity will be mostly on the lower bands, CW, RTTY and
Hell. QSL via his home callsign, direct or by the bureau.

NA-028. Bill, K4XS, will be active as AL0/K4XS from Saint Paul Island
(USI AK-041S), Pribilof Islands, Alaska, between September
7-15th. He expects to be active on 40/20 meters CW between
0000-0700z daily, time permitting. There is a possibility
of some SSB activity. Bill will especially listen for Europe
during their sunrise. QSL K4XS "DIRECT ONLY".

J3, GRENADA. PZK and SPDX Club members Wojciech/SP9PT and Marek/SP9BQJ
will be going here to be active between October 26th and November 8th.
They have confirmation of their licences and will receive callsigns
after their arrival (they will probably use J3/SP9PT and J3/SP9BQJ).
Activity will be 40-6 meters, and depending on their local situation,
also 80/160 meters. Modes will be CW, SSB, RTTY and PSK31. QSL via their
home callsigns.

NP2, U.S. VIRGIN ISLANDS. Ann/W2AZK (at least for now; new call pending)
and Brian/KF2HC will be part of the NP2B team during the CQ WW DX SSB
Contest (October 29-30th) as Multi/? entry. They will join operators
NP2B, WD4R, W4OV, W4DTA, W1RG, K9VV and possibly others. QSL via NP2B.
ADDED NOTE: Ann will also do the Sweepstakes Phone Contest from
St. Thomas using her new callsign which is pending.

PY, BRAZIL (Lighthouse Activity). Rogaciano, PY1NEZ, will be active as
PY1NEZ/6 from the Corumbau Lighthouse (ARLHS BRA-130) in the Bahia State,
September 20-30th. Activity will be on 40-10 meters SSB. His suggested
frequencies are: 7051, 14221, 21221 and 28351 kHz. During this time he
may also activate the following lighthouses: BRA-084 - Porto Seguro,
BRA-012 • Belmonte, BRA-003 • Alcoba•a, BRA-119 • Barreira do Prado
and BRA-088 • Rio Doce. QSL via PY1NEZ, by the Bureau, eQSL or direct
to: ROGACIANO DE LIMA CORREA FILHO, RUA BELIZARIO AUGUSTO 91/1101,
24230-200 NITEROI, RJ, BRAZIL.

QSL INFO AND NEWS.....
NEW QSL MANAGER. Jose, YV5TX, informs OPDX that he has a new manager
for his special prefix 4M5R operation. QSL via EA5KB.

QSL 4X0AI (AS-100) via 4Z4DX. Online log is available at:
http://www.qsl.net/va3rj/frame_logs.html

QSL LA3SRK/P via SM5SIC. This special event station was activated by
the "Skandinavisk Radioklubb" during the Reg1 Field Day this past
weekend. The multi-operation commemorated the centennial anniversary
of the dissolution of the union between Sweden and Norway.

NOW ON LISTED ON THE LOTW. Bill, AK0A, reports that the logs for TI9M
and T30WB are now available on the "Logbook of The World" (LoTW).

QSL CORRECTION. Luis, EA5KY, mistakenly provided the wrong QSL Manager
for the TI0SP operation (See OPDX.724). QSL Manager is EA7FTR and not
EA5FTR.

QSL TM0JPL via F5TBX. Activity was from Pompignac (DPT 33 France) to
commemorate the twinning of the cities of Lerin (Spanish Navarra) and
Pompignac (South France near Bordeaux). Information is available at
the following Web sites:
http://lerin.pompignac.monweb.net
http://www.multimania.com/ardilouze

VK0DX QSL STATUS. Finn, VK4LL (OZ2QK), is now back from the Antarctica
and was active as VK0DX from the Davis Station. He states that as of
August 30th all direct QSLs were answered. Finn states that if you
do not receive your QSL card by October (2005) to please write him
via E-mail at: vk0dx@hotmail.com
DO NOT SEND ANY MORE QSL REQUESTS via the post office box. He has
requested the Australian QSL Bureau to forward him the cards received
by them but has not received a response. So unfortunately, he can not
send you a card if you only sent one via the bureau. Please write to
him if this is the case, and he will send you a new postal address to

send a direct card with an IRC or green stamp. NO CARDS VIA THE BUREAU. ADDED NOTE: Finn mentions that that there will be two amateur radio operators at the Davis Station between November 2005 and February 2006. One of the operators will stay until the end of 2006.

NEW ADDRESS. QSL ZL2HE to: Arthur E. Law, P.O. Box 368, Dannevirke 5491, NEW ZEALAND.

SPECIAL (FRENCH) EVENTS.....
The 27th HamExpo will be held October 22-23rd in Auxerre, Burgundy, and is said to be one of the most important Ham shows in Europe just behind Friedrichshaffen. HamExpo which was founded in 1978 by Pierre Michel, F9AF (ham gear builder) and his daughter Christiane, F5SM, who has been with the French IARU Society Ref-Union organization since 1996. During the Hamexpo weekend, and especially from the Event Hall, the callsign F5REF (REF-Union's callsign) will be aired on HF and VHF (6/2 meters), CW, SSB, PSK and if asked RTTY and SSTV. All contacts with F5REF will be confirmed automatically via the bureau. Those who choose the direct way, QSL via Pierre, F2WS (w/SAE + IRC). If you use green stamps, please, 1 USD for Europe and Africa and 2 USDs elsewhere).

The Yonne area hams will use the special callsign TM3DR in rememberance of Roland, F3DR (SK), who was very involved in Yonne ham activities. Look for TM3DR from October 8-21st, on HF and VHF (6/2 meters), CW, SSB, PSK and if asked RTTY and SSTV. All contacts with TM3DR will be confirmed automatically via the bureau. Those who choose the direct way, QSL via Pierre, F2WS (w/SAE + IRC. If green stamps, please, 1 USD for Europe and Africa and 2 USDs elsewhere).

T88, PALAU. Just a reminder! If you did not get to work Martti/OH2BH and Tim/N4GN from here, you will have another chance to work Tony, KQ2I. He plans to be active between September 6-15th. No other details were provided.

TK, CORSICA. Vasek, DL4FF, will be active again as TK/DL4FF now through September 30th. Reference numbers are: IOTA EU-014, IIA TK-001 and MIA MCO-001. Activity will be on 160-10 meters CW/SSB. He will be active during the WAEDX SSB Contest. QSL via his home callsign, direct or by the bureau.

VK5, AUSTRALIA (IOTA Op). Dirk, PA9KW, will be active as VK5AUQ from here with Ben, VK5ZZM, between October 16th and November 14th. Activity will be on all bands and modes. The two operators will travel to Kangaroo Island (IOTA OC-139) between October 28-30th. They plan to participate in the CQ WW DX SSB Contest. QSL via PA9KW, direct only (see QRZ.com).

XL/XM/XN/XO, CANADA (Special Event). Industry Canada has authorized the use of the following special callsign prefixes to commemorate the 25th anniversary of Terry Fox's run across Canada. All Canadian Radio Amateurs are encouraged to use these special prefixes for the month of September. The following special prefixes will be in effect from September 1-30th (Original - Special Prefix): VE - XM, VA - XL, VO - XN and VY - XO.

That's true. But in this case there is no compensation for operation; rather expense reimbursement(food?/transportation?/lodging?). This would be similar to being given a plane ticket, food and lodging vouchers, and sent to provide your volunteer services, without any compensation for those services.

That distinction covers the legalities which I'm sure both CNCS and ARRL lawyers have examined. All that said, at a more basic personal level I'd be uncomfortable taking this reimbursement, preferring to just let the expenses be part of my (tax deductible) contribution to the recovery effort.

>From the FCC Rule Book: Complete Guide to the FCC Regulations Governing Amateur Radio; edited by Norm Bliss,WA1CCQ, Published by the ARRL

Chapter 4, Page 4-2 Direct and Indirect Payment

"You must never accept any money or other consideration for operating your station [97.113(a)(2)]. this is consistent with one of the prime directives of our serice:

"Recognition and enhancement of the value of the amateur service to the public as a voluntary, noncommercial communication service, particularly with respect providing emergency communication" (emphasis added) [97.1(a)]

If you club is providing communications support to the town of Needham for a parade, you cannot accept their offer of payment for your work. You are volunteers, providing a community service on a non-commercial basis, period
You should never accept anything for your Amateur Radio operating. The FCC prohibits operation of an amateur station "for hire, or material compensation, direct or indirect, paid or promised" [97.113(a)(2)] This includes direct payment (money, goods, food, and so on) and indirect payment (publicity, advertising, and so on)."

It rather funny that K1MAN get's fined $21,000 for Pecuniary Interest and the ARRL is allowed to do this. What go for one person should apply to all. The ARRL should be fined by the FCC for doing this!

I understand your concern, but the grant does not provide payment for operating;
it provides reimbursement for expenses.

The distinction isn't all that subtle --- consider this: If the government gave
you a plane ticket, lodged you in a hotel, and provided your meals so you could
operate a station in the disaster area, would you consider this "compensation"?
In this case, rather than provide those items "in kind", the government has made
a grant which covers exactly those same expenses after the fact.

I personally wish the money was spent on grants to actual victims, but I can't
find anyone being paid "any money or other consideration for operating".

I am sure the Lawyers have looked at it. I also know that you can
normaly find support for about anything in the body of legal precedent.

But like Todd I find it troubleing when laid next to K1MAN

based on what has been published by the ARRL for years yes I would say
it was compensation. I have never thought that type of rule was proper,
but I have and do feel that those are the rules

Specifically:

(2) Communications for hire or for material compensation, direct or
indirect, paid or promised, except as otherwise provided in these rules;

Never? Who said "never"?

What is compensation? How about the public service event support where
the volunteers are expected to wear a hat or t-shirt? And the sponsors
give all the volunteers that piece of clothing. Must the Hams refuse?
What if the sponsors says "sorry, if you don't abide by our rules, we'll
have to do this some other way"?

Is accepting that glass of water compensation?

Better yet, during field day, I drank a lot of soda provided by some
club members. Is that compensation?

> "Recognition and enhancement of the value of the amateur service

What if one of the people in that parade gives you a ride home? We get thank you letters all the time, and mentioned in these groups newsletters. Is this in violation?

There is a significant difference between compensation (which the FCC allows in some circumstances, and having expenses covered. For me to move a station down to one of these states in trouble for a week or two is going to put considerable expense on me. A kilobuck for a plane ticket each way), a weeks worth of food, (probably around 150 if I'm careful) and hotel expenses (say $700). Plus a weeks worth of vacation means I'm giving up around 3-4 kilobucks depending on how you add it up.

Vacation isn't a compensable item IMO, but we simply aren't going to get many people to help on-site during these disasters if there isn't some form of compensation.

Under certain circumstances it is.

We're talking about being reimbursed for reasonable expenses here. The personal cost of say a week on location in a disaster area is significant. Air travel, hotel and food adds up pretty quickly. And as Ham radio becomes more integrated into the disaster response system, we will be compensated like the rest of the responders.

Perhaps that will be one of those certain circumstances?

It should be but this amounts to turning the rules upside down over
night

The rules should be rewritten so as to deal with such things but the
rules currently forbid it

wicking at the rules at some point, is likely the reason why some hams
(like K1MAN) have developed views and actions that so many Ham
disaprove of

I fully support changing the rules, writing new ones to deal with such
things. I would even support this if it came with words like" we are
aware this may be considered a violation of the rules, but the ARRL
thinks in this case we must act, and then we will seek to work with the
FCC to write rules that permit reasonable compsation for thier
expenses" or word to that effect

as it is is looks like graft and corupportion

It only looks like that to people who look at the worst possible
interpretation rather than the best. Most of us DON'T look at it that way.

as are My drill bits For punching hole in the walls

A Better set of rules would allow some reasonable comp, and I would
support it but that isn't the rules NOW

```
... so, the general message here is, "Do as the FCC says--unless you are
arrl--then you can do as you see fit. However, no one else (not even
K1MAN) can do as the arrl does..."

I'll admit it is a bit confusing... unless you are the arrl--then you know
exactly what is going on--you are giving everyone a royal screwing and
either they are too stupid to care--or too stupid to have ethics!

IMO No what she said was "trust the ARRL they know what they are doing"
that takes more than Rose colored glasses, more like CGI imaging glasses

What you are trying to do is hyper-interpret the rules. They aren't made for what you are trying to do. They are made to keep people from being paid for their volunteer work. This means money or goods changing hands. It means advertising your business through your radio activities. It doesn't mean me using my own vehicle and gas to get around the parade in 100 degree heat, and getting a bottle of water from them.

But I can see it now.......

Dave works out of band French Amateurs, and I accepted a bottle of water at a public service event. 8^)

I agree the rules are made for this occasion like many other rules in
DHS, FEMA, etc many rules are showing just how out of touch the planing
of the goverment is with needs of the people

I find it suspious that the ARRL is taking part in this when they have
published and pusshed the opinion that this ilegal for years

I can remeber the Former Central Divison Director (can't remeber his
name but he was from Springfield IL lecutureing some of us on the
repeater when we were discussing this subject, and then showing up at
the Ham club meeting to make sure we understood that that even that
soda is techicaly illegal

Major flip flop

I agree the rules are not set up for this just like FEMA and DHS and
other set of rules are not set up for this mess (katrina)

I don't agree with the rules as written but they are the rules

People have been paying to have their 2M and 440 transmissions repeated
for years, and all the OFs here are good with it. None are asking for
a rules change.

You might be able to make a case for that if you purchased them for
emergency use, and only used them for Emergency use.

Expect a challenge, tho'

> of the expenses that hams incur in response to a disaster," she said.

Obviously this woman don't know just how cheap hams
can be. They better have a great accounting system on hand
and/or have the radios nailed down and/or etched with
property and S/N tags else their gonna be up for sale on
e-Bay in a few months!

> "We only wish that we could justify an expense reimbursement program

Just put a big truck well stocked with *free* coffee and doughnuts
and it will attract them like iron filings to an alinco magnet.

(Been listening to 75M between all the traffic nets at night. Sounds like
the musings in an all-white redneck bar from one end of the band to the
other. How amusing and expected)

Not at all. I read the ARRL statement and the FCC rules. I happen to agree that there is enough flexibility to allow meeting the travel expenses, food expenses for those who are going down. There is no intent to "make a buck".

My point was that there is no reason to automatically assume that there is an intent to do wrong.

You sure didn't, Lardass, you shouldn't jack off over your
cum-encrusted keyboard so your space bar sticks like that.

You never did tell us how somebody "operates" a dictionary instead of
reading one, or weren't you "thinking" as is your standard operating
practice.

...
After reading the original post I am of the opinion that the poster intended
to say what he did. His comment that Roger cannot "operate" a dictionary is
apparently lost to Roger. 'Operating' a dictionary is an open definition,
and the very task of opening such a book could be looked at as 'operating'
same.
Of course Rogie is unable to grasp the subtle humor and the use of a
dictionary is obviously a foreign concept to him. Heck, he has a difficult
enough time as it is with learning how to utilize the space bar.

Ain't that wight, Wogie?

Yes in the sense written in the rules. Now those rules ought to be
rewritten and so one but in real terms yes you according the
publications of the ARRL.

such a rule is stuppid will never be enforced but it a violation never
the less, just as if I drive 60 in 55 zone I'll likely not be stoped
and ticketed but I would still be breaking the law.

"an old friend" <kb9rqz@yahoo.com> replied:

> Yes

OK, folks, every one of you who accepted food or lodging in the course of participating in an emergency communications incident is guilty of violating FCC rules.

If the Red Cross or Salvation Army (btw, why is there no Salvation Navy) provided you with some identification garment like a hat or t-shirt, you must return the garment to the issuing agency. If you have lost or damaged the garment you must reimburse the RC/SA for the fair market value of the garment.

You should file amended state and federal tax returns accounting for the value of the freebie meals/lodging/refreshments/transportation which was provided to you in the course of your volunteer assignment, with copies to all FCC Commissioners who will review your fitness to continue to hold your Amateur Radio license.

Or not.

Food, caps, tee-shirts, food, and bottle water is one thing, but money is another. My point in all of this is K1MAN was fined by the FCC for Pecuniary Interest and now the ASSHOLE RADIO RELAY LEAGUE is going to do the samething. What go for one person should apply for all. The MAIN problem I see here is the definition of the term noncommercial, and seems that there is two tems on what noncommercial means.

I'll have agree wihth you where I think you realy go of the tracks is
saying there are 2 standards, there are far more than that. the rules
are enforced in arbitary manners based on personalities not on the
public interests

The ARRL can do most of what it wants becuase of its sheer size, and
the facts it has the money and legal forces to make a better fight of
it

The FCC will try and make examples of those that are not liked like
K1MAN who by the best accounts I have heard sounds like a jerk, not
crimal to my mind Unless the ARRL is too but not a nice guy.

The danger of such tactics is the camels nose effect, and like the
Nazi's you start with folks that are not liked and then you move on to
others and still others

Not bashing Bush for this or Clinton or... but the general creeping
influence of the people truely runing the country , the nameless
faceless breaucrat, what Asimov called the "Greys"

The general term for noncommercial is a station that can't make a profit, but can make money to substain the station. Then you have the amateur rules which state an amateur station can make money direct or indirect period. K1MAN is a primary example of this no money direct or indirect period which the FCC is enforcing and the ARRL supports. that was last week, now you have the ARRL this week getting a grant to give to amateur operators to basically compensate them for doing radio communication down south. I REALLY hope the FCC is watching this crap as a matter of fact I'm going to copy and paste this and sent it to the FCC and a few other people I know. I posted it on QRZ but those asshole knocked it off their site. Because Like I said what applies for one should apply for all.

Years ago I participated in ham radio communications after a tornado
cleaned out about half of the southern part of Witchta Fall, Tx. The
kind folks of WF housed us in a church, provided sleeping facilities and
fed us. Anyone think that was violating the rule of "pecuniary interest"?
....

Of course not. Besides, who but the most idiotic of Hams would accuse you of
same?
You were performing a public service.
I am assuming, of course, that your question was posted with a
tongue-in-cheek smile and with hopes to "bait" someone.

And by the way. Hotel/motel rooms, meals etc. aside, I wonder if some
nit-picker may not come along and posit that you should not have accepted
the free electricity to run your radios, either.

Not me. I'm quite sure you returned home with less money than you started.

I've generally seen the term "pecuniary interest" used in the sense of
"attempting to make a profit". Neither the ARRL nor the individual hams
will make a profit from this.

Of course, if you reverse the wording, it makes the thing all make more
sense.

You volunteer for something, but they insist you wear a tshirt and hat,
and you MUST pay for it.

They won't provide food, so you've got to pay for it, even though you will
be in a situation where you can't easily bring lunch from home, and don't
have a wide selection of choices.

Then they will bill you for lodging.

When you're drowning in a sea of ignorance, you grasp at straws. The word "operate" can be a synonym "use" in certain contexts, and that was one of them.

Now tell us about "non sequitur," Professor Woger.

You sure are, maybe you will be a floater like those in New Orleans.
No mattrer how hard you backpedal and try to lie your way out of it,
most people don't "operate" a dictionary, they "read" a dictionary.
You still fucked up on other levels, dumbass. And DO tell us why you
used "things" instead of "thinks", you whiny, little fat pussy.

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he

Well, at least the esteemed ham from Canookia used English words. The esteemed
old_friend from Michigan used words from an unknown language.

843. FCC Broadcast Flag v.s. Amateur Radio

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-05 17:32:23 UTC
From: phil-news-nospam@ipal.net
Message-ID: <dfhvf70227s@news1.newsguy.com>
Source record: 49747
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.misc

As television moved to the digital age, I was looking forward to this technology making higher bandwidth digital components available more cheaply that ham radio operators could use. The ATSC television system carries a data rate of 19.39265846 mbps over a 6 MHz wide channel using 8VSB technology. This is something ham radio could use on UHF and SHF frequencies to transmit some high speed digital data in less spectrum. So I was looking forward to components like modulators that take a raw bit stream (that in a TV application would carry the ATSC formatted data) and output RF (to be upconverted to the frequency of interest), and demodulators that to the reverse to reproduce that same bit stream.

The movie industry (e.g. Hollywood) has been insisting on copy protection for their movies, to (as they claim) prevent then from entering the piracy stream taking place on the internet. I can understand theur concern and in principle I also support it.

However, I just learned that what they want to do to enable protection in the over-the-air TV broadcast is in fact not protection at all. I had assumed they (Hollywood) learned their lessons and started to use strong encryption to protect the content until it reaches the final device that plays it out. But in fact, the "Broadcast Flag" for TV is not anything like this at all. The "protected" content is still transmitted in the clear, unencrypted. It's just simply flagged (now it makes sense where they got the odd name for it) as "do not allow this to be copied" (they should have called it the "do not copy flag").

The real problem with this, though, is that all of this "protection" relies on a prohibition to be applied to devices such as demodulators, and it covers general purpose demodulators that amateur operators could use for transmission of any arbitrary bit stream. Such demodulators would be required to interpret the bit stream as ATSC television in order to be legal for sale under this rule.

Currently, the "Broadcast Flag" FCC rule was struck down in court. It is up to Congress to clarify or change statutory law that affects this to allow the FCC to implement such a rule. I suspect Congress is very likely to pass such a law. Hollywood very much wants this law, and while they "own" a lot of Congress people, there is also the issue that without such a law, Hollywood may not produce (as much) content for over the air broadcast in high definition video.

But there may still be time to act on this. I would like to suggest all hams in the USA contact their Congress persons and urge them to make sure that any law they impose that provides for copy protection for digital and/or high definition television also have terms that ensure generic

purpose devices like demodulators with all of this technology will NOT be required to comply with the interpretation of data bit streams. Perhaps this could be made to work for devices that specifically do not cover all TV channels, since amateur radio use would not have to involve that. But we need to make sure we have some exception in the law to ensure the rapidly dropping prices of this 8VSB digital technology can be usable for hams setting up new 19.39265846 mbps digital data links. In the next few years such a demodulator could be built from one or two chips at a cost well under $100 due to the same chips (doing error correction codes, trellis coding, and polynomial (de)scrambling, as well as RF conversion) being mass produced for the digital TV and set top box market.

Funny, but when the gov't asked for billions for "homeland defense" and made fema and it united, I thought they would have bought some communications equip., trained people and they would be set in place in such a disaster--from planes, tops of tall buildings, in communication vehicles and such--then begin communicating with hams in their local communities to handle communications for family and other services into that area. I never thought for a moment they would then plan, in a real disaster, to start hiring hams--that simply sucks and demonstrates we have been screwed.

Now we find out, they didn't even use the money to get supplies of food, water, bedding, blankets, clothing, etc. WHICH YOU WOULD NEED IN ANY EMERGENCY! together, how surprising, the gov't has given us a royal screwing--ONCE AGAIN...

Saggytits Lee whined and made more pathetic excuses for his misuse of
the word "operate":

> [straw grasping skipped]

You wrote it, Fatass.

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

That incomplete sentence is priceless as an archive.

>What <bitchslap>

What about the fact that houseofnames.com pegs YOU as being of Jewish
and Welsh origin Davies, while Wiseman is one from the British Isles
and Germany?

You'll just make more pathetic excuses and try to change the subject,
won't you, Jewboy Davies?

Please be aware:

NEW YORK STATE OFFICE OF CYBER SECURITY AND CRITICAL INFRASTRUCTURE
COORDINATION CYBER INFORMATION BULLETIN
DATE ISSUED:
September 1, 2005

SUBJECT:
Fraudulent Websites for Hurricane Katrina Victims

OVERVIEW:
We have received information indicating that Internet domain names are
being created that could be used to lure unwary users into visiting
potentially malicious web sites.

BULLETIN:
Relief and charity efforts for the victims of Hurricane Katrina began
immediately after the hurricane devastated the Gulf Coast area.
Shortly
thereafter, web sites began to appear which were designed to defraud
unsuspecting users. Some of the activities include soliciting
donations
for seemingly charitable purposes, attempting to collect personal
information through phishing scams and also spreading malware to
unsuspecting users. Over the past few days, domain names that redirect
users to malicious web sites have appeared online, in addition to
email
scams requesting donations for those impacted by the hurricane. While
some of these sites and messages may be legitimate, many are not. At
the
time of this bulletin, please be aware that the following domains are
reported to be suspicious:

katrinahelp.com
katrinacleanup.com
katrinarelief.com.

Please note that this is not an exhaustive list and additional domains
may continue to appear.

In addition to fraudulent web sites, opportunists may use this event
as
a vehicle for other types of online attacks. For example, email
messages that claim to contain attachments with photos, video, or
other

information about Hurricane Katrina may actually contain viruses,
worms,
or other malware.

RECOMMENDATIONS:

We recommend that staff be advised to:

* Validate the relief fund or charity through a known reliable
entity. Please refer to the FEMA link below for a list of reputable
disaster relief resources for Hurricane Katrina.
* When a message containing a request for donations for these
victims appears, do not respond unless you are certain it is a valid
message.
* Avoid visiting untrusted web sites.
* Avoid opening email messages and attachments that claim to
contain video, photos, or other information relating to relief
solicitation for Hurricane Katrina.
* Follow standard best practices for email and web browsing
security.

How do you make a dead looter float?

First you get a tall glass, add two scoops of dead looter and 8 oz of cold milk, top it off with whipped cream and a cherry.

Hi

I have the following for sale:

HP 8444A Tracking Generator with allot of hardware electronic, manuals. Everything is wrapped in antistatic bags, foam and bubble wrap. There are plastic cases with dividers that have hardware in them.

Agilent HP 182T Large Screen Oscilloscope Mainframe.

There are cables, connectors etc.

I'm taking offers. If you have an offer that you think is reasonable let me know?

If you are interested email me at mr.mopar@videotron.ca

Thank You
Mike

It wasn't exactly Wyatt Earp and Ike Clanton, but to Roger it was just as traumatic and dangerous.

Go ahead, Roger. Why don't you tell everybody the tale. And then I'll tell what really happened.
Come on, Roger. Tell the boys about The Showdown at the Save-A-Lot Corral.

All that money to the ARRL which everyone knows to be the only legit representative of ALL of the nations hams and not one single penny to the looser up in Maine who is usually bellowing how important he is. The Corporation for National and Community know which groups are real and which are phony and they know that the ARRL and ONLY the ARRL deserves the support because the ARRL is REAL and is saving lives. The K1MAN group is nothing more than a guy in an old packing crate in Maine.

Make the ARRL stop, make them all stop. Who listens to W1AW anyway,
except for field day points.

877. K1MAN Has a Case ...

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-09 12:29:38 UTC
From: "Bob Sherin, W4ASX" <Sherins@bellsouth.net>
Message-ID: <1126268978.255260.178620@g47g2000cwa.googlegroups.com>
Source record: 49781

He's crossed the line numerous times: doing foreign policy, defaming Riley Hollingsworth, going commercial. But he has a case

When Ervin Duggan was FCC Chief Commissioner in the 80s, Baxter received two NALs similar to the present. Dutifully, he spent a great deal of time on his response, serving same on the FCC by regular mail. When the mail was "lost," Baxter resorted to Federal Express with no better result.

So, here was an agency, pre-Hollingsworth, that had issed two NALs and had purposely sandbagged K1MAN's answer -- with good reason.

In his answer, Baxter cited two documents of probative value. One was a letter to Kenneth Black of Ulmerton, UK, responding to his complaint, that gave K1MAN's operation a clean bill of health, equating it to W1AW bulletins. It was signed by Robert McNamara, Chief of the FCC, then-Private Radio Bureau.

The other was a declaratory order on the subject of the length of Information Bulletins with a footnote that referred to W1AW published schedules. The essence of the order was, information bulletins cannot be proscribed by time limits since they are so varied. Rightly or wrongly, Baxter has drawn his authority to come on when he does from that Order's footnote.

Small wonder the FCC disregarded K1MAN's answer, which essentially held that the issue of the NALs had already been settled in his favor. In legal argot, res judicata.

Though most hams, including myself, want to march Baxter right out of this service, justice dictates something else. The FCC, it seems to this commentator, has the burden of first addressing its previous NALs of the 80s which were never resolved.

An agency of government simply cannot throw a flurry of similar charges at a citizen, selectively unresponsive to those that can be defended, while arbitrarily limiting its attention to subsequent charges. Certainly, to the extent the previous NALs are similar, the legal principle of collaterol estoppel comes into play in Baxter's behalf.

I don't like what Baxter does any more than you. Indeed, I think he lost his way years ago. But if we're to have justice for all in these United States, then we must afford K1MAN justice. Let's not throw out the baby with the bath water.

Bob Sherin, W4ASX

Today is named after the Roman god of time and the harvest, Saturn. The Anglo-Saxons had no corresponding god of time, so they chose the Roman god and called their sabbath day saterdaeg. Saturn was so pleased with the Anglo-Saxon honor that he created a new class of men from within their ranks, the Time Lords. Those chosen men could travel through time and could influence the present by changing the past. Therefore, they had to be keen of intellect and pure of heart and could never reveal the true extent of their powers. They hid their abilities by taking up menial jobs and appearing to be ordinary men.

They are with us even to this day, because they are immortal.

Yet they have the failings of ordinary men and can lose their tempers when provoked. If you provoke a Time Lord to the point where he is truly angry, legend says that he will alter your genetic past, causing you to shrivel up into a microcephalic, long-haired dwarf and to subsequently go insane.

And now you know what happened to Woger.

====
"Doth not even nature itself teach you, that, if a man have long hair, it is a shame unto him?" St. Paul, 1 Corinthians 11:14

I have been hearing strong static levels from 14.100 MHz to 14.200 today and last night. The static drops off rapidly to quiet listening levels just above and below these two frequencies. Could this be caused by the solar flare? Could BPL do this? The static between 14.1 & 14.2 varies some, but is continuously high until the two points where it drops to zilch. I've checked to make sure it's nothing in the house causing the noise. OM

883. FCC SETS ASIDE K1MAN'S LICENSE RENEWAL

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-10 19:32:12 UTC
From: "Dr.Ace - WH2T" <Ace@WH2T.com>

FCC SETS ASIDE K1MAN'S LICENSE RENEWAL

The FCC's Wireless Telecommunications Bureau (WTB) has set aside its grant of license renewal to Glenn A. Baxter, K1MAN, of Belgrade Lakes, Maine. According to correspondence the FCC released recently, the WTB took the action soon after it had granted Baxter's renewal application, received on July 22 via the W5YI VEC.

"The application has been set aside for enforcement review," Associate Chief of Licensing Operations Tracy Simmons told Baxter in a July 25 letter from the FCC's Gettysburg, Pennsylvania, office. Simmons said the WTB took the action in accordance with 47 CFR ?1.113(a). That section says: "Within 30 days after public notice has been given of any action taken pursuant to delegated authority, the person, panel, or board taking the action may modify or set it aside on its own motion." Baxter's Amateur Radio license is set to expire October 17, 2005.

In early June, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) proposing to fine Baxter $21,000. In the NAL, the FCC alleges that Baxter has violated several sections of the Part 97 Amateur Service Rules. The list includes rules proscribing interference with ongoing communications, transmitting communications in which he has a pecuniary interest, failure to provide information the FCC requested, engaging in broadcasting, and failure to exercise control of his station.

The FCC has not yet affirmed the NAL by issuing a Forfeiture Order. Baxter has insisted in correspondence with the Commission that he has operated his station in full compliance with FCC rules and regulations.

On July 31, Baxter responded to Simmons' setaside notification to assert that the FCC has "intentionally violated my constitutional rights of due process" by not renewing his timely filed renewal application. Baxter said it's his "legal position" that he may continue to operate K1MAN "indefinitely," until a final legal determination in the case.

Poor Lardass Davies, thinks there are such things as "Time Lords" is it
any wonder he will be the 32 year old VIRGIN tomorrow?
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

Anonymous above,

Mea culpa on gabfests, though I've never regarded my voice as particularly good. Nor do I favor K1MAN, which has gotta be obvious from the post -- a little reading comprehension goes a long way.

Paramount, equal justice under the law is treasured, because I've witnessed too much unequal justice connecting with ham radio pre-Hollingsworth.

You could say, like other patriotic Americans, I want to see our system functioning smoothly. (For more information relating to equal justice under the law in another arena, go here: http://www.newsbackup.com/about673082.html.

A report earlier this week revealed the Louisiana Department of Homeland Security blocked Red Cross trucks filled with water, food, blankets and hygiene items from bringing relief to the thousands of hungry and thirsty evacuees stranded in the New Orleans Superdome after the hurricane struck

The state government office explained to the Red Cross it wanted the evacuees to leave and were afraid the relief supplies would become a magnet, causing more people to stay, according to Fox News.

The Red Cross posted a "Disaster FAQ" on its website which explained, "Access to New Orleans is controlled by the National Guard and local authorities and while we are in constant contact with them, we simply cannot enter New Orleans against their orders."

The charity says, "The state Homeland Security Department had requested - and continues to request - that the American Red Cross not come back into New Orleans following the hurricane. Our presence would keep people from evacuating and encourage others to come into the city."

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2ND STRANGE RADIO EVENT. This year's event is sponsored by the "Strange Radio Team" (SRT) with the collaboration of the Salerno and Taranto ARI clubs. This yearly event does change its goals every year. To obtain the "Strange Radio Event Certificate" this year, there is a 30 point minimum required. The Strange Radio event will take place from the 0000z, October

21st to the 2400z, October 23rd. S.R.T. stations and the associates of respective A.R.I. Sections are worth 3 points, the special callsigns are worth 5 points and the special station is worth 10 points. These stations can be contacted once every day per single band. A prize will go to the station that has the greatest number of QSOs. Prize will be given out during the 3rd Strange Radio Meeting in Salerno. More details and updated information is available on: http://www.strangeradioteam.com
Look for the following S.R.T. special callsigns:

II0SRT QSL via IZ0BTV (Simone) II6SRT QSL via IZ6FZS (Mirko)
II1SRT QSL via IZ1GJK (Maurizio) II7SRT QSL via IZ7FLT (Fulvio)
II2SRT QSL via I2JJR (Augusto) II8SRT QSL via IZ8EDJ (Oreste)
II3SRT QSL via I3BQC (Vittorino) IO8SRT QSL via IK8WEJ (Franco)
II5SRT QSL via IZ5BTC (Max) II9SRT QSL via IT9MUF (Marcello)

3Y0X, PETER I ISLAND (Update). The following press release was put on the 3Y0X Web page dated September 5th, by Ralph/K0IR and Bob/K4UEE (Peter I DXpedition co-leaders): "The 2006 Peter I (3Y0X) DXpedition Team announced today that it has been awarded a major sponsorship grant by the Northern California DX Foundation, Inc. (NCDXF). This DXpedition is funded principally by the contributions of its twenty-plus team members, but 30% of the total cost must come from the DX community. We are extremely pleased that the Northern California DX Foundation has decided to be the DXpedition's largest financial contributor. Their contribution to the 2006 DXpedition exceeds their contribution for last year's postponed effort. The DXpedition leaders and team members thank NCDXF for their continued confidence and support. In early February, 2006, a multinational team of approximately twenty operators, one explorer, and a professional photographer led by Antarctic DXpedition veterans Ralph Fedor, K0IR, and Bob Allphin, K4UEE, will activate Peter I Island. Team members come from France, Norway, Russia, Switzerland, Netherlands, Martinique and the United States, and many possess significant DXpedition and Antarctic experience." For further information on the Peter I DXpedition and how to contribute to the success of this DXpedition, go to: http://www.peterone.com

A6, U.A.E. Members of the Slovenia Contest Club (SCC) will be active as A61AJ during the CQ Worldwide DX RTTY Contest (September 24-25th) as a Multi-Multi entry. North American stations should QSL via K2UO and all others via DJ2MX.

C21, NAURU. Roger/G3SXW and Nigel/G3TXF plan to operate from Nauru (OC-031) as C21SX and C21XF, respectively, starting about 0800z on September 20th to about 1900z on September 25th. Their activity will be CW ONLY. Roger, C21SX, will operate the traditional HF bands (80-10m) on: 3503, 7003, 14023, 21023, 28023 kHz, and plans to be active each day during the hour before sunrise (1845z) on 3503 in the hope of working Western Europe. Nigel, C21XF, will concentrate on the WARC bands on 10103/10113/10123, 18073/18083 and 24893/24903. QSL C21SX via G3SXW, and C21XF via G3TXF. Further details, including propagation forecasts, are available on: http://www.g3txf.com/dxtrip/C21-Nauru/C21.html

DX MAGAZINE MOST WANTED SURVEY. Carl Smith, N4AA, Editor/Publisher of QRZ DX and The DX Magazine, announced that the 2005 Most Wanted survey conducted by The DX Magazine is now available at: http://www.dxpub.com Carl states, "Please let all of your DXer friends know about the survey. The more input we get, the better the results. Deadline for response is October 15, 2005. Click on the survey notice at the bottom of the home page and submit your 'needs'. Please be careful when marking the boxes for your Continent and/or USA TIME ZONE. Marking the wrong box will invalidate your response. The complete results will be published in the Jan/Feb 2006 issue of The DX Magazine, with a breakdown by mode in the Mar/Apr 2006 issue. The Top 100 will be posted to the web site in mid-January 2006."

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Branch Manager, informs OPDX that the following operations are approved for DXCC credit:
5X1B - Uganda, for August 3-12th, 2005
KH9/AH8H - Wake Island, for operations in 2003 and 2004
TT8BZ - Chad, for March 31st through August 23rd, 2005

FH & FR, MAYOTTE AND REUNION ISLAND. Serge, F6AML, (and possibly with another TO7C operator) will be active as FR/F6AML from September 27th to October 23rd. During this period he will also be active from Mayotte (between October 10-14th) as FH/F6AML. Activity will be on 40-10 meters. Suggested frequencies are:
CW - 7014, 10115, 14014, 18071, 21014, 24892 and 28014 kHz
SSB - 7057, 14266, 18140, 21266, 24966 and 28444 kHz.
QSL is OK via the bureau or direct to F6AML.

FP, ST. PIERRE AND MIQUELON. Operators Stan/AC8W, Ted/K8AQM, Henry/K8DD, Greg/K8GL, Ian/K8MM and Kurt/W8IQ will be here between November 22-28th. They plan to be active as FP/K8DD during the CQ WW DX CW Contest as a Multi-Multi or Multi-2 entry, depending on the conditions and antennas. Before and after the contest operators will be using their own callsigns. They will sign FP/homecall and are planning to be active on PSK-31, RTTY and the WARC bands before the contest. The possibility of adding one or two more operators exists. QSL FP/AC8W, FP/K8DD and FP/K8GL direct only via K8NA. QSL FP/K8MM direct only to CBA. QSL FP/K8AQM and FP/W8IQ direct (CBA) or by the bureau. Bureau cards (to home callsigns) will eventually be answered.

HI, DOMINICAN REPUBLIC. Bob/W9XY and Steve/K9WD will be operating as homecall/HI7 from Punta Cana, D.R., from October 16-22nd. Using two separate stations, activity will be on CW and SSB on 40-10 meters, with a possibility of some 6 meters as well. Transmitting from the all-inclusive Sunscape "The Beach" resort, Bob and Steve will mostly be active during the evenings after "sun and fun" activities are over for the day. QSL via their home callsigns, either direct or via the Bureau.

IOTA NEWS.....
AS-008. Look for 7L3ATQ/1 to be active from To Island (JIIA AS-008-013) in the JA1 North Izu Island group, September 17-19th. QSL via the home callsign either direct or by the Bureau.

EU-004. Kurt, HB9XCL, will be active as EA6/HB9XCL/p from the Island of Formentera (DIE E-024 and MIA MB-002), Balearic Islands, September 18-23rd. Activity will be on all HF bands, with an emphasis on SSB and the digital modes. QSL via his home callsign; bureau is preferred.

EU-008/
EU-123. Operators Steve/G0MTD, Malcolm/2E0MAX, Brian/G0OMB, Norman/M0CRM, Joe/M0DHV and Malcolm/M0XAT will be active as MS0WRC/p from the Isle of Mull (IOSA NH-15 and SCOTIA CN-10), September 11-17th. Activity will be on 80-10 meters SSB, 2 meter FM, possibly digital and CW. Also, there is a possibilty (operator dependant) that they will activate a local lighthouse and go to the Isle of Iona (EU-123, IOSA NH-15 and SCOTIA CN-01). QSL via the bureau or direct to G0MTD.

EU-031. Peter, DJ2OS, plans to activate a few islands in this IOTA group between September 13-16th. The following islands were mentioned: Ischia (IIA NA-001, MIA MI-042), Capri (IIA NA-006, MIA MI-015) and Procida (IIA NA-002, MIA MI-080). Look for him daily starting at 1800z on 14260 kHz, and also a little later on 10120 kHz. QSL via is home callsign, direct or by the bureau.

EU-042. Georg, DK7LX, will be active as DK7LX/p from Foehr Island (GIA/DID N-17), October 6-12th. Activity will be mainly CW, using a multiband vertical antenna. QSL via his home callsign.

EU-174. Laci, HA0HW, will go to Thassos Island and be active as J48HW and SV8/HA0HW/p now through September 18th. Activity will be on HF bands, 80-10 meters, the WARC bands included, on CW, SSB, BPSK31 and RTTY. His rig is FT-840 using monoband dipoles and GPS on fishing poles. QSL cards are OK via the HA Bureau or direct.

NA-062. Bodo, DL3OCH, will be active as W4/DL3OCH from Key West (USI FL-040S, Monroe county, Florida) between September 30th and November 4th. Activity will be CW only. There is a possibility of Bodo to activate other IOTAs as well. QSL via his home callsign, direct or by the bureau.

NA-140. David, AH6HY, will be active as AH6HY/W3 from Smith Island (USI MD-003S, Somerset County, Maryland), September 16-18th. Activity will be SSB only, 20-10 meters. QSL via AH6HY (use QRZ.com address).

OC-NEW. Kardi, YB1TC, Project Manager, reports that the Karimata DXpedition is on schedule. Operation will take place September 16-20th. Activity will be mainly on 40-15 meters with an emphasis on 80/160 meters. The callsign will be YE7P. The team will be landing on the island on September 15th, at about 1500z, and try their best to initiate the first activity on September 16th, at 0000z on 15m SSB and CW, beaming to JA and NA west coast. IOTA frequencies will be used with split

operations when needed. They will try to operate 24 hours with
2 or 3 radios at a time (5 radios are available). Operators are
YB5QZ, YB0DPO, YB0ECT, YB0KLI, YB0JS, YB0MCR, YD0LLY, YB1TX,
YC1XDS, YB2MTA and lead by Kardi, YB1TC, also as QSL Manager.
Their Web site is already online and will include online logs
that will be available during event. Please visit their Web site
and take a look to at their sponsors. The online logs will be
updated every 30 minutes. The Web site is on:
http://www.orari.web.id
QSL route for North America is via K8SIX, Japan via JN6RZM and
Europe via IZ8CCW. You can also send directly to Kardi, YB1TC.
The first batch cards will be ready in mid-October, and Kardi
will distribute QSLs to all 3 QSL Managers. Anyone who needs a
QSL before the January 31st IOTA deadline, please send request
directly to YB1TC. After you send a request, please send an
E-mail to Kardi (yb1tc@msn.com)so he can prepare to reply
immediately.

SA-NEW. A group of several operators from Argentina led by Daniel,
LU3CT, will be active from Isla Escondida, in the North of
Chubut Province. Callsign already issued is: L95WI. They will
leave the 20th of October, and hope to be ON THE AIR starting
the 22nd, operating 24 hours a day with 4 stations until the
24th, then they will return back home by the 26th. Operations
will be 80-10 meters, CW, SSB and the Digimodes. QSL via Dany,
LU3CT, to the following address where donations can be also
be sent to help the DXpedition's expenses at:
Sr. DANIEL CARLOS FAIGUENBLAT, TRES ARROYOS 768, C1416DCF,
BUENOS AIRES, ARGENTINA.

J3, GRENADA. Harry/AC8G and Kelly/N0VD plan to activate Grenada from
October 26th to November 1st. In the CQ WW SSB Contest, they will use
J3A. Outside the contest AC8G will use J37K, and N0VD will use a callsign
to be determined. QSL J3A via WA1S and J37K via AC8G. Activity outside
the contest will be on the regular bands, 12/17 meters and perhaps 6
meters. They still have time to add other operators. Contact AC8G, if
interested, at: hflasher@dayton.net
Two Polish operators will also be on the island during the same time
period (plus a few more days). They have indicated that they plan to
do mostly CW operations.

J43, GREECE. Geza, HA4XG, will be active as J43XG from October 1-15th
from Rio (near Patras - KM08vh). He will use his FT-897D on the HF bands
(40-10 meters, including the WARC bands) with a DunaX GPS and dipoles, and
on 2 meters with an 8 element Yagi antenna. He does like CW but will try
to work on SSB and FSK441 also. Geza is on his holiday with his wife, so
main time of operation will be during his early mornings and evenings.
QSL via the HA QSL Bureau or direct.

KH7, KURE ISLAND. Another press release (Kure-Osity #4, dated Sept 7th)
was sent out by Ward, N0AX, this past week. OPDX InterNet Subscribers

will receive the complete press release as an additional bulletin. Excerpts from the press release indicate that the K7C Team members are converging on Honolulu to complete preparations and sail for Kure on the 15th of September. Captain Bill Austin is preparing the "Machias" to be their home for the next month. Local amateurs Kimo/KH7U and Pat/NH6UY are doing yeoman service in handling gear and shipping chores. Ward states, "For example, to prevent importation of invasive species to Kure, new clothing is required and all supplies will be deep frozen before shipping! To do my part, I've purchased the world's ugliest tennis shoes just for the island, and you'll no doubt see my colorful apparel in several photos." The press release asks that DXers (especially around the Pacific Rim) to please be patient as they take advantage of any openings to the other side of the world. They also ask that DXers to please be disciplined and stand by when requested. Their first goal will be to give as many different DXers a contact with the island, and that may mean focusing on the one or two most reliable bands for the first few days. Later in the expedition, they will try to explore openings on more marginal bands. Pay close attention to the DXA Web site and to the K7C operators instructions and bulletins. The DXA Web page is: http://www.cordell.org/DXA

KH9, WAKE ISLAND. Dan, W0CN, informs OPDX that he is pleased to announce his KH9 DXpedition which will take place (firm) between September 18-30th. Some equipment has already been shipped and has arrived on Wake Island. Should any plans change, information will be posted on:
http://www.qrz.com/w0cn
The KH9/W0CN DXpedition to Wake Island will commemorate the 60th anniversary of the end of World War II. Activity will be on 160-10 meters CW/SSB. The QSL Manager will be K9JS, by the bureau or direct to: Jonathan L. Schulz, 813 West Washington, Harvard, IL 60033. Logs will be submitted to the "Logbook of the World" (LoTW).

MU, GUERNSEY. Members of the Purple Mug Team DX Group (PMTDXG) will activate the Island of Alderney (EU-114), the most northernly island of the Channel Islands group, from Wednesday, October 12th to Wednesday, October 19th. A group of four amateur radio operators from around the U.K. will be operational on all HF bands, 6 meters, VHF APRS, VHF/UHF, SSB, and hopefully, some satellite activity. They hope the first calls could be made during the evening of the 12th; most probably on 80/40 meters. Worked All Britain (WAB)and Lighthouse activity may take place depending on the availability of portable power supplies/generator.
Further information is available from: dave@g1ocn.com
Skeds are welcomed and encouraged. Callsigns and QSL route(s) are:
GU5XW via G5XW, GU1OCN via G5XW, MW0JZE via G5XW and MU3SDE via M3SDE.
For more information, see individual callsigns on QRZ.COM. Also, visit the PMTDXG Web page at: http://www.pmtdxgroup.co.uk
More details/updates will be sent prior to departure.

NP2, U.S. VIRGIN ISLANDS (Update/Correction). Brian, KP2HC (ex-KF2HC), informs OPDX that there is a minor correction regarding the NP2 posting in OPDX.725. Ann will be doing the November Sweepstakes Phone Contest, QRP from their new home in St. Croix not St. Thomas. Additionally, her

new callsign is KP2YL (ex-W2AZK).

OH0, ALAND ISLANDS. Hadi, DJ2PJ, will be OH�JWH once again from Eckero Island in the Aland Archipelago from September 25th to October 7th. His activity will be on all HF bands, 160-10 meters (no 6 meters this time), including the WARC bands, on CW, SSB, RTTY, PSK, MFSK, SSTV, and Hell. A special focus will be on 160-30 meters. QSL via DJ2PJ, direct or by the Bureau, or by E-mail request (oh�jwh@dj2pj.de). More info is avalaible at: http://www.dj2pj.de
LAST MINUTE UPDATE: On his upcoming visit to the Alands, OH�JWH will be using the callsign OH�P!

PJ5, ST. MAARTEN/ST. EUSTATIUS. Jim, K1NA, will be active as PJ5NA during the CQ WW DX CW Contest (November 26-27th) as Single-Op/All-Band entry. QSL via K1NA (100% QSL direct only with SASE) No bureau cards will be answered.

PLEASE STAY CLEAR...TNX. A request has been sent out for stations to keep the following frequencies (plus/miuns 5 kHz) clear for emergency nets:
14265 (SATERN NET) 3873 (W Gulf ARES Net)
7285 (W Gulf ARES Net) 3935 (Katrina h/w Traffic Net)
7290 (Katrina h/w Traffic Net)

PY0S, ST. PETER AND ST. PAUL ROCKS. Joca, PS7JN, is active as PY0S/PS7JN until September 22nd. Activity will be on all HF bands CW/SSB and also various digital modes. Over the past week, he was heard mainly on 20 meters SSB/RTTY/PSK. There was one QSN on 40 meters. QSL to his home callsign.

QSL INFO AND NEWS.....
Joe, K1JN, informs OPDX that there seems to be much confusion regarding the various QSL Managers for the VP9I callsign. Different operations should be QSLed via different managers. Joe states that he has received many direct and bureau requests for operations that he is not the manager for, especially the CQWW 2003 CW Contest. He periodically forwards these cards to the correct managers, but this will slow down the turn around time of your card considerably. The correct managers are:
CQWW 2002 SSB via K1EU CQWW 2003 CW via KQ1F
CQWW 2003 SSB via K1JN CQ WPX 2005 via N1HRA

Randy, W5UE, reports, "As a result of Hurricane Katrina my QTH was flooded with 4 feet of water. As luck would have it most of the blank QSLs for stations I manage were underwater and have been ruined. I plan to continue as manager for these stations, however, I will appreciage your patience in the coming months as new cards will need to be ordered, and I will be establishing a new QTH. Stations managed by W5UE include: HC8N, HC8L, PZ5A, K5R, W4D and 6G1KK. Please check my web page often to get my latest status." His web page is:
http://www.datasync.com/~w5ue/qsl-w5ue.html

Tim, N4GN, announced Friday that a log search is now available for T88BH, T88GG and T80A. Just send an E-mail to <t8-log@n4gn.com> and include up to ten callsigns in the subject line of your message. For

details, see the following web site: http://www.n4gn.com/logsearches/

Alan, VK4AAR, advised OPDX on Friday: "This is to advise that all valid requests for VK6DHI cards will be cleared and in the mail between now (9th Sept) and Sunday (11th Sept).

SILENT KEY. OPDX has been informed by Angelo, I2ACC, that Tino, I2ZZZ, became a "Silent Key" (SK) on August 29th, 2005. Tino was a long time DXer, a great CW enthusiast and DXCC Honor Roll #1.

SPECIAL EVENT. The Anaheim Police A.R.C. will be operating as K6P to commemorate "POW-MIA Recognition Day." The station will operate from September 11-18th. Operation will generally take place between 2000-0300z daily. The purpose of the event is to honor and remember those that served and those that are still waiting to be fully accounted for. The event will gratefully acknowledge the sacrifices made by American military personnel and their families as they endured captivity in the service of the nation. The suggested frequencies (as propagation and QRM permits) will be as follows: 28450, 24950, 21350, 18150, 14253 and 7250 kHz SSB. QSL direct with an S.A.S.E. to KM6HB: Mark McMullin. P.O. Box 27271, Santa Ana, California 92799 U.S.A.. PHOTO QSL CARD ONLY is available, NO CERTIFICATE.

SPECIAL EVENT. The military radio club, F6KAT, will use the callsign TM5OBA from November 26th to December 10th. They will be active on HF and VHF. The activity is to celebrate the 50th anniversary of the French Air Force Base 128 at Metz-Frescaty. They will run two stations on the HF bands (one for SSB and CW and one for the digital modes) and one VHF station. QSL via F6KAT, direct or by the bureau.

SWL WEB PAGE/MAILING LIST. The Mediterranian DX Club (MDXC) has been supporting the IOTA since 1997. The IOTA Program was established back in 1964 by the late Geoff Watts, BRS-3129, the only SWL ever inducted in the CQ DX Hall of Fame. For this reason, the MDXC is now glad to open a Web site for SWLs around the world. Please visit their Web page and join them at: http://www.mdxc.org/swl
In order to subscribe to the SWL mailing list, please send an E-mail to: mdxcswl-subscribe@mdxc.org

T88, PALAU. You still have a couple of days (until September 13th) to work Tony, KQ2I, as T88AT. Activity on has been on CW. QSL via KQ2I.

TF, ICELAND. Rich N0HJZ, will active as TF/N0HJZ, from October 26-30th. Activity will include the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via N0HJZ. Look for activity before the contest. He states that he will use large rhombics and full power.

V5, NAMIBIA. Klaus, DJ4SO, will be active as V51/DJ4SO between September 18th and October 12th. Activity will be on 6 meters with an HB9CV antenna. QSL via his home callsign.

In article <1126417608.290456.203380@f14g2000cwb.googlegroups.com>,
hhc314@yahoo.com says...
> Dave, what ever happend to the Civil Defense organization.

Civil Defense was renamed Emergency Management and delegated to local
levels. In some areas of the country this worked out well. In other
areas with little funding or interest it was assigned to a storage
closet in the basement of the county building next to the Korean War K
rations and iodine pills.

Most hurricane or tornado prone areas had some level of Civil Defense.
The Three Mile Island incident kicked it up a notch.
Sept 11th kicked it up some more.

I'm going to post this as a question that I am answering to one of my Congressmen. Then again, most congressmen don't even know what a ham operator is. They probably don't know what usenet is. Too bad for them.

==========

Harry,

You ask a valid question.

I don't want to get too far off topic here in r.r.a.m, but I think it is safe to state that most hams are conservatives (hang on a second all of you!!! hear me out!!!) in that, during a disaster, we don't wait for the gov't to do stuff; we do it ourselves. Someday, the gov't will tell us (and the rest of the world) how well we did. Government is a lot like a woman's butt. You can ask any woman if you want to confirm this. The smaller it is, the better it looks. And shall we pour money into it?

I should say up front that I have been a ham since I was 13 years old, raised in a (R) household, but have mingled with other opinions. Got my Novice, then General, then Advanced, and then Extra in 1983 (maybe 1984?). Got the coolest callsign available at the time by dumb luck: Kay Zed One Oscar KZ1O. My current age is 50, this was written in 2005.

I wanted to give something back, so I helped with the testing of new hams. I wanted to bring new hams into the hobby, so I elmered (as in, I taught kids who wanted to get their ham license).

I ask the same questions that you did just now.

Where is the part of us that wants to jump out and help? The Civil Defense people were really taking a risk to do what they did. Yet they did!!

Amazing.

One thing that I keep finding, and you will also, is that ham operators were there all the time, for free.

Now here is my question to you (and anyone else who has read this so far): Why has the president not walked into the Rose Garden and basically told everyone living that ham radio has been there when everything else has failed. Is ham radio some kind of second-class citizen that works when all else fails?

Yes, we are. We are what works when all else fails. Maybe you should put that into your Blackberry when you can't get through.

Ham operators will make contact, no matter what.

Don't forget that. Especially when you are voting to take away frequencies from our ham operators.

73, Best Wishes,
Dave Bushong
KZ1O

.....
Now here is my question to you (and anyone else who has read this so
far):

Why has the president not walked into the Rose Garden and
basically told everyone living that ham radio has been there when
everything else has failed. Is ham radio some kind of second-class
citizen that works when all else fails?
.....

Politics.

Hams don't vote as a block.
Do hams come out in support of a particular canidate or donate
significant $$$$ as a group to an election campaign ?

First Responder union officials make a big stink on the TV news in
support of canidates. Big companies make significant donations.

That all means something.

As hams we can and do help provide communications infrastructure during
emergencies but this is back office work compared to fire, police, EMS,
and military.

Last year my ARES group activated for major flooding multiple times.
We had tons of thanks heaped upon us by the Red Cross and First
Responders. It felt good. There was a press conference and I know for a
fact the head of the First Responders personally thanked the hams for a
job well done.

The local newspaper said nothing about ham radio. Instead they just said
there were communications problems, cellphones would not work in the
area , and the problem was being looked at.

Geese..

Yes, it certainly has been a long time, but, I am back.
It has been a tough year, we took two direct hits from hurricanes, the house then burned and the groves are gone. But guess what, the real estate has turned to gold !!!!
What ever happened to AF2Y, and OTK, and what about that sick bastard from Tampa, KE4TEW. Also, I have been getting busy stringing wire to get back on 14313, but I have yet to hear RAMBO DAN, has there been any Psycho Dan sightings lately ???
You guys have got to keep me posted, and just wait for the Roll CAll.

The 14.313 - 14.300 - 3.894.5 net wars are long gone and
the battleground has now re-grown with gresh grass and flowers.

Nature has reclaimed these freq's and the WAR IS OVER.

Even KV4FZ is GONE and has abandoned the field of battle. (!!)

It's over dude! Do something different.

(except for 3.950 and the Saturday Liberty Nitwit Net which
is still going on and on like the Energizer bunny with a bad
case of the shits. Those people will never give up until they
drop dead like the guy in AL did a few months ago.)

923. K1MAN's Pychological Profile, according to his Wife

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-13 16:30:14 UTC
From: "Bob Sherin, W4ASX" <Sherins@bellsouth.net>
Message-ID: <1126629014.500516.302440@g44g2000cwa.googlegroups.com>
Source record: 49727

Sifting through prior posts, I found one relevant and worthy of reposting. Where some hams are raising K1MAN's pyschology, what better commentary can we have than from Glenn's Wife, Bonny, which Glenn himself published?

The following was posted on January 21, 2003. It is reposted with one caveat: The Logan Act is raised when, better, The Patriot Act should be substituted.

"Answering W4ASX editorials, today Baxter fired back. (In the attachment which follows) we learn that he equates himself to Bill Gates and Ted Turner, that people in Dayton ask for his autograph, that AARU is a registered trademark and that www.K1MAN.com had 64,582 hits during the month of December. But more to the point: 'My wife Bonnie says I am a narcissist.'

Bonnie is on the money. DSM, the internationally accepted manual of mental disorders, defines narcissism as 'An all-pervasive pattern of grandiosity (in fantasy or behavior), need for admiration or adulation and lack of empathy, usually beginning by early adulthood and present in variety of contexts.'

We all have characteristics that track DSM, but the difference between an order and disorder is dysfunction. If the characteristics give rise to a 'presenting problem, then the person is said to have a disorder.

Quite simply, the issue comes down to whether Glenn's narcissism is all pervasive, invading, penetrating, and molding every aspect, nook, and cranny of the personality, which is, granted, a subjective judgment.

The moment I witnessed the forays into foreign policy in Bougainville, I thought that line had been crossed. And now listening to Sam and Glenn talk about operations in Iraq, Jordan, Israel and Somalia, I know they've entered forbidden territory.

Their activity violates the Logan Act, which prevents private citizens from conducting foreign policy. Glenn's response: 'And we have done some wild things around the world over the years. But in violation of the Logan Act? Come on Bob, who is deluded now?' In fact, Glenn embraces some of the same people we, worried about homeland security, oppose. Shouldn't a responsible leader be open, in the very least, to the possibility of adverse consequences?

As Brian, K3VR, who has compiled an amazing dossier on Baxter operations in the arena of foreign policy, writes: 'Whether he is ill,

naive, stupid, or a bona-fide spy, won't matter one iota to the agencies who have questions about his actions. They will want satisfactory answers to significant questions.' Our security demands no less.

As to his respected Wife's assessment of narcissistic mental state, Baxter drops one more hint in the attachment. "Anyway, I sent Bob the $25 and he said he never got it. It did not come back so, being paranoid, I figured Bob was stiffing me." Unbelievable, this after the closest working relationship where I had proved my honesty time and again. Characteristic of Baxter, he does not disclose in the attachment (identification of check, i.e. date and number), leaving, for the readers, that cloud of suspicion remaining, a classic Baxter tactic.

DSM identifies the narcissist as 'interpersonally exploitive, i.e., uses others to achieve his or her own ends.' It gives us closeup insight into his apparent view of himself: of the omnipotent, worldwide, IARN Network with offices girding the globe engaged in missions befitting Mother Teresa, his views sought out by leaders of the free and non-free worlds as well as important media, such as the Wall Street Journal and major TV Networks.

We are left with an impression of grandeur, when, in fact, this is but one person, Glenn Baxter, and his Radio Shack recorder on timers and a loop. We would be less than honest if we didn't acknowledge a certain value in the production and distribution of such a bulletin.

To read the DSM criteria for narcissistic disorder is to gain full insight into Baxter. Having 5 of the following qualifies him: 1) Feels grandiose and self-importance (e.g., exaggerates achievements and talents to the point of lying, demands to be recognized as superior without commensurate achievements), 2) Is obsessed with fantasies of unlimited success, fame, fearsome power or omnipotence, unequaled brilliance ..., 3) Firmly convinced that he or she is unique and, being special, can only be understood by, should only be treated by, or associate with, other special or unique, or high-status people (or institutions), 4) Requires excessive admiration, adulation, attention and affirmation -- or, failing that, wishes to be feared and to be notorious narcissistic supply), 5) Feels entitled. Expects unreasonable or special and favorable priority treatment. Demands automatic and full compliance with his or her expectations, 6) 'interpersonally exploitive' ..., 7) Devoid of empathy. Is unable or unwilling to identify with or acknowledge the feelings and needs of others, 8) Constantly envious of others or believes that they feel the same way about him or her, and 9) Arrogant, haughty behaviors or attitudes coupled with rage when frustrated, addicted, or confronted."

Quoting Baxter: "He (meaning me) has been on Prozac for several years now and recently a mood regulator as well ... . While apparently making him happier, I now find Bob to be a different functioning human being with regard to his great intellectual abilities."

"For sure, Glenn; thanks for the kudos. Depakote, a mood regulator, prevents those leaps into grandiosity, bad judgment, irritable episodes, pressured speech. The intellect remains, albeit, for more productive pursuits. There isn't a person in my inner circle, including myself, who has failed to notice a vast change for the better. For some, Depakote (makes) miracle(s).

Consider it Glenn. Just a bit of harmless Depakote can make you the achiever you've only imagined thus far.

Bob Sherin, W4ASX"

Dave,

Why won't the President acknowledge what hams do? Simple.....can't allow
us "Amateurs" to show up the giants like Motorola...wouldn't look good on
the stock exchange.

927. How to weather-seal an upside down Tailtwister rotor?

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-13 23:27:20 UTC
From: Marshall Goldblatt <w4emb@myacc.net>
Message-ID: <3op5feF73ibjU1@individual.net>

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,.radio.amateur.antenna

Hello all,

I have a Tailtwister (TX-2) rotor mounted on a Rohn 25 foldover tower. While the tower itself appears to have survived intact, hurricane Katrina snapped the mast and destroyed the antennas. I need to fold the tower over to work in it, and likely leave it folded over for a fairly extended period. This will leave the top of the tower and the rotor upside down. Unfortunately, it is still the rainy season here, and the last time I needed to do this, rain water got into the rotor and settled in the bell, causing rust and other corrosion damage inside the rotor, because it is only weather protected when it is upright. I would like to seal the rotor to prevent this from happening again, but none of the ideas I've had so far (wrapping it in plastic garbage bags, using duct tape, using sealing foam) are usable, either because they don't seal well enough to keep water out or because stuff may get up inside the rotor where I can't get it out.

So, does anyone have any suggestions?

73, Marshall - W4EMB

Maybe ... get some axle grease, or RTV sealant would be better, perhaps.
Both should peal off reasonable well.

One other thing I am concerned with tho. I always heard that the rotar
must be kept in a vertical position or the grease would drain out of the
bearings? Wives tale ??? I don't know. But I always keep mine vertical
when stored.

One of the tricks I learnt early on with RTV sealant in medical ultrasound water tanks is if you wet the surfaces with water and a detergent wetting agent the sealant wont actually adhere to the prewetted surface. Kind of handy if you wanted to force the sealant into a clearance slot and remove it later.

Or was it oil? Damn I cant remember! I know kerosene is used to pre the surface for better adhesion...

How about paper/masking tape over the gaps and spraying with that gluggy sealant you use on sink drains?

Probably not very useful thoughts, sorry!

Cheers Bob W5/VK2YQA

Don't know about that, but there's no way to keep the rotor vertical
when lowering a foldover tower... In any case, it's been folded over
(for long periods) many times, and I've never noticed a bearing problem.

First off, there are at least two rotor repair vendors whom you should
contact for ideas; Craig's and RotorDoc (I think those are the
names--a web search should yield results).

Secondly, with some experience with HAM type rotors I would suggest
that the two principle entries for moisture are at the cable
attachment point (either a terminal strip or an Amphenol connector,
depending on vintage or whether you modified it), and the space
between the fixed portion of the rotor (the part with the cable
attachment) and the black rotating part.

The cable attachment point will be trickier, but you may be able to
get good results with gobs of plumber's putty. What you want to avoid,
particularly if you have a terminal strip, is glopping it up with
silicone sealant or Coax-Seal. You will rue the day you ever tried
either if you use it on a terminal strip. The spaces around the
attachment into the non-rotating part need to be sealed, too.

You might also have success with plumber's putty at the opening
between the moving and non-moving parts. Just roll it up and stuff it
in.

I would follow that up with some sort of shroud. The garbage bag/duct
tape method you mentioned seems like a really good idea. I would have
been inclined to think it sufficient without any extra caulking. Don't

be concerned about "stuff [that] may get up inside the rotor where I can't get it out." See below.

As far as Dan's warning about the grease, I think he's right about the "old-wive's tale." The rotator turns at 1 RPM. Even if the grease did run out of the races (there are two in the T2X), you can certainly run the rotator at least a limited amount of time without concern until you get to it, not to mention that fact that there will be a film of it that will stay on regardless of position.

What many people ignore is the instruction right in the manual regarding grease, and it calls for very little. It's not a wheel bearing. Since you're almost certainly going to want to take it apart for a cleanup after all of your other repairs are completed, you can take care of any missing grease (and "stuff") then.

There are two kinds of hams: those who have had bearings on the floor and those who have never taken apart a HAM style rotor. But, even if you don't get 'em all back in, you'll be okay. When you talk to one or the other of the rotor repair guys, order a pack of extra balls. You'll need 'em sooner or later anyway. Think of the fun you'll have telling people you ordered extra balls.

Here's a tip: the bearings are held in a plastic carrier. Whatever you do, when you lift the carrier out, do NOT attempt to straighten the carrier into any bigger diameter than the race it rests in. In fact, keep the ends of the carrier overlapped. That is the secret to keeping the bearings off the floor. It's not foolproof, but it'll certainly reduce your adventure significantly. I can't tell you how many rotor invasions I had to perform to learn that.

I hope your Rohn 25 isn't one of the ones that folds over halfway up with a significant boom to crank it over. Those things are killers. I had a friend in Oswego, IL, who broke his arm when repairing his after it went over during the Plainfield tornado. The kit for 45 is MUCH stronger.

Good luck on all of your recovery.

Wonder what ever happened to that bedrock ham in
Miami in the mid-80s, who used to give disabled hams
rides to ham club meetings. Used to be an inspiration to
ride with him to meetings and socialize after. Oh, now I
recall, he inserted himself into the kv4fz controversy, and
since then, it has been all down hill for him.

Lloyd, That's a funny commentary, because right after that I married the Angel of my life, started a mood regulator called Depakota and life has been a dream. We have a wonderful group of friends -- with many hams among them.

Let me now address the KV4FZ federal prosecution. Answering the call of a fellow ham, I went to help, not knowing a thing about it. I learned 1) that Herb had committed minor misconduct, and 2) that the federal government used unlawful tactics to try and bag him for 3 counts of felony. I happen to have discovered the false evidence, was able to prove it through witnesses here, and 2 counts were overturned. The 3rd, which remained, was questionable at best.

Had I to do over again, I would, as I would for any ham, given the time.

Bob Sherin, W4ASX

> [nothing different]
>
> Judging

Judgeing by the whining you are doing you pedophile, you whined and got
it cancelled. Not to worry, many more will just be put into use.

Now go whine and cry some more, Pussy.

--
Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

If I were really after you, Woger, I'd notice that you aren't Lloyd, n0vfp, and then I'd look at the Google TOS section which states that you are not allowed to

"* impersonate another person or entity ..."

while using Google groups. I think it would be trivially easy to get your Lloyd account nuked, based on that and on several other prohibitions. In fact, as long as you stalk or harass or post obscene material, you are also in violation of Google's TOS.

If I were really after you, Woger, your Google accounts wouldn't last beyond one posting session.

.Lloyd,

There you go, Lloyd, raising your own predicate, then shooting it down. I never said he was framed; to the contrary. I've always maintained that he committed misconduct. But here's where it gets over your head apparently. Pay close attention and make an effort to comprehend.

The Federal Government's position was that Herb was a kingpin of crime, defrauding Calls out of thousands. And so they presecuted three counts of felony. Two of those counts required a jurisdictional minimum of $1000, and the feds simply falsified his alleged wrongdoing to come up to that amount.

Here's how I discovered the ruse. The printout was laid on the trial at the last minute (I wish I understood the federal rules and why his lawyer couldn't exclude it). Anyway, the printout made their case a fait accompli.

After the trial, I asked for a copy and studied it all the way back to Miami. Noting two calls showing where Herb had called Miami, I visited those people and got Affidavits that neither even knew a Herb Schoenbohm, let alone talked to him.

Put before the Court, the Affidavits resulted in two of the jury verdicts being overturned. The remaining was weak because it was "possession of a counterfeit access device with the intent to defraud." The access devise was a stretch of first impression to encompass a pass code in Herb's head. Trouble is, the Feds never specified any precise pass code. Vague and without specificity, that count should have gone too, in my view.

I am not condoning his behavior in any way, just attempting to relate the intracacies as I saw them unfold. And yes, Lloyd, I get a kick out of moving social causes in a positive direction for society, which was part of my upbringing. There is a much more important issue occupying me right now and it is just breaking in the press. (For more info, put into Google Newgroup Search: "The Florida Bar is Corrupt.") Yes Lloyd, by their nature, these issues all do mature and reach the press. But before that, there is untold work that goes into them with little note.

Bob Sherin, W4ASX

Hi all,

I've been trying to solve a data transfer problem for about a year now and i cant find a cheap solution to what i need. I'm basically transmitting data (average and gust wind speed) once a minute over a distance of about 20 miles, over small hills and towns (small hills being 3-400ft) from a beach location. This location has no power source and no other means of connectivity. My current method is to chirp the speeds into a mobile phone continuously and set it to auto-answer so all i have to do is ring it to find out speeds. However I'd like to WWW-ize it and so cant get the PC to listen to the beeps all the time, plus this would cost a fortune call-wise if i could lol.

Can anyone suggest a solution that doesnt draw huge amounts of current or require loads of space - this is a remote location but still close enough to towns to have things that look like electronics stolen.

Any hints would be great, this is a personal project so budgets are small lol.

Many thanks.
James

Hi James

My first thought is to use one of those (no license needed) low power HF frequencies set aside for telemetry, garage doors etc. The allowed power output varies from place to place. From memory I think around the 1-50mW range.

There is a fairly common world wide allocation for example around 13.555 Mhz. My thought would be to setup a xtal oscillator on the right frequency and use very narrow band modulation techiques to continually transmit the wind numbers (say) every minute or so. How much data you are sending will govern the intervals and modulation bandwidth. You might even like to do initial trials with PSK31 but it may not be narrow enough for the power limitation.

At the receive end a sound card DSP demodulator attached to a receiver. Not sure what sotware is already available. It would probably be very easy though to modify existing source code at higher rates to what you need. The demodulated data could be dropped into a database/file to be read by your web engine.

Keep in mind that this technique would probably need forward error correction on the data, or at least some kind of checksum so you could ignore bad data.

The price? Assuming no transmitter already exists as a kit/off the shelf you are looking at maybe AUD20 of components, the xtal being the single most expensive part. The power consumption would be very low.

In case you arent involved in radio generally, the rule is that the narrower the bandwidth of the signal, the better signal to noise ratio you will get for a given output power. ie noise is a function of bandwidth. For example CW (morse code) is often easier to hear at low signal levels than a persons voice on SSB. There is however a penalty in using a narrow bandwidth in that the rate of data you can send is limited. Voice for example generally requires at least 2.4Khz and "normal" morse code around 500Hz. I think PSK31 needs about 100Hz but dont quote me.

Funny you shd mention this as I have a long term project to one day send GPS signals (from a car) on 144Mhz using very narrow band techniques. The average 30km range base to mobile for a voice circuit will probably do about 200km using this mode.

Cheers Bob W5/VK2YQA

I was thinking along this line too but having no experience with RF transmissions or methods of doing so I've just realised i'm going to need to sit back and read for a while! Coding im OK with, electronics I can deal with (though I mainly do microprocessor stuff) but RF is less in my area lol. Thanks for the hints, I'm currently running through google pages like never before :) so I'll get back to you when i feel more on a level to understand the information presented.

Thanks again!
James

Well strictly speaking such a low power transmission shouldnt be a huge problem in design and build. You might get away with a simple xtal oscillator and maybe a "power stage". You'll find lots of designs for that all over the web. Look for CW transmitter designs for QRP use.

Your first step though is to find out what the rules and regs on unlicensed low power HF devices is in your country.

The next biggest problem is how you modulate that oscillator in a very narrow band mode. FSK (freq shift keying) and PSK (phase shift keying) are relatively easy to do. Likewise you'll find lots of designs for that on the web. I should also point out that oscillator stability and "bad" noise/sideband generation also needs to be closely looked at for extreme narrow band modes. Your power supply also needs to be as noise free as possible and things like hanging TTL switching etc off the same supply might be problematic.

What you didnt mention is what is the actual output of the wind speed device. Is it a uP device with lots of options or does it just send out pulses? If it just does pulses you'll probably need a counter in TTL etc. I'd be interested to hear how you already have that working and interfacing to the phone.

The receive side is pretty simple in a sense. Assuming you have a reasonably stable SSB receiver you then only need a soundcard connection. (ie radio speaker to sound card line in) You'll need to decouple the computer from the radio (like through a transformer) to reduce noise pickup. Antennas of course are another "problem" to be solved and how much time you spend on them depends on how good a signal you get on first tests. PSK31 might actually be a good starting point because there have been lots of programs written for it that are GPL. Hence you can modify at will.

Hey I use to write assembler and do prototypes etc for the old 8085's uP's.. That was a long time ago!

Cheers Bob

972. Re: GMRS 1 Watt range?

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-15 17:40:00 UTC
From: Caveat Lector <UALLBeware@9984reader.com>
Message-ID: <PliWe.14696$mH.4298@fed1read07>
Source record: 49675

Neither one as it depends on several factors
Power
Receiver sensitivity -- Noise Figure
Altitude of the 2 units
Antennas gain
Obstructions hills mountains
Frequency

But here is how to determine line of sight
VISUAL DISTANCE. A rough rule of thumb is to take the square root of the height in feet and that will give the miles from the antenna to the ground. Repeat for the other antenna and add the number of miles. This can be multiplied by about 1.2 to 1.3 for radio waves. For example if the transmitter antenna is 625 feet high and the receiving antenna is 16 feet high, square root of 625 = 25 miles, square root 16 = 4 miles. Add 25+4 = 29 miles for the visual distance. Then multiply this by 1.3 to get 37.7 miles of radio range. This gives the visual distance. And of course, transmitter power and antenna gain, receiver noise figure and antenna gain enter into it

So at ground level -- two 6 footers gives about 6 to 8 miles at best

Best you get a hold of a pair and try them out.

--
CL -- I doubt, therefore I might be !

Expect about 3/4 of a mile range. You may get more, but nowhere near the
advertised range.

Lloyd,

Taking a second look at your posts, I think something got by me. You asked "Where?"

I see that question now as meaning where can you find the article to which I'm privy that is not generally known. Try putting this into Google Newsgroup subject-matter: "When the Feds Fanned Out." It is the

story of my awakening at St. Croix.

Bob Sherin, W4ASX

To me, the above series of posts are unambiguous. Am I missing something?

Bob Sherin, W4ASX

I am not sure I understand the question. I think you have the rotator upside down on the tower at the moment. If it went through some weather, it is probably full of water now. The way I would handle the problem is to remove the rotator from the mount and hang it on the tower (clothes hanger wire) right side up. I would hang it there for a few days to drain & dry out. When it comes time to reinstall the antennas, test the rotator for proper operation. Chances are that it will be OK. If you seal it tight, the moisture will be sealed in. These things are intended to be able to breathe!

If removing/replacing the rotator is a major hassle, I would either send it to one of the maintenance guys or put up a new one & sell the old one on ebay WITH the explanation. There are lots of us who have setups that are easy to change.

If the rotator must be left in the inverted position outside for an extended time I would wrap it in black landscape plastic and duct tape to prevent more water from entering while leaving the bottom of the plastic open to dry out.

> These things are intended to be able to breathe!

The tower is currently up (the mast broke above the rotor, so all the antennas are dangling by their feedlines, but the tower itself is OK) and the rotor is in its normal upright position. It will be upside down when the tower is folded over to work on. As far as I know, the rotor is fine right now.

> If removing/replacing the rotator is a major hassle, I would either
> send it to one of the maintenance guys or put up a new one & sell the

> setups that are easy to change.

Don't understand this. Yes, removing/replacing the rotor is a hassle, largely because it has to be done with the unit upside down, and standing at the top of a ladder. But that isn't the issue here - in fact, there is no obvious reason to remove the rotor at all, since it seems intact. Just remove the stub of the broken mast from the thrust bearing and put a new one in. The issue is that while that is done, and the new antennas are mounted, and new (or repaired) feedlines are run, and all the antennas are tuned, the tower will need to be folded over, with the rotor mounted, and these steps will almost certainly take several days. Because of availability of helpers reasons, this will likely have to be on weekends, meaning the tower will be folded (and the rotor inverted) for a period of at least 1 to 2 weeks.

> If the rotator must be left in the inverted position outside for an

> to prevent more water from entering while leaving the bottom of the
> plastic open to dry out.

I have done this in the past, but because of the way the rotor is mounted on the Rohn tower, it isn't possible to seal it very well this way - I was looking for suggestions for better ways of weatherproofing it for this period.

Have used both over the years (at least one and perhaps both on this
particular rotor :-)). I don't believe that either had specific
suggestions for this problem.

> attachment) and the black rotating part.

The unit has a terminal strip, but this was "remoted" via a short cable
the last time one of the rotor repair vendors overhauled it, and the
point that the cable exits was heavily sealed. (This was done because
the terminal strip is blocked by the Rohn rotor mounting plate.) The
space between the fixed and rotating parts is the one of concern.

> The cable attachment point will be trickier, but you may be able to

> between the moving and non-moving parts. Just roll it up and stuff it
> in.

I'd have some concern about some of the putty getting into the bell of the rotor, where it could cause problems. I'm currently thinking of using tape (perhaps just masking tape) to cover the opening, and then covering this with sealing foam or something else. The tape would be to prevent any of the sealer from entering the bell.

> I would follow that up with some sort of shroud. The garbage bag/duct

Just garbage bags and duct tape isn't really sufficient (or hasn't been in the past) because the way the rotor is mounted on the Rohn (seems to?) preclude wrapping it well without gaps that let rain in.

> As far as Dan's warning about the grease, I think he's right about the

Haven't ever had (noticeable?) problems with loss of grease.

> What many people ignore is the instruction right in the manual

Actually, no plans to take it apart (hence the concern about "stuff" getting in). It was overhauled after tower damage _last_ year (not directly hurricane related, but...). As far as I know, there are no current problems with the rotor, so if at all possible, I had planned on leaving it mounted, and just replacing the mast and other thing above.

> There are two kinds of hams: those who have had bearings on the floor

> with a significant boom to crank it over. Those things are killers. I
> had a friend in Oswego, IL, who broke his arm when repairing his after
> it went over during the Plainfield tornado. The kit for 45 is MUCH
> stronger.

It indeed _is_ a half-way up fold-over. No other style works in the location (well, at one time in the distant past, I had a crank down, fold over at the base tower, but current versions of such either won't fit the space or won't fit the budget...) Have had it and folded it over many times for many years without problems (lost it in hurricane Andrew, but no problems for 10 years before or after that). However, have lost the hinge section a couple of times in the last few years - once because a wind gust spun it sideways while it was being cranked up, and once because the boom got caught in a guy without our noticing while it was being cranked up. I'm a lot more concerned (and careful) about it now than in earlier years, but (for the above reasons) don't expect to do anything about it if it can be avoided. We've avoided injury by keeping well clear while it is going up and down, and (trying to) control rotation by using guide ropes well to the side and out of the path. The 45 _is_ much stronger, but it would be difficult to fit, and would require replacing the entire tower, which is effort and expense that isn't viable right now.

> Good luck on all of your recovery.

Thanks!

Marshall

Agree, very nice and it would be a great radio for when you are way out in the middle of nowhere with an emergency. You can always contact a plane flying over to relay your position and situation to local authorities and not have to rely on a Ham 2 meter repeater being nearby. Very cool radio and nice size and battery life too.

Nice..
I've seen similar equipment discussed in ultralight Backpacking Yahoo
group..

http://groups.yahoo.com/group/ultralightbackpacking/

Someone (Hiking alone) Took a 40 foot tumble down a cliff..
Survived..
now carries something like whats in the link above..
Use it only once and it's paid for immediatly .. .

All right my friends, including all the Lloyds. Here's the post that
tickled the answer that follows:

Bob. God bless you for trying to be civil to "Lloyd", but as you have
already determined there are several posters usurping that name.
The most proliferant, and the most obnoxious posts emanate from but one
person, AB8MQ in West Virginia.
This person has a penchant for being less than witty and most often resorts
to profanity in a weak-minded effort to respond to or irritate other
posters.
If you are ever in the mood and have some time to waste, you can do a Google
search of AB8MQ (and his old callsign, KC8JBO) and I guarantee that you will
find more than enough to keep you busy for an evening.
This poster has, as a result of his cruel profanity, lost numerous internet
providers over the years and now often resorts to anonymous remailers to
post his filth.

In short, Bob, responding to "Lloyd", aka Roger Wiseman, is futile. Don't
waste your time. The man is psychotic, a social misfit who, at 50 years of
age, shows no promise of outgrowing puberty.

(it is not "peaking", but rather "peeking")

OTOH it could be, perhaps, that Roger "peaks" at the very mention of
Lloyd...

In this case "peaking", insofar as Roger is concerned, could be defined as
Roger's uncontrollable urge to tumesce at the thought of Lloyd being
anywhere in the immediate area.

Now I understand!
I this case I would get some of the soft rope like window putty from the hardware store to seal up the rotator while it was vulnerable. I have not bought any for years, I assume it is still available. Play Dough does not work well, it either shrinks and falls out or hardens.

But he's not up at almost 4 AM on a Friday night dateless whining about
another man like you are, LARDASS! BWHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

> <more whining from Dumbfuck Davies>

LOL! Coming from a hopelessly myopic fucktard who fancies himself the
center of the universe, this goes way beyond a PKB. The problem
is, Lameass Lloydie, you've been hammered so hard for so many years,
you're
totally punch drunk. Just a blind man shooting at the world with
blanks for ammo.
I know getting through your thick skull is nearly impossible, Lardass
Davies, but your delusions are so
laughable that I couldn't resist putting you back where you belong.
Just couldn't help but notice that it seems you have a severe case of
megalomania (Pauses while you look that 'big word" up)that is
completely unjustified. Thought I'd like to point out that your
homepage and yahoo gay chat group Domestic Cunt is a fetid, steaming
turd (sorta like your posts), and
those alcohol and drug inspired poems and pictures are pitiful. To
think that you spend your time composing these pathetic lines of verse,
and even more pathetic prose in the form of empty threats and weak
flames (I should call them
"sparks", maybe "fizzles" would be more appropriate), and then are so
PROUD of these things that you put them all over the place!!

Well, shit for brains, I guess these things just confirm my suspicions
all along that you have absolutely
NO LIFE. You've even admitted this on the board and on the newsgroups.
And those many sockpuppets you have.... I'm pretty sure that the only
time you've ever pulled wool was to keep the sheep from running away.

Trying to use KC8UNJ's VX7 Commander software with a Yaesu VX-7R and a ttl2usb CT-1 adapter. As soon as I try to read from the radio, I get a message "Run-time error '8002'. Invalid port number", and the program crashes. Doesn't matter if the radio is hooked up in clone mode or not.

Anyone have a solution of this? Thanks.

Those of you who have something substantial to say, thank you.

Wouldn't it be preferable, fellow hams, to put this group on an issue level? That way we could all learn from one another, for that is the raison d'tre of Newsgroups.

For example, my initial post in this thread, as great as I thought it was at the time, pales in comparison to a private response I received from a genius of a Counselor. Unfortunately, it is something that cannot go public yet understand that my analysis here is amateurish.

That having been said, why can't we have erudite opinions here, or if we lack erudition, why don't we pretend we have it, as I did in initiating this thread? For myself, I love to be outclassed, because it is such an easy education. I mean, without sitting in the classroom as the professor drones on and on, we get the best from one another, thereby spiraling our intellects, or whatever intellects we have.

Am I asking too much for the group to consider this post? Is it asking too much for those of you who post personal attacks and drivel to try and contribute meaningfully? After all, we are all judged by the rhetoric that surrounds us here. And I personally am so ashamed of some of it that I always wind up pulling out, when what we need is the best minds staying and rising to the top.

Poor Wogie must be off his meds again. The below angry post is yet another indicator of the misfiring synapses in the cranium of this developmentally delayed fifty year old man.
The comment, "and isn't a mentally ill retard" is wide open for argument.

"It's "complaintant," you sniveling weasel." (Roger Wiseman on spelling complainant.)

"Dumbass Lloyd" <n0vfp_lloyd@yahoo.com> wrote in message news:1126968054.616844.243520@g43g2000cwa.googlegroups.com...

Digital wrote:

Dickless would apply to you, at least Roger has kids and isn't a mentally ill retard who is still a VIRGIN at 32 years of age like you are, Dickless Davies.

>> "Who's Roger's BITCH?" <jawn_kimball@yahoo.com> whined in message

>> That's our

But he's not up at almost 4 AM on a Friday night dateless whining about another man like you are, LARDASS! BWHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

> <more whining from Dumbfuck Davies>

LOL! Coming from a hopelessly myopic fucktard who fancies himself the center of the universe, this goes way beyond a PKB. The problem is, Lameass Lloydie, you've been hammered so hard for so many years, you're
totally punch drunk. Just a blind man shooting at the world with blanks for ammo.
I know getting through your thick skull is nearly impossible, Lardass Davies, but your delusions are so
laughable that I couldn't resist putting you back where you belong.
Just couldn't help but notice that it seems you have a severe case of megalomania (Pauses while you look that 'big word" up)that is completely unjustified. Thought I'd like to point out that your homepage and yahoo gay chat group Domestic Cunt is a fetid, steaming turd (sorta like your posts), and
those alcohol and drug inspired poems and pictures are pitiful. To think that you spend your time composing these pathetic lines of verse, and even more pathetic prose in the form of empty threats and weak flames (I should call them
"sparks", maybe "fizzles" would be more appropriate), and then are so PROUD of these things that you put them all over the place!!

Well, shit for brains, I guess these things just confirm my suspicions
all along that you have absolutely
NO LIFE. You've even admitted this on the board and on the newsgroups.
And those many sockpuppets you have.... I'm pretty sure that the only
time you've ever pulled wool was to keep the sheep from running away.

Actually, the large intestine has a special cell lining that simulates a metallic. I believe the attenuation value is about 80 dB in the UHF range.

If you try placing your GMRS transceiver within the confines of your large intestine, you will come to the conclusion that the performance is shit!

The other problem with this technique is that is rather difficult to talk into the radio when it is up your ass. You could use a microphone and, of course this would not be necessary if your head is already up your ass.

Did you try plugging it in the wall? Did you turn it ON? Do you have all the cables hooked up?

If none of this works for you, look for short circuits or a dead battery. Then again, putting it in your large intestine may make it communicate, but I still say the reception will be affected.

.....

Leave it to the hand-wringers to call names.

Of course the Libs and the Lib Media have completely ignored the homes of
the white persons that were flattened by the storm. That makes for poor
copy.
Oh, and last I saw? It was not white folks shooting at the rescuing
helicopters, it was not whites raping the helpless victims. It was not, but
in few cases, whites stealing televisions and stereos from shattered store
fronts.
Facts is facts.

Yes, we are making your job a lot easier. We tell it as it is while you and
your Liberal cohorts try your best to blame it on Pres. Bush and make
excuses for lawlessness and criminal mayhem.

In the words of one of the looters, "We be taking us a TV because we needs
to feed our family."

And by the way, Mr Liberal, how much money did YOU give to the hurricane
fund?

>Not sure, but for years the dead have been voting for Democrats.
>I have a ten spot that says the dead folks in New Orleans will rise again
in
>the next Democrat primaries.

Spoken like a true Republiscum, yet another glaring example of the
disconcern and disrespect Republicans have for those who died in New
Orleans. Keep it up stupid, makes our job alot easier.

//

Hit too close to home, did it?

Darn if it is not true. Look around you.

Ain't any secret that dead Democrats vote once, twice, and even three or
four times.

Heck, for that matter it isn't unusual for dead Republicans to have a
graveside change of heart and arise from the grave every four years to vote
for a Democrat.

If it were not for vote fraud most Democrats would be left standing on the
sidewalk asking for handouts.

Correction: I should have asked, "Just where were the white looters?"
Oh, wait. The whites were able to flee before the hurricane hit.
The blacks were not told beforehand to flee, were they? This is an obvious conspiracy fomented by Pres. Bush to wipe out the homes of the blacks who didn't vote for him.

Name one person who would speak or think highly on him. His ex Regina?
She's got a VPO on him. His kids? Taken away for suspected sexual
abuse and a unhealthy/unclean home environment (according Florida Child
Welfare Documents). His Mommy? Wait she's in hell and he beat the hell
out of her when she was alive.

No, I am afraid that no one will speak or think highly of our Woger.

Donny Lardass Davies the 32 year old VIRGIN whined:
> Poor Wogie (IKYABWAI)

Poor Lardass Lloydie aka "Donnie" spending his Saturday night alone,
drunk and always stupid. The thing is, he can't even find a decent job
no that he was fired as a pizza BOY.

ANOTHER SATURDAY NIGHT
(Sam Cooke)

Another Saturday Night, LARDASS Lloyd has nobody
He is so ugly, and he can't get laid
How he wishes he has someone to talk to,
He's in an awful way

It's hard on a fella, when you look like he does
He looks at 'em but he can't get 'em
Women think he looks like slime
Not impressed that he slings pizzas all the time

Another Saturday Night, LARDASS Lloyd has nobody
He is so lonely, and he can't get laid
How he wishes he has someone to talk to,
He's in an awful way

Lloyd don't have much to spend of the weekly pay,
When you spend it all on toys to play,
Lloyd met a volunteer firefighter, to him she looked fine,
Too bad she had a strange resemblence to a cat named Frankenstein

Another Saturday Night, LARDASS Lloyd has nobody
He is so ugly, and he can't get laid
How he wishes he has someone to talk to,
He's in an awful way

I see that nothing has changed much since the mamby-pamby
liberal 'Oh boys, less all kiss each other and make up'
wanabe mediator you tried to be (unsucessfully I add) at the
Orlando Hamfest between Herbie and his crew of morons
and that teary-eyed old bint and her pack of el-cheapo
rich retired heebs of the Maritime Mobile Net on the other side.

Acutally it was quite funny when you rented that
room and not only did nobody show up, but K1MAN
saw (smelled ??) an opportunity and interjected himself
and not only stole your show Bob, but he managed to
esclate the whole 14.300/14.313 war to a new level
of insanity in the process!

Boy oh boy! Weren't they the good ole days?
Alas, most of the protagionists are now dead or
dottering drooling fools residing in nursing homes
who live to watch Regis and Kathy Lee on the
boob tube or have given up on ham radio alltogether.

I will say this for you Bob. You are consistent.
Unlike most hams I know. I'll be in Orlando again
this year and I'll buy you a beer or a coke.
your a good egg and I don't care what they say
about you. You're OK in my book. I want to know
however if ole CQR in DeBary (raincoat charlie) is
still around. He is (was?) one of the most entertaining
gentlemen I've met on ham radio, along with the golfing
canadian transplant from North Fort Meyrs. That guy can
play a round-o-links like Arnold Palmer!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th/September, through Sunday, 18th/September there were 213 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J5, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, V8, VE, VK, VK9N, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Zoli, HA5PP, will be active as 5B/HA5PP during the CQ World-Wide DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (TBD) entry. QSL via HA5PP.

8P, BARBADOS. Dean, 8P6SH, will be active as 8P2K during the CQ Worldwide DX RTTY Contest (September 24-25th) as a Single-Op/All-Band entry. QSL via KU9C.

APDXC. The Osaka International House Radio Club is hosting the Asia Pacific DX Convention (APDXC) which will take place November 18-20th, as the first Asian international DX event. In addition to the presentations of recent DXpeditions, there will also be technical sessions, displays, etc... that you usually find at most large DX conventions. This convention will offer something special, such as a tour to the Icom factory, a technical session led by the Icom IC7800 design team, a tour to the electronics district, and more since it is being held in the country in which most of the amateur radio equipment is developed. Their guest speakers are:
Bob, K4UEE, who is co-organizing the Peter I DXpedition
Jaes, 9V1YC, who made the successful DXpedition as FT5XO.
Andy, UA3AB, will introduce us to the Big Guns in Russia
John, ON4UN, will talk about "low band antenna arrays"
Bharathi, VU2RBI, tells us about her experiences on Andaman Islands

Please visit their Web site for more details at: http://apdxc.org/

D4, CAPE VERDE. Andrea, IV3SKB, will be active as D44TD, during the CQ Worldwide DX RTTY Contest (September 24-25th) as a Single-Op/Single-Band (20m)/High-Power entry. Listen to the operator for QSL route.

EY8, TAJIKISTAN. Nodir, EY8MM, will do a limited operation during the CQ Worldwide DX RTTY Contest (September 24-25th) as Single-Op entry. QSL via K1BV. Visit his Web page at: http://www.qsl.net/ey8mm

FR, REUNION ISLAND. Jean-Marc, F5SGI, will be active as FR/F5SGI from October 23-31st. Activity will be mainly CW. However, Jean-Marc states, "I'll make an entry in the CQ WW Phone Contest on Oct. 29 and 30 (although phone is definitely not my cup of tea !) to give zone 39 to those who will understand my barefoot signal."

HC1, ECUADOR (Update). Dr. Rick, NE8Z, will be active as HC1MD from Tumbaco from September 19-26th. Activity will be CW on the WARC bands using a Yaesu FT-100 and a 40-10 meters Carolina Windom. Suggested frequencies are: 10103, 18073 and 24903 kHz. Also, look for him on 6 meters on 50110 kHz using 100 watts into a 2 element Par Electronics Loop. QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA.

IOTA NEWS.....
AF-NEW. Operators Ezzat/SU1ER (President of the Egypt Amateur Radio Assembly), Mohammed/SU1KM (EARA Vice-President), Karim/SU1KA, Carlo/IK6CAC, Antonio/IZ8CCW, Leopoldo/I8LWL, Tony/IK8VRH and Raimondo/IK8BQE will be active as SU8GFT from Giftun Island, for about four days and for at least 18 hours a day during the last week of September. The team plans to operate SSB and CW mostly on 20 and 40 meters, with two 100-watts stations, a beam and two verticals. QSL via IZ8CCW. This operation is funded mainly by the MDXC. However, further contributions can be sent and gratefully appreciated through the QSL Manager.

The Web site for the operation is at:
http://www.mdxc.org/su8gft/

AS-100. (Op Cancelled!) Jan, 4X1VF, informs OPDX that he had to cancel his scheduled DXpedition to Akhziv Island (for September 30th through October 1st) due to permission problems. The Israel Navy is not ready to give them the permission to stay overnight on Akhziv Island. He states, "Without operating the night, we shall not be able to contact NA and SA as we planned. The Island is close to Lebanon's border and this is a sensitive issue..... We hope one day to get the authorization."

AS-100. Dov, 4Z4DX, is planning to go back to Akhziv Island between October 19-21st. His callsign will be 4Z4DX/p. His mentions that he just finished sending out all the direct QSLs for the last 4X0AI operation (in August).

AS-117. Operators JN4MBO, JR4HHX and JA5BEX will be active as homecall/4 from Toyo Island (AS-117-034), Hiroshima Pref, October 9-10th. Activity will be on 80/40/30/20 meters CW and SSB. Other plans include possibly the activation of Ituki Islands. QSL via their home callsign, direct or by the bureau. Also, visit the JIIA Award Web page at: http://www3.ocn.ne.jp/~iota/newpage61.htm

NA-143. Martin, KN5G, will be operating from Galveston Island (USI TX-001S) and South Deer Island (Not an IOTA; a new USI TX-037S) mainly weekend days between now and October 9th. He will be running QRP only, 5 watts, with a battery powered K2 and a Half Square antenna at the water's edge. Primary activity will be on 20 meters SSB and CW. He will be using the callsign KN5G/P. QSL via his home callsign, direct or by the bureau.

SA-069. Members of "Atacama Desert DX Group" will activate the very rare IOTA, "Santa Maria Island", for 3 days between October 8-10th. Activity will be on 40-10 meters, including the WARC bands and 6 meters. Modes will be CW, SSB, RTTY and BPSK31. The callsign will be 3G1M. Santa Maria Island is an uninhabited island visited by fishermen and is located about 50 Kms north west of Antofagasta City. Operators mentioned are: Nick/XQ1IDM, Danilo/XQ4ZW, Marco/CE6TBN, Mauricio/CE2WUI, Mauricio/CA2UDO, Serigo/CE1RQB and Luis/CE2UWJ. QSL via XQ1IDM. Visit the following Web for more details at: http://www.mdxc.org/3g1m

SA-NEW. (Update) The Team (A group of several operators from Argentina led by Daniel, LU3CT) is working hard to prepare and set up equipment and antennas for their October 20-26th trip to Isla Escondida, in the Northern part of the Chubut Province. The callsign is already issued: L95WI. They have already organized the costs and ship with the skipper to transport operators and equipment to the island. A dedicated Web site for this DXpedition is now available at: http://www.ddxc.net/l95wi Roberto, LU3CQ, will be regularly in touch with the Dynamic

DX Charterhouse in order to update any phases of the activity.
They would like to remind the IOTA Hunters that expenses for
transportation is a significant amount; therefore, any
donations would be greatly appreciated. You can send your
donation to LU3CT: Sr. DANIEL CARLOS FAIGUENBLAT,
TRES ARROYOS 768, C1416DCF, BUENOS AIRES, ARGENTINA.
You can also contact Daniel, LU3CT, directly at:
lu3ct@ipv4.com.ar

SA-082. Pedro, HK3JJH, will be activating the Magdalena/Guajira Division
Group for 2 or 3 days begining September 19th. He hopes that
the propagation will be good. Look for him as HK3JJH/2 on
14260 kHz (+/-) SSB. QSL via his home callsign (w/SASE).

KG4, GUANTANAMO BAY. Doug, W4OX, will be active from Guantanamo Bay, Cuba,
as KG4OX from September 19-26th. Activity will include an all band entry
in the CQWW RTTY Contest (September 24-25th). Outside of the contest, he
will be active on all bands 80-6 meters, including the WARC bands on SSB,
CW and RTTY. QSL via his home callsign. Bureau cards are gladly welcomed.
He mentions that upon his return home the logs will be uploaded to LoTW.

KH2, GUAM. Phil, KH2X, will be active during the CQ WW DX SSB Contest
(October 29-30th) as a Single-Op/All-Band entry. Phil will arrive in Guam
on the 27th and will operate primarily on 80/40 meters before/after the
contest. QSL via KH2X.

KH7, KURE ISLAND. Another press release (Kure-Osity #5, dated Sept 15th)
was sent out by Ward, N0AX, this past week just before leaving for Kure.
OPDX InterNet Subscribers will receive the complete press release as well
as other Kure-Osity press releases as an additional bulletin. In excerpts
from the press release Ward states, "After a lot of boat loading, box
packing, rope tying, and nautical things the words for which escape me at
the moment, the K7C expedition is ready to sail on the ebb tide this
afternoon!" The K7C team did leave that afternoon aboard the "Machias" for
their 9 day trip to Kure. Actually, Kimo Chun, KH7U, reported: "The K7C
Kure DXpedition departed from Honolulu at 6:13 p.m. Hawaiian Standard
Time (HST), Thursday, September 15, 2005 (0413z, 16 Sept 05 - UTC). All
preparations went well. They left with a rainbow in the sky at their back
and a setting sun to guide them out of Keehi Lagoon. Hopefully, the
following sea will aid in speeding them towards Kure Atoll at the Northwest
end of the Hawaiian Island chain." It has also been reported that the K7C
Expedition also wishes to dedicate the expedition to the memory of Hugh
"Cass" Cassidy, WA6AUD, whose visionary wisdom in the "West Coast DX
Bulletin" opened the door to much of DXing culture that we take for granted
today. For more information about the team's whereabouts and schedule,
stay tuned to the K7C Web site's DXA application in the "Messages" section.
They will also attempt to be active from the "Machias", most likely on 20
meters, as K7C/MM. As of Saturday, the team has not set up a radio on the
"Machias". The DXA Web page is: http://www.cordell.org/DXA

LZ26, BULGARIA. The Balkan Contest Club, LZ1KZA (LZ5A), will be active
again as LZ26ZA between October 1-31st. The callsign LZ26ZA counts 10

points towards the "St. Teodosii Tyrnovski Award". See the following Web page for details at: http://www.balkanclub.8m.com
QSL via the bureau or send direct to LZ1KZA: P.O. Box 36, 4300 Karlovo, BULGARIA.

MU, GUERNSEY (Update to OPDX.726). Members of the Purple Mug Team DX Group (PMTDXG) will activate the Island of Alderney (EU-114), the most northernly island of the Channel Islands group, from Wednesday, October 12th, to Wednesday, October 19th. A group of four amateur radio operators from around the U.K. will be operational on all HF bands, 6 meters, VHF APRS, VHF/UHF, SSB, and hopefully, some satellite activity. The team Members announced are: Carol/2E1DQZ, Russell/G5XW, Tim/M3SDE, Dave/G1OCN and Anthony/MW0JZE. Callsigns and QSL route(s) are: GU5XW via G5XW, GU1OCN via G5XW, MW0JZE via G5XW and MU3SDE via M3SDE. For more information, see individual callsigns on QRZ.COM. Also, visit the PMTDXG Web page at: http://www.pmtdxgroup.co.uk
More details/updates will be sent prior to departure.

PIRATE ALERT! Edward, K2MP/W2AN, informs OPDX that an operator called "Bill" is pirating W2AN in Europe on 160/80 meters CW. "Bill" selects weak CW sigs and gives them the thrill of their first EU/USA QSO. Edward states that this is a "Nasty thing to do and I have hundreds of QSL cards from eager EU stations seeking their first DX QSL. Spread the word that W2AN does not work DX on 80 and 160."

QSL INFO AND NEWS.....
Andy, VE9DX, reports that all CY9SS logs have now been uploaded to LoTW during the afternoon of September 12th - all 38,500 + contacts. The paper QSLs are now being printed and should be available in a few weeks. You can view the photo QSL (front) at:
http://ve9dx.weblink.nbtel.net/cy9ss/cy9ss.html

INTERESTING LOTW NOTE. Brian, K3KO, recently announced that he downloaded a file containing all callsigns listed in the "Logbook of The World" (LOTW), and ran it through WIN-EQF to find out the number of countries that were available and missing in the LoTW. There are 273 countries presently within the LoTW. The following countries are not available:
1A, 3CO, 3D2/C, 3D2/F, 3XA, 3Y/B, 3Y/P, 4U1UN, 5A, 5N, 7O, 7P, 7X, 9J, 9Q, 9U, C31, C9, E3, EK, EP, EZ, FO/M, FR/G, FR/T, HK0/MALPELLO, HV, J5, KH5, KH5K, KH7K, KP1, KP5, OD, PY0T, R1F, R1M, ST, SU, T9, TL, TN, TT, VK0/M, VK9L, VP8/SG, VP8/SO, VP8/SS, VU4, VU7, XF4, YK, Z3, ZK1/NC, ZK3, ZL8, ZL9 and ZS/MARION
Brian states, "The completeness and accuracy of the above list is dependentent upon the input file completeness and the accuracy of WIN-EQF in detecting the correct country from the call." If you take a brief look at the list above, less than 50% of them have had some DXpeditions to them (some quite old). It would be nice if some of them would at least upload their logs to LoTW.

S7, SEYCHELLES (Rare IOTA Op). Members of the Russian Robinson Club are proud to announce a DXpedition to Aldabra (AF-025) and Farquhar (AF-035) Islands scheduled for late September and early October. Their tentative

schedule (and callsigns) is:
S79RRC/A - Aldabra Island, September 30th-October 2nd
S79RRC/F - Farquhar Island, October 5-7th
The team will be: Sergey/RA3NAN (S79NAN), Eugene/RZ3EC (S79EC) and Andy/RZ3EM (S79RRC). They are expected to dedicate 3 days of operation to each island. For more details and updates, visit the Web page at: http://www.qso.ru/s79rrc

SILENT KEY. It is with great sadness to report the passing of Hugh "Cass" A. Cassidy, WA6AUD, on September 9th at the age of 88 years. Many will remember Cass for his "DX IS" articles/stories he wrote for "The West Coast DX Bulletin". Cass was the editor for eleven years, and some of his "DX IS" stories are available on the K2CD Web site at: http://www.geocities.com/k2cddx/index.html
OPDX and its readers would like to send out our deepest sympathy to the family and friends of Cass.

SV9, CRETE. Ron, WB2GAI, will be operating from here, September 26th to November 10th. Activity will be on 80-10 meters CW using a Force 12 vertical dipoles. Please QSL via the bureau.

T8, PALAU. John/WB6Z (T88US) and some JA operators will be active and celebrate the 11th anniversary of this country's "Independence Day", between 1300z, September 28th and 1300z, October 2nd. They are now applying to the PTT for extra permission and a special station callsign T80Z. Activity will mainly be on SSB on 80-6 meters and VoIP (Echolink, WIRES?!!!!). QSL via WB6Z: P.O. Box 746, Mercer Island, WA 98040 U.S.A. (w/SASE or SAE+IRC to PO Box address only). No via BUREAU QSLS (it takes forever :-)).

V26, ANTIGUA AND BARBUDA. Bud, AA3B, informs OPDX that he will be active as V26K between November 23-28th. Activity will include an entry in the CQ WW CW Contest as a Single-Operator/All-Band/Low-Power category. Outside of the contest, he will be active on CW only. QSL via AA3B.

V3, BELIZE. A team will activate V31MD for CQ WW SSB Contest (October 29-30th), the first all software defined radio DXpedition. The team, consisting of Rob/V31MD, Terry/AB5K, Eric/AA4SW, Gary/W5ZL and Larry/WO0Z, will also operate as V31LL, V31TG, V31ZL, and V31SD before and after the contest on all HF bands and modes with their SDR 1000s. QSL as per the operator's instructions. ADDED INFORMATION: V31MD's QSL route is the same as always. The other individual callsigns used by the team members will be handled by the individuals ("hence QSL as the operator's instructions"). Dates outside the contest will vary by the participating member's arrival and will be informal. Many team members will operate between October 25-31st. V31MD will be used exclusively in the contest, of course.

VA3, CANADA (New CIsA Op!). Operators Bob/VA3QV/VA3RCS and Martin/VA3SIE will be cycling into Maple Island (CIsA ON-NEW!!, not IOTA). They plan to activate the island for the Canadian Islands Award Program on September 25th. They will be operating QRP with an FT-817 and Elecraft KX-1 transceivers, battery powered. Activity will be on 80/40/30/20/6/2 meters.

Further information and a detailed times/frequencies schedule can be
found on their Web site at: http://www.sunim.plus.com/maple/index.html

VP5, TURKS AND CAICOS. Gail, K2RED, will be active as VP5RED during the
CQ Worldwide DX RTTY Contest (September 24-25th). Operation class is
TBD - LP. Look for some SSB/RTTY operations as VP5/K2RED prior to contest.
QSL via K2RED.

Had a quick Google around on this. A few useful hit was one that complained about a missing codec and during game animations. I havent used the s/w so i dont know if this is likely! I assume you have written to the author? All GPL writers I have mentioned faults too have been most helpful in fixing same.

I also saw a Japanese post of problems with runtime erros and this s/w

I suppose you have the windows update stuff all loaded and up to scratch? Also handy to update to the latest VB6 libraries as this is most likely where the errmsg comes from.

Cheers Bob W5/VK2YQA

If it were not for crooked voting machines we would not be in war
and we would not be suffering overwhelming rise in gasoline prices
and the deficit would still be there and we would be working on
stopping global warming and with Kerry for president we would
have some respect as a nation now -not hatred brought on by
the Bu$h gang.

1078. Identification of Motorola Diode 56C53

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-18 23:04:14 UTC
From: djzman <djzman@wi.rr.com>
Message-ID: <1127084654.468474.293600@o13g2000cwo.googlegroups.com>
Source record: 49582

Hi all,

Sorry to do another "can anyone identify" post ...

I purchased a small bag of "18v 1w Zener" diodes at a recent hamfest.
The parts themselves have the Motorola logo and the following
numbers/letters on multiple lines:
K56C53633. I was hoping to use them to repair one of my radios. The
diode that I need to replace is on the 12v power input as a surge
suppressor/over-voltage protection device.

I can't seem to find any information on this diode to confirm the
spec's.

Any information would be most appreciated,
Dan
KZ9B

To obtain a shortwave license you can not LESS then 50,000 watts and have to pay around 4,000 to 5,000 dollars. FM BROADCAST you can run 6KW on up at a cost of $50,000 to $100,000 just for the license, Same applies for AM radio.

It's not aircraft equipment, it's a single-band ham transceiver that
can receive aircraft. There are cheaper multi-band ham transceivers
that have wider receivers than that. My VX-5, for example, can
receive aircraft - AND any frequency from 0.5 MHz to 999 MHz, AM, FM
or WFM, and can transmit on 6, 2 and 440. And it's cheaper.

From what I see on their web page, it appears that the VXA-700 is an
airband transceiver (not just a receiver), with 2-meter amateur
operation added.

It does look as if it re-uses a lot of the VX-7 construction.

My friend, I have never attended any Orlando hamfest, so, quite frankly, while some of the tangential information is cognizable, that part about happenings at the hamfest is not. I wasn't there.

Bob, W4ASX

hi,

A large sheet of 6 mil clear plastic should be able to
cover the tower and the folded over section.

Place a container of DampRid on the rotor shelf
before you cover the tower with the plastic sheets.

Two layer of sheet should do the trick.

Drape the plastic 4 or 5 feet below the rotor,
no way for any water to get inside the rotor.

Tie it tiht with some good rope and your done.

The damp rid will absorb any moisture that it
trapped during the day from the hot sun
heating up the top of the 'rotor bag' you just made.

Or just take the rotor inside.

good luck with the repairs.

russ

Please fill us in on what Kerry's exit strategy was for Iraq, other than turning tail and running, because if he had one, he never articulated it during the campaign.

toddaug555@yahoo.com says...
> It isn't over yet, there is a long process that the FCC and K1MAN has
> to go through. including a hearing before an administrative law judge
> and the US Court of Appeal.

However, his "broadcasting" days are about to come to a close -- owing
to the FCC "red light rule" discussed in other threads, the setting
aside of his renewal application is going to put him off the air at the
expiration of his present license. If he continues transmitting after
that date, he'll start racking up more fines for unlicensed
operation....

Forget soap operas and "reality shows." This stuff is =way= more
interesting.

Also, be careful of phone calls or emails soliciting donations. Some scurrilous individuals are using this as an opportunity to propagate spyware, viruses and outright fraud. Marshall Loeb had a writeup recently on MarketWatch regarding some folks who are cold-calling to sell "investments" that are supposed to benefit Katrina victims. The info should still be on their website, but as I write this I'm offline and can't get the actual URL for you, sorry.

It is definitely a transceiver on the aircraft band. I fly and carry it as
a
backup in the plane. Also has a backup VOR (navigation) capability
as well as FM radio. Nice piece of gear for a pilot. Plus, as was
mentioned earlier, it has 2m capabilities. Pretty cool.

That was the mission I was thinking of. I used to fly a fair amount of
single engine,single pilot night IFR. My only remedy for a total
elecrical system failure was to always know which way to go to find
clear weather... This device would avoid an emergency operation.

Bush was simply trying to be a good Christian and help out the Muslim
population. You see it is very expensive to come to America, pay for
schools, buy housing, pay for the eats and the movies and color TV's, etc.
for all those volunteers for Allah.

So he decided to help cut the expenses for Al Quada, et all by kicking up
some sand dunes in Iraq. After it is all over and we have our bases
established we can then kick sand in the Iranian idiots eyes, followed
immediately by Syria. A lot easier to do when your in their back yard.
Also makes it real problematic for IRAN to kick up the game by nuking the US
Forces.

And don't forget Israel. Real nice to have a solid alley in the pig pen,
isn't it?

So Claressa are you catching on yet? Or is you Left Wing Wacko Bull
blocking out any common sense at all?

You hate Bush? You ain't seen nothing yet. Wait till Billary comes on the
scene.

Dan/W4NTI

1115. (UPDATE, SHORT) Auto-FAQ Sent to Over 42,500 rec.radio.amateur.* Posters

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-19 23:03:02 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <432f42f1$0$175$bb4e3ad8@newscene.com>
Source record: 49510

For the previous (SHORT) update, see:

http://groups.google.com/group/rec.radio.amateur.misc/msg/f4f6a916abc666f8

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a message once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup.

The project was expanded on June 19, 2002 to cover all rec.radio.amateur.* newsgroups, but with the same previous-poster database (as I stated my intention to do in previous updates). This means that if you have already received the message to a given E-mail address, you won't receive it again to that same E-mail address. The average number of recipients per day is currently about 12. Feedback statistics remain about the same for the additional 2,500 recipients (see previous updates via the link above for more details). Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):
0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250
22,500 April 3, 2002 220
25,000 August 8, 2002 625
27,500 December 1, 2002 670
30,000 April 1, 2003 625
32,500 August 27, 2003 500
35,000 January 30, 2004 500
37,500 July 31, 2004 420
40,000 February 10, 2005 360
42,500 September 19, 2005 360

>Subject: WELCOME to rec.radio.amateur.*
>X-Loop: rec.radio.amateur-auto-faq@oasis.novia.net

Hello,

The following message is automatically sent to every new poster or cross-poster (as of June 19, 2002) to any of the rec.radio.amateur.* newsgroups. It should be sent once, and only once, to each unique address. This is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.*, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to enable you to get the most out of these newsgroups. I hope you will consider the message in that spirit.

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also access them from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. Original newsgroup voting and charter information for the rec.radio.amateur.* hierarchy, as well as for rec.radio.info and rec.radio.swap, may be accessed from:

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

3. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the Usenet newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

4. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the Usenet newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate newsgroup in the rec.radio.* hierarchy for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

5. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may access their comprehensive and informative home page at:

http://www.arrl.org/

(They also have information about amateur radio organizations in other countries.)

6. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going all the way back to 1981) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired at your local news server. Services like Google allow Usenet a much longer "institutional memory," greatly benefiting both new and experienced users.

7. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. A recommended practice is to ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (2 or 3 at most), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

8. Remember, Usenet newsgroups are based on the idea of mutual aid. Usenet only works if we put as much into it as we get out of it.

73, Paul W. Schleck, K3FU

The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.

Is there anywhere I can see more detail of the VOR capabilities?
I looked over the web site but it doesn't really show what it
can do in that function.

Dan

It is FAR from over, after the FCC makes it's decision it goes to Court
of Appeal where he can challenge the FCC rules and or decision. If he
transmits, he will be unlicensed which can speed the process to the
court systems like I said it's FAR from over.

Hmmm...good question. Don't know if there is a web site where you can go look.
The manual has details on how to use the VOR capabilities. Essentially, you can
select any VOR frequency (I think ILS too) and get course/bearing info, as well
as a CDI indication if desired. The range of the VOR capability is very limited.
I would not expect to do any real world navigation with it, but as a backup, it
could be indispensable (if everything else crapped out). The VOR was an added
bonus for me as I use a yoke mounted GPS (in addition to the VOR receivers in
the plane and a Loran). So I really bought it for the backup voice capabilities.
Also nice for getting ATIS/AWOS, clearances, FBOs, etc., while sitting on the
ground.

Win

Yes Dan, amazing how so much gets imputed to the controversial, much of which is totally untrue. Then, before you know it, conclusions are built on the false information.

It gets so bad that a suedo podia is formed (a new false position) that is attributed, and everyone jumps on the bandwagon. So, with everyone rushing so quickly to judgement, there is more misinformation here than information.

Fellow hams, let's change all that.

Bob Sherin, W4ASX

Fellow hams,

More of this low class posting and I'm gone. Surely you all have sufficient intellect to realize how infirm most of these posts are. None of us should want prejudice aired in these ham Newsgroups.

Ham radio has always been a hobby/service appealing to all walks of life. We have been the epitome of acceptance and help. This gives prospective hams the wrong idea. If this Newsgroup is going to remain the bastion of ignorance that it is, then you can have it that way and I'm out of here.

I'll form my own ham radio newsgroup where the emotionally disturbed and ignorant will have no voice, admittedly censorship yet censorship, not of the issues, only in endeavor to have the cream rise to the top.

Bob Sherin, W4ASX

You had your chance to make a difference. You turned down
the opportunity of being Roger's mentor, when it was offered to
you.

BTW, what is a "suedo podia"?

1125. Hints and kinks --- wandering foot switch

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-20 18:19:45 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>
Message-ID: <5pYXe.1104$oc.722@newsread2.news.pas.earthlink.net>
Source record: 49529

I like to use a foot switch to key up my transmitter, especially during contesting when I use a combination earphone/mic headset (Heil Pro-Set).

The problem is that the foot switch tends to get kicked around under the operating position, finally getting lost just when you hear that new double-double multiplier in zone 39!

Well, radiomen aren't the only ones to use foot switches, as my lovely XYL K0CKB pointed out to me. One of her other hobbies is sewing, and seamstresses use a foot switch all the time, presumably also losing their switch at the worst possible time. Unlike radiomen, seamstresses did something about it. She sent me down to the local fabric emporium and told me to ask for a "Pedal Sta-II". You can see/buy it on the web at http://www.pedal-sta.com/pedal-sta.html. No more lost foot switch (and multiplier) in the heat of the battle!

Message-ID: <1rn1j19las63pbol199o23jgld8udic94j@4ax.com>
Source record: 49441

Last year I moved my antenna mast system to the 'south' side of my house. Right off lighting 'busted' a two meter/440 ground plane. The 'juice' came in the shack, by way of two antennas, a TV antenna/coax, and the coax for the 2/440. I had the coax un connected to the radios. The TV antenna's coax was connected, to a monitor/TV and VCR,,, ''they bit the dust''.
I had almost this same system on the north side of the house for many years, with no apprent damage/problems. I have re purchased new antennas and installed them in the air, several months ago. We have had some 'near misses' since then, I no longer have the TV antenna on the main mast (75'), it is located nearby now at about 20'.
I don't know why, after 'the move south 100' I have more problems with lighting. I want to add more assurances (gournds?) to the system, including a antenna switch, that has in it a swithch to "ground".
But I don't feel really comfortable, putting some of my eggs in this 'ground switch basket'. I purchased some connectors that ''slip on, slip off'', and I am thinking of adding a panel with these slip connectors monted close at hand, and when there is "weather" I just pull the slip connectors lose, and then use the ''ground switch", switching, to ground. One of my questions,,,,, would you feel better using the slip on and slip off connectors or the antenna switch, or both ???
Soooo now my question, how many '''holes''' are there in my ideas/plans???? thanks in advance. cl 73

Source record: 49445

Hans:

If your shack is carpeted, just purchase some "velcro" tape. It comes in two parts, the hook side and the loop side. You can get it with a "peel and stick" adhesive back. Just cut a couple of strips of the Hook side to the length of your footswitch, and stick them on the bottom. On a cut-pile carpet, it has enough grab to stay put, and on commercial style or full loop carpets, it sticks really well and you have to crawl under the table to reposition it. Either way, it keeps the footswitch from wandering around on you.

If you have a tiled or vinyl floor, a couple of strips of soft foam rubber (like closed cell neoprene as is used in wet suits, but without the fabric) will help keep the footswitch from moving around, but it's not nearly as effective as velcro on a carpet.

Another thing that can help is to insert a "wye" in the cable and add a hand switch on top of the operating table that you can grab if you can't find the footswitch. Not nearly as effective as capturing the footswitch (at least for me) but I've used it during field day for the people that aren't used to using a footswitch...

Good Luck

Seems you have the wrong group here, but cross post if you must.

I DO have one question I saw on the post, however, and you didn't answer it.

Where the heck WERE all the white looters? Surely there must have been at least one or two with a TV under their arms. And the guys shooting at the rescue helicopters? Aw, come on. The guys that stole guns from Wal-Mart were surely not ALL black, were they?

According to CBS, ABC, NBC, et al, well, just where were the white looters?

Bottom line? You have no "point".
In this case, facts are undeniable.
Racism is not a factor.
Facts is, as was said, Facts.

These criminals were not "undocumented shoppers", they were looters.

You have helped make my point once again, thank you!

you Republican "Christians", plain evil.
.....

Yes, Liberals do see Christianity as "evil". Liberals see Socialism as
"good", and Liberals
see taxation as a means of taking from the earners and giving to the
slackards.

"Commie Liberal" is not so much a label as it is a descriptor. It is kind of
how you use labels
to define Christians as evil.

--
Its not that Liberals are stupid. Its just that they know so much that isn't
so.

--
Liberals are like a Slinky ... Not really good for anything......But they
still bring a smile to your face when you push them down a flight of stairs

Let's see...the United States and her troops were attacked at least nine times during the sick tenure of Bill Clinton. We had the first, original bombing of the World Trade Center and what did he do? Aside from getting another blow job from Monica, he did nothing.
Of course when one of our Naval ships was attacked Good Old Bill fiddled and diddled and again did nothing.
And the Marines that were killed by a missile? Good Old Willy again diddled and did nothing.
Meanwhile the Terrorists became even more emboldened by Clinton's unwillingness to retaliate and their attacks became even larger and more violent.
What the "F" is up with you? New York was attacked way before 9/11 and yet you Libs wanted to reach out
to the Jihadist's and ask them why they were angry with us?
You Libs are SO myopic.

>Oh, wait! Clinton did not say that. His most infamous quote is, "I did NOT
>have sexual relations with that woman, Miss Lewinsky."

and you see this is the difference right there, you consider a man not
interested in publicly discussing his private life, his personal
privatre business, somthing you have no need to interfere with, as
"casting the first stone" but somehow cowardly bombing into oblivion
100,000 unarmed, innocent, defensless people is not, my what priorities
you have there..
////////////////////////////////////

You nailed it. Seems Saddam had been doing that for years. The guy is a
master of torture.
He gassed innocent people, poisoned innocent people, and raped them into
submission.

But that was OK, since it had nothing to do with your outlook, so what is a
few hundred thousand
Iraqi's in YOUR scheme of things? Or a million or two? A little mustard gas
here, a little torture there,
so what?
Bush saved more "defenseless" people than Saddam could kill, but not before
Saddam had a good start.

And while you are expounding, Mr. DooRight, I should take some time to let
my neighbor, an Iraqi immigrant, tell you the sordid details of how his 13
yr. old daughter was raped by Saddam's troops. Not once, not twice, but
...well, you get the message.
She lives here now and is ever so thankful for OUR troops who helped save
her. She is now adapting very well to Junior High School and her grades are
most likely much better than any YOU ever made.

He is a Kennedy, he is entitled, his brothers were only among the
greatest leaders America has ever seen, besides there is nothing wrong
with being rich, I never said that. What is wrong with it is when you
do everything in your power, like Bush Republifcans have, to prevent
the rest of the 99% of the country from obtaining wealth. That is greed
beyond imagination, not somthing Kennedy would do.

>Shouldn't Fat Ted be content to live in a doublewide somewhere, like so many

I guess being you live and dump in the woods "Squatting Bare" that
would be an issue for you. Vote Democrat then and you will have a much
better chance to catch up with Ted if it bugs you that much, because as
long as Republicans are in charge you can count on two thiungs, the
rich will get richer and the poor and middle class will starve in
comparison like they are now.

Ah yes, the entitlement mentality of the liberal Democrats.....

his brothers were only among the
> greatest leaders America has ever seen, besides there is nothing wrong
> with being rich, I never said that.

Correct. Rather, you were talking of being "greedy".

So, are Ted Kennedy and John Forbes Kerry "greedy", or are they merely
liberal Democrats, and thus "entitled" to be rich?

What is wrong with it is when you
> do everything in your power, like Bush Republifcans have, to prevent
> the rest of the 99% of the country from obtaining wealth.

But neither President Bush nor we "Bush Republicans" have done that. On the
contrary, it is you Hillary Clinton Democrats who have attempted to prevent
the rest of the country from obtaining wealth. It was you Hillary Clinton
Democrats who voted AGAINST tax cuts, whereas it was we "Bush Republicans"
who voted FOR the tax cuts for the Working Class.

So once again you Hillary Clinton Democrats have indicted yourselves, and
are guilty of what you falsely accuse others of doing.

As much as I would like to think the FCC will shut this guy down
permanently, I don't really think they have gotten that much closer.
K1MAN seems to be relatively fast on his feet because he knows how to
stretch the administrative process and just ignore rulings.
The FCC on the other hand seems to personify the hidebound federal
agency that is so tied up in its own administrative process that it can
only react sluggishly to violations of the law.

I've always wondered if Baxter sits up nights listening to himself
rebroadcast over and over and over.

Lawyers use the term. Suedo podia means false position. In law it isn't taken as necessary false but an alteration of the original position.

Here's how it's used. A plaintiff, say, pleads a contract against you when its existence is by no means certain. You plead back that no contract exists but there was a relationship and you've been damaged in tort.

So, it is kind of a dance where you position your opponent to be slayed by your arguments.

Of course, you post without knowing what the hell you are talking
about, that is.... Nice to see you finally embrace your inner woman,
Davies, you are just a whiny cunt deep down inside.

Lardass Davies embracing his inner woman whined:

> Roger has

Lardass, Roger has you lock stock and barrel. How does it feel to be
some man's bitch?

You still have never explained these:

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

1183. Clueless Davies answers himself!

read it and weep idiot ->

The Truth About Those Bush Tax Cuts

Year-by-Year Analysis of the Bush Tax Cuts Shows Growing Tilt to the
Very Rich

A new study released today by Citizens for Tax Justice and the
Children's Defense Fund reveals for the first time who stands to
benefit from the 2001-enacted Bush tax cuts in each year from 2001
through 2010. Among the key findings:

Over the ten-year period, the richest Americans-the best-off one
percent-are slated to receive tax cuts totaling almost half a
trillion dollars. The $477 billion in tax breaks the Bush
administration has targeted to this elite group will average $342,000
each over the decade.

By 2010, when (and if) the Bush tax reductions are fully in place, an
astonishing 52 percent of the total tax cuts will go to the richest one
percent-whose average 2010 income will be $1.5 million. Their tax-cut
windfall in that year alone will average $85,000 each. Put another way,
of the estimated $234 billion in tax cuts scheduled for the year 2010,
$121 billion will go to just 1.4 million taxpayers.

Although the rich have already received a hefty down payment on their
Bush tax cuts-averaging just under $12,000 each this year-80
percent of their windfall is scheduled to come from tax changes that
won't take effect until after this year, mostly from items that phase
in after 2005.

In contrast, the vast majority of taxpayers have already received most
of their tax cuts from the 2001 legislation.

For the four out of five families and individuals making less than
$73,000 this year, three-quarters of the tax cuts-averaging about
$350 this year-are already in place.

Tax cuts for the 19 percent of taxpayers making between $73,000 and
$356,000 this year will grow a little over the next four years as the

cuts in the upper tax rates continue to kick in, but then will dwindle thereafter.

By 2010, the tax cuts for this group will be no bigger as a share of income than they are now.

As a result, freezing the Bush tax cuts at their 2002 levels would have little or no effect on 99 percent of the taxpayers, whose tax cuts are already mostly or completely "frozen." Only the best-off one percent of the taxpayers will receive significant additional tax cuts if the rest of the Bush tax program continues to be implemented.

>From 2001 through 2005, the best-off one percent will receive "only" 19.8 percent of the Bush tax cuts.

>From 2006 through 2009, the share of the tax cuts going to the very rich jumps to 41 percent of the total.

By 2010, when all of the provisions of the bill-including complete repeal of the estate tax on extremely large estates-are scheduled to be fully in place, 51.8 percent of the tax cuts are targeted to the top one percent.

Wayne Green had by far the best solution to the problem back in 1992:

Wayne Green W2NSD/1
WGI Center
Peterborough NH 03458

Sep. 13, 1992

"While I can appreciate your frustration with Baxter, which I share, your approach to disenfranchising him seems to indicate that you either do not read my editorials or at least don't remember them. I've God knows how many times been quite blunt about NOT annoying the FCC with our problems. That's not only a waste of time, it's downright dangerous... and can cause far more trouble than poor little Baxter. Please remember that we keep trying to convince the FCC that we are self-regulating. Note the term "self."

If a few hams ever want to get rid of Baxter that's not all that difficult... and you don't even have to pay a hit man to clean off 14,275. All it takes is a little creativity and some coordinated effort.

As a matter of fact it would be fun to wipe out Baxter. And you wouldn't even have to have a small group of like-minded hams drive to Maine with hack saws for his coax and tower or a concentrated campaign to turn his neighbors against him with propaganda. No, all it would take is a few hams with good signals and some coordination.

I'm sure you can come up with much more fitting tortures for Baxter than anything I could dream up, but my mind turns to getting the channel about ten minutes before his broadcasts with my own anti-IARN broadcasts. I'll bet I could come up with some material which would burn Baxter, yet would not quite be actionable. Or I might tape one of his broadcasts and just repeat it as a "service" right on top of him and wipe him out. I've got as good a signal as anyone and I'm only a couple hundred miles from him. Knowing the love they have for him in Maine I'm sure you can find one, two or even three

strong stations fairly near him to join in the effort to "help" him get his broadcasts out.

Of course if you don't know anyone capable of outsmarting Baxter, then you have no choice but to give up and take up stamp collecting. Baxter may be loud, but I haven't yet seen any signs of a three digit IQ behind the mess he's been making for several years.

If you do decide to actually do something instead of wasting your time on the FCC and ARRL, please let me know. "

Cheers ...
Wayne

Hi,

Some of you, hopefully many of you, may be aware of the existence of the "Amateur Radio Course" project which provides a number on-line and downloadable tutorials for the various UK amateur radio examinations.

Due to the sudden, unexpected and unexplained withdrawal of support by the company who up to now have very kindly hosted our web-site free of charge, and their even more unexpected failure to communicate with me regarding how we might transfer or redirect the URL which they registered for us but now will not let us use, our site is no longer available to the clubs and individuals who benefited from it.

Can you therefore help us and please publicise as widely as possible the following information.

The "Amateur Radio Course" which was located at www.ukradioamateur.org is now relocated at www.radioamateur.co.uk

There may be a number of functions that are not working due to the sudden move, but they will be fixed within the next few days.

It remains, as always, a non-profit making activity sponsored and supported entirely by the group of individuals who give up their time and resources free of charge to support and promote interest in the hobby.

I apologise for posting this message in so many newsgroups, but I need the new URL to be publicised as rapidly as possible.

Many thanks to you for your help, best wishes and 73's

Chris
G8PUT

Hi,

2nd post, the first contained an error, the new address should have been given as www.ukradioamateur.co.uk

Some of you, hopefully many of you, may be aware of the existence of the "Amateur Radio Course" project which provides a number on-line and downloadable tutorials for the various UK amateur radio examinations.

Due to the sudden, unexpected and unexplained withdrawal of support by the company who up to now have very kindly hosted our web-site free of charge, and their even more unexpected failure to communicate with me regarding how we might transfer or redirect the URL which they registered for us but now will not let us use, our site is no longer available to the clubs and individuals who benefited from it.

Can you therefore help us and please publicise as widely as possible the following information.

The "Amateur Radio Course" which was located at www.ukradioamateur.org is now relocated at www.ukradioamateur.co.uk

There may be a number of functions that are not working due to the sudden move, but they will be fixed within the next few days.

It remains, as always, a non-profit making activity sponsored and supported entirely by the group of individuals who give up their time and resources free of charge to support and promote interest in the hobby.

I apologise for posting this message in so many newsgroups, but I need the new URL to be publicised as rapidly as possible.

Many thanks to you for your help, best wishes and 73's

Chris
G8PUT

The sheer stupidity of the premise is what kept the Morse Forever
warriors going for as long as they were able to. The Guamanian judges
got it right: 9.8!

I am working with a new ham who is sightless (legally blind). He has a new FT-857D with the CT62 interface and programming software. He needs a way to hear the CAT upload data to know what frequency and the mode that the active memory channel is on. Is there a product he can obtain that will translate that information from text to voice on his computer? Thanks for any help. OM

It's never a good idea to use vigilante tactics to solve a problem. There are rules for which all of us must abide. One of those rules is that we must not intentionally block or interfere with another transmission that is in progress. We must all share the frequencies in an orderly fashion.

These are the rules. If we were to all ignore these rules and transmit whenever, however, and wherever we pleased, there would be mass chaos on most bands. The rules are structured and enforced by the FCC. I cannot condone any other approach to eliminating unruly examples like K1MAN--as frustrating as that approach may be.

Wayne P. Muckleroy

BELGRADE LAKES INSTITUTE FOR ADVANCED RESEARCH (B L I F A R)

MISSION STATEMENT
The Belgrade Lakes Institute For Advanced Research is a private scientific think tank foundation organized to conduct research and further advanced study into the nature of magnetic, electric, gravitational and other fields or combinations of known fields such as so called electromagnetic fields (radio and light waves) and so called gravitational waves. A long term goal of the Institute is to discover how to generate anti gravity and how to detect and work with gravitational waves and/or other phenomena associated with the property we now understand (or fail to understand) known as gravity.

The immediate goal of the Institute is to critically examine Dr. Albert Einstein's 1905 special theory of relativity and reformulate the theory to conform with the findings of our current research and newest findings.

The Institute offers training to its salaried staff Scientists in advanced mathematics, physics, and other scientific disciplines in order to stimulate further creative thinking, further development of creative scientific thought, and the publishing of the Institute's findings in scientific journals such as Scientific American. It is the goal of the Institute to have its distinguished scientists publish at least five articles in Scientific American by March 16, 2001 (as in 2001, a Space Oddesey). The Institute was founded on March 16, 1999.

The Institute is a non profit Foundation and is sponsored in part by the American Amateur Radio Association. The Institute seeks other funding and grants to finance its scientific study, scientific development, and scientific research.

Glenn A. Baxter, P.E

1. The earth rotates approximately toward the East at about 1000 miles per hour. (The earth is approximately 24,000 miles in diameter and rotates approximately once every 24 hours.)

2. Einstein said that when two points are in relative motion, time observed on the other point from the first point appears to slow down according to a factor of the square root of 1 minus v squared divided by c squared.

3. Thus, Einstein says, a clock situated on the equator will run slightly slower than a clock situated in New York (1). Let's expand this particular theory of relativity prediction by Dr. Einstein's to be the prediction that a clock on the equator will run slightly slower that a clock at the North Pole. If you stand at the North Pole and face in the direction of the clock on the equator, there is no relative motion between you and the clock whatsoever and thus, (according to Einstein own hypothesis) if there is no relative motion, there can be no slowing down of time as he states in his famous 1905 paper.

In Fact, if you stand in New York (instead of the North Pole) and face the same clock on the equator, there still is no relative motion between you and that clock.

4. Now, let us launch two rockets with the exact amount of total thrust energy from that same location on the equator as our clock above, one in the easterly direction (the same direction as the rotation if the earth), and another in the opposite westerly direction. Suppose the rocket heading east has just enough fuel and thrust to achieve a perfect synchronous orbit. Since this rocket heading east has an extra 1000 miles per hour due to the earth's rotation and the rocket has 1000 miles per hour less (both relative to the launch site), the rocket going easterly will achieve a slightly higher orbit that the one going west.

5. The rocket in synchronous orbit (A) will "hover" directly over the launch site (L) and thus there will be no relative motion and, according to Einstein, no slowing down of time with regard to clocks at A and L. Also, there will be no relative motion between a clock at the north pole (N) and L as we discussed previously.

6. The rocket heading westerly in orbit (B) will be in relative motion to L, and therefore, according to Einstein, there will be a slowing of time with the clock on rocket B with respect to L. But B has no relative motion with the North Pole (N) and thus no slowing of time relative to N.

7. Consider the vertex edge graph in Exhibit 1. Each verticie represents a different clock and each edge connects clocks that do not have any relative motion. Since B has motion relative to L, the clock at B should be going slower than the clock at L according to Dr. Einstein's theory of relativity. Also, B and A have relative motion and therefore, according to Dr. Einstein, the clock on B is going slower than A as observed by A. But since Exhibit 1 shows that clocks at A and L track with the clock at N and that the clock at B also tracks with N, then all clocks must track with with each other and therefore Dr. Einstein's theory is fundamentally wrong. 10/03/00

From: Curt Esident curt_r_esident@yahoo.com
Date: 4/6/2001 5:49:56 AM Eastern Daylight Time

Recently found your article on a search I was doing about vectors and relativity. You said something that contains an issue I'd like to point out:

You wrote: If you stand at the North Pole and face in the direction of the clock on the equator, there is no relative motion between you and the clock whatsoever and thus, (according to Einstein own hypothesis) if there is no relative motion, there can be no slowing down of time as he states in his famous 1905 paper.

But, there IS relative motion. You are at the North Pole. The clock at the Equator is undergoing a change in angular momentum as it circles the circumference of the earth. [Basic physics: A body moving in a circular path undergoes constant acceleration.] Because you are at the POLE, you do not have the same angular momentum as the clock/point on the equator, because you are in a position that is fixed, relative to the poles. But, the clock is in motion around you, as it is in orbit around the equator (-- albeit, the orbit is several thousand miles below your feet and follows the curve of the Earth thru space).

Curt,

Your reference to angular momentum is an interesting "angle" to relativity. The PUN is intended! Your reference to acceleration is also worthy of further consideration.

This calls for some Einsteinian "Thought Experiments."

MOMENTUM

1. Momentum is defined as mass times velocity. Consider the clock N at the North Pole, the other clock L at the launch site on the equator, and an imaginary line passing through the North Pole and South Pole and extending "up" beyond the North Pole. The angular rate of rotation of clocks N and L about this line are identical.

The angular momentum of each can be made to be identical by adjusting the mass of N up and the mass of L down until they are. The angular momentum of N is a vector pointing "up" along the line and the equal angular momentum of L is another vector superimposed on the first. To

eliminate "wobble" of the earth caused by clock L, we place another clock of equal mass at the equator on the opposite side of the earth.

Thus, there is identical angular momentum for each clock and no relative motion between them. Therefore there is no change in the synchronization of these clocks caused by either.

2. Now consider two clocks on the earth, one on the ground, and one next to it in the middle of a rotating "lazy Susan." The angular momentum of the two are different, but there is no relative motion. Do the clocks stay synchronized?

3. Lets consider a clock on the edge of a a merry go round and another on the ground near by. Do the clocks stay synchronized? Dr. Einstein says no, since the clock on the merry go round goes away and then comes closer, thus producing relative motion. The two clocks also have differences in angular momentum.

ACCELERATION

Dr. Einstein says that in a box, one could not distinguish between acceleration of the box and a nearby mass producing gravity. This is not exactly correct because the effect of acceleration in the box would be the same in all parts of the box but the effect of gravity would be slightly greater where the side of the box is closet to the gravity producing mass. However, let us assume for the sake of study that the effects of acceleration and gravity are the same.

A person at the North Pole constantly feels the effect of being accelerated straight up at the rate of about 32 feet per second per second. If he/she were in a box, he/she would not know whether he/she were accelerating or simply sitting on the North Pole according to Dr. Einstein. Accelerating at 32 feet per second per second will get you to the speed of light in about a year's time.

Synchronous satellite A, on the other hand, is both accelerating toward the earth and away from it equally, and if in a similar orbiting box the feeling, according to Dr. Einstein, would be that net acceleration and/or net gravity is zero. Clock N on the North Pole is therefore "accelerating" while clock A in synchronous orbit is not. There is no relative motion (the distance between A and N never changes), the angular momentum of both are the same, and the only difference is "acceleration" which is not discussed in Dr. Einstein's famous 1905 paper. Does acceleration cause clock N to fall out of synchronization with with clock A and, if so, in which direction? But clock L on the equator experiences the same acceleration as experienced by clock N at the North Pole (equalized to compensate for centrifical force at L by raising L above the ground on a tower).

Again, a vertex edge graph of all clocks shows that all clocks always remain synchronized, and acceleration and angular momentum can always by nullified by thought experiment.

There needs to be further thought and discussion about these issues.

The rules should also apply to W1AW who has also caused malicious
interference. The problem is W1AW is allowed to interfere with on going
transmissions and K1MAN isn't. the rules should apply to all. One final
note, rules are only valid until a court says otherwise.

Maybe at one time, but many radio operators have taken steps to
discourage such vandalism, such as running the coax via a path that is
difficult to get to without being noticed. Besides, Baxter is probably
someone that has video security around his station. Do you really
think pinning his coax is something you actually think can feasibly be
accomplished?

Obviously it couldn't cure stupid, as Wayne was a shining example.

How about a grapple hook tied to a good strong truck, thrown quickly to the tower and it yanked down? "Possibly" done rather quickly and easily if one has a good throwing arm. OR how about a laser beam fired from a car on the street - using an AC Inverter for the power?

Seriously though - if someone wanted to "really" take him or his transmitter out - it could be done. No one is safe in this day and age. Hang in there, the FCC will do it..... I've seen them bust others and haul all the equipment away - towers included.

OK, so let's idolize K1DUDE and follow his example. We'll all start ignoring the rules and do as we please as long as we can get away with it. Before long, all amateur bands would be reduced to a bunch of "Citizen's Bands."

1237. realistic htx-202

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-23 17:23:44 UTC
From: larry <larya@rogers.com>
Message-ID: <jsudnRXfHKIyp6neRVn-pA@rogers.com>
Source record: 49341

Greetings
I suppose the message should go under rec.radio.amateur. equipment but I could not get any messages under that group...
Anyways.... It's a long story but I just received an htx-202 in the mail.. and need some information..
First.. what are the ratings of the battery..one is 7.5 volts.. At first I thought they were both the same but upon noticing that one had two bolts on the bottom and the other didn't and they they were about 1/4 different in height I began wondering..
What are the two battery pack rating....
I have a commercial analyzer so rejuvenating them should not be too much trouble...
Second.. are the two battery packs opennable?...
I found the manual on a zip file and will soon start to read it....
Third... there is no antenna..

1239. Underwater Data Link?

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-23 18:05:26 UTC
From: Eric <none@nospam.not>
Message-ID: <GtXYe.50848$vJ4.22348@tornado.ohiordc.rr.com>
Source record: 49343
Cross-posted to: alt.internet.wireless,rec.radio.amateur.misc,rec.scuba

Hi,

Don't want to get side-threaded, but I got hit up on a project idea that should prove practical, educational, fun, and just plain neat.

What will be required, however, is a wireless data pipe down to a depth of ~50 feet (15m). Unfortunetly, it will have to be wireless.

(Obviously, such a link will also have to be acoustic and not RF.)

I can't go outside of "consumer" price tags though. By "consumer", I'm thinking up to ~$500.

Depth time on a full battery charge of at least 30 mins is prefered.

Standard data ports, such as ethernet or RS-232.

I'm not concerned about the data rate through the water, or what mechanism/schemes these modems use going through the water (proprietary, I'd imagine), as long as the data ports use standard communications.

If the modems behave and function (from their physical ports, not modem-modem through the water) as a standard "analog modem", I plan on using just a terminal program with the surface modem. Port speed should be a non-issue, as long as its standard. Even just 300 bps will work fine.

If the modems behave and function (port side, again) as standard "network cards", then I'll be doing TCP/IP. Again, only need the bare minimum data rate for function.

It would be nice if such modem could function like both above, giving more flexibility, but I can do with either.

Its not going to be passing graphics, images, or anything extensive through the water. In fact, the relevant data it will be passing will only be 15 to 20 characters in length.

I "thought" that I had seen such an (consumer) animal in the past years ago, and mentally noting that it "neat", but I may be mistaken. My googles are only turning up such modems that are either commercial or military, obviously outside my reach.

Just throwing this out in hopes that maybe someone has seen such an animal with a consumer price tag -- or possibily an idea or two on how to maybe creatively homebrew such hardware, relatively inexpensively, out of existing hardware. If need be, I can kludge up power supplies and waterproof casings (able to withstand 15m) for anything creative...

Thanks!

Cheers
Eric

E-mail me and I'll hook you up with an old swabbie I know who can probably
build exactly what you need.

I also know that some line of sight devices have been made using blue-green
lasers, that allow P3 Orion aircraft to communicate discretely with US subs.

Todd,

If you substitute "incidental" or "unintentional" for your use of
malicious, I might agree with your premise, at least on the surface.
However...

N9OGL wrote:

> The problem is W1AW is allowed to interfere with on going

...the only other thing that can be said in defense of W1AW is that it
is a *national* organization representing tens of thousands of hams that
is presumably "broadcasting" for the common good (and follows a regular,
published schedule, allowing others to dodge the "interference" if
they so wish), while K1MAN is a --single--private--individual-- who has
had some peculiar (shady ?) pecuniary interests associated with his
"broadcasts" in the past.

Hi Eric

First thought is that I have read somewhere about underwater antennas. They were a lot shorter than what you have in air and the attenuation was much worse. Might be worth some research. If you (say) ran a couple of hundred kilohertz you could FSK or PSK that at some low data rate. Perhaps even drive it with one of the older 1200/75/300 modem chips. (ie RS232 serial data) I mean this is how the US subs get their action messages (although this is a really low data rate)

Next one is a laser diode connection to some modem. I note that in the cell phone world one can connect a laser/optical fibre device direct to the RF output stage of the TX. This may sound far fetched but I wonder about using a laser diode and phototransistor connected to an ethernet switch. I have NOT thought this through at all so pls done burn me too hard!

I think the data rate of using an acoustic path would be way too low. You have to allow for major multipath reflections through the medium and I see this as bringing it down dramatically. There are probably some signal recovery techniques that can be used in this situation but I dont know of them. Personally I'd like to fiddle with Wyman/RDFT encoding in a voice bandwidth and see if that works. It has adjustable forward error correction which might just make it do-able. You tend to need a PC at each end though!

Apologies for the waffling

Cheers Bob Vk2YQA

At one Computex (Taipei) I attended, there was a company showing an
Ethernet hub that worked under water. This was a wired network.

doesn't matter Interference is interference, and ANYONE or GROUP who
causes interference should pay regardless if it for the "common good".
As for published schedule the FCC has stated that do mean squat, my
view is that all who cause interference should pay.

Also this

http://www.grantsystems.com/pdf/beeman.pdf

Looks like a system at 150Mhz.

Maybe use a 2M txcvr, a shortened antenna and a packet TNC! Lots of
these can be bought second hand very cheaply.

I assume you are licensed to use amateur equipment?

I purchased my HTX-202 directly from a RS store in '92. The original
battery was six NiCad AA cells in series, so 7.2 V. The pack was held
together with several screws and has been disassembled, since the
cells have been dead for a couple of years. I have not gotten around
to rewiring it with new cells since I also have a couple of packs for
standard AA cells. It does have two contacts on the bottom, which were
wired directly to the jack on the side. Do not use that jack to power
the radio, only to charge a disconnected pack.

The DC jack on the top of the radio can handle up to 13.8 V DC, as
provided from an auto cigarette lighter jack. The maximum output power
is directly related to the input voltage, so you can only get full
power with an external supply.

The manual used to be available as a PDF file on the RS web site. I
haven't looked lately to see if it is still there.

The other battery pack sounds like an aftermarket, or possibly an ICOM
product. The HTX-202 was made by ICOM and is compatible with some of
their other products.

Umm, no. The HTX-202 was based on a the Icom 02AT, but the design was purchased by Radio Shack, who contracted with Maxon to build the radio with alterations requested by Radio Shack, including the full-size display, unmod-able frequency coverage, more memory, and some other changes I can't remember at the moment. I passed up the chance to purchase a 202 with the Maxon name on it several years ago at HamCom, wish I'd bought it, now. The battery packs are interchangeable between the 202, the 02AT and the 2AT (oh, and of course their UHF versions).

Bob,
I suspect if he wants to go wireless, he is going to have to go further down the RF Spectrum than a couple of hundred khz, even for that short a distance. The OTS comm systems for their full face masks have a range just slightly over what he desires, operate around 30 khz SSB. At that frequency, he is not going to be able to move a great deal of data very fast but as I recall, that was not a factor. I use an Aladin AirZ hoseless computer and I think the transmitter operates around that same frequency range.

Nice to see folks from "VK" land here with us.

I pretty sure the 202 / 404 radios were made by Maxon and not Icom. Even
though they use the same type packs.

Its all intriguing anyway! Not that I have a large enough body of water nearby to try experimenting with it though.

I did a quick bit of browsing around and even found some experiments done by a VK5 using 160M (http://www.qsl.net/vk5br/UwaterComms.htm) I note he has some attenuation curves that might be worth a look at. Although some kind of packet, PSK or other kind of digital system would work in an SSB bandwidth the problem for the OP is that he probably doesnt want to take a PC with him underwater! Still think a packet TNC at 300BPS might be usable though.

I am actually here in more ways than one.. Am living in East Texas.

I agree Bob. Quite interesting. I was diving last weekend in a quarry with two other divers who had wireless comm systems using full face masks. I could hear them talking to each other but couldn't make out what they were saying. They have been trying to talk me into purchasing a full face mask with comm but at present, I have other financial priorities. I guess for a very limited distance, 160 meters might work but depending on the application, battery size and the associated tx power would be limiting factors. The article mentioned floating an antenna to the surface. If you were to do that, you might as well use VHF or UHF depending on distances and power outputs, etc. For most divers, I would think that would not be their first choice because of entanglement issues.

If you are in East Texas, depending on where, you are getting pounded by "Rita". Hope all goes well. Perhaps we can hook up on 20meter?

Tonight is KOOK SCIENCE night on the Great Liberty Net!

Topic of discussion is how Hurricanes Katrina and Rita were
created by secret Russian weather modification machines
which use "Scalar Hyperdimensional Tesla Technology" located
in Mexico.......

Get your tinfoil hat at the door!

It's almost as nutty as that guy from Nevada and his late night radio show.

Todd. Sorry, bud, but your comments are disjointed and make little sense.
You really should step back a pace or two, look at your posts and give a
good, long look at why the guys in this group are laughing at you.
In spite of your attempts to post what you see as facts, Todd, you are and
will be looked upon as a Usenet fool.
I guess that I am, in your words, "your assholes just like them".
(I think you meant to say, "You are assholes just like them", but who am I
to second guess you?)

And, Todd, you don't debate. You call names. We understand this, Todd, and
realize that this is all you are capable of.

Why? Because you have no idea of what Debate means.

Grow up, Todd. Kiss your Mommy goodnight and shut down her computer and call
it a night.

Belgrade Lakes -

The mighty IARN - THE WORLD LEADER IN AMATEUR RADIO EMERGENCY COMMUNICATIONS - roared into action, turning its massive antenna system toward the southwest to listen in on super-secret "unpublished" AMTOR frequencies.

Glenn Baxter urged amateurs to buy used vans and hurry to the hurricane affected area in order to park on the side of the road while making use of their Walmart brand porta-potties.

Meanwhile, FEMA, and every other responsible agency advised everyone to evacuate the area. Visit the link below to see IARN's famous leader in action!

Hi all - I just wrote a webpage that generates morse code MIDI files which should work on most mobile phones capable of playing poly ringtones. Its 100% free and you should even be able to download your tones via WAP (for free).

http://www.braintank.pwp.blueyonder.co.uk/midi/morse2mid.php

I'm also working on a more fully featured one aimed at amateurs with procedural chars, speed, qsb and random qso generation, so any suggestions are welcome.

cheers

AndyB

Yeah I know. Some news broadcast had someone on that had been evacuated
from 4 different shelters.

Sort of like it was here with Isabelle last year (or year before). She
ripped up the coast of NC and VA. 20-25 miles east of here there were
downed trees and it got worse the further east you went. Around here it
got a little breezy and that was about it. The barometric pressure
dropped substantially at my house.

I had plans to dive Va. Beach that weekend, but it had torn up some much
stuff and they were evacuating people, no since in going down there.
Lost the money I had on my hotel reservations but there were LOTS of
people in Virginia Beach who lost a LOT more than that.

No, you sure don't, Todd. No one is forcing you to use usenet. As
Harry S said, if you can't stand the heat ...

Oh, and <plonk> My 5-year-old grandson is more mature than you are,
and he's hyperactive.

Ohio/Penn DX Bulletin No. 728

The Ohio/Penn DX PacketCluster
DX Bulletin No. 728
BID: $OPDX.728
September 26, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, DL1EK & The DX News Letter, EA5RM, EA7EUF, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IK4RUX, IZ8EDJ, JI6KVR & JA-IOTA Islands News, RA4HT, SM6DER, VA3RJ & ICPO, and ZL3JT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th-September, through Sunday, 25th-September there were 219 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0S, PZ, R1FJ, S0, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZC4, ZD7, ZD9, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H2, TANAZANIA (Attention Prefix Hunters). Operators Javi/EA5KM and Toni/EA5RM will be working on a "Radioamateurs Without Frontiers" (Radioaficionados Sin Fronteras) NGO's (Non-Government Organization) project, in Tanzania between October 22-31st. The announcement states, "Please do not expect a lot of activity on the bands during the first days, probably any, because they will be working on the installation of

two HF stations solar powered to a couple of medical dispensaries located in a remote part of northern Tanzania." Activity will be during their free time on 80 meters CW, and 40-10 meters CW, SSB, and digital using the callsign 5H2AG. Also, they plan to take part in the CQWW SSB Contest. Since the prefix 5H2 has not been used too much on the air, it will be of interest for prefix hunters. A online log will be available on their Web page at: http://www.rsf-rwf.org
Contributions received with the QSL will be donated to the RWF NGO.
QSL via EA5RM.

6W, SENEGAL. Look for members of the "Union Francaise des Telegraphistes", Benoit, F8PDR, to be active from South Senegal as 6W7/homecall or possibly a 6W7xx callsign between October 10-19th. Activity will be on 80-10 meters, with an emphasis on 80/40/30 meters and mainly on CW. QSL via the French REF Bureau or direct (SAE + 1 IRC or 2 USD) to:
Benoit LE BOURGEOIS, ROUTE DE CHEVRY, F50420 TESSY/VIRE, FRANCE.

7P, LESOTHO. Jun, JH4RHF/OE1ZKC, will be active from here until October 2nd. He should be on the air by the time you read this as 7P8/JH4RHF and not 7P8RH as first reported (See OPDX.725). This will be a one man effort, and he hopes to be active as much as possible. Activity will be on 160-10 meters, SSB, CW and RTTY (probably more CW/RTTY than SSB); SSTV on request(?). Jun may stay on the low bands longer due to the propagation. QSL via OE1ZKC.

9M2, WEST MALAYSIA. Champ, E21EIC, will be active as 9M2/E21EIC for the CQ WW DX CW Contest (November 26-27th). His operating class is currently undetermined. QSL via E21EIC.

A5, BHUTAN. The same Clipperton DX Club team that activated A52FH in 2000 and A52CDX in 2004, will once again return to Bhutan from November 18th to December 3rd. Operators mentioned are: Gerard/F2VX, Jean-Louis/F9DK, Vincent/G0LMX and Alain/F5LMJ. They will be at the Ham center in Thimphu from November 18-29th, and then try to be active from Bunthang and Paro Valley. This is not a DXpedition but a "ham radio project" to promote the growth of amateur radio in Bhutan. To continue their project with the Bhutan Telcom Authority, they will donate one or two radios that would be used to create new radio clubs in eastern Bhutan. The QSL info will be the same as the 2004 operation, via F9DK. QSL direct or by the bureau is "OK".

AO7, SPAIN (Special Event). John Flynn, EA7EUF, Secretary URE Huelva, informs OPDX that members of the local section of URE in Huelva have organized a special event. They will activate the special callsign AO7URE during an all day event from Do&#65533;ana National Park, Huelva, Spain, to commemorate the birth, for the first-time in captivity, of 3 Lynx kittens and also as part of the &#65533;II Diploma Especies de Do&#65533;ana&#65533; in support of the Iberian LYNX, a feline in danger of extinction. Operations will start at 0700z on October 2nd. Activity will be on 80/40/20/15/10 meters using SSB only. A special QSL card will be issued for 1 confirmed contact via the bureau or direct to URE Huelva, P.O.Box 259, 21080-Huelva, Spain, with

1 IRC (Europe) or 2 IRC (Non-Europe). More information about the Diploma
can be found at the following URLs at:
http://webs.ono.com/usr017/diploma_donana
http://www.qsl.net/ea7ure

CK6, CANADA. Mike, VE6AO, can sometimes be found on 20 meters SSB signing with the special callsign CK6AO to celebrate Alberta's 100th anniversary. QSL via VE6AO.

FY, FRENCH GUIANA. Operators F5MZN, F6FGZ, F5HRY, F1HAR, FY5FY, F5LND and I4UFH will be active as FY5KE during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via FY5KE.

IOTA NEWS.....
AF-NEW. (UPDATE) Just a reminder to look for a group of SU and I operators who are expected to be on the air from Giftun Island this week. The operators mentioned are: SU1ER, SU1KM, SU1KA, IZ8BQE, IK6CAC, IZ8CCW, I8LWL and IK8VRH. The callsign to be used from this new IOTA will be SU8GFTN (not SU8GFT as previously announced). QSL SU8GFTN via IZ8CCW. Their Web site for this operation can be found at: http://www.mdxc.org/su8gftn/

AS-046. Enno, 9V1CW (PF5X), will be active as 9M2/PF5X from Sibu Island, October 8-10th. His activity will be holiday style, mainly during his local evening hours. QSL via PA0KHS.

AS-058. Enno, 9V1CW (PF5X), will be active as 9M2/PF5X from Langkawi Island, October 29th through November 5th. His activity will be holiday style, mainly during his local evening hours. QSL via PA0KHS.

EU-083. Operators Vanni/IK4RUX, Frank/IK4GLV and Sergio/IK4JPR are/were expected to activate Tinetto Island (Italian Island Award IIA SP-003) this past weekend. Activity will be on 40-10 meters CW and SSB. QSL via their home callsigns, direct or by the bureau.

EU-093. Just to reminder, look for members of the Costa Blanca Cultural ARC to be active from Tabarca Island (WLOTA: LH-1779 [Most Wanted] and ARLHS: SPA-136), October 1-2nd. The callsigns to be used are: ED5TII (Tabaeca Island) and ED5TIF (Tabarca lighthouse). QSL via EA5FHK.

OC-NEW. Operators Nando/IT9YRE (T32Y), Claudio/I1SNW (T32SNW) and Alfio/IT9EJW (T32EJW) will be active from Flint Island (a new IOTA) between September 28th and October 15th. If they are unable to land on Flint Island, they will move on to Vostok Island in the same island group. They will actiavte a second new IOTA named Caroline Island (aka Millennium Island). Activity will be on all bands and modes. QSL all three calls via IT9YRE (QRZ.com).

OC-119. Wayne, K9YNF, will be active as K9YNF/KH6 from Kauai Island (USI HI-003S, Kauai County, Hawaii) between now and October 1st.

Look for him on SSB on the usual IOTA frequencies on 20/17/12/10 meters. QSL via K9YNF, direct with SASE or SAE with large IRCs.

IR8, ITALY. The "Strange Radio Team" will participate in the CQ WW DX SSB Contest (October 29-30th) as IR8C as a Multi/Single entry. The operators mentioned are: IK8WCQ, IK8WEJ, IK8YTG, IW8EQS, IZ0BTV, IZ7DOK, IZ8EDJ, IZ8EQF and IZ8EZP. QSL via IZ8EDJ. The "Strange Radio Team's" Web is at: http://www.strangeradioteam.com

KP2, U.S. VIRGIN ISLANDS. John, K3MD, will be active as KP2/K3MD during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via K3MD. John will be a portable operation from the north shore of St. John's for a few days before the contest using wire a vertical and 500W. Activity will be on 80-10 meters.

KH7, KURE ISLAND. After being behind schedule in getting on the air due to the challenges of unloading equipment because of heavy seas, the K7C team is on the air! However, they are having difficulties with their ISP over the operation of the DXA Web page. The K7C Web page on Sunday, states: "We have slimmed down DXA to focus only on the logging functions due to excessive server loads. After talking a few hours to sleep and catch their breath this morning, K7C will be back on the air around 2000-2100z. We will be adding the lost QSOs to the DXA log. PLEASE REST ASSURED that if your contact was confirmed by a K7C operator over the air, and it currently doesn't show up on DXA, it is in the log and it will appear on DXA in the near future after we have resolved these issues. Thanks so much for all the wonderful emails of support we have been receiving."

As this was being written, it seems K7C has been active on 30/17 meters CW and 20 meters CW/SSB. From their Web site, the following are a selected set of primary operating frequencies. They are selected to avoid conflict with other possible operations and to be on or near the standard frequencies used by major DXpeditions. The following is indicative of these frequencies, but is only provisional. THIS LIST IS SUBJECT TO CHANGE. They will make every effort to avoid interfering with emergency communications related to the hurricane disaster on the gulf coast. Please work with them to adapt to the location conditions, and advise them if they are in conflict with emergency service communications.
CW - 1826.5, 3522, 7022, 10106, 14022, 18072, 21022, 24892 and 28022 kHz
SSB - 3795, 7095, 14195, 18145, 21295, 24945 and 28475 kHz
RTTY - 7035, 10135, 18105, 21085 and 28085 kHz
6 Meter - 50106 kHz CW/SSB

The K7C Web site: http://www.cordell.org/htdocs/KURE/
The DXA Web site: http://www.cordell.org/DXA

LIGHTHOUSE ACTIVITY. Operators John/GM6LYJ and Andy/GM4JR will activate Southerness Lighthouse during three weekends in October. John has given an advance notification of an intent to use the 80/40 meter bands on October 23rd. They have obtained the callsign GB4SLH for this activity event. The WAB square will be NX95. They intend to try and opperate during the weekend before the 23rd, and the weekend after, giving 3 weekends in

the total work this lighthouse. Operations are also expected to be on all HF bands from 160-10 meters (except 30m) and on 2m and 70cm. QSL Manager was not mentioned.

QSL INFO AND NEWS.....
OPDX has been informed that Joseph, ex-(4K6GF, UD6GF, UD6DLJ, 4K500GF, 4K70GF and 4KA6GF) has now moved (with his family) to Russia. His new callsign is RD4HF, and his mail address is now: Joseph S. Raihshtain, P.O.Box 12466, Samara 443084, Russia. He still has all the logs and blank QSLs for all his previous callsigns.

QSL 7L3ATQ/1 via his home callsign, direct or by the Bureau. Activity was from Shikine Island (IOTA AS-008 and JIIA AS-008-011), JA1 North Izu.

QSL OD5NJ via direct, or EA5BYP or I1HJT. Activity was during this past weekend's CQ Worldwide DX, RTTY Contest.

QSL SF50A via W3HNK. This special callsign was activated during the SAC SSB Contest this past weekend from IOTA EU-037.

INTERESTING LOTW NOTE (Update). In last week's OPDX.727, we mentioned that Brian, K3KO, recently downloaded a file containing all callsigns listed in the "Logbook of The World" (LOTW), and ran it through WIN-EQF to find out the number of countries that were available and missing in the LoTW. He reported that there were 273 countries presently within the LoTW. Since then, OPDX readers have provided updates to this list and the count now is 281. The following countries are not available: 1A, 3CO, 3D2/C, 3XA, 3Y/B, 3Y/P, 4U1UN, 5A, 5N, 7O, 7P, 7X, 9J, 9Q, 9U, C31, C9, E3, EK, EP, EZ, FO/M, FR/G, HK0/MALPELLO, HV, J5, KH5, KH5K, KH7K, KP1, KP5, OD, R1F, ST, SU, T9, TL, TN, TT, VK0/M, VK9L, VP8/SO, VU4, VU7, XF4, YK, Z3, ZK3, ZL8, and ZL9.

SV9, CRETE. Stephan, DK3TNA, will be active as SV9/DK3TNA from September 30th to October 12th. Activity will be on 80-10 meters SSB. QSL via his home callsign, by the bureau (preferred) or direct (QRZ.com).

TO5 & TX5, REUNION ISLAND AND MAYOTTE (Update to OPDX.726). Serge, F6AML, is scheduled to be active as TO5R from Reunion Island, September 27th through October 23rd. During his short trip to Mayotte, from October 10-14th, he will be active as TX5M. Activity will be on 40-10 meters CW/SSB. See OPDX.726 for suggested frequencies. QSL both operations via F6AML, either direct or via the French REF-Bureau.

TO5, GUADELOUPE (IOTA Op). Operators Jacques/F1BCS, Jean-Marc/F1HDI, Gilles/F5JBE, Patrick/F6CMH, Olivier/F6EIE, Daniel/F6EPD, Irenee/F6GAL and Yves/F6JMV will be active as TO5S from Les Saintes Island (NA-114), November 2-10th. Activity will be on 160-6 meters, CW, SSB, SSTV and PSK31. QSL via F1BCS: Jacques Salomon, 15 rue de La Garenne, F-94440 - Villecresnes, France.

TZ, MALI. Ned, AA7A, plans to be active on 6 meters as part of the TZ5A VooDoo Contest Group CQWW DX CW Contest operations between November

25-29th. He will use the TZ5A callsign on 6 meters. QSL via G3SXW, direct or bureau.

Hmm, so your saying they empty the Jails and let the criminals out....
bloody stupid idea that. Why didnt they just send an armoured bus to take
them to another Jail.... now they are going to be free for more
crimespree's. Absolutely bonkers....

Hi,

(This is reply to both of your messages, along with a reply to others in this thread as well.)

Apologies for not getting back to this thread until now. I had something come up that kept me busy all weekend, and it looks like it will continue to do so until early next week. :/

I did read all the replies though and all were very helpful. That link you gave for the PDF will be very helpful as well. I've only had time to briefly skim over it, but look forward to reading it in detail as I'm not familiar with propagation through water at all.

The laser idea is pretty cool. (Wonder if IR would work at all, have to look that up later.) From googling, found some other folks that put together some homebrew robotic projects and had various levels of success using DTMF. They were using generators/decoders just for simple commands, but got an idea in my head brewing on how to turn sequences into characters (with even some rudimentary CRC), and not requiring any computer coding at all.

As for a license, unfornutely I don't have one (yet). I do have experience with commercial and military communications though (mainly SHF, tactical and fixed SATCOM, LOS/Troposcatter microwave, etc) on both the radio side (converters, synths, amps, filters, antennas, ect) and data side (muxes, modems, ect). Planning, when time avails, to go to a local ham radio meeting and getting involved with the hobby.

Cheers!
-Eric

I'm sorry...but I just can't resist here.....Toad claims to have been born in 1968 was it? And now he claims to be going to college, and don't seem to have a problem with living with his parents....Let's see now....that makes him....37....THIRTY SEVEN YEARS OLD.

Uh......at that age....

1. Why are you still in college?

2. Why do you still live with your parents

3. Just exactly what are you learning in community college Toad?

Just curious.

And please stop the juvenile pre-high school silliness and language, if you can.

Dan/W4NTI

I have decided to start a new net....I pick 14.321. I will be replaying ARRL bulletins and information from RAIN. Then claim it as original. I will also be using a prompt from Walter Cronkike, even tho his lawyers asked me to stop.

Then if anyone interferes with me I will send out "Felony affidavits".

What you think Toad? Looks like your future to me.

In article <jsudnRXfHKIyp6neRVn-pA@rogers.com>, larry <larya@rogers.com> wrote:

| First.. what are the ratings of the battery ...

The HTX-202 I have had a 6 cell AA 500 mAh NiCd pack, which was long since dead when I got it. (I then rebuilt it with 1800 mAh NiMH cells and it works quite nicely.)

That's the stock pack. I don't know about your other pack.

| I have a commercial analyzer so rejuvenating them should not be too much
| trouble...

Depends on what the problem is. At some point the batteries won't come back, no matter how many cycles you attempt.

Also, if you're on a budget, one of the R/C charger/cyclers will work very nicely for around $100. And you can go much cheaper than that if you're willing to improvise ...

| Second.. are the two battery packs opennable?...

Yes.

Actually, most battery packs are openable. The question is how much prying and cutting you'll have to do to get it open :)

(In this case, a simple screwdriver will do it. At least it did with mine, if I recall correctly.)

| I found the manual on a zip file and will soon start to read it....

Yeah, Radio Shack has most of their manuals online.

| Third... there is no antenna..

No biggie. It's a 144-148 mHz radio, so any antenna made for that band with a BNC connector will work fine. You can even make your own easily enough by soldering a 1/2 meter wire onto a BNC plug.

Har. I have no idea what either of those did, but the second
reminds me of my first job. Our direct boss was as much of a nervous
narvus as I've ever seen. The office, in the early 60s, was wired with
an arrangement whereby his boss could call any one of my boss' four
peers into his office using a buzzer to each of their desks.

We found we could poke a pin into the right cable against the
wall and frequently set his buzzer off. Then he'd go into his boss'
office and get chewed out for being an idiot for showing up when he
hadn't been called.

We also found out that if you leaned back hard enough in one
of the office chairs, it made nearly the same sound.

I suspect the guy could have lived a few extra years if he
didn't have the four of us as his temporary summer messengers a couple
of years running.

^^

Toadie blathers, "with" irony.

> don't understand that if you want to make it in this world you need a
> education, and not just a high school education.

Dan has already "made it" in this world, stupid.

> >2. Why do you still live with your parents
>
> Well first off a lot of people in this area still live at home.

Only losers like you, Toadie.

> but to anwer

What's "anwer"????? Better take a remedial English course, Toadie.

> your question my parents are retiring a few more years and plan
> to move up north, while I will be given the house, it kind of like a
> inheritance.

Toadie is leeching off them until they croak or are in the nursing home
and he gets the house.

> As I stated before I very seldom see my parents i live on
> the fourth floor while they occupy the second.

Oh, is the basement considered the "fourth floor", Toadie? I'd stay two
stories away from an idiot like you if I were your parents, too.

> >3. Just exactly what are you learning in community college Toad?
>
> I was going to study physics but I've been really looking into going

What learning disability is that Toad? Just because you have one, does not
mean I do.

>>2. Why do you still live with your parents

Now why does that not surprise me? Liberal arts. What a deal.

You would make a great lawyer Toad. Especially when the law clerk laughed
at you every time you submitted a "paper". Get a spell checker, it will

help your credibility.

I've learned a lot from you Toad. Mainly how I thank God I didn't grow up
like you.

Dan/W4NTI

1329. yaesu fnb-1 battery pack..

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-27 17:01:54 UTC
From: larry <larya@rogers.com>
Message-ID: <B5ydnbwrgNMV5qTeRVn-2g@rogers.com>
Source record: 49333

Again please excuse me for using amateur.misc but my amateur.equipment
doesn't show up....
A ham friend of mine, this morning, gave me his yeasu battery pack to see if
I could revitalize it. This fellow also has quite a bit of negative
feelings toward nicad batteries in general.. but that is another subject...
Anyways.. Would someone please tell me where the fnb-1 battery pack is
used.. I am not familiar with yaesu (including, probably, how to spell
yaesu... a little bad humour.. sorry)..

Hi,
Is there some way to lookup a GMRS call sign by registered zipcode?
I've found out how to do it by state via the FCC website, but that gives
a HUGE list... is there anyway to narrow it down to zipcode? So far
I've been non-successful in finding a way.

No dan, but I will talking about this weekend on my show and how people like you and your little bitches on here don't need to be amateur radio operators. I will also be talking about the CC&R rules congress is trying to pass and how if amateurs treat other amateurs like shit they really don't deserve that bill.

Yes. Same way you searched by state. Instead of selecting state, just
enter a ZIPcode, and you are set.

So if someone disagrees with you then they should be prevented from
being an amateur radio operator. Sounds like that denying of freedom of
speech you keep yapping about. You really are a turd.

Pencuniary Interest pt 2. The ARRL at it again

Why doesn't the fucking FCC go after them?? it seems to me that the ARRL and the Fascist Communication Commission (FCC) are butt buddies or at lease giving each other knob jobs. If Glenn Baxter is to fined by the FCC, then they should fine the ARRL, but hey the FASCIST COMMUNICATION COMMISSION (FCC)are giving the ASSHOLE RADIO RELAY LEAGUE (ARRL) are butt buddies.

Federal Grant Augments "Ham Aid" Fund for Hurricane Volunteers

NEWINGTON, CT, Sep 27, 2005--The Corporation for National and Community Service (CNCS) will provide the ARRL with an additional $77,000 to support Amateur Radio operators volunteering in the field in the aftermath of Hurricane Katrina. The latest grant augments the recent $100,000 CNCS made available immediately following the Katrina disaster. The grant money, supplemented by contributions from individual donors, will subsidize "Ham Aid," a new League program to help defray out-of pocket expenses of Amateur Radio volunteers deployed in the field in disaster-stricken areas.

"The new funding of $77,000--added to the initial $100,000 award, for a total of $177,000--is gratefully accepted to assist ham radio operators who have incurred expenses related to their volunteer service," said ARRL Chief Development Officer Mary Hobart, K1MMH. "The per-diem awards of $25 per day up to a maximum award of four days, or $100 per person, will cover approximately 6000 'ham days' of service."

Ham Aid also will strengthen the role Amateur Radio can play in disaster response by funding the preparation of containerized complete Amateur Radio HF/VHF stations complete with radios, antennas, feed lines, repeaters and more, Hobart added. These are designed for deployment to disaster areas where the Amateur Radio infrastructure has been compromised or additional equipment is required beyond what's available.

Hobart says Ham Aid marks the first time in ARRL history that the League has been able to reimburse some of the expenses ham radio volunteers incur while responding to a disaster--especially if the service requires out-of-town travel. The ARRL established Ham Aid reimbursement procedures following the initial grant.

In addition to providing emergency communication within and outside hurricane-affected areas, Amateur Radio Emergency Service (ARES)/Radio Amateur Civil Emergency Service (RACES) members and individual radio amateurs have supplementing the communication needs of emergency management and relief agencies, including the American Red Cross and The Salvation Army.

The CNCS Ham Aid grant is effective for operations established and documented as of September 1, 2005, and the aid is earmarked for Hurricane Katrina deployments only at this point. Corporation funds may also sustain the Ham Aid program and help to rebuild the emergency communications capabilities in Louisiana, Mississippi and Alabama to ensure that the Gulf Coast is prepared, should disaster strike again.

The CNCS grants represent an emergency amendment to ARRL's three year Homeland Security training grant, which provided certification in emergency communication protocols to nearly 5500 Amateur Radio volunteer over the past three years. Hobart pointed out that CNCS helped make it possible for the League to train Amateur Radio volunteers. "Now they are making it possible for the hams to use that training," she added.

The recent grant extensions do not cover additional ARRL Amateur Radio Emergency Communications training program reimbursements, however.

Hobart says the League will accept reimbursement request applications on a first-come, first served basis for as long as funds are available. For now, the program only covers per-diem reimbursements between September 1 and December 31, 2005. The period may be extended based on the availability of funds.

Hams seeking expense reimbursement must complete an on-line application form with the required information. The Section Manager or Section Emergency Coordinator on site during the radio operator's service in the field will verify dates of service and e-mail the validated electronic forms to ARRL Headquarters.

Dan/W4NTI

1348. God's plan of salvation for YOU

Newsgroup: rec.radio.amateur.misc
Date: 2005-09-28 17:30:02 UTC
From: SP <salvationsplan.com>
Message-ID: <b4fb7$433ad31b$4275f2f2$23134@FUSE.NET>
Source record: 49252

God has a plan of salvation for all mankind. This gift is freely given.

God's plan of salvation for YOU
http://www.salvationsplan.com/

God's Plan of Salvation is simple, and it is available to everyone. It does not matter who you are, young or old, man or woman, rich or poor ... this gift of God is freely given to all people. What must you do to receive it?

According to God's plan of salvation, revealed in the Bible, there is only one way to be saved and go to Heaven. That way does not include belonging to any particular church or club or doing good deeds. Jesus said in John 3:7 that in order to go to Heaven, "Ye must be born again."

First, you must realize you are a sinner. "For all have sinned, and come short of the glory of God" (Romans 3:23).

Second, realize that you are a sinner, and because of your sin you are condemned to death and an eternal existence in hell away from God. "For the wages [payment] of sin is death" (Romans 6:23).

Third, Jesus took your sin, punishment and death upon himself. In John 3:16, we read, "For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life." Also, Romans 5:8 tells us, " ... God commendeth His love toward us, in that, while we were yet sinners, Christ died for us."

The Bible says to believe and call on the Lord:

" ... Believe on the Lord Jesus Christ, and thou shalt be saved ..." (Acts 16:30-31).

"But as many as received Him, to them gave He power to become the sons of God, even to them that believe on His name." (John 1:12).

"For whosoever shall call upon the name of the Lord shall be saved." (Romans 10:13).

"Whosoever" means anyone. Anyone desiring to be saved, can be saved.

Anyone can be saved if they:

Realize they are sinners and on their own they are doomed to death and hell.

Turn from their own way to God's way (repent) and accept Jesus' shed blood as the payment for their sins by calling on Him to save you.

The Bible says to believe on the Lord Jesus Christ (sinless life, death and resurrection) and with repentance in your heart call on His name and He will save you.

God's plan of salvation is a simple plan because Jesus has done everything for us. Believe on Him and call on Him to save you, and you will be saved!

Hello,

This isn't strictly a Ham radio question. So, I'll apologize up front.

A couple of years ago I picked up a CC AM Radio by Sangean. I love it. Its a blast, especially at night, to try to pick up distant signals. However, you can only play with it so much. It has an antenna screw on the back. I've tried wiring in a piece of copper wire that looped around my hous in an 'L' shape. That was fun, but it was also like bringing in the world. I got alot of wierd signals (blurps and screaches and 'dots') that I couldn't make heads or tails of. Also, when the first thunderstorm came around I will admit to being a bit freaked out by having a piece of copper wire hanging out the window. I have heard from some Ham's that you can 'tune' an antenna, by length (?), to get in certain stations, and that you can set something up to trick a radio to think that a fixed length antenna is varying lengths.

So, to the web I went. And then I came here to usenet because frankly there was *alot* of stuff, and I found alot of it very confusing.

So I am wondering if someone could lead me on the trail of some doc that would help out. Do I need basic antenna theory? Is there something easy to learn? Or can I find a diagram of something I can build and jump right to that?

Any help would be appreciated, and again I apologize if this isn't strictly a ham question. I am leaning that way, the fun I'm having with this. Its just a bit daunting.

Thanks!

Jim

I don't see the problem with the ARRL getting this grant money--so long as it is distributed to those who are involved in Rita or Katrina disaster. I would also expect the ARRL to keep back a fair amount for administrative and distribution expenses. This is typical practice in the private aid and contribution business.

Certainly, the FCC would not view this as a "pecuniary interest" as described in Part 97.

Please, N9OGL, refrain from the use of such emotion and vulgarity in your stated opinions. It really is offensive and detracts from your credibility. The poor grammar doesn't help either.

Hi Jim

Yes it can get quite daunting.

I guess you could immerse yourself in antenna theory but that may not necessarily help. What you are trying to achieve is a) get enough signal so that you can hear the stations and b) reduce the noise/interference from undesired sources. Tuning is something you tend to do more for transmitting because although a strong receive signal looks good on a meter, what is more important is how much stronger than it is to the noise. The idea of transmitting antenna tuning is to get maximum power transfer from the radio to the antenna. Not an issue in your case. If you are wandering across the shortwave and broadcast bands it is also very fiddly having to tune where you go!

Antennas can also be cut to specific lengths to receive radiation from particular directions. The problem here is that since you are listening to various frequencies the length varies in inverse proportions to it. What you cut the antenna for may have undesirable results elsewhere!

Not being much help am I? Here are some thoughts anyway.

- A high and clear a antenna is probably a good compromise. In my experience horizontal antennas yield less noise than vertical ones.

- The radio should also have a ground connection that you should make to a buried earth stake. Dont rely on mains earthing as that can induce noise onto the signal.

- If the radio has side by side antenna terminals you may wish to use open feeder (eg TV ribbon) to get away from the house electrical noises before it joins to the antenna wire. The idea is that this ribbon wont pickup any noise source it goes past. (eg fluoro's)

- If you are serious about receiving specific stations you can design antennas for just that frequency.

- If it was my interest I'd probably put up a magloop with remote tuning. From what I have read this seems to produce high signal to noise ratio performance.

- Disconnect the antenna during storms. The electrical pulses can damage/destroy your radio.

Now even more confused?

Cheers Bob VK2YQA

To K1DUDE, an FCC rule is something to be avoided and worked around at all costs. He has spent considerable thought and money resource on fighting the FCC to get his way. If he had that same passion about complying with the rules, I'm sure he could work with the FCC and still accomplish what he wants.

It is to late for him now. K1DUDE is the type of person that draws negative attention to this wonderful hobby. We need more positive examples if this hobby is to survive. I just think that, at some point, the FCC will give into the cellular, BPS, and other special interest groups and scrap the whole amateur program. Then where would be?

Source record: 49277

Email yesterday:

C'mon over to 3.890 on October 17th for the 1st Annual Pig Roast and JOTA Without K1MAN!

Baxter ruined Boy Scouts chances to talk to a lot of hams last year after his crap-cast interfered with Jamboree on the Air Stations in Canada and the United States.

This year we're going to celebrate the expiration of K1MAN's ham license with this memorial "Pig Roast."

So get ready to work some Scouts, and bring your favorite stories about the little ham from Belgrade Lakes. Stop by 3.890 starting at sundown on October 17th. This is one Pig Roast you won't want to miss!!

Y'all come back now, y'hear?

The rule regarding pecuniary interest states that it can't be direct or indirect. What the ARRL is doing is indirect pecuniary interest and is a violation of the FCC rules.

Why do you have such a hard-on for the ARRL?

There are problem children all over as can be seen by the published
enforcement notices, but all you carp about is the ARRL. Why? Did they
kill your dog or something?

Actually, the very fact that you include an ad for a "show" on 20
meters tells me you're one of the problem children (show=broadcasting,
which is a violation of the FCC rules.). Why don't you clean up your
act first and then you can think about going after some larger fry.

It's always good to see bullies get their just desserts...

Most of you have heard of the Peter Trapp computer shows. You may also recall some of the policies Mr. Trapp insisted on when staging these shows. One such policy was requiring facilities to not have any other events within a 45-day period in which computer hardware or software were sold. This affected a few hamfests that were held at the same facilities. The Peter Trapp people threatened to pull the plug on their shows if any other such event was held within that time period. (A rather lengthy discussion of this topic occurred on the amateur radio newsgroups during the Spring of '97. Use Google to read some of the posts)

These shows drew huge crowds throughout the 1990's, but attendance began to drop off about five years ago. Last year, shows were canceled and no dates were given for future shows. E-mails that I sent went un-answered. Today, after several months of not visiting the Peter Trapp web site, I redirected to a search engine when I entered the URL.

The quality of the shows had fallen off the last time I went to one, which was over a year ago. I have to say the same about hamfests, but they are still around, and will be for some time. I noticed, too, that vendors seemed to be more aggressive towards people who just want to peruse the wares that wear offered for sale. You'd think people would learn that it's a turn-off when you have someone gets in your face and gets too damn pushy when trying to make a sale.

As far as the shows themselves, it's good to see that the online world presented a form of competition to Peter Trapp that he couldn't bully into submission. Good riddance...

FS: ALPHA 87 A HF AMPLIFIER
This amp is in excellant condition. It is 3-4 yrs old. It has the Alpha Max & remote updates. Software for computer is included. This amp has a new pair of 3CPX800A7 Military/Medical grade tubes installed. It also comes with a spare set of like new 3CX800A7 tubes. Full output also. Includes manual, software, orig carton. NON SMOKING shack. $5000.00 PLUS SHIPPING & INSURANCE. I WOULD PREFER PICKUP IN MADISON, WI.

You should advertise for this company in a more applicable group. This
group is for the express purpose of discussing amateur radio policy,
especially morse code policy. Thank you for your concern.

I thought I might share a couple of observations I've made regarding the Amateur Service; the situation in other locations may differ.

Based upon my adventures last year in Florida when we got pounded by three hurricanes I was interested in finding out the utility of my Ham two meter transceiver by taking advantage of Field Day (simulated emergency test) in June. I raised a collinear with an advertised gain of 7 dB to thirty feet and powered my transceiver with a deep cycle battery. Operating on the 'National Simplex Calling Frequency' 146.52 MHz with 75 watts output power I attempted to find out how many stations I could contact and the extent of my operating range during the test. From my numerous calls I was able to contact NO ONE! Not one person responded to my Field Day calls throughout the day and I heard NO ONE calling Field Day! Not one Ham could I find operating Field Day on the two meter National Simplex Calling Frequency! Yet to my surprise, I was able to consistently 'key-up' repeaters from Jacksonville to Palm Bay---approximately 2/3's the length of the state of Florida. And to consider, this is an amateur service simulated emergency test in Florida occurring only 10 months after the destruction of Charley, Frances, and Jeanne. It made me wonder just how interested Hams are in emergency communications. I did have a nice conversation with a fellow 100 miles away via his repeater.

With regard to the Alaskan Emergency Frequency of 5167.5 kHz. As the FCC recently granted amateurs five channels in the HF (60 meter) band: 5332, 5348, 5368, 5373, and 5405 kHz, it would seem to me that the ARRL would have taken an interest and evaluate those frequencies for channelized emergency operations. The frequencies between the 75 and 40 meters bands might offer propagation characteristics of both bands and make those channels particularly useful for short and long haul message handling.
Furthermore, the Alaskan Emergency Frequency channel might be added to the new assignment for emergency use in the lower 48. Ideally, the 60 meter amateur band might become an important part of an emergency response provided by the amateur service. But, I just don't see any interest by the ARRL and those frequencies, every time I check them, remain unused.
A citation from the ARRL's Petition for Rule Making to the FCC concluded, in part, "An Amateur Allocation in this band (60 meters) would improve the Amateur Service's already exemplary record of providing emergency
communications during natural disasters when even modern communications systems typically fail." Perhaps the ARRL may take a break from their publishing activities someday and investigate its possibilities.

Additionally, its odd about the amateur service that proclaims itself to be devoted to emergency service but dropped its distress frequencies. Until

the 1960's the ARRL had specific calling frequencies reserved for distress and safety in the HF bands for radiotelephone and radiotelegraphy. These frequencies were regularly printed in its journal 'QST'. I haven't found out why the ARRL dropped them. Its beyon my comprehension that a communications service, world wide in extent, that doesn't assign frequencies,
routinely monitored, for distress signaling and calling. Similarly, some years ago,
a manufacturer hardly wanted to discuss the necessary modifications of my transceiver so I could access the, FCC authorized, 5167.5 kHz amateur service Alaskan Emergency Frequency. It was only through the force of my professional credentials did they finally agree and sent me the service note I required. I like to point out that until recently, as far as I know, Yaesu, (FT-857 and FT-817 for example) is the first amateur equipment manufacturer to provide amateur equipment capable of accessing the Alaskan Emergency Frequency without equipment modification. If the amateur service is so concerned with emergency communications why did it take so long for this to occur?

After nearly forty years as an amateur radio operator, these are some of the issues that make me reconsider the utility of the amateur service as an emergency communications provider . Although the amateur service has played a significant role in handling emergency communications in the past, the changing face of technology has relegated the amateur service to a position of little consequence---possibility, with better leadership, the amateur service can regain its former stature.

I sincerely think, that with the devastation of Charley, Frances and Jeanne last year, and Katrina this year, the ARRL really needs to get off their ass and come up with a serious emergency communications plan. I suspect that the ARRL is a 'has been' organization and a new vision for amateur radio (emergency communications) needs to take their place.

ok, so you don't know about the modern field day. today field day is not
about emergency communications, its a time to get out in the woods, drink
some beers, tell war stories, and maybe make some contacts... since vhf
isn't a place to make lots of contacts most field day operations are on hf.

ok, so you aren't checking them at the right time. they are used, though
lightly since many radios need modifications, lots of people don't have
antennas for them, and the channelized requirements are rather odd so lots
of people aren't really interested in them... especially since there are no
operating events, contests, awards, or other reason to be there if you
aren't interested in propagation exploration.

> A citation from the ARRL's Petition for Rule Making to the FCC

yeah, yeah, what else did you expect them to say? thats probably
boilerplate they put on every memo they send to washington or gettysburg.

> Additionally, its odd about the amateur service that proclaims itself to
> be
> devoted to emergency service but dropped its distress frequencies. Until

this might be nice to have, but then again there are so many frequencies
claimed by so many different nets and organizations that finding some place

to do this would be a real pain. then it would end up being a constant battle between those who want to keep it clear and those who want to use any clear frequency they can find. emergency frequencies are easily proclaimed for short periods by the fcc and as seen in recent hurricane operations they are relatively well respected world wide and very well utilized.

> out why the ARRL dropped them. Its beyon my comprehension that a
> communications service, world wide in extent, that doesn't assign
> frequencies,

the arrl is not a communications service. they are a membership body, if the members aren't interested it won't get done. world wide allocation of frequencies would have to be done via the iaru and then would only have the force of a recommendation on each of the member countries since each one has its own regulatory body like the fcc who may or maynot add the force of law to such recommendations.

> transceiver so I could access the, FCC authorized, 5167.5 kHz amateur
> service Alaskan Emergency Frequency. It was only through the force of my

i thought you were in florida? anyway, mods for most radios can be found easily on-line these days. and for radios like the ft-1000mp its just a matter of pressing a few secret button combinations and you can transmit anywhere, right out of the box you could receive anywhere anyway so you could monitor those frequencies.

> Although the amateur service has
> played a significant role in handling emergency communications in the
> past,
> the changing face of technology has relegated the amateur service to

> the amateur service can regain its former stature.

then why are they now recruiting for relief operators to go in to the katrina and rita areas to continue operating with fema and other agencies? if we were of so little use why do they still want our help? and apparently will want it for a while yet in just that area??

>
> I sincerely think, that with the devastation of Charley, Frances and

Well FM on 2, 6 or 10m is not used for Field Day, I don't know why but its
not,

However if you had gone to 2M SSB you would of had better luck.
In North Texas we usually work just over 100 stations on 2 quite a few more on 6m.
In fact 6m was open most of field day and we worked most of the USA that
day.

Over all the years going to field day I can only remember working 1
station on 146.52 on field day and that was a accident as we were using it
as a local calling channel and happened to hear another Field Day group
doing the same thing some 300 miles away.

yea... your are right---poor leadership and vision. The simulated emergency
is not a simulated emergency test but more of a sales opportunity for ARRL
pins and tee-shirts. HOW ABOUT AN FD IN WINTER?

>

yea... a screwed up mess---amateur radio. If I needed to pass distress I'd
go military/commercial instead of trying to convince a bunch of knob
twisters that I am legit traffic.

yea... besides hobby lobby radio I worked global communications for numerous
military/commercial telecommunications circuits at locations thoughout the
world. Yea... no internet back then, picked up new rig and headed
overseas---needed info not BS.

yea... last I heard FEMA was phasing them out and besides, what took the
ARRL so long to respond (many comments). Furthermore, what was the state of
affairs of comms in NO---hams said practically everything was down.

>

I'm trying to raise and interest outside of 'normal' channels---SEC's
haven't shown any initiative---can't get out of their wheelchairs.

Isn't this a poor way of responding to a post? Thanks Dave for your comments though.

Howdy Korbin:

Back decades ago it was not uncommon to operate FD on 2 meters---only simplex exchanges are allowed (we let the novice operators use the club call). Of course, back in the 1970's and 80's there was much more 2 meter activity than now.

I couldn't think of a better frequency that the 'National Simplex Calling Frequency' to make my FD calls on. As you suggest, 2 meter SSB might have proven better but I was interested in common FM (base/portable/mobile) operation.

From the ARRL website:

[snip]
Field Day 2005 Rules

2. Object: To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and in doing so to learn to operate in abnormal situations in less than optimal conditions. A premium is placed on developing skills to meet the challenges of emergency preparedness as well as to acquaint the general public with the capabilities of Amateur Radio.

You should advertise for this company in a more applicable group. This
group is for the express purpose of discussing amateur radio policy,
especially morse code policy. Thank you for your concern.
******** AA2QA's reply seperator *********
What you do not seem to realize is that the folks that actually learned
something (before the multiple guess answers came out), just might have a
few skills.

These are usually folks that have a genuine interest in how things work, not
how to turn a knob or push a button or keys. This isn't to say that folks
that simply wish to talk are not welcome; they certainly are.

Although I do not possess a college degree, I am a certified electronics
technician. I have repaired two-way radios (business and trunking radios).
I have done a lot of electrical control and power wiring. I have not worked
in high voltage, but have done a fair amount of 277/480 3 phase work. I've
climbed atop silos and repaired bag houses. Welded, soldered, cut, run
milling machines, surface grinders, lathes, and more. If a saws-all can't
do the job readily, the oxy-acetylene tourch will handle it well for me
(hmmmm ... wonder how that would solder pl-259s? LOL). Done EMC compliance
studies along with UL compliance. Come to think of it, ozone compliance.
Can you spell exponential decay? Come to think of it, I've programmed
slc-500s, Texas Instruments PLCs, Modicon PLCs, and more (including data
highways and ethernet). Even written a program to generate ladders from
simply inputting I/O assignments and letting the program know what I want to
have happen. Under 15 minutes to properly program 3 cells. Another 5
minutes to debug because someone wired a switch backwards (normally closed
rather than normally open).

The nice thing about amateur radio is that it encompasses a whole spectrum
of individuals, unlike most trade magazines. To me, advertising in an
amateur publication such as QST would make a lot of sense, especially if you

are trying to locate a number of different skills (rather than a number of ads in different magazines or newspapers).

As to Morse, it can be fun. If we had difficulty with it back when (for me, 1962), we learned to overcome that difficulty (not a bad thing to learn, in my humble opinion). Come to think of it, as much grief as it gave me (when memorizing dots and dashes), once I learned it by sound, I enjoyed it and by 1967 had perfect copy at 40 words per minute in the U.S. Navy. More than 40? I don't know; that was the fastest test they had back then. I would have had difficulty much beyond that as we were banging away with manual typewriters then. I might have (possibly) made 50 at most. Disclaimer - that would be perfect typewritten copy filling close to a whole page of paper. A few errors would have allowed me considerably faster copy. Then. (LOL)

I'd suggest rethinking your position.

Best regards from Rochester, NY
Jim AA2QA

Come on! My background check turned up perfectly clean. A drivers license check on me also turned up perfectly clean. And I'm 58! And managed to get a decent job that pays considerably better than Kodak did.

Just don't ask for a sanity test or I just might be toast! :)))

Then again, perhaps that is why I was hired; I was as crazy as the rest of the gang at Sentry Safe LOL.

I do have to admit that after 5 weeks, it is a great company to be working for. A lot of crazies, but nice crazies LOL

How many hams do you think are going to be on two meters?

Knowing the propagation characteristics of two meters, do you
extrapolate how many hams are on two meters across the nation?

hint: there *are* some, but not very many. If you think about it a bit,
you will come up with the reasons why.

> With regard to the Alaskan Emergency Frequency of 5167.5 kHz. As the FCC

Why the ARRL? Go straight to the FCC with your idea. They are the ones
who are calling the shots.

> Additionally, its odd about the amateur service that proclaims itself to be

> routinely monitored, for distress signaling and calling.

Whenever there is an emergency, frequencies *are* designated for
emergency handling net purposes.

And as for a full time designated frequency, it isn't needed. Is there
a good reason why a person should call on a frequency where no one might
be listening. If I have an emergency and need to get hold of someone,
I'm going to go to some frequency where I can hear someone already.

Of course, we *could* always use CB channel 9! ;^)

I don't think it works that way any more. Volunteer amateurs were kept
out of the affected areas, at least for Katrina. In the system as it is
set up now, we aren't anywhere near calling the shots. Unfortunately
those who have been are perhaps not doing a very good job themselves.

It ain't the ARRL's fault

On 9/18/05 I made a purchase from the website of N5ZTW, William D. Ellis of Dripping Springs, TX. As of today 10/1/05 I have not received the FT-847 Interface which I paid nearly $70 for. I have sent Mr. Ellis 3 emails, all went unanswered. Iï¿½ve made two phone calls to Mr. Ellisiï¿½ residence, no answers.

The only saving grace was that I paid with PayPal. A complaint has been filed with PayPal so I will be getting back my money after PayPalï¿½s 10 day investigation has completed.

Before making any purchase from Mr. Ellisiï¿½ website (N5ZTW) please use extreme caution.

Itï¿½s a shame that a fellow ham would take another hamï¿½s money and not ship, refund, or even communicate with his fellow ham.
